RULE 17. RECORDS OF HEARINGS

An accurate stenographic record shall be kept of all testimony taken at a public hearing. Witnesses may, in the presence of a member of the Committee staff and at reasonable times in the office of the Committee, examine the transcript of his own testimony and may make suggestions to the staff to correct grammatical or technical changes as will not substantially alter the record of the testimony. In instances where the witness is from out of town, and where it will contribute to a more complete record and/or expedite the printing of the hearing, the appropriate portion of the transcript may be transmitted to the witness by the staff for correction and immediate return. Members shall correct their own testimony and return transcripts as soon as possible after receipt thereof. The Chairman may order the printing of the hearing without the corrections of a witness or Member if he determines that such Member or witness has been afforded a reasonable time to make such corrections and that further delay would impede the consideration of the legislative action which is the subject of the hearing. Witnesses appearing in public hearings, or submitting a statement for the record of a public hearing, or submitting a written comment in response to a request for comments by the Committee from the interested public, must provide the Committee with a list of any clients of that witness (or the firm or association he represents) at whose behest or in whose employ the witness appears. This list shall be retained in the Committee's files and shall be made public unless otherwise directed by the Committee. As to public hearings within the United States, verbal testimony and statements for the record, or written comment in response to a request for comments by the Committee, will be accepted only from citizens of the United States or corporations or associations organized under the laws of one of the 50 States of the United States or the District of Columbia, unless otherwise directed by the Committee or subcommittee involved. Written statements from noncitizens may be considered for acceptance if transmitted through Members of Congress.

RULE 18. TRANSCRIPTS OF OTHER COMMITTEE MEETINGS

An accurate stenographic record shall also be kept of all markup and other meetings of the Committee, whether they be open or closed to the public. This record, marked as "uncorrected," shall be available for inspection by Members of the House, or members of the Committee together with their staffs, at reasonable times and places. This record shall not be published or made public in any way except by a majority vote of the Committee. Before any public release of the uncorrected record, Members must be given a reasonable opportunity to correct their remarks. In instances in which a stenographic record is kept of a conference committee proceeding, all of the requirements of this rule will likewise be observed with respect to such record.

RULE 19. BROADCASTING OF COMMITTEE OR SUBCOMMITTEE HEARINGS

The provisions of House Rule XI3(f) are by reference specifically made a part of these rules.

RULE 20. PARTY RATIO

The ratio of Democrats to Republicans on any subcommittee of the Committee shall be not less than two Democrats plus one to each Republican including ex-officio members. In recommending to the Speaker members of conference committees, the same ratio shall apply.

RULE 21. PROXY VOTING

Voting by proxy shall be permitted in accordance with the manner prescribed in House Rule XI2(f).

RULE 22. TRAVEL OF MEMBERS AND STAFF

(a) Consistent with the primary expense resolution and such additional expense resolution as may have been approved, the provisions of this rule shall govern travel of Committee members and staff. Travel to be reimbursed from funds set aside for the full Committee for any Member or any staff member shall be paid only upon the prior authorization of the Chairman. Travel may be authorized by the Chairman for any Member and any staff member in connection with the attendance of formal or informal hearings conducted by the Committee, its subcommittees, or any other committee or subcommittee of the Congress on matters relevant to the general jurisdiction of the Committee, and meetings, conferences and investigations which involve activities or subject matter relevant to the general jurisdiction of the Committee. Before such authorization is given there shall be submitted to the Chairman in writing the following:

(1) The purpose of the travel;

(2) The dates during which the travel is to be made and the date or dates of the event for which the travel is being made;

(3) The location of the event for which the travel is to be made;

(4) The names of Members and staff seeking authorization.

Where travel is in connection with the conduct by Members of the Committee of an informal hearing, the prior approval not only of the Chairman but also of subcommittee chairmen shall be required where the hearing involves any matter within the jurisdiction of one or more of the subcommittees of the Committee.

(b) In the case of travel of Members and staff of a subcommittee to hearings, meetings, conferences, and investigations involving activities or subject matter under the legislative assignment of such subcommittee to be paid for out of funds allocated to such subcommittee prior authorization must be obtained from the subcommittee chairman and the Chairman. Such prior authorization shall be given by the Chairman only upon the representation by the applicable chairman of the subcommittee in writing setting forth those items enumerated in (1), (2), (3), and (4) of paragraph (a).

(c) Within 60 days of the conclusion of any travel authorized under this rule, there shall be submitted to the Chariman a written report covering the information gained as a result of the study or investigation, or meeting, conference or hearing attended pursuant to such travel.

"CONSERVATION ENERGY: CHEAPER WARMTH"

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. OTTINGER. Mr. Speaker, the cheapest, swiftest, cleanest, and safest source of energy available to us for reduction of our energy dependence on OPEC is conservation energy.

All the high-technology answers being touted by the energy industry require gigantic amounts of capital—an estimated $1 trillion by the year 2000—will take 15 to 20 years to bring on line in commercial quantities and will involve high safety and environmental risks.

Conservation, on the other hand, is labor-intensive, rather than capital-intensive, and according to ERDA's own studies can save enough energy by 1985 to make us almost totally independent of imports. The ERDA national plan of April 1976 indicates potential savings of 25 percent of our energy consumption by 1985 by using the conservation option; this would very nearly equal our current imports.

It is for these reasons that I am so delighted that President Carter and his Energy Coordinator, James Schlesinger, are placing No. 1 priority on conservation in their comprehensive energy package to be submitted to Congress on April 20.

The following article by Jim Cubie, who has been working on energy matters for Ralph Nader's Public Citizen, and Roger Sant, who was FEA's Assistant Administrator for Conservation, appeared recently in the New York Times. It sets forth the conservation potential very ably and presents a proposal to achieve housing insulation via our utilities that is well worth our examination. I commend the Sant-Cubie article to the attention of my colleagues:

CHEAPER WARMTH

(By Roger Sant and Jim Cuble)

WASHINGTON.—The case for increasing energy conservation has been made repeatedly. Experts in and out of government agree that it costs about half as much to save a barrel of oil or the equivalent amount of electricity or natural gas as it does to produce similar amounts of new energy.

Implementing all proved money-saving energy-conservation investments in residences, commercial buildings and industrial plants could save the equivalent of 30 to 50 percent of the total expected energy demand for 1985.

The problem is that few such investments are actually taking place. Conservation these days is just another good idea, but not producing any results.

To change this situation, we make the following proposal:

Energy-conservation measures should be placed on an equal footing with energy-production investments. For electricity and gas, this means that the private utility would propose, and the public utility commission would agree, that every home, for example, in a given area should have storm windows and the equivalent of 12 inches of insulation in the attic as long as the cost of the insulation and storm windows is cheaper than the cost of new gas or electricity—as it clearly is now. The costs of implementing this program would be estimated on a per-kilowatt-hour or per-unit-of-natural-gas basis. This amount would be added to the utility bill of all energy consumers.

In the next five years, the local public utility would insulate every home in its service area to specifications accepted by the public utility commission. The insulation and storm windows would be as "free" as a new power plant—that is, no one would pay for it as it was put in.

The local utility, using contractors, would do the insulation work, just as it now changes electric or gas meters. In a given week, all the houses in a certain neighborhood would receive the insulation and storm windows. Any person who had already made these investments would receive a credit for the economic life of the investment.

The insulation and the storm windows would remain a part of the utility's rate base for a determined period of time or until they paid for themselves in energy savings. And since the utility would be buying in such large quantities, the cost per house would be much cheaper than if the home owner did the work. (There should be no offsetting labor-cost inflation because there is such a surplus of construction labor.) Similar examples can be given for industrial and commercial customers.

This approach to implementing energy-conservation investments clearly has significant advantages:

1. It is cheaper than building new nuclear or coal power plants or producing new natural gas.

2. It overcomes, without changing rates, the existing bias against energy-conservation investments.

Energy-conservation investments are now made only when the investment is cheaper than the average cost of new (expensive) and old (cheaper) energy.

But, new production investments are made in comparison only to other new (expensive) energy-production investments. This difference is crucial when you realize the average cost of energy is now roughly half the cost of new energy.

3. It is easier to implement than convincing millions of individuals that they should save energy, especially when they are not paying the full cost of new energy.

4. Reasonable estimates of how much energy will be saved can be made, and public-policy decisions based on them.

Now, why is it, with all these advantages, that this proposal is not now being carried out by our nation's utilities? The reasons appear to be conceptual rather than institutional, and could easily be overcome if we were to adopt three simple principles.

First, we must think of utilities as energy utilities, and not as electricity or natural-gas utilities. Second, we must understand that saving energy is just another form of energy production. Third, the energy utility should be required to propose to the local public utility commission the most economically efficient method of producing (or saving a given amount of energy and implementing the investment.

This proposal is obviously a very rough outline of a new notion. A number of details must be worked out, but there appears to be no serious legal or regulatory hurdles.

Certainly, if it is reasonable and feasible to build hundreds of expensive, and environmentally threatening, power plants, is it not also reasonable to finance and implement energy-conservation investments through the public-utility structure?

WESTCHESTER COUNTY, N.Y., MOVES TO OUST CON EDISON

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. OTTINGER. Mr. Speaker, I am pleased to observe that the county of Westchester in New York State, which I represent, has taken a very important initiative in meeting the electric power cost crisis which is afflicting so many of the metropolitan areas in our Nation today. I am bringing this initiative to the attention of my colleagues because I feel that it may be of great assistance to many of their constituents in providing a model of the kind of action that communities can take to improve power service and dramatically reduce costs.

Let me briefly explain the background. Westchester County has the misfortune to be served by the largest, richest, most unresponsive and least efficient public utility in the United States today: Consolidated Edison Co. In the past 16 years, the cost of 500 kilowatt-hours of power, the average amount of power consumed by Westchester's residents, has risen more than 200 percent, 120 percent ahead of the national average. New York State has the highest power costs of the contiguous States, but Con Edison's costs are half again as much as the average of those of the State.

NO END IN SIGHT

It has now become clear to citizens and power experts alike that the end is not in sight. Unless dramatic action is taken the residents of Westchester and, indeed, the residents of Metropolitan New York—most of whom also suffer under the burden of this ungainly giant's ineptitude, will be literally priced out of the power market.

Commercial service for 30 kilowatts of demand and 6,000 kilowatt-hours of service has gone from $165.12 nationally in 1960 to $285.86 at the present time. In the Con Edison area this has more than doubled in the same period, from $209.21 to $490.26. Industrial service has gone from $1,125 in 1960 to $2,348 at present in the Nation for 300 kilowatts of demand and 60,000 kilowatt-hours of service; for Con Edison users this has quadrupled in the same period, going from $1,206 16 years ago to a whopping $4,789 at present.

Con Edison claims, of course, that the

causes of its high costs are the fault of its customers. It blames these costs on its tax burden, which is high. It blames them on the fact that it has an underground distribution system, which is expensive to run. It blames them on the high cost of the fuel it is required to use to protect the public health, which is somewhat more expensive than fuel in some other areas. It blames them on the consumption pattern of its consumers which it created by aggressive and shortsighted promotional campaigns.

MOST EXPENSIVE POWER

The fact is that even if all of these factors were removed, Con Edison would still provide the most expensive power in the Nation, and given its present cumbersome, wasteful, and inept methods of operation, there is nothing that can be done to restrain the company from seeking further increases, much less reduce the cost of its power.

The citizens of Westchester, however, have discovered an option which can free them from this electrical incubus that threatens to destroy their economy and their quality of life. They can create a public utility service of their own, acquire cheap public power from State sources, augment this with low-cost power from other utilities, acquire the Con Edison distribution system, and rid themselves once and for all of Con Edison.

County Legislator Ronald Tocci, of New Rochelle, N.Y., has submitted to the county legislature a resolution which would accomplish this goal. It creates a system for providing utility service which is so well thoughtout, so balanced, and so much in the public interest that I believe it should be made available to all citizens who may be experiencing utility troubles similar to those suffered by Westchester.

MANY TOWNS SERVED

Con Edison and other opponents of the public interest have cried that this is a radical proposal that will somehow undermine the free enterprise system. They ignore the fact that 45 communities in the State of New York now operate municipal utilities providing public power to their citizens and do so at an average cost of $10.48; Con Edison charges $44.09 for the same amount of power.

Ah yes, they reply, but these are small municipalities. You cannot apply this principle to a county as large and as populous as Westchester. They ignore the fact that the city of Los Angeles, which is over nine times the size of Westchester and has over seven times as many residents, has long supplied its citizens with power from a municipal system and does so at a cost of only $16.49 for the same amount of power which costs $44.09 from Con Edison. They ignore the fact that the State of Nebraska which is over 125 times larger than Westchester and has nearly twice the county's population has long provided municipal power to its residents at costs ranging from less than one-sixth to slightly more than one-third the cost of Con Edison's power.

Clearly size, population, and population density are no barrier to efficient municipal power.

SHERRILL, N.Y., SAVES 35 PERCENT

Well, the opponents of this proposal respond, those are old, long-standing situations. You cannot make this kind of dramatic change today and still effect significant savings for your consumers, especially in New York State. They ignore the experience of the residents of the small city of Sherrill in northern New York State. This summer the citizens of Sherrill ousted the Niagara Mohawk Corp. as their power source and experienced immediate reductions of 35 percent in their monthly electric bills. Now I have been informed that they have so greatly improved the efficiency of their system that their power costs are down by 43 percent from the bills they were paying Niagara Mohawk and they have taken over the task of supplying low-cost power to the city's major industry, although they had to take Niagara Mohawk to court to do so.

The opponents claim that removing Con Edison from Westchester County would deprive the county and its municipalities of the substantial property and sales taxes that Con Edison pays. This is perfect nonsense. Under the present ratemaking system, Con Edison does not pay taxes, it just collects them and passes them on. Legislator Tocci's resolution provides an efficient answer: It would have the county's utility service make payments in lieu of taxes to all jurisdictions, just as almost all public power entities do, and would guarantee no loss in revenue.

Perhaps the most vicious distortion which opponents resort to is the claim that consumers would not want to subject themselves to the supposed ineptitude of politicians in operating so vital a service as a public utility. Westchester County is superbly run. It has a triple-A credit rating with the financial community—a credit rating vastly superior to Con Edison's. Recently, under the leadership of County Executive Alfred B. DelBello, the county floated a major bond issue at 5.14 percent, as compared to Con Edison's 9.125 percent rate for its last bond issue. In fact, one of the reasons that Westchester can run the system less expensively than Con Edison is because the financial community, which has had experience with both the county and the company, has so much more confidence in the stability of the county and therefore charges it less for capital investment funds.

CON EDISON LOSES PLANTS

As to ineptitude, consider this: Recently, Con Edison got iself into so much trouble that it had to ask the State of New York to bail it out by buying two major generating facilities that it had started to construct, but was unable to raise the funds to complete. This is a level of ineptitude that is unthinkable in the county of Westchester's government, especially under the prudent leadership of County Executive DelBello. The government of the county of Westchester does not pay its executives exorbitant salaries for inept performance as Con Edison does, and any official that even approached the level of inefficiency and arrogance that is Con Edison's normal daily practice, would be thrown out of office. On top of this, Legislator Tocci's resolution provides an ingenious commission mechanism to protect the public utility service from any transient vagaries of politics.

I commend this farsighted and well-thought-out proposal to the attention of my colleagues and the Nation. It provides a mechanism for significantly reducing costs, making public utility service responsive to the people, and for imposing the rational methods of conservation and innovation that are essential to the protection of the public interest as we meet the power challenges of the future. Mr. Speaker, I include the resolution establishing the Westchester County Energy Resources Commission in the RECORD at this time:

RESOLUTION WITH RESPECT TO THE PROVISION OF PUBLIC UTILITY SERVICE BY THE COUNTY OF WESTCHESTER

Whereas, the provision of adequate, reliable supplies of energy, and particularly, electricity and gas, at the lowest possible cost and with all possible protection to the environment, is essential to the public health, safety, prosperity and well-being of all the people of the County of Westchester, and in the general welfare; and

Whereas, the County is empowered to provide such public utility service under Article 14–A of the General Municipal Law of the State of New York;

Now, therefore, be it resolved by the Board of Legislators of the County of Westchester, as follows:

1. *Authority, Purposes.* The County of Westchester is hereby authorized, pursuant to Article 14–A of the General Municipal Law of the State of New York, and in the manner herein provided, to construct, lease, purchase, own, acquire, use and/or operate a public utility service within or without its territorial limits, for the purpose of furnishing to itself, and for compensation to cities, towns and villages within the County, to the inhabitants of the County (including for residential, commercial and industrial use), and to such other persons, governments or agencies as may be permitted by law, any service similar to that furnished by any public utility company specified in Article 4 of the Public Service Law of the State of New York.

2. *Powers of County.* To accomplish the purpose set forth in Section 1 of this Resolution, and subject to the requirements of applicable law, the County is authorized:

(a) To construct, lease, purchase, own, acquire, use and/or operate all facilities necessary or appropriate to furnish public utility service as provided in Section 1, and to furnish and operate such service;

(b) To determine the methods of operation of such public utility service, the rates, rentals and charges for such service and the procedure for their collection;

(c) To purchase gas or electricity from the state, or from any state agency, including, without limitation, the Power Authority of the State of New York in accordance with the provisions of Title 1 of Article 5 of the Public Authorities Law of the State of New York, or other municipal corporation, or from any private or public corporation;

(d) To acquire the public utility service of any public utility company operating pursuant to Article 4 of the Public Service Law of the State of New York or any other public utility service within or without its territorial limits, by purchase, or by condemnation in the manner provided by law for

condemnation by the County of private property for a public use;

(e) To acquire by purchase or condemnation, own any transmission or distribution lines or facilities or pipes connecting it with any source or sources of gas, either natural, artificial or mixed, or electric power or production, and to share with the municipal corporations the cost of such transmission lines or pipes;

(f) Whenever a surplus of such public utility service exists over the amount thereof required by the County and the residents thereof, to sell such surplus outside the County to persons, public or private corporations or other municipal corporations;

(g) To agree with any other municipal corporation or corporations authorized to furnish a public utility service in accordance with Article 14–A of the General Municipal Law of the State of New York to extend such service to such other municipal corporation or corporations, subject to the approval of the Public Service Commission of the State of New York if at the time a public utility service is actually being furnished in such other municipal corporation or corporations, and to agree with any such municipal corporation or corporations for the joint ownership, leasing, construction, acquisition, use or operation of a public utility service, within the combined territorial limits of the County and such other municipal corporation or corporations, all upon such terms and conditions, including the method of operation and the rates, rentals and charges for such service and the procedure for their collection, as shall be agreed upon;

(h) In general, to exercise all of the powers granted to a gas corporation or an electric corporation or a gas and electric corporation pursuant to Article 2 of the Transportation Corporations Law of the State of New York.

3. *Westchester Energy Resource Commission.* Subject to the further provisions of this Resolution, the County shall exercise the powers and authority herein set forth through the Westchester Energy Resource Commission which is hereby created and established. The Commission shall be composed of three Commissioners who shall be appointed by the County Executive with the approval of the Board of Legislators.

4. *Organization.* (a) Of the Commissioners first appointed under this Resolution, one shall continue in office for a term of one year, the second for a term of two years, and the third for a term of three years, in each case from the effective date of this Resolution, as designated by the County Executive at the time of nomination. Thereafter each successor Commissioner shall be appointed for a term of three years from the date of expiration of the term for which his or her predecessor was appointed. In the event that a successor Commissioner is not appointed as of the expiration of the term of a sitting Commissioner, the sitting Commissioner shall continue to serve until a successor is appointed and the term of the successor shall be limited to a period of three years from the original date of expiration of the term of the sitting Commissioner. In the event of a vacancy occurring as a result of death, incapacity, removal from office or resignation, a new appointment may be made and the appointee shall serve only for the unexpired term of his or her predecessor.

(b) No more than two Commissioners shall be of the same political faith. At least one Commissioner shall be representative of the interests of consumers and shall be so designated by the County Executive at the time of his or her appointment. The appointment of the Commissioner or Commissioners representing consumer interests shall take place only after a public hearing has been held by the County Executive at which the qualifications of said Commissioner or Commissioners shall be presented to the public and the public shall have had an opportunity to comment thereon. Such a public hearing shall be held at a time and a place convenient to the general public and at least thirty days following the public announcement of the name of the proposed Commissioner, which announcement shall specify the qualifications deemed to render such person representative of consumer interests.

(c) Commissioners shall only be removed from office for just cause, upon a majority vote by the members of the Board of Legislators, and with the approval of the County Executive.

(d) Each Commissioner shall receive an annual salary of $48,000 and shall receive and be entitled to receive all reasonable expenses actually incurred in the performance of their duties.

(e) Within one month following the appointment of the three initial Commissioners, the Commission shall designate by a majority vote one Commissioner as chairperson, who shall serve as such until the expiration of his or her term. Thereafter, and upon the expiration of the term of each successive chairperson, the Commission shall elect a new chairperson who shall serve until the expiration of his or her term or until a vacancy shall occur in the office of chairperson by reason of the death, incapacity, removal from office or resignation of such person as chairperson or Commissioner. In the event of a vacancy in the office of chairperson, a new chairperson shall be promptly designated from among the remaining two Commissioners by the County Executive by and with the advice and consent of the Board of Legislators and such chairperson shall serve until the expiration of the term of his or her predecessor.

(f) Two members shall constitute a quorum of the Commission and no vacancy in the Commission shall impair the rights of the remaining Commissioners to exercise all the powers of the Commission, *provided that*, in the event of a tie vote of two Commissioners as a result of a vacancy, the matter shall be put over until a third Commissioner shall have been appointed and qualified.

(g) The Commission shall meet no less frequently than twice a month in a place and at a time to be designated by the chairperson and announced to the public and all such meetings shall be open to the public.

(h) All hearings, proceedings, meetings, deliberations, and other business conducted by the Commission or any of the Commissioners or employees of the Commission and all records, minutes, documents, rulings, regulations, publications and communications of the Commission shall be open and accessible to the public in accordance with the provisions of the New York State Open Meetings Law and the New York State Freedom of Information Law. The Commission and all of its employees and agents shall maintain full and complete records of all communications of any kind with any person, firm, corporation or association appearing before the Commission or doing any form of business with any person, firm, association or corporation appearing before the Commission or with any person, firm, association or corporation engaged in, or doing business with any other person, firm, association or corporation engaged in generation, transmission, or distribution of electric power or distribution or sale of gas, or the manufacture or sale of material, equipment or machinery used in connection with the generation, transmission or distribution of electric power or distribution or sale of gas or any person, firm, association or corporation connected in any way with the sale of bonds, stocks or other securities. Such records shall be public records as provided in the preceding sentence. Failure to maintain such records shall constitute just cause for the removal from office of a Commissioner responsible, or the termination of the employment of an employee or agent of the Commission.

(i) As a condition of appointment, each Commissioner shall make full and complete disclosure of all employment, fees, retainers, bonuses or dividends or other income or reimbursement received over the previous five years from whatever source and failure to make such disclosure shall constitute just cause for removal from office. No person shall be appointed to the Commission who has within the five years preceding his appointment or employment been in the employment of any privately owned utility company or association representing private utility companies, or who has done substantial business with, or received substantial income from, a privately owned utility, or organization representing privately owned utility companies. No person owning stocks or bonds of any privately owned utility company or having any form of pecuniary interest of any kind in a privately owned utility company or deriving any form of income from any person, firm, association, corporation or partnership doing substantial business with or deriving substantial income from any private utility company shall be permitted to enter upon the duties of or hold the office of Commissioner.

5. *Staff of the Commission.* (a) The Commission shall have the authority to appoint a chief engineer at an annual salary of $43,000, a general counsel at an annual salary of $42,000, a secretary who shall also serve as staff director at an annual salary of $28,000, and such other employees as the Board of Legislators may from time to time approve at the request of the Commission. The Commission may also request the County Executive to make available the services of employees of various departments of the County government, including but not limited to the employees of the Office of the Budget, the Department of Public Works, the Office of the General Counsel, and the Department of Finance, and the County Executive is authorized to detail, transfer or assign to the Commission such employees as he deems necessary to enable the Commission to discharge its responsibilities under this Resolution. The Commission and its employees and agents shall be subject to the Civil Service Law of the State of New York in accordance with the provisions of Article 15 of the Westchester County Charter.

(b) No person having a substantial interest in stocks or bonds of any privately owned utility company or having substantial pecuniary interest of any kind in a privately owned utility company or deriving substantial income from any person, firm, association, corporation or partnership doing business with or deriving substantial income from any private utility shall enter upon or remain in the employment of the Commission without the approval of the Board and failure to make such interest or income known to the Commission at the time of employment or thereafter shall be just cause for termination of employment with the Commission.

6. *Duties of the Commission.* (a) Within one year following the effective date of this Resolution, the Commission shall report to the Board of Legislators and the County Executive as to the measures that are necessary to carry out the purposes of this Resolution. Such Report shall include, but not be limited to:

(i) The proposed method of constructing, leasing, purchasing and acquiring the plant and facilities for providing public utility service pursuant to this Resolution;

(ii) The maximum and the estimated costs of the method proposed in paragraph (i) of this section and the means recommended for meeting such costs;

(iii) The contracts or other agreements with any persons, public or private corpora-

tions, municipal corporations, agencies or authorities to be entered into to assure adequate and reliable provision of public utility service, including the source, amount and cost of any energy to be acquired, or distribution or other services to be provided, and the duration of such contracts or agreements, and such actions in law as may be required to compel any persons, corporations, agencies, or authorities to enter into just contracts for the provision of energy or services necessary to carry out the purposes of this Resolution;

(iv) The method of operation of and the rates, rentals and charges for such service and the procedure for their collection;

(v) The annual operating budget of the commission for carrying out the purposes of this Resolution and providing the public utility service recommended; such budget to specify the staff and supporting personnel required by the Commission to provide public utility service.

(b) In preparing such Report, and generally in exercising all of its powers hereunder, the Commission shall emphasize specifically:

(i) Provision of public utility service, instrumentalities and facilities which shall be safe, adequate, just and reasonable, at the lowest possible cost to consumers, with each class or category of consumer bearing a just and reasonable share of total costs, without any undue or unreasonable preference or advantage to any person, corporation or locality, or to any particular description of service in any respect whatsoever;

(ii) The greatest possible protection of the environment and conservation of natural resources, both within the County and in the State as a whole;

(iii) The promotion of economic development of the County, and in particular of any depressed and substandard areas therein;

(iv) The encouragement of conservation of electric and gas energy and development of new energy technologies through (a) appropriate rate design, (b) installation of materials or mechanisms to help reduce energy consumption or reduce peak energy loads in the County, (c) appropriate demonstration projects to test new energy technologies, materials or methods (d) decentralization of the County's energy facilities and instrumentalities, including their installation in consumers' homes, offices, factories and the like, or the installation by the County of energy conserving devices or materials in such places, and (e) such other methods as the Commission may select;

(v) Cooperation with local, State and Federal governments and public and private utilities in measures designed to maintain an adequate supply of reliable low-cost energy and assist in developing the economic potential of the County and the State of New York of subdivisions thereof or any regional grouping of States with which New York State is a participant;

(vi) Cooperation with other authorities, communities, cooperatives, municipal corporations or any other public benefit corporations or agencies to achieve the purposes of this Resolution;

(vii) Cooperation with local jurisdictions within the County to avoid insofar as possible loss or serious curtailment of revenues.

(c) Upon submission of the Report referred to in this Section, and if it shall approve the same (either as submitted or modified), the Board of Legislators shall set forth in a further resolution, and shall submit for approval of the electors of the County, all in accordance with Article 14–A of the general municipal law of the State of New York, the proposed method of constructing, leasing, purchasing and acquiring the plant and facilities for the public utility service to be provided by the County, together with the maximum and estimated costs thereof, and the method of furnishing such service. Until approval by the electors upon such referendum, neither the County nor the Commission through which it acts shall undertake to construct, lease, purchase or acquire the plant and facilities proposed to provide such service, or to furnish the same.

7. *Powers of the Commission.* (a) In exercising the powers and authority conferred pursuant to Section 2 of this Resolution, the County shall act through the Commission which shall have the power to take all of the actions therein specified; *provided* that the Commission shall have authority to take the following actions only with the prior approval of the Board of Legislators:

(i) To fix the salary and number of professional, clerical and other employees, subject to the provisions of applicable Civil Service laws;

(ii) To determine the method of operation of and the rates, rentals and charges for public utility service to be provided and the procedure for the collection of such rates, rentals and charges;

(iii) To make payments in lieu of taxes to any and all cities, towns, villages and districts within the service area of the Commission, provided that no payment shall be in excess of the total amount of revenue paid to such city, town, village or district in the year 1977 by the public utility corporation serving such city, town, village or district in that year without specific authorization of the Board of Legislators approved by a referendum of all the qualified electors of the County as provided by law;

(iv) To acquire, either by agreement with and purchase from the owner or owners, or by condemnation, the whole or part of any existing public utility service, or any plants or facilities comprising and part thereof (including, but not limited to, transmission and distribution lines and facilities), or of any other property or right or interest in property which is necessary to carry out the purposes of this Resolution;

(v) To constuct or lease any plant or facility for the generation, transmission or distribution of electrical energy or for the production, storage or distribution of natural or artificial gas;

(vi) To enter into contracts or agreements with any person, agency or corporation for the distribution of gas or electrical energy within the service area of the County.

(b) In addition to the powers and authority heretofore described, but subject to the further provisions of this Resolution, the Commission shall have the following further powers:

(i) To sue and be sued;

(ii) To have an official seal of which judicial notice shall be taken, and to alter the same at pleasure;

(iii) To make and execute contracts and all the instruments necessary or convenient for the exercise of its powers and functions under this Resolution;

(iv) To meet at such times and places as the chairperson or a majority of the Commission shall decide, except as elsewhere provided in this Resolution;

(v) To appoint, transfer and remove at pleasure all employees except as otherwise provided by the laws of the State of New York or the County;

(vi) To make any investigation necessary and proper to the effective execution of this Resolution (including, without limitation, any investigation necessary or appropriate to prepare the report required in Section 6 hereof) and, for that purpose, to take and hear proofs and testimony under oath, to compel the attendance of witnesses and to require the production of records, books, papers, accounts and other documents including records of public agencies;

(vii) To enter upon any lands, waters or premises within the County for the purpose of making studies, surveys or investigations that it deems necessary to carry out the purposes of this Resolution:

(viii) To make and promulgate such rules and regulations as may be necessary to carry out the purposes of this Resolution, *provided* that the Commission shall, before any such rules and regulations become effective, hold a public hearing on proposed rules and regulations no less than thirty days after publication of such proposed rules or regulations in a newspaper of general circulation in the County; and *provided further* that the Board shall have thirty days from the date of publication in which it may suspend or reject such proposed rules or regulations by majority vote;

(ix) In general, to do all other things necessary and proper to carry out the provisions and purposes of this Resolution, except as otherwise provided herein and by applicable law.

8. *Finance.* (a) The provision of public utility services as provided herein, including the acquisition of such plants, facilities, property and equipment or rights or interests therein as may be necessary to carry out the provisions of this Resolution, may be financed in whole or in part by the County through levy of taxes in the same manner that taxes are levied pursuant to law for any permanent improvement by the County, or may be financed in whole or in part through bonds or other obligations of the County approved by the Board of Legislators and by the voters in a general referendum as provided by law. Debt service (including amortized principal) and related charges for any bonds, notes or other obligations of the County issued pursuant to this section shall be considered an operating expense of the Commission.

(b) When any public utility service is provided by the County pursuant to this resolution, the Commission shall collect, by a method approved by the Board of Legislators and in accordance with the applicable rates, and shall retain in separate accounts, all rentals and charges for such service and such other revenues as may derive from any other transactions permitted under this Resolution, and shall use such rentals, charges and other revenues to meet and defray the costs and expenses of the Commission and the public utility service provided. If, at the end of any fiscal year, the rentals, charges and other revenues collected by the Commission exceed the costs and expenses incurred, plus all necessary reserves, so that a surplus shall result, such surplus shall be used to defray the costs of service in the next ensuing fiscal year; *provided* that the Board of Legislators may by resolution direct that such surplus be added to the general revenues of the County or allocate the same for such other purpose or purposes as the Board deems appropriate.

(c) Upon and after the County commences to provide any public utility service hereunder, and as necessary to carry out the purposes of this Resolution, the Commission shall have the authority to request, receive, hold and expend operating advances to be made from the general revenues of the County by the Department of Finance, and the Department of Finance is hereby authorized to make such operating advances, provided that it shall make no advance until and unless the Commissioner of Finance shall have examined the books and records of the Commission and shall have certified that the Commission will be able to repay

such advance in timely fashion while fully discharging its duties and obligations to all parties in accordance with the purposes of this Resolution.

(d) During the initial year of its experience and thereafter until its costs and expenses are financed through operating revenues or from bond proceeds specifically allocated for that purpose, the costs and expenses of the Commission shall be financed and paid out of the general revenues of the County, in accordance with appropriations made by the Board of Legislators. Any costs and expenses so financed shall be treated as costs of the utility service to be provided, and shall be recovered over a reasonable period of time once such service is commenced.

9. *Public Utility Service Obligations.* Nothing in this Resolution shall be construed as in any way limiting or diminishing the obligation and responsibility of any corporation or other entity providing any public utility service in the County to continue to provide such service until such time as the County may otherwise determine by affirmative action, subject to the requirements and limitations of this Resolution and the laws of the County and the State of New York.

10. *Construction.* This Resolution, being necessary for the welfare of the County and its inhabitants, shall be liberally construed so as to effectuate its purposes.

11. *Separability.* Should any provision, article, section, clause, phrase or word in this Resolution be declared invalid, it shall not affect the validity of any other provision, article, section, clause, phrase or word.

12. *Effective Date.* This Resolution shall become effective immediately.

SOLAR RAYS GETTING BRIGHTER AND BRIGHTER

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. OTTINGER. Mr. Speaker, I want to bring to the attention of my colleagues two articles which appeared in the press over the weekend. The first one announcing that the State of Massachusetts will instigate a program to help market solar energy units and the second that General Motors will begin marketing solar-powered hot water heating systems.

The Secretary of consumer affairs in Massachusetts said that—

If 3 percent of the energy used in Massachusetts turned solar, 100,000 jobs would be created.

Here we are then, with the most potentially job-intensive energy option coming forward with a company like General Motors getting into the act. I find both these announcements coming at the most propitious time because tomorrow a group of Congressmen and Senators are introducing a package of solar legislation which will aid in bringing solar into the homes, business, and farm communities of our country. We have waited quite a while for all this to finally get off the ground—and here we are.

The legislative package will be announced in the special order that we have called for this important introduction. I urge all of my colleagues to join with us in sponsoring either the whole package or as many of the bills as they will. Let us all move forward together on this brighter and brighter path.

I include the following:

[From the Washington Post, Feb. 19, 1977]

MASSACHUSETTS HOPES TO HELP SOLAR ENERGY HEATING MARKET

BOSTON.—The Massachusetts secretary of consumer affairs, Christine Sullivan, has announced a state program to help market solar energy heating units.

"If 3 per cent of the energy used in Massachusetts turned solar, 100,000 jobs would be created," she said at a meeting of the state cabinet.

At the same time, Education Secretary Paul Parks said a program to begin training researchers and technicians to work in the solar industry was being discussed with Southeastern Massachusetts University and three community colleges.

Sullivan said a solar energy advisory committee made up of legislators, bankers, labor union leaders and contractors has been set up to increase public interest in solar energy.

She said banks have expressed interest in making loans available to install solar energy heating units, which she estimated would cost $1,200 at current prices. The price probably would decrease as the demand increased, she added.

Sullivan said savings from using a solar energy heating unit, backed up by an auxiliary electric unit 30 to 40 per cent of the time, would save the average homeowner $116 a year over a 10-year period.

[From the New York Times, Feb. 19, 1977]

G.M. PLANS SOLAR-POWER HOT WATER SYSTEM IN HOMES

DETROIT.—The General Motors Corporation, the world's largest auto maker, says it may begin selling a solar-powered hot water heating system for homes next year.

Howard H. Kehrl, G.M. executive vice president, said, "If this solar package does prove practical, it probably would be teamed with a conventional household gas or electric water heater so the water would get hot whether or not the sun was shining."

G.M.'s Harrison Radiator division, in Lockport, N.Y., is doing the work because it makes heaters and air-conditioning units for cars. Solar power is a natural outgrowth of its knowledge in the heat-transfer field. Eugene R. Harris, head of energy systems at the G.M. manufacturing staff, said Harrison had embarked on "a development program for domestic products that operate from solar energy."

The plans were disclosed yesterday by G.M. officials at a news conference called to discuss what the company was doing in energy conservation and research.

A G.M. spokesman estimated today that about 140 companies were now making solar collectors, including the General Electric Company and the Grumman Corporation.

Grumman has an energy systems division in Ronkonkoma, L.I., which markets Sunstream solar products, including a sun-powered hot water heater. Leonard Rothenberg, solar sales manager for Grumman, said the company had been selling a complete system for a year. The basic model retails for $995 and the deluxe model for $1,260 f.o.b. New York, with installation extra, he said.

Mr. Rothenberg said the company had 55 dealers nationwide but declined to say how many units had been sold. "We expected a slow buildup but think the market will develop more rapidly as energy prices increase and tax incentive legislation is passed," he said. Revere Copper & Brass Inc. is one of the companies building complete solar hot water systems, he added.

Mr. Rothenberg said: "We also have made a couple of solar space heating installations, and we sell solar swimming pool heaters. But the most potential is in a solar water heating system because it can be used in existing homes and new construction, too."

G.M.'s Mr. Harris said a key to the Harrison system "is a flat-plate solar collector they are developing that has several unique features aimed at giving the units improved performance and longer life at moderate cost."

Michael Walsh, general sales manager for Harrison, said he was "very optimistic" about the prospects for solar water heating. He said it was "still in the experimental stage, but we see it as being a good entry into the consumer market." Asked when it might go on sale, Mr. Walsh said, "We have not picked a date, but it will be at least a year away." He added that Harrison might be ready to unveil the system later this year.

Mr. Walsh said the new system would "have to be cost competitive" with existing systems. "I would expect the initial attempts to market it would be in the South," he said. "But, with increasing energy costs, long term I would think it could be expanded beyond that area."

The solar heater would use solar collection panels, probably mounted on the roof of a house. Mr. Walsh said that only a few panels would be needed for a typical home.

Solar collectors, Mr. Harris explained, consist of a flat, absorbing surface—usually steel, copper or aluminum—coated with a suitable material (such as flat black paint) for absorbing the sun's rays. The collector is installed in an airtight enclosure, covered with sheets of glass to permit the sun's rays to enter the box.

Water is collected through passages molded in the collector plate or through tubes attached to it. When the sun's rays strike the plate, it gets hot. The heat passes through the metal plate and tube walls to the water. The hot water is then pumped through heat exchangers to heat air or water for home use.

G.M. has been experimenting with solar power for some time at its desert proving ground near Phoenix where it has a number of systems serving several buildings with hot water and heat. The home system apparently would be similar but smaller and less complicated.

PROTECTING OUR REDWOODS

(Mr. PHILLIP BURTON asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PHILLIP BURTON. Mr. Speaker, I have introduced a bill today to complete the work begun by the Congress in 1968 and to correct many omissions of the executive branch in keeping for the American people a remnant of the magnificent redwood forests which once stretched from Oregon southward for 400 miles. I call the attention of my colleagues to this bill.

After many years of consideration and after 4 years of intense controversy, the Congress established the Redwood National Park in 1968. Despite a heavy investment in virgin redwoods, the park was incompletely and inadequately fashioned. When the park was established, it was a 58,000-acre compromise. It was a long narrow strip along California's

northern coast, bulging to take in three major State parks and lower Redwood Creek, and extending another 7 miles farther up Redwood Creek to take in the world's tallest trees and the Emerald Mile. This 7-mile stretch, commonly known as the "worm," has been the subject of much discussion and study but logging continues upslope and upstream from the groves.

When the Park Act was enacted, it was hoped that certain of its provisions would allow the Department of the Interior and the National Park Service to protect the park, despite the boundary deficiencies. However, in the 8½ years which have passed since then, no real protection has been given. Though the authority was given by Congress, no Secretary has used section 3(e) of the Redwood National Park Act (32 Stat. 931) to protect "the timber, soil and streams within the boundaries of the park." No Secretary has entered into a contract to protect the park, or signed a permanent binding cooperative agreement, or received a donation from any landowner, or acquired an interest in the lands and tributary watersheds. Not one of these steps have been taken to assure that logging will not "adversely affect the timber, soils and streams within the park." In particular, there was hope that the lumber companies which had lands surrounding the park would enter into permanent cooperative agreements with the Federal Government.

A number of studies and plans have been made since 1968. The Subcommittee on National Parks and Recreation of the Senate Committee on Interior and Insular Affairs held oversight hearings in May 1971. At that time, incredibly enough, spokesmen for the National Park Service and the Bureau of Outdoor Recreation stated that they had no problems. In November 1971, the National Park Service offered some specific suggestions to the Secretary for ways to enlarge the boundaries, to establish scenic corridors and to acquire management easements, as well as in-fee lands, along key tributary streams, as Congress had authorized. The Service stated in an internal document:

Without application of special forest management practices to control present clearcutting methods, remaining old growth redwood within the Park will be subject to windthrow.

Steep slopes will erode severely producing major slides in unstable soils known to exist in the area. Water quality of Park streams will deteriorate as a result of siltation. It is essential, therefore, that a buffer zone comprising about 10,000 acres be established to protect the Redwood Creek area of the Park.

The Department, however, never released this document, which was obtained later only after a "freedom of information" suit was filed by a conservation organization—nor did it formulate a program. In 1972 and 1973, the Department of the Interior made extensive studies—which also became public only as a result of a lawsuit by a public interest group. That report found that there were extremely high erosion factors surrounding the main unit of the park in Redwood Creek—which were being activated by bulldozer logging, clearcutting, and massive road construction. The study warned:

There is nothing to prevent the tributaries in the Park from becoming the nightmarish tangle of debris and downed trees as were observed along some of the tributaries above the Park.

The long, drawn out litigation by a public interest organization demonstrated beyond any question several points:

Clearcut logging on privately owned lands adjacent to the corridor portion of the Park has caused and continues to cause substantial, and perhaps irreparable, damage to those very resources within the park—timber, soils, streams, and esthetics—that the Congress intended to preserve when establishing the park in 1968.

All other possible avenues of park protection—through the companies themselves, the Interior Department, the White House, the Governor, the California State Board of Forestry and the Courts—have now been exhausted—and to no avail. Only the Congress remains to take effective action to protect an investment of almost $200 million in public funds. As Federal Judge William T. Sweigert stated in the last of three reported decisions on the litigation:

The Court further finds that, in order adequately to exercise its powers and perform its duties in a manner adequately to protect the Park, Interior now stands in need of new congressional legislation and/or new congressional appropriation.

It follows that primary responsibility for the protection of the Park rests, no longer upon Interior, but squarely upon Congress to decide whether and, if so, when, how and to what extent new legislation should be passed to provide additional regulatory powers or funds for protection of Redwood National Park.

My bill authorizes expansion of the park from 58,000 to 132,000 acres by inclusion of the watershed of Redwood Creek above the "worm" and immediately upstream from it. This will give protection to this critical area, as well as enhance the recreational experience of park visitors, particularly to the tallest trees. It adds to the remaining virgin redwoods in the drainage of Redwood Creek and the high quality old growth redwoods of Skunk Cabbage Creek. It completes a logical, contiguous stretch of parkland extending to Prairie Creek Redwood State Park, and it establishes an upstream park protection zone where the land may be managed in order to protect the parkland, water, and trees down stream.

It is not clear how much this expansion of Redwood National Park would cost. It may cost more than we have already paid. The time left for the park, however, is short. If the Congress decides it wants a viable Redwood National Park for the enjoyment of present and future generations of Americans, it must act quickly. If we fail to act, we will have wasted much of the funds we have already spent. If these trees go down, they can never be replaced. Let us move now to do the job right and to keep faith with those whose vision began this historic park.

FEDERAL TRADE COMMISSION AMENDMENTS OF 1977

(Mr. ECKHARDT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ECKHARDT. Mr. Speaker, today I introduced legislation to amend the Federal Trade Commission Act to expedite the enforcement of FTC cease and desist orders and to make various other necessary amendments to the FTC Act. The Consumer Protection and Finance Subcommittee begins hearings on this legislation the week of March 7. Because of the widespread interest in this bill, I am inserting it in the RECORD. The text of the bill follows:

H.R. 3816

A bill to amend the Federal Trade Commission Act to expedite the enforcement of Federal Trade Commission cease and desist orders and compulsory process orders; to increase the independence of the Federal Trade Commission in legislative, budgetary, and personnel matters; and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Trade Commission Amendments of 1977".

PENALTIES FOR NONCOMPLIANCE WITH COMPULSORY PROCESS

SEC. 2. (a) Section 10 of the Federal Trade Commission Act (15 U.S.C. 50) is amended—

(1) by striking out "SEC. 10. That any" and inserting in lieu thereof "SEC. 10 (a) Any";

(2) by inserting, respectively, "(b)", "(c)", and (e)" immediately before the second, third, and fourth paragraphs;

(3) by striking out the first sentence of subsection (c) and inserting in lieu thereof the following: "If any person, partnership, or corporation which is required by the Commission (1) pursuant to section 6, to file or submit any annual or special report or written answers to specific questions, or (2) pursuant to section 9, to produce, or provide access to, documentary evidence or to testify, fails to comply with any such requirement within the time prescribed therefor by the Commission, and if such failure continues for 30 days after service on such person, partnership, or corporation of a notice of such default, such person, partnership, or corporation shall be liable to the United States for a civil penalty of not more than $5,000 as the court may determine, for each day that such failure continues after such 30th day. The amount of such civil penalty shall be recoverable in a civil suit by and in the name of the Commission, by any of its attorneys designated by it for such purposes, brought in the district court of the United States for a district within which such person, partnership, or corporation resides or does business."; and

(4) by inserting after subsection (c) the following new subsection:

"(d)(1) No court shall have jurisdiction over any action or claim seeking—

"(A) to stay the accumulation of any penalties authorized by subsection (c) for failure to comply with any requirement described in such subsection, or

"(B) to challenge the validity of, or enjoin the enforcement of, any such requirement,

unless the action is brought or the claim is made by a person, partnership, or corporation upon which a notice of default respecting such requirement has been served.

"(2) No court shall issue any order staying the accumulation of penalties for failure to comply with any part of a requirement described in subsection (c) unless the party seeking such relief shall have first demonstrated—

"(A) that such party is likely to prevail on the merits of its claim that such part is not enforceable because—

"(i) compliance with such part would be unduly burdensome on such party,

"(ii) the information or documents sought under such part are not reasonably relevant to any proceeding or inquiry which the Commission has authority to conduct, or

"(iii) the Commission is otherwise prohibited by law from obtaining or having access to such information or documents; and

"(B) that the equities clearly favor such stay.

Such an order shall not affect the accumulation of penalties for failure to comply with any part of a requirement as to which the party did not make the demonstration referred to in subparagraphs (A) and (B).".

(b)(1) The amendment made by subsection (a)(3) shall apply only with respect to failures to comply with a requirement described in section 10(c) of the Federal Trade Commission Act insofar as they occur or continue after the date of the enactment of this Act.

(2) the amendment made by subsection (a)(4) shall apply with respect to any action or claim pending on the date of the enactment of this Act, and any action brought or claim made after the date of the enactment of this Act, respecting a requirement described in section 10(c) of the Federal Trade Commission Act.

(3) Notwithstanding paragraphs (1) and (2) of this subsection, in the event that the Commission's authority to issue a notice of default as to a person, partnership, or corporation pursuant to section 10 of the Federal Trade Commission Act, as amended by this Act, is restricted by any order entered or stipulation approved by a court before the date of the enactment of this Act, the amendments made by subsections (a)(3) and (a)(4) shall be inapplicable, during the period in which such restriction is in effect, to the amount of civil penalties that could be assessed against, or to any application for a stay of penalties made by such person, partnership, or corporation to whom such notice of default is issued, except that in any such event the Commission shall have authority to issue notices of default, and penalties shall accrue and be assessed, in accordance with the provisions of the Federal Trade Commission Act in effect on the day before the date of the enactment of this Act.

PROCEEDINGS TO ENFORCE COMPULSORY PROCESS

SEC. 3. (a) The second undesignated paragraph of section 9 of the Federal Trade Commission Act (15 U.S.C. 49), is amended by striking out the second sentence thereof.

(b) The fourth undesignated paragraph of section 9 of the Federal Trade Commission Act (15 U.S.C. 49) is amended to read as follows:

"In case of failure to comply with any provision of a subpoena or access order issued pursuant to this section or of an order issued pursuant to any other provision of this Act, the Commission may invoke the aid of a court of the United States in requiring compliance with such subpeona or order. Any of the district courts of the United States within the jurisdiction of which the inquiry of the Commission is being carried on may, in the case of such refusal to obey, issue an order requiring compliance with such subpoena or order, and any failure to obey such order of the court may be punished by such court as a contempt thereof.".

EFFECTIVE DATE OF CEASE AND DESIST ORDERS

SEC. 4. (a) Section 5(g) of the Federal Trade Commission Act (15 U.S.C. 45(g)) is amended (1) by striking out paragraphs (2), (3), and (4); and (2) by inserting in lieu thereof the following new paragraphs:

"(2) Upon the 60th day after such order is served, if a petition for review has been duly filed, except that any such order may be stayed, in whole or in part, subject to such conditions as may be appropriate, by—

"(A) the Commission;

"(B) an appropriate court of appeals of the United States, if a petition for review of such order is pending in such court and if an application for such a stay was previously submitted to the Commission and the Commission, within the 30-day period beginning on the date the application was received by the Commission, either denied the application or did not grant or deny the application; or

"(C) the Supreme Court, if an applicable petition for certiorari is pending; or

"(3) For the purpose of section 19(d), if a petition for review of the Commission order has been filed—

"(A) upon the expiration of the time allowed for filing a petition for certiorari, if the order of the Commission has been affirmed or the petition for review dismissed by the court of appeals and no petition for certiorari has been duly filed;

"(B) upon the denial of a petition for certiorari, if the order of the Commission has been affirmed or the petition for review dismissed by the court of appeals; or

"(C) upon the expiration of 30 days from the date of issuance of a mandate of the Supreme Court directing that the order of the Commission be affirmed or the petition for review dismissed.".

(b) The amendments made by subsection (a) shall apply only with respect to cease and desist orders of the Federal Trade Commission served under section 5 of the Federal Trade Commission Act after the date of the enactment of this Act.

REVIEW OF CEASE AND DESIST ORDERS

SEC. 5. (a) The first sentence of section 5(c) of the Federal Trade Commission Act (15 U.S.C. 45(c)) is amended to read as follows: "Any person, partnership, or corporation required by an order of the Commission to cease and desist from using any method of competition or any act or practice may obtain a review of such order in the court of appeals of the United States for the circuit within which such person, partnership, or corporation resides or maintains its principal place of business, or in the United States Court of Appeals for the District of Columbia, by filing in the court, within 60 days from the date of the service of such order, a written petition praying that the order of the Commission be set aside.".

(b) The amendment made by subsection (a) shall apply only with respect to petitions for judicial review of cease-and-desist orders served under section 5 of the Federal Trade Commission Act after the date of the enactment of this Act.

APPLICATION OF ACT TO BANKS AND COMMON CARRIERS

SEC. 6. (a) Section 5(a)(2) of the Federal Trade Commission Act (15 U.S.C. 45(a)(2)) is amended to read as follows:

"(2) The Commission is hereby empowered and directed to prevent persons, partnerships, or corporations from using unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce, except that the provisions of this paragraph shall not apply to any act or practice, or method of competition, of (A) banks, to the extent such acts, practices, or methods are subject to regulation under any other Federal law; (B) common carriers, to the extent such acts, practices, or methods are subject to regulation under the Act to regulate commerce; (C) air carriers and foreign air carriers, to the extent such acts, practices, or methods are subject to regulation under the Federal Aviation Act of 1958; and (D) persons, partnerships, and corporations, to the extent such acts, practices, or methods are subject to regulation under the Packers and Stockyards Act, 1921, as amended, except as provided in section 406(b) of such Act.".

(b)(1) Section 6(a) of the Federal Trade Commission Act (15 U.S.C. 46(a)) is amended by striking out "excepting banks and common carriers subject to the Act to regulate commerce,".

(2) Section 6(b) of the Federal Trade Commission Act (15 U.S.C. 46(b)) is amended by striking out "excepting banks, and common carriers subject to the Act to regulate commerce,".

(3) Section 6 of the Federal Trade Commission Act (15 U.S.C. 46) is amended by striking out "*Provided*, That the exception of" and all that follows through "the Act to regulate commerce.".

APPOINTMENT OF TRUSTEES OR RECEIVERS

SEC. 7. (a) Section 13 of the Federal Trade Commission Act (15 U.S.C. 53) is amended by redesignating subsection (c) as subsection (d), and by inserting immediately after subsection (b) the following new subsection:

"(c) Whenever the Commission has reason to believe—

"(1) that any person, partnership, or corporation is violating, or is about to violate, any provision of law enforced by the Commission, and

"(2) that the appointment of a trustee or receiver to control the disposition by such person, partnership, or corporation of any money or property pending the issuance of a complaint by the Commission and until such complaint is dismissed by the Commission or set aside by the court on review, or until the order of the Commission made thereon has become final, would be in the interest of the public,

the Commission by any of its attorneys designated by it for such purpose may bring suit in a district court of the United States for the appointment of such a trustee or receiver. Upon a proper showing that the appointment of such a trustee or receiver would be in the public interest, and after notice to the defendant, the court may appoint such a trustee or receiver, except that if a complaint is not filed within such period (not exceeding 20 days) as may be specified by the court after such appointment, such trustee or receiver shall cease to exercise any authority under this subsection. Any such suit shall be brought in the district in which the person, partnership, or corporation involved resides or transacts business.".

(b) The last sentence of section 19(b) of the Federal Trade Commission Act (15 U.S.C. 57b(b)) is amended by inserting immediately after "the payment of damages," the following: "the appointment of a trustee or receiver to administer any such refund, return, or payment, and to control the disposition of any money or property obtained by such person, partnership, or corporation pending disposition of such action,".

CONSUMER ACTIONS

SEC. 8. The Federal Trade Commission Act (15 U.S.C. 41 et seq.) is amended by redesignating section 20 and section 21 as section 21 and section 22, respectively, and by inserting immediately after section 19 the following new section:

"SEC. 20. (a)(1) If any person, partnership, or corporation—

"(A) violates any rule under this Act re-

specting unfair or deceptive acts or practices (other than an interpretive rule, or a rule violation of which the Commission has provided is not an unfair or deceptive act or practice in violation of section 5(a)); or

"(B) engages in any unfair or deceptive act or practice (within the meaning of section 5(a)(1)) with respect to which the Commission has issued a final cease and desist order which is applicable to such person, partnership, or corporation;

then any person, partnership, or corporation injured by any such rule violation or unfair or deceptive act or practice may commence a civil action for relief against such person, partnership, or corporation, on behalf of himself or on behalf of himself and all persons similarly situated, in a United States district court or in any court of competent jurisdiction of a State.

"(2) The United States district courts shall have original jurisdiction with respect to any matter under this subsection if the amount in controversy may be reasonably expected to exceed the sum or value of $25,000, in the aggregate, exclusive of interest and costs.

"(3) Any person, partnership, or corporation which commences an action under subsection (a)(1) shall notify the Commission of such action at the time such action is commenced.

"(b) The court in any action commenced under subsection (a)(1) shall have jurisdiction to grant such relief as the court finds necessary to redress injury to the plaintiffs in such action. Such relief may include, but shall not be limited to rescission or reformation of contracts, the refund of money or the return of property, the payment of damages, and public notification respecting the rule violation or the unfair or deceptive act or practice, as the case may be, except that nothing in this subsection is intended to authorize the imposition of any exemplary or punitive damages. Any award of damages based upon any proof of damages under subsection (d)(1) shall not be considered to be exemplary or punitive damages.

"(c)(1)(A) The court involved shall cause notice of any action commenced under subsection (a)(1) to be given to the members of any class of plaintiffs involved in such action through one or more of the following methods—

"(i) publication by newspaper, radio, television, or any other medium, or by posting at any location which is likely to be frequented by members of such class; or

"(ii) individual notice to each member of such class who can be identified through reasonable effort.

"(B) The court involved may provide, in addition to causing notice to be made through the use of one or more of the methods under subparagraph (A)(i), that individual notice shall be made to (i) a sample of the members of such class, if such members may be reasonably expected to represent any material conflict or divergence of views among members of the class; or (ii) any specific subclass of the class of plaintiffs involved. The specific characteristics or interests of any such subclass shall be determined by such court.

"(2) The court involved, in determining the method of notice under paragraph (1), shall take into account—

"(A) the interest of the members of the class of plaintiffs in being informed of the pendency of the action;

"(B) the interest of the members of such class in the presentation of their claims through the institution and disposition of such action in the absence of individual notice to the members of such class;

"(C) the costs which would accrue in connection with the use of each such method;

"(D) the financial and other resources of the parties involved in such action;

"(E) the nature and importance of the interests of members of such class in such action; and

"(F) whether a significant percentage of the members of such class would be reasonably likely to desire to exclude themselves from such class or to participate in such action as separate parties.

The court may give individual notice of such action to an appropriate sample of the members of such class in order to obtain information necessary to assist the court in making determinations under this paragraph.

"(3)(A) The plaintiff in any action commenced under subsection (a)(1) shall bear any costs which accrue as a result of the use of any method of notice required by the court involved under paragraph (1), unless the court orders otherwise.

"(B) If the court determines, after a preliminary hearing, that justice so requires, the court may—

"(i) order the defendant in the action to bear any costs which accrue as a result of the use of any method of notice required by the Court under paragraph (1); or

"(ii) order the plaintiff and the defendant to bear a portion of any such costs in proportion to the likelihood that each will prevail on the merits in the action.

"(C) In any case in which the court involved requires individual notice under paragraph (1)(A)(ii), paragraph (1)(A)(iii), or paragraph (1)(B), any costs which accrue in connection with identifying the members of the class or subclass of plaintiffs shall be borne by the defendant in the action involved. The court may require such defendant to furnish to the court any information or materials in the possession, custody, or control of such defendant which may assist in identifying the members of such class or subclass.

"(d)(1) Proof of the aggregate amount of damages to be awarded to members of the class of plaintiffs in the event the plaintiffs prevail in any action commenced under subsection (a)(1) shall be permitted on the basis of—

"(A) any evaluation based upon statistical or sampling methods;

"(B) any econometric evaluation of the probable extent to which the rule violation or the unfair or deceptive act or practice of the defendant affected the revenues and market performance of the defendant; and

"(C) any other information or materials derived from a reasonable method or system for determining the aggregate amount of such damages.

"(2)(A) Any damages awarded in any action commenced under subsection (a)(1) shall be distributed in a manner determined by the court involved, except that such manner of distribution shall assure each member of the class of plaintiffs in such action a reasonable opportunity to receive an appropriate portion of the net damages involved.

"(B) For purposes of this paragraph, the term 'net damages' means the aggregate amount of damages awarded in any action commenced under subsection (a)(1) reduced by the amount of any unrecovered costs of litigation or administration associated with such action.

"(3) If the plaintiffs prevail in any action commenced under subsection (a)(1), the plaintiffs shall be entitled to recover, in addition to any damages or such other relief as may be granted by the court involved, the costs of such action, including reasonable attorney and expert witness fees.

"(e) The provisions of Rule 23 of the Federal Rules of Civil Procedure shall apply to any action commenced under subsection (a)(1), except where inconsistent with the provisions of this section.

"(f)(1) Any person, partnership, or corporation aggrieved by any rule violation referred to in subsection (a)(1) or any deceptive act or practice referred to in subsection (a)(1) with respect to which the Commmission has issued a final cease and desist order may commence an action for injunctive relief in a United States district court or in any court of competent jurisdiction of a State.

"(2) Any person, partnership, or corporation commencing an action under paragraph (1) shall give notice of such action to the Commission. No such action may be commenced before the close of the 60-day period immediately following the receipt of such notice by the Commission.

"(3) No action may be commenced in a United States district court under paragraph (1) unless the plaintiff demonstrates that the amount in controversy satisfies the requirements of subsection (a)(2). The calculation of such amount shall be based upon an estimate of the nature of any class of persons, partnerships, or corporations affected by the rule violation or unfair or deceptive act or practice involved, and the nature and extent of the actual or potential injury to such class.

"(g)(1) The provisions of section 19(c)(1) and section 19(e) shall apply to any action commenced under this section.

"(2) The provisions of section 19(d) shall apply to any such action, except that such provisions shall be construed to apply to any person who seeks to commence such action.".

RULES RELATING TO DISCOVERY

SEC. 9. Section 6(g) of the Federal Trade Commission Act (15 U.S.C. 46(g)) is amended by adding at the end thereof the following new sentences: "Such power to make rules and regulations shall include authority to make provision for the assessment of monetary sanctions by the Commission in the case of a failure to comply with discovery rules adopted by the Commission or orders made pursuant to such rules. Any such monetary sanction shall be paid to the Commission for deposit into the Treasury of the United States and shall accrue to the United States and may be recovered in a civil action brought by the Commission in its own name, by any of its attorneys designated by it for such purposes, in the United States district court for the district where the violation is alleged to have occurred, where the proceeding in which such discovery is sought is carried on, or where the person, partnership, or corporation involved has its principal office.".

INDEPENDENT APPOINTMENT OF PERSONNEL

SEC. 10. Section 2 of the Federal Trade Commission Act (15 U.S.C. 42) is amended by adding at the end thereof the following new paragraph:

"The appointment of any officer (other than a Commissioner) or employee of the Commission shall not be subject, directly or indirectly, to review or approval by any officer or entity within the Executive Office of the President.".

SUBMISSION OF BUDGETARY AND LEGISLATIVE RECOMMENDATIONS TO CONGRESS

SEC. 11. The first section of the Federal Trade Commission Act (15 U.S.C. 41) is amended by adding at the end thereof the following undesignated paragraphs:

"Whenever the Commission submits any budget estimate or request to the President or the Office of Management and Budget, it shall concurrently transmit a copy of such budget estimate or request to the Congress.

"Whenever the Commission submits any legislative recommendations or any testimony or comments on legislation to the President or the Office of Management and Budget, it shall concurrently transmit a copy thereof to the Congress. No officer or agency of the United States shall have any authority to require the Commission to submit its legislative recommendations or its testimony or comments on legislation to any officer or agency of the United States for approval, comments, or review, before the submission

of such recommendations, testimony, or comments to the Congress.".

CITIZEN PETITIONS FOR RULEMAKING

SEC. 12. Section 18(b) of the Federal Trade Commission Act (15 U.S.C. 57a(b)) is amended—

(1) by inserting "(1)" immediately after "(b)";

(2) by redesignating clauses (1), (2), (3), and (4) as clauses (A), (B), (C), and (D), respectively; and

(3) by adding at the end thereof the following:

"(2)(A) If the Commission receives a petition for the issuance, amendment, or repeal of a rule described in subsection (a)(1)(B) of this section, the Commission shall either grant or deny the petition within 120 days after the date the petition is received by the Commission. If the Commission grants such a petition, it shall, as soon as is practicable after the date the petition is granted, commence a proceeding under this section as requested by the petition. If the Commission denies such a petition, it shall notify the petitioner of the denial and the reasons therefor and shall publish such reasons in the Federal Register.

"(B)(i) If—

"(I) a petition is filed with the Commission for the initiation of a proceeding under this section for the issuance of a rule, described in subsection (a)(1)(B), to define an act or practice as an unfair or deceptive act or practice in or affecting commerce,

"(II) such petition alleges that such acts or practices have a substantial adverse effect on a significant number of persons, that the Commission has not taken any action under this Act with respect to such acts or practices, and that failure of the Commission to issue the rule with respect to which the petition was filed will result in a continuation of such acts or practices and their adverse effects, and

"(III) the Commission denies such petition or fails to grant or deny such petition within the 120-day period described in subparagraph (A),

the petitioner may apply to an appropriate district court of the United States for an order directing the Commission to take the action requested in such petition. Any such application shall be filed within 60 days after the date the Commission denies such petition or, if the Commission did not grant or deny such petition within such 120-day period, within 60 days after the expiration of such period. The Commission shall answer the application within 60 days of the service on the Commission of the application or within such other period as the court may prescribe.

"(ii) In a proceeding for the issuance of an order under clause (i), the court shall provide for an expeditious determination of the matter presented by the application for the order. Such determination shall be based on a consideration by the court of the petition with respect to which such proceeding is brought, any submission filed with the Commission respecting such petition, the responses of the Commission to such petition and to the application for such order, and such other evidence as the court may deem necessary to determine whether the petitioner has made the demonstration described in clause (iii).

"(iii) If, in a proceeding commenced under clause (i) respecting a petition to initiate a proceeding for the issuance of a rule described in subsection (a)(1)(B), the petitioner demonstrates to the satisfaction of the court, by a preponderance of the evidence, that—

"(I) the acts or practices with respect to which such petition was filed with the Commission are unfair or deceptive acts or practices in or affecting commerce within the meaning of section 5(a)(1),

"(II) such acts or practices have a substantial adverse effect on a significant number of persons,

"(III) the Commission has not taken any action under this Act with respect to such acts or practices, and

"(IV) failure of the Commission to issue the rule with respect to which the petition was filed will result in a continuation of such acts or practices and their adverse effects,

the court shall order the Commission to initiate the proceeding requested in the petition.

"(iv) The issuance of an order under clause (iii) or the denial of an application for such an order shall be given no effect in any other action or proceeding.".

STUDY OF ALCOHOLIC BEVERAGE ADVERTISING

SEC. 13. The Federal Trade Commission shall conduct a study (1) to determine if the advertising, in newspapers, magazines, and other communications media, of alcoholic beverages produced by distillers constitutes an unfair or deceptive act or practice within the meaning of section 5(a)(1) of the Federal Trade Commission Act (15 U.S.C. 45(a)(1)); and (2) if it determines such advertising does constitute such an act or practice, to determine if existing legislative authority is sufficient to effectively prevent it. Within one year after the date of the enactment of this Act the Commission shall report to the Congress the results of such study together with such recommendations for legislation as it considers necessary. For purposes of this section, the term "distiller" has the meaning given it by section 5002(a)(5) of the Internal Revenue Code of 1954 (defining distiller).

AUTHORIZATION OF APPROPRIATIONS

SEC. 14. (a) The first sentence of section 21 of the Federal Trade Commission Act, as so redesignated by section 8, is amended (1) by striking out "and not to exceed" and inserting in lieu thereof "not to exceed"; and (2) by inserting after "1977" the following: "; not to exceed $61,000,000 for the fiscal year ending September 30, 1978; and not to exceed $70,000,000 for the fiscal year ending September 3, 1979".

(b) The second sentence of section 21 of the Federal Trade Commission Act, as so redesignated by section 8, is amended by striking out "1977" and inserting in lieu thereof "1978".

TECHNICAL AND MISCELLANEOUS AMENDMENTS

SEC. 15. (a)(1) The third undesignated paragraph of section 4 of the Federal Trade Commission Act (15 U.S.C. 44) is amended to read as follows:

" 'Person, partnership, or corporation' shall be deemed to include any individual, partnership, corporation, or other organization or legal entity.".

(2) Section 5(m)(1)(A) and section 5(m)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 45(m)(1)(A); 45(m)(1)(B)) each are amended by adding at the end thereof the following new sentence: "In such actions, the United States district courts are empowered to grant mandatory injunctions and such other and further equitable relief as they deem appropriate.".

(3) Section 6 of the Federal Trade Commission Act (15 U.S.C. 46) is amended by adding at the end thereof the following new paragraph:

"(i) To accept gifts and voluntary and uncompensated services, notwithstanding the provisions of section 3679 of the Revised Statutes (31 U.S.C. 665(b)).".

(4)(A) The first undesignated paragraph of section 9 of the Federal Trade Commission Act (15 U.S.C. 49) is amended—

(i) by inserting immediately after "for the purposes of this Act" the following: ", or any other provision of law enforced by the Commission,"; and

(ii) by inserting "or physical" immediately after "documentary" each place it appears therein.

(B) The second undesignated paragraph of section 9 of the Federal Trade Commission Act (15 U.S.C. 49), as amended by section 3(a), is amended by inserting "or physical" immediately after "documentary".

(C) The third undesignated paragraph of section 9 of the Federal Trade Commission Act (15 U.S.C. 49) is amended by inserting "or physical" immediately after "documentary".

(D) The third sentence of the fifth undesignated paragraph of section 9 of the Federal Trade Commission Act (15 U.S.C. 49) is amended by inserting immediately after "writing" the following: ", or shall be recorded through the use of any electronic or mechanical recording device,".

(b)(1) Section 5 of the Wool Products Labeling Act of 1939 (15 U.S.C. 68c) is amended by striking out "wood" in the second paragraph and inserting in lieu thereof "wool".

(2) Section 9(b)(1) of the Fur Products Labeling Act (15 U.S.C. 69g(b)(1)) is amended by striking out "volating" and inserting in lieu thereof "violating".

A TEXAS MAYOR TURNS THE TABLES ON BUREAUCRACY

(Mr. ROUSSELOT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ROUSSELOT. Mr. Speaker, Healthways magazine of Des Moines, Iowa, in its February 1977 edition reproduced an article that had appeared in the May 1976 issue of Conservative Digest entitled "A Texas Mayor Turns the Tables" by Philip Nicolaides. Mayor Ernie Angelo of Midland, Tex., has in fact made a point long overdue about how the American public perceives the problems of dealing with Federal agencies, in this case, HUD. Mayor Angelo and his fellow city council members decided to provide a lesson for the Federal bureaucracy and HUD, specifically, by "returning a letter of guidelines" of which all of us as Members of Congress should be made aware.

Let me submit for my colleagues attention the article from Healthways and say to Ernie Angelo, the mayor of Midland, Tex., that the Congress of the United States does, indeed, hear you and we hope that by now you have received a response from HUD. At least, we hope that this taste of their own medicine will stir the thinking of Federal bureaucrats:

A TEXAS MAYOR TURNS THE TABLES

(By Philip Nicolaides)

Last October (1975) the area director of the Department of Housing and Urban Development (HUD) called the office of Ernie Angelo, the mayor of Midland, Texas, to request a reserved parking space for HUD officials at the Midland Regional Airport.

HUD didn't know what it was getting into. Ernie Angelo is no run-of-the-mill mayor. He's a spunky conservative who is sick to death of the Niagara of useless reporting demands and red tape that gushes out of Washington. So he and his fellow City Council members got together and decided to give the federal bureaucracy an object lesson in what it feels like to be on the receiving end.

"The overpaid paper shufflers on the Potomac can dish it out," Angelo says, 'we just wanted to see if they can take it." So

he fired off the following letter to HUD in response to their request:

A FEW GUIDELINES

DEAR SIRS: Reference is made to the request of Mr. J. C. Hays, Community Development Area Representative from your office, for a parking space at the Midland Regional Air Terminal for a U.S. government vehicle to be used by your staff when they visit the West Texas area from time to time.

'We will of course be happy to process a proper application, but a simple request by telephone or letter just won't do at all. In order to justify as many public employees as possible and to make things as difficult as possible for anyone trying to do business with the City of Midland, we have adopted a few regulations and guidelines with which you must comply which are set out as follows:

"1. You must obtain from the U.S. Government Printing Office, or the National Archives, or the Library of Congress, or someplace, a supply of application form COM-1975.

"You must submit three executed and 14 confirmed copies of this application which we will then distribute to our Department of Aviation, Fire and Police Departments, the Public Works Department, the city attorney's office and anyone else we can think of when they arrive.

"2. With the application submit the make and model of the proposed vehicle together with certified assurances that everyone connected with the manufacture, servicing and operation of same were paid according to a wage scale that complies with the requirements of the Davis-Bacon Act.

"3. Submit a genealogical table for everyone who will operate said vehicle so that we can ascertain that there will be a precisely exact equal percentage of whites, blacks and other minorities, as well as women and the elderly.

"4. Submit certified assurances that this plan has been discussed at length with the EEOC and submit that commission's certification that requirement 3 above has been fully complied with.

"5. Submit certified assurance that all operators of said vehicle and any filling-station personnel that service same will be equipped with steel-toed boots, safety goggles and crash helmets and that the vehicle will be equipped with at least safety belts and an air bag to show compliance with Occupational Safety and Health Act.

"6. Submit an Environmental Impact Statement. You will probably want to hire an expensive consultant for this item, as you probably have no one on your staff with the expertise to prepare it.

"The statement should show the number of times the vehicle will be operated, times of day, the name of the operator of the vehicle, the number of other vehicles that might be coming into or leaving the parking lot at the same time, as well as the number and type of aircraft that might be landing or taking off at the airport at the same time and an exact conclusion as to the cumulative effect this will have on the atmosphere in West Texas.

"7. In order to obtain approval of a negative Environmental Impact Statement, you will not be able to:

"(a) operate the car on gasoline produced from domestic oil because that would require that someone discover it, process it and deliver it, and it is possible that some private person, firm or corporation might realize a profit as a result of such activties and this simply won't do;

"However, if the gasoline is produced from foreign oil, this will be acceptable and we don't care what grade it is or how much profit the foreign producers make, nor will we even concern ourselves about this;

"(b) operate the car from energy produced by coal because this might require digging a hole in the ground and that is simply not acceptable in the United States;

"(c) operate the car by solar energy because this is the most abundant source of energy available and it is entirely too practical to justify any expenditure for research and development;

"(d) operate the car with nuclear energy because it is available.

"The use of wind power is acceptable.

"8. Submit a certificate from the attorney general of the United States that all of the certifiers of the above assurances are duly and legally authorized by Congress to make such certificates and that Mr. Hays is duly and legally authorized by Congress and the President to make this application, and that the United States of America is a duly organized and legally existing independent nation with full right, power and authority to operate automobiles in the first place.

"Upon receipt of the foregoing, rest assured that the application will be promptly referred to someone for approval. We cannot state at this time who that someone will be because whatever department he or she is in will be undergoing a process of reorganization and the delegation of authority to approve will change from day to day and you will just have to take potluck as to who has authority to approve your application, if anyone.

"Sincerely,

"ERNEST ANGELO, Jr.
"Mayor."

Word of the Angelo letter leaked out to the local press. They pounced on it as an updated version of the classic news story: "Man bites dog." The item was picked up by Paul Harvey who mentioned it in his nationally syndicated radio commentary.

MANY BOUQUETS

Since then Mayor Angelo has received hundreds of letters from every state in the union commending him for giving the bureaucrats a well-deserved hotfoot. Some even came from federal officials, including one circuit court judge, who wrote, "Right on!"

But what about HUD? Angelo reported he had half expected a witty reply. But so far, not a word.

"It may be," Angelo says, "that federal bureaucrats aren't allowed to have a sense of humor. If they did, they might laugh themselves into dealing with people in a reasonable way and cutting some of the useless red tape. Why, for all I know," he muses, "they may have taken the letter seriously and been conducting studies and filling out forms for the past four months."

Angelo, who has served as mayor for four years, is dead serious about the need to scale down the federal bureaucracy and eliminate the "tons of useless paperwork and reporting requirements with which it burdens local government, business, and the average citizen."

FAULTY ECONOMETRIC MODELS

(Mr. ROUSSELOT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ROUSSELOT. Mr. Speaker, the following provides a concise and effective critique on the reliability and worth of econometric models. In that the figures we are debating in the third budget resolution today and tomorrow are based on the calculations and results of these Keynesian models, I think it is helpful to understand the faulty assumptions on which they are based:

ECONOMETRIC MODELS, ECONOMIC POLICY AND POLITICS

(By Paul Craig Roberts)

The ongoing debate over the proper amount and type of economic stimulus is heavily influenced by econometric models. The models are used to simulate the effects on the economy of the various policy alternatives such as tax rebates, tax rate reductions, and increases in government spending programs. They all share in common the Keynesian emphasis on the primacy of spending. Once the models are accepted, their emphasis on demand sets the limits to the debate, regardless of the political persuasion of the participants.

The basic idea is that a government budget deficit leads to an increase in disposable income and consumer spending. The models assume that as long as there is unemployment or a growing labor force, output will rise to meet the additional demand. Thus, a deficit increases spending which increases GNP and employment. The economic content of the models is captured by the oft-heard statement that "the reason people produce is that people buy." In this view, a tax rebate and a permanent personal income tax rate reduction both impact on the economy in the same way by increasing disposable income and total spending on goods and services.

Everyone has heard of supply and demand except the builders of econometric models, who apparently have heard only of demand. As a result the models cannot take into account two additional reasons why people produce: for income and for profit. Since they cannot simulate supply side effects, they cannot show the impact that alternative policies have on these two powerful economic motives.

A correct model would show the relationships between quantities of productive inputs and their prices. However, the models upon which economic policy depends only relate numbers of people employed to levels of spending. Thus, the models show that a tax rebate and a permanent personal income tax rate reduction stimulate GNP and employment by stimulating spending. But they cannot show that only a rate reduction also stimulates production by increasing the after-tax rewards to work and investment. Indeed, in the models a reduction in personal income tax rates only affects GNP and employment by raising disposable income, and production increases only in response to increased spending.

Both Congress and the Executive branch rely on the same models—Chase, DRI and Wharton. The government is spending a small fortune on guidance from econometric models that see only half of the picture. For example, in simulating the effects on economic activity of changes in personal income tax rates, the models focus only on changes in disposable income and spending and neglect the changes in relative prices. Yet, it is relative prices that influence the critical choices between income and leisure and between current consumption and future income.

As an illustration, consider the decision to produce. There are two uses of time—work and leisure. Each use has a price in terms of the other. The price of additional leisure is the amount of income that is foregone by not working, and it is influenced by the tax rates. The higher the tax rates, the smaller the amount of the after-tax income that is foregone by enjoying additional leisure. Thus, the higher the tax rates, the lower the relative price of leisure. If the tax rates were 100 percent, the relative price of leisure would be zero.

We often hear that a person works the first five months of the year for the government before he starts working for himself. But that is not the way it works. The first part of the year the person works for himself. He begins working for the government only when his income reaches taxable levels. The more he earns, the more he works for the government until the rising marginal rate of taxation discourages him from further work.

Take the case of a medical doctor, who encounters the 50 percent rate after 6, 8 or

10 months of work. He is faced with working another 6, 4 or 2 months for only 50 percent of his earnings. Such a low after-tax return to effort encourages doctors to share practices, to reduce their working hours, and to take longer vacations.

The high tax rates shrink the tax base by discouraging doctors from earning additional amounts of taxable income. They also drive up the cost of medical care by reducing the supply of medical services. A tax rate reduction would raise the relative price of leisure and result in more taxable income being earned and, also, in a greater supply of medical services.

The effect of tax rates on the decision to earn additional taxable income operates across the tax bracket spectrum. It is limited neither to doctors nor to the top tax bracket. Studies by Martin Feldstein of Harvard show that the tax rates on the average worker practically eliminate the gap between his after-tax take-home pay and the level of his untaxed unemployment compensation. Here is a case where a marginal tax rate of 30 percent (including state and federal income and social security taxes) reduces the relative price of leisure so low that it raises the measured rate of unemployment by 1.25 percent and shrinks GNP and the tax base by the lost production of one million workers.

Now consider how tax rates affect the decision concerning the use of income. There are two uses of income—consumption and investment (saving), and each use has a price in terms of the other. The price of additional current consumption is the amount of future income that is foregone by not investing, and it is influenced by the tax rates. The higher the tax rates, the smaller the amount of after-tax future income that is foregone by enjoying additional current consumption. Thus, the higher the tax rates, the lower the relative price of current consumption.

Take the case of the Englishman facing the 98 percent marginal tax rate on investment income who faces a decision between investing $50,000 at a 17 percent rate of return, which would bring him $8500 per year in before-tax future income, or purchasing a Rolls Royce. Since the after-tax value of the future income is only $170 per year, the price to him of additional consumption is very low. He can enjoy the services of a fine motor car for only $170 per year. This is why today so many Rolls Royces are seen in England. They are mistaken for signs of prosperity, but in fact are signs of high tax rates on investment income. The principle involved is most easily illustrated by extreme example, but as in the case of the decision to produce, it operates across the spectrum of tax rates.

A tax rate reduction would raise the relative price of current consumption and result in more investment. The rate reduction not only increases disposable income and total spending, it also changes the composition of total spending toward more investment. Thus, labor productivity, employment, and real GNP are raised above the levels that would result from a different composition of the same amount of total spending. The relative price change, then, moves both consumption and investment to higher levels.

Since the econometric models only pick up one of the three ways in which a reduction in personal income tax rates works to increase GNP and employment, they grossly exaggerate the tax revenue losses which would result from cutting tax rates. The only feed-back on the revenue base that they pick up is the expansion of output in response to an increase in buying. They do not pick up the expansion in output which results from the changes in the relative prices.

In short, the econometric models are not aware that a permanent personal income tax rate reduction stimulates incentives in addition to spending and will call forth a larger increase in GNP and employment in response to the increase in spending. The models do not take into account that compared to a rebate of equal amount, a rate reduction will have a bigger effect on expanding the tax base and pull in more tax revenue to offset the initial revenue loss. Thus, the models produce erroneous estimates which say that $X billion in rate reductions will add the same amount to the government's budget deficit as $X billion in per capita rebates.

This is not a full account of the defects of the reigning econometric models. Two of the "big three" predict GNP declines if corporate tax rates are reduced. (Chase is the exception.) In the case of the DRI model, the explanation is that investment does not depend on after-tax profits in a very strong way. However, investment is very sensitive to changes in the interest rates. Interest rates go up when the government sells bonds to finance the deficit that results from the corporate tax cut. As a result of the rise in interest rates, investment falls. Thus, in the DRI model a tax reduction that increases the profitability of investment reduces investment!

The reader is no doubt wondering why such defective models remain uncorrected and in such wide use. The answer may be that they are mainly useful for short-run forecasting and not for economic policy simulation. Sailors can navigate very well by the Ptolemaic system, even though it is false.

As we are ending on a speculative note, I would point out that by showing tax rate reductions, tax rebates, and government spending programs financed by deficits to be equally effective economic policy tools, the models serve the interests of egalitarians by allowing income redistribution under the policy guise of fighting unemployment. And they serve the political interests of the Democratic Party by allowing it to build spending constituencies that it could not finance by raising the statutory tax rates.

By showing that tax rate reductions produce the same deficits that overspending revenues does, the models leave the Republicans out in the political cold where they fight deficits and become the tax collector for Democratic spending programs. But more importantly, employment opportunities and higher levels of living standards for everyone will continue to be foregone until the supply side—which is where production actually takes place—gets plugged into the econometric models.

(Note.—Dr. Roberts is Chief Economist, Minority Staff, Committee on the Budget, U.S. House of Representatives, and Adjunct Professor of Economics at George Mason University.)

Mr. Speaker, let me include at this point a copy of the minority substitute resolution on the third concurrent budget resolution:

H. CON. RES. 122

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenues is $347,096,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $19,000,000,000;

(2) the appropriate level of total new budget authority is $440,662,000,000;

(3) the appropriate level of total budget outlays is $404,993,000,000.

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $57,897,000,000, and

(5) the appropriate level of the public debt is $708,000,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 304 of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1976, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Ms. OAKAR (at the request of Mr. WRIGHT), for February 22 and 23, on account of death in the family.

Mr. GONZALEZ (at the request of Mr. KAZEN) for today, on account of illness.

Mr. DENT (at the request of Mr. WRIGHT), for February 22 and 23, on account of a death in the family.

Mr. FOUNTAIN (at the request of Mr. WRIGHT), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. FASCELL for 30 minutes, today.

(The following Members (at the request of Mr. EDWARDS of Oklahoma), to revise and extend their remarks, and to include extraneous matter:

Mr. MCKINNEY, for 5 minutes, today.
Mr. WHALEN, for 5 minutes, today.
Mr. MARKS, for 5 minutes, today.
Mr. YOUNG of Alaska, for 20 minutes, tomorrow.
Mr. BOB WILSON, for 5 minutes, today.
Mr. RAILSBACK, for 5 minutes, today.
Mr. BAUMAN, for 30 minutes, today.
Mr. KEMP, for 10 minutes, today.

(The following Members (at the request of Mr. PEASE) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. WIRTH, for 5 minutes, today.
Mr. CORNELL, for 15 minutes, today.
Mr. ULLMAN, for 5 minutes, today.
Mr. BLOUIN, for 5 minutes today.
Mr. FRASER, for 10 minutes, today.
Mr. MINISH, for 5 minutes, today.
Mr. FLOOD, for 5 minutes, today.
Mr. FORD of Tennessee, for 5 minutes, today.
Mr. STAGGERS, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. LUKEN, for 5 minutes, today.
Mr. COTTER, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. ECKHARDT and to include extraneous matter notwithstanding the fact that it exceeds three pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $942.

Mr. SNYDER to revise and extend his remarks about the son of Congressman CARTER.

Mr. ROUSSELOT immediately following Mr. LATTA.

Mr. MICHEL to include remarks in general debate on House Concurrent Resolution 110.

(The following Members (at the request of Mr. EDWARDS of Oklahoma), and to include extraneous matter:)

Mr. CONABLE.
Mr. FINDLEY.

SENATE CONCURRENT RESOLUTIONS REFERRED

Concurrent resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. Con. Res. 2. Concurrent resolution relative to military personnel missing in action or killed in action and body not recovered in Southeast Asia; to the Committees on International Relations and Armed Services.

S. Con. Res. 3. Concurrent resolution to reaffirm the honor of those who served in Southeast Asia and to urge establishment of a Presidential Task Force on Prisoners of War and Missing in Action; to the Committee on Armed Services.

ADJOURNMENT

Mr. PEASE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

Accordingly (at 4 o'clock and 30 minutes p.m.), the House adjourned until tomorrow, Wednesday, February 23, 1977, at 3 o'clock p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

792. A letter from the President of the United States, transmitting proposed supplemental appropriations for fiscal year 1977 and budget amendments for fiscal year 1978 to implement his economic recovery program (H. Doc. No. 95–85); to the Committee on Appropriations and ordered to be printed.

793. A letter from the Secretary of Housing and Urban Development, transmitting the 10th report on the Emergency Homeowners' Relief Act, pursuant to section 111 of the act; to the Committee on Banking, Finance, and Urban Affairs.

794. A letter from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to authorize additional funds for housing assistance for lower-income Americans in fiscal year 1977, and for other purposes; to the Committee on Banking, Finance, and Urban Affairs.

795. A letter from the Chief Commissioner, U.S. Court of Claims, transmitting a report on the allowance of attorney expense claims in proceedings under the Alaska Native Claims Settlement Act in docket No. F-29 (John W. Hendrickson and Hendrickson & Rowland), pursuant to section 20 of the act; to the Committee on Interior and Insular Affairs.

796. A letter from the Administrator, National Aeronautics and Space Administration, transmitting a report on professional and scientific positions established in the agency during calendar year 1976, pursuant to 5 U.S.C. 3104(c); to the Committee on Post Office and Civil Service.

797. A letter from the Secretary of Labor, transmitting a draft of proposed legislation to extend the emergency unemployment compensation program, to amend the number of weeks of benefits, and for other purposes; to the Committee on Ways and Means.

798. A letter from the Acting Comptroller General of the United States, transmitting a report on improvements by the Government Printing Office in its management of printing operations (LCD–77–408, February 22, 1977); jointly, to the Committees on Government Operations, and House Administration.

799. A letter from the Chairman, Federal Election Commission, transmitting the Commission's fiscal year 1978 authorization request, pursuant to section 310(d)(1) of the Federal Election Campaign Act of 1971, as amended; jointly, to the Committees on House Administration, and Appropriations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. THOMPSON: Committee on House Administration. House Resolution 287. Resolution to amend the Rules of the House of Representatives. and for other purposes; with amendment (Rept. No. 95–21, Pt. II). Ordered to be printed.

Mr. REUSS: Committee on Banking, Finance, and Urban Affairs. H.R. 3365. A bill to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, and for other purposes; with amendment (Rept. No. 95–23). Referred to the Committee of the Whole House on the State of the Union.

Mr. MURPHY of Illinois: Committee on Rules, House Resolution 304. Resolution providing for the consideration of H.R. 11. A bill to increase the authorization for the Local Public Works Capital Development and Investment Act of 1976 (Rept. No. 95–24). Referred to the House Calendar.

Mr. ULLMAN: Committee on Ways and Means. Adverse report on House Concurrent Resolution 80. Concurrent resolution to disapprove the determination of the President denying import relief under the Trade Act of 1974 to the U.S. honey industry (Rept. No. 95–25). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions

were introduced and severally referred as follows:

By Mr. CORMAN:

H.R. 3723. A bill to extend the emergency unemployment compensation program, to amend the number of weeks of benefits, and for other purposes; to the Committee on Ways and Means.

By Mr. ASHLEY:

H.R. 3724. A bill to authorize additional funds for housing assistance for lower-income Americans in fiscal year 1977, to extend the Federal riot insurance and crime insurance programs, to establish a National Commission on Neighborhoods, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BREAUX:

H.R. 3725. A bill to amend title 5, United States Code, to extend certain benefits to former employees of county committees established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BREAUX (for himself, Mr. BROOKS, Mr. LEGGETT, Mr. PICKLE, Mr. YOUNG of Texas, Mr. BOWEN, and Mr. HUCKABY):

H.R. 3726. A bill to extend the Rice Production Act of 1975 through the 1978 crop; to the Committee on Agriculture.

By Mr. BRECKINRIDGE:

H.R. 3727. A bill to amend section 142 of title 28, United States Code, relating to the furnishing of accommodations to judges of the courts of appeals of the United States; to the Committee on the Judiciary.

H.R. 3728. A bill to provide for additional district judges for the State of Kentucky; to the Committee on the Judiciary.

By Mr. BRINKLEY:

H.R. 3729. A bill to amend the Internal Revenue Code of 1954 to provide a trade or business deduction to firemen for meals which they eat while at their post of duty overnight; to the Committee on Ways and Means.

By Mr. BROOKS:

H.R. 3730. A bill to authorize additional appropriations under title II of the Public Works Employment Act of 1976; to the Committee on Government Operations.

By Mr. COCHRAN (for himself and Mr. VANDER JAGT):

H.R. 3731. A bill to amend the Internal Revenue Code of 1954 to provide that the mileage rate used to determine the amount allowable as a deduction for the business use of automobiles shall be the same as the rate used to reimburse Federal employees; to the Committee on Ways and Means.

By Mr. COHEN (for himself, Mr. CONTE, Mr. DOWNEY, and Mr. MCKINNEY):

H.R. 3732. A bill to enact the National School-Age Mother and Child Health Act of 1977; to the Committee on Interstate and Foreign Commerce.

By Mr. COHEN (for himself, Mr. GEPHARDT, Mr. HANNAFORD, Mr. MCCORMACK, Mr. PANETTA, Mr. RICHMOND, Mrs. SPELLMAN, Mr. STEERS, Mr. TREEN, Mr. WOLFE, Mr. KRUEGER, Mr. FLYNT, Mr. STARK, and Mr. TRAXLER):

H.R. 3733. A bill to amend title 38 of the United States Code in order to provide that the fees payable to agents or attorneys who represent veterans in allowed claims under the veterans laws shall be paid by the Administrator rather than deducted from amounts awarded under the claims; to the Committee on Veterans' Affairs.

By Mr. COHEN (for himself, Mr. GEPHARDT, Mr. HANNAFORD, Mr. MCCORMACK, Mr. PANETTA, Mr. RICHMOND, Mrs. SPELLMAN, Mr. STEERS, Mr. TREEN, Mr. WOLFF, Mr. KRUEGER, Mr. FLYNT, Mr. STARK, and Mr. TRAXLER):

H.R. 3734. A bill to amend title II of the Social Security Act to provide that attorneys' fees allowed in administrative or judicial proceedings under that title (or under title XVIII of such act), in cases where the claimants are successful, shall be paid by the Secretary of Health, Education, and Welfare rather than deducted from the amounts awarded claimants; to the Committee on Ways and Means.

By Mr. COHEN (for himself, Mr. RINALDO, and Mrs. SPELLMAN):

H.R. 3735. A bill to provide for quality assurance and utilization control in home health care under the medicare, medicaid, and social services programs in accordance with a plan to be developed by a commission specifically established for that purpose; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. CONYERS (for himself, Mr. BROWN of California, Mr. ECKHARDT, Mr. MITCHELL of Maryland, Mr. STARK, Mr. ROSENTHAL, Mr. EDWARDS of California, Mr. CARR, Mr. BADILLO, Mr. FORD of Tennessee, Mr. STOKES, Mr. DOWNEY, Mr. HAWKINS, and Mr. MOAKLEY):

H.R. 3736. A bill to establish certain rules with respect to the appearance of witnesses before grand juries in order better to protect the constitutional rights and liberties of such witnesses under the fourth, fifth, and sixth amendments to the Constitution, to provide for independent inquiries by grand juries, and for other purposes; to the Committee on the Judiciary.

By Mr. CONYERS (for himself, Mr. MOFFETT, and Mr. LEFANTE):

H.R. 3737. A bill to designate the birthday of Martin Luther King, Jr., a legal public holiday; to the Committee on Post Office and Civil Service.

By Mr. CORNELL:

H.R. 3738. A bill to amend title II of the Social Security Act to provide that an individual may become entitled to widow's or widower's insurance benefits at age 50 whether or not disabled, subject to the existing actuarial reduction prior to attaining age 65 but with full benefits after attaining that age; to the Committee on Ways and Means.

By Mr. ROBERT W. DANIEL, JR. (for himself, Mr. ABDNOR, Mr. BEDELL, Mr. BLOUIN, Mr. BOWEN, Mr. BURLESON of Texas, Mr. CLAY, Mr. CLEVELAND, Mr. DORNAN, Mr. EVANS of Colorado, Mrs. FENWICK, Mr. FORD of Tennessee, Mr. GOODLING, Mr. GUDGER, Mr. ICHORD, Mr. KELLY, Mr. LEDERER, Mr. LONG of Maryland, Mr. MCHUGH, Mr. MILLER of Ohio, Mr. NIX, Mr. RINALDO, Mr. SCHEUER, Mr. SISK, and Mr. STEIGER):

H.R. 3739. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

By Mr. DERWINSKI:

H.R. 3740. A bill to amend the Food Stamp Act of 1964, to exclude from coverage under the act households which have members who are on strike, and for other purposes; to the Committee on Agriculture.

By Mr. DERWINSKI (for himself and Mr. HYDE):

H.R. 3741. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange services; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. EDGAR:

H.R. 3742. A bill to permit credit for civil service retirement purposes and in computing length of service for purposes of determining leave, health insurance, severance pay, tenure, and status in the case of certain individuals who performed National Guard technician service before January 1, 1969; to the Committee on Post Office and Civil Service.

By Mr. FITHIAN:

H.R. 3743. A bill to foster and continue the family farm in the United States by providing young farmers with the necessary assistance to purchase family farm units, and for other purposes; to the Committee on Agriculture.

By Mr. DENT:

H.R. 3744. A bill to amend the Fair Labor Standards Act of 1938 to increase the minimum wage rate under that act, to provide for an automatic adjustment in such wage rate, and to repeal the credit against the minimum wage which is based on tips received by tipped employees; to the Committee on Education and Labor.

By Mr. HARRIS:

H.R. 3745. A bill to provide for the resolution of claims and disputes relating to Government contracts awarded by executive agencies; to the Committee on the Judiciary.

By Mr. HARSHA:

H.R. 3746. A bill to amend section 201 of the Appalachian Regional Development Act of 1965; to the Committee on Public Works and Transportation.

H.R. 3747. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mrs. HECKLER:

H.R. 3748. A bill to amend the Tariff Schedules of the United States; to the Committee on Ways and Means.

By Mr. HUGHES (for himself, Mr. BEDELL, Mr. BONIOR, Mr. DANIELSON, Mr. FRASER, Mr. HOWARD, Mr. KILDEE, Mr. MAZZOLI, Mrs. MEYNER, Mr. MURPHY of Pennsylvania, Mr. RODINO, Mr. ROYBAL, Mr. STARK, Mr. STUDDS, and Mr. TONRY):

H.R. 3749. A bill to establish a commission to study the production, distribution, and use of natural gas; to the Committee on Interstate and Foreign Commerce.

By Mr. JOHNSON of Colorado:

H.R. 3750. A bill to require the Administrator of the Environmental Protection Agency to exercise his authority under the Safe Drinking Water Act to make grants for certain demonstration projects; to the Committee on Interstate and Foreign Commerce.

By Mr. KEMP:

H.R. 3751. A bill to amend the Federal Water Pollution Control Act to permit States to perform certain responsibilities; to the Committe on Public Works and Transportation.

By Mr. KOCH:

H.R. 3752. A bill to amend the Federal Election Campaign Act of 1971 to provide that payments made with respect to certain campaign materials shall not be considered to be contributions under such act, and for other purposes; to the Committee on House Administration.

By Mr. LEGGETT (for himself, Mr. FORSYTHE, Mr. MCCLOSKEY, Mr. OBERSTAR, Mr. AKAKA, Mr. HUGHES, and Mr. EVANS of Delaware):

H.R. 3753. A bill to bring certain governing international fishery agreements within the purview of the Fishery Conservation Zone Transition Act; to the Committee on Merchant Marine and Fisheries.

By Mr. LEHMAN:

H.R. 3754. A bill to provide a 2-year extension of time for the payment of so much

of any income tax as is attributable to the application to 1976 of the change made by the Tax Reform Act of 1976 in the exclusion for sick pay; to the Committee on Ways and Means.

By Mr. LEHMAN (for himself and Mrs. SPELLMAN):

H.R. 3755. A bill to provide for the reinstatement of civil service retirement survivor annuities for certain widows and widowers whose remarriages occurred before July 18, 1966, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. LEHMAN (for himself, Mr. SIKES, Mr. FUQUA, Mr. BENNETT, Mr. CHAPPELL, Mr. KELLY, Mr. YOUNG of Florida, Mr. GIBBONS, Mr. IRELAND, Mr. FREY, Mr. BAFALIS, Mr. ROGERS, Mr. BURKE of Florida, Mr. PEPPER, and Mr. FASCELL):

H.R. 3756. A bill to amend the Federal Aviation Act of 1958 to authorize reduced fare transportation on a space-available basis for elderly persons and handicapped persons, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. McFALL:

H.R. 3757. A bill to amend the Internal Revenue Code of 1954 to exempt from treatment as an industrial development bond certain bond issues the proceeds of which are used for facilities for the furnishing of water and hydroelectric energy, or either; to the Committee on Ways and Means.

By Mr. McKINNEY:

H.R. 3758. A bill to amend title II of the Social Security Act to reduce from 20 to 10 years the length of time a divorced woman's marriage to an insured individual must have lasted in order for her to qualify for wife's or widow's benefits on his wage record: to the Committee on Ways and Means.

By Mr. MEEDS:

H.R. 3759. A bill to reaffirm the intent of Congress regarding the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MIKVA (for himself, Mr. OTTINGER, and Mr. ROSTENKOWSKI):

H.R. 3760. A bill to prohibit the importation, manufacture, sale, purchase, transfer, receipt, or transportation of handguns, except for or by members of the Armed Forces, law enforcement officials, and, where authorized, licensed importers, manufacturers, dealers, and pistol clubs; to the Committee on the Judiciary.

By Mr. MIKVA (for himself, Mr. LLOYD of California, Mrs. BEDELL, Mr. BONIOR, Mr. DERWINSKI, Mr. DOWNEY, Mr. EDGAR, Mrs. FENWICK, Mr. HANNAFORD, Mr. HYDE, Mr. JENRETTE, Mr. LEHMAN, Mr. MATHIS, Mr. MAZZOLI, Mr. McCLOSKEY, Mrs. MEYNER, Mr. MURPHY of Pennsylvania, Mr. WHITEHURST, and Mr. CHARLES WILSON of Texas):

H.R. 3761. A bill to abolish certain Federal regulatory agencies and to cause the self-destruct of certain Federal regulatory agencies or their successor agencies after a specified period of time, and for other purposes; jointly, to the Committees on Government Operations and Rules.

By Mr. MINISH:

H.R. 3762. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit with respect to expenditures for residential solar energy equipment; to the Committee on Ways and Means.

By Mr. MOLLOHAN:

H.R. 3763. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. NATCHER:

H.R. 3764. A bill to amend the Veterans Education and Employment Assistance Act of 1976; to the Committee on Veterans' Affairs.

H.R. 3765. A bill to amend the Internal Revenue Code of 1954 to exempt certain agricultural aircraft from the aircraft use tax, to provide for the refund of the gasoline tax to the agricultural aircraft operator, and for other purposes; to the Committee on Ways and Means.

H.R. 3766. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. NOLAN:

H.R. 3767. A bill to provide grants to renovate existing structures for use as youth hostels in order to further the development of a national youth hostel system and increase the opportunity for outdoor recreation and educational travel; to the Committee on Interior and Insular Affairs.

By Mr. OBERSTAR:

H.R. 3768. A bill to establish mandatory penalties for use of a firearm during the commission of a felony, and for other purposes; to the Committee on the Judiciary.

By Mr. OBERSTAR (for himself, Mr. UDALL, Mr. BAUCUS, Mr. BEVILL, and Mr. SIMON):

H.R. 3769. A bill to promote safety and health in the mining industry, to prevent recurring disasters in the mining industry, and for other purposes; to the Committee on Education and Labor.

By Mr. OBERSTAR:

H.R. 3770. A bill to amend the Federal Food, Drug, and Cosmetic Act so as to require that in the labeling and advertising of drugs sold by prescription the "established name" of such drug must appear each time their proprietary name is used, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 3771. A bill to amend the Federal Food, Drug, and Cosmetic Act and the Fair Packaging and Labeling Act and to otherwise require the labels on foods and food products to disclose all of their ingredients and any changes in their ingredients, their nutritional content, accurate weight data, storage information, their manufacturers, packers, and distributors, and their unit prices and to provide for uniform product grading and prohibit misleading brand names; to the Committee on Interstate and Foreign Commerce.

H.R. 3772. A bill to require that certain products be prominently labeled as to date of manufacture, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 3773. A bill to require that durable consumer products be labeled as to durability and performance life; to the Committee on Interstate and Foreign Commerce.

H.R. 3774. A bill to terminate the Airlines Mutual Aid Agreement; to the Committee on Public Works and Transportation.

H.R. 3775. A bill to provide relief from shore damages attributable to high water levels in the Great Lakes and for other purposes; to the Committee on Public Works and Transportation.

H.R. 3776. A bill to amend the Internal Revenue Code of 1954 to require the establishment of formal procedures and criteria for the selection of individual income tax returns for audit, to inform individuals of the reasons why their returns were selected for audit, and for other purposes; to the Committee on Ways and Means.

H.R. 3777. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for expenses incurred by a taxpayer in making repairs and improvements to his residence, and to allow the owner of rental housing to amortise at an accelerated rate the cost of rehabilitating or restoring such housing; to the Committee on Ways and Means.

H.R. 3778. A bill to amend the Internal Revenue Code of 1954 to provide that pensions paid to retired policemen or firemen or their dependents, or to the widows or other survivors of deceased policemen or firemen, shall not be subject to the income tax; to the Committee on Ways and Means.

H.R. 3779. A bill to amend title XVIII of the Social Security Act to include, as a home health service, nutritional counseling provided by or under the supervision of a registered dietitian; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. O'BRIEN:

H.R. 3780. A bill to require automatic sprinkler systems in all skilled nursing facilities and intermediate care facilities as a condition of certification under the medicare, medicaid, and Veterans' Administration programs, and to authorize loans and grants to assist such facilities in purchasing and installing such systems; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. PEPPER (for himself, Mr. ANDERSON of California, Mr. HYDE, Mrs. KEYS, Mr. MARKS, Mr. RYAN, Mr. SCHEUER, Mr. SEIBERLING, Mr. UDALL, and Mr. WAMPLER):

H.R. 3781. A bill to amend the Federal Aviation Act of 1958 to authorize reduced rate transportation for certain additional persons on a space-available basis; to the Committee on Public Works and Transportation.

By Mr. PEPPER:

PETITIONS, ETC.

Under clause 1 of rule XXII,

51. The SPEAKER presented a petition of Bernardas Brizgys, Detroit, Mich., and others, relative to the Soviet occupation of Lithuania, Latvia, and Estonia, which was referred to the Committe on International Relations.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 11

By Mr. COCHRAN:

Page 3, strike out lines 8 through 20, inclusive, and insert in lieu thereof the following:

SEC. 2. (a) Subsection (a) of section 108 of the Local Public Works Capital Development and Investment Act of 1976 (Public Law 94-369) is amended by—

(1) inserting "(1)" immediately after "(a)";

(2) inserting immediately after "any one State" the following: "unless a State has no Indian tribe in such State in which case the minimum percentage to be granted within such State shall be three-fourths of 1 per centum";

(3) adding at the end of such paragraph (1) the following new sentence: "Notwithstanding any other provision of this Act, not more than 2½ per centum of all amounts appropriated to carry out this title shall be granted to Indian tribes under this Act for local public works projects."; and

(4) adding at the end of such subsection the following new paragraph (2):

"(2) The Secretary shall not approve any application for a grant in a State which would result in the payment to the recipient of such grant of an amount in excess of 10 per centum of the total amount available for grants under this Act in such State.".

Reletter suceeding subsections and references thereto accordingly.

By GARY A. MYERS:

On page 4, after line 16, add the following new subsection:

"(f) Subsection (e) of such section 108 is hereby repealed."

subsequent subsections to be designated accordingly.

Page 4, strike line 18 and insert in lieu thereof the following:

amended to read as follows:

"(f) Eighty-five per centum of all amounts appropriated to carry out this Act shall be granted for public works projects submitted by State or local governments given priority under clause (1) of the first sentence of subsection (c) of this section. The remaining 15 per centum shall be available for public works projects submitted by State or local governments in other classifications of priority.".

On page 3, after line 7, add the following new subsection:

"(g) No grant shall be made under this Act except for those projects for which the applicant has given satisfactory assurances, in such manner and form as may be required by the Secretary and in accordance with such terms and conditions as the Secretary may prescribe, that, the project can be completed not later than the last day of the 18th month which begins after the first day on which on-site labor is begun on such project.".

FACTUAL DESCRIPTIONS OF BILLS AND RESOLUTIONS INTRODUCED

Prepared by the Congressional Research Service pursuant to clause 5(d) of House rule X:

HOUSE BILLS

H.R. 1. January 4, 1977. Judiciary. Requires candidates for Federal office, Members of the Congress, and certain officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions.

H.R. 2. January 4, 1977. Interior and Insular Affairs. Regulates surface coal mining operations through a permit program administered by the Secretary of the Interior. Requires applicants to meet minimum environmental protection performance standards. Allows States to establish surface mining control programs at least as stringent as minimum Federal standards.

Includes provisions to fund mineral resources research programs and to provide for reclamation of abandoned mine sites.

H.R. 3. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends titles XVIII (Medicare) and XIX (Medicaid) of the Social Security Act to authorize payment of funds in accordance with an assignment from the person or institution providing the care or service involved if such assignment is made to a governmental agency or entity or is established by the order of a court.

Increases the penalties for defrauding the Medicare and Medicaid programs.

Requires the Secretary of Health, Education, and Welfare to suspend any physician or practitioner from participation in the Medicare or Medicaid programs whenever such individual is convicted of a criminal offense related to their involvement in such programs.

H.R. 4. January 4, 1977. Government Operations. Establishes the Commission on the Reorganization of the Executive Branch of the Government to study all instrumentalities of the Government except those of the Legislative or Judicial Branches to determine what changes in organization of such entities are necessary to eliminate duplication and improve efficiency. Requires the Commission to submit to the President and Congress a final report by December 31, 1978 at which time the Commission shall cease to exist. Permits the President to submit to Congress reorganization plans to implement any recommendation of the Commission.

H.R. 5.—January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Presents a national health care plan. Establishes a program of grants and loans for the construction and modernization of comprehensive ambulatory health care centers. Sets forth a health care insurance program.

Amends the Internal Revenue Code to provide an unlimited personal deduction for amounts paid for health care plans providing specified minimum benefits. Limits the deductions employers may take for contributions to employee health care plans. Limits the damages available in malpractice suits arising from the furnishing of services under such a health care plan, or under the Social Security Act.

H.R. 6.—January 4, 1977. Judiciary. Enacts title 11 of the United States Code to establish a uniform law of bankruptcy. Changes the administration of bankruptcy cases including the determination of claims and allowances. Amends procedures for liquidation and reorganization. Makes provisions for the adjustment of debts of municipalities and individuals with regular income.

Amends title 28 of the United States Code and the Federal Rules of Evidence as they pertain to the creation and the powers of bankruptcy courts. Provides for a transition period of the bankruptcy court system.

H.R. 7.—January 4, 1977. Education and Labor. Establishes a career education program for elementary and secondary schools to increase the emphasis such institutions place upon career awareness, exploration, decisionmaking, and planning.

Specifies procedures to be used in implementing this act, both at the national and local level.

Directs the Office of Career Education within the Office of Education to administer this act.

H.R. 8.—January 4, 1977. Interstate and Foreign Commerce. Reaffirms the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce. Grants additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest. Reaffirms the authority of the States to regulate terminal and station equipment used for telephone exchange service.

H.R. 9.—January 4, 1977. Judiciary. Requires candidates for Federal office, Members of Congress, and certain officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions.

H.R. 10. January 4, 1977. Post Office and Civil Service. Revises provisions prohibiting Federal, Postal Service, and District of Columbia employees from engaging in political activities.

Establishes the Board on Political Activities of Federal Employees to decide cases regarding violations of this Act. Sets forth procedures to be followed in such cases.

Directs the Civil Service Commission to conduct a continuing program to inform all employees of their rights of political participation under the Act and to educate employees with respect to those activities which are prohibited.

Creates a specific criminal offense for extorting political contributions from Federal personnel.

H.R. 11. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to increase the amount authorized to be appropriated under such Act to $6,000,000,000.

H.R. 12. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to increase the amount authorized to be appropriated under such Act to $6,000,000,000.

H.R. 13. January 4, 1977. Post Office and Civil Service. Sets forth a plan for the conduct of labor-management relations in the Federal service. Establishes the Federal Labor Relations Authority, responsible for carrying out the purposes of this Act.

H.R. 14. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow

as a credit against the income tax a limited amount of specified higher education expenses, including tuition, fees, books and supplies, incurred by the taxpayer for himself and any dependents.

H.R. 15. January 4, 1977. Education and Labor. Extends for five years specified elementary, secondary, and other education programs of the Elementary and Secondary Education Act of 1965, the Elementary School Aid Act, the Indian Education Act, the Indian Elementary and Secondary School Assistance Act, the Adult Education Act, the Special Projects Act, the National Reading Improvement Act, and the Bilingual Education Act.

H.R. 16. January 4, 1977. Interstate and Foreign Commerce. Creates a national health insurance system to cover personal health services including medical, dental, podiatric, home-nursing, hospital and auxiliary services. Directs that the system shall be administered by the States wherever possible.

H.R. 17. January 4, 1977. International Relations. Sets forth United States policy with respect to nonproliferation of nuclear explosive devices. Specifies procedures for (1) implementation of international agreements for nuclear material transfer and safeguards, (2) initiation of safeguards training programs, (3) participation in international cooperation programs, (4) export and production of special nuclear material, and (5) Congressional oversight of such nonproliferation activities.

Authorizes additional, and revises present, nuclear safeguard functions of the Nuclear Regulatory Commission.

H.R. 18. January 4, 1977. Interior and Insular Affairs. Amends the Atomic Energy Act of 1954 to establish procedures for expeditious review of applications for the licensing of sites for, and construction and operation of, nuclear production and utilization facilities. Requires that opportunity for public hearings on relevant safety and environmental factors be incorporated into the licensing procedure.

H.R. 19. January 4, 1977. Post Office and Civil Service. Changes the organizational structure of the United States Postal Service by: (1) transferring the authority of the Board of Governors to the Postmaster General; (2) revising the procedures for adjustment of rates and services; (3) creating a procedure for review of proposed capital investments; and (4) requiring the Postal Rate Commission to submit to the President a separate annual budget.

H.R. 20. January 4, 1977. Education and Labor. Establishes (1) a national youth service program designed to provide assistance to States, local governments, and private nonprofit organizations for the employment of youths, (2) an opportunities in private enterprise program designed to provide assistance to business concerns for the employment of youths, and (3) an Office of Youth Initiatives in the Executive Office of the President.

H.R. 21. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Creates a national system of health insurance. Establishes a Health Security Board in the Department of Health, Education, and Welfare to administer such health insurance program.

Repeals the Medicare provisions of the Social Security Act and all health benefit plans for employees of the Federal Government.

H.R. 22.—January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Creates a national system of health insurance. Establishes a Health Security Board in the Department of Health, Education, and Welfare to administer such health insurance program.

Repeals the Medicare provisions of the Social Security Act and all health benefit plans for employees of the Federal Government.

H.R. 23.—January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Creates a national system of health insurance. Establishes a Health Security Board in the Department of Health, Education, and Welfare to administer such health insurance program.

Repeals the Medicare provisions of the Social Security Act and all health benefits plans for employees of the Federal Government.

H.R. 24.—January 4, 1977. Interstate and Foreign Commerce. Directs the Federal Trade Commission to develop a test protocol for a consumer product to assist consumers in making informed purchasing decisions, whenever the Commission determines that, based upon the importance of a consumer product, the ease with which the average consumer can obtain its quality and performance characteristics, and the economic impact of the test protocols, such procedures would be helpful to the consumer.

H.R. 25.—January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion from gross income for any amount received as an annuity, pension, or other retirement benefit.

H.R. 26.—January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to require air carriers to file rate changes with the Civil Aeronautics Board at an earlier date than previously required.

H.R. 27.—January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to authorize reduced air fares on a space-available basis for persons 60 years of age or older and for handicapped individuals and their attendants. Directs the Civil Aeronautics Board to conduct a study and to report to Congress regarding the feasibility of such reduced air transportation rates for persons 21 years of age or younger. Authorizes specified types of air carriers in California to enter into agreements with other air carriers to establish joint fares, rates and services.

H.R. 28. January 4, 1977. Education and Labor. Directs the Secretary of Health, Education, and Welfare to establish for displaced homemakers Multipurpose Service Centers in order to provide such persons job, health, financial, and legal services.

Directs the Secretary to prepare and furnish to the Congress a study to determine the feasibility of and appropriate procedures for allowing displaced homemakers to participate in (1) programs established under the Comprehensive Employment and Training Act of 1973, (2) work incentive programs under the Social Security Act, (3) related, Federal employment, education, and health assistance programs, and (4) programs established or benefits provided under Federal and State unemployment compensation laws.

H.R. 29. January 4, 1977. Banking, Finance, and Urban Affairs. Amends the Consumer Credit Protection Act to prohibit abusive practices by debt collectors. Sets forth criminal and civil penalties for violations of such provisions. Requires the Federal Trade Commission and the Attorney General to oversee the enforcement of this Act.

H.R. 30. January 4, 1977. Education and Labor. Amends the Act which established the Youth Conservation Corps to direct the Secretaries of Agriculture and Interior to jointly extend the Youth Conservation Corps so as to make possible the year-round employment of young adults.

H.R. 31. January 4, 1977. Education and Labor. Amends the Act which established the the Youth Conservation Corps to direct the Secretaries of Agriculture and Interior to jointly extend such program to include young adults.

H.R. 32.—January 4, 1977. Education and Labor Amends the Act which established the Youth Conservation Corps to direct the Secretaries of Agriculture and Interior to jointly extend such program to include young adults.

H.R. 33. January 4, 1977. Agriculture. Extends the Agriculture Act, as amended by the Agriculture and Consumer Protection Act, for the 1978 through 1981 crop years. Changes the loan rate for the 1977 through 1981 crops of feed grains, cotton, wheat, and soybeans.

Stipulates conditions under which the Commodity Credit Corporation may dispose of commodities for which levels are established pursuant to this Act.

Requires the Secretary of Agriculture to establish reserves of certain commodities and authorizes him to dispose of them in specified kinds of distress areas and for the preservation of foundation herds.

H.R. 34. January 4, 1977. Science and Technology; Judiciary; Rules. Establishes a national materials policy for the United States. Establishes a National Materials Policy Board to implement such policy and make recommendations for the maximum effective use of limited resources. Establishes a commission to review such recommendations.

H.R. 35. January 4, 1977. Science and Technology. Directs the President to establish (1) a National Earthquake Hazard Reduction Program, (2) an Office of Earthquake Hazard Reduction, (3) a National Advisory Committee on Earthquake Hazard Reduction, and (4) an Earthquake Prediction Evaluation Board.

Specifies the duties of the Office of Earthquake Hazard Reduction, including the development of an Earthquake Hazard Reduction Program plan.

Enumerates the Federal agencies to be assigned responsibilities in, and details the elements of, the Earthquake Hazard Reduction Program.

Directs the Earthquake Prediction Evaluation Board to monitor prediction methods and issue earthquake predictions.

H.R. 36. January 4, 1977. Science and Technology. Amends the Federal Nonnuclear Energy Research and Development Act of 1974 to authorize the Administrator of the Energy Research and Development Administration to utilize Federal loan guarantees as a method of furthering nonnuclear energy research, development, and demonstration.

H.R. 37. January 4, 1977. Science and Technology. Amends the Federal Nonnuclear Energy Research and Development Act of 1974 to authorize the Administrator of the Energy Research and Development Administration to guarantee loans for the development of bioconversion demonstration facilities.

H.R. 38. January 4, 1977. Science and Technology. Amends the Federal Nonnuclear Energy Research and Development Act of 1974 to authorize the Administration to guarantee loans for the development of synthetic fuels from coal, oil shale, biomass, and other resources. Authorizes assistance in the form of Federal grants for oil shale conversion modular facilities and price supports for the sale of synthetic fuels by manufacturing facilities.

H.R. 39. January 4, 1977. Interior and Insular Affairs. Designates specified public lands and waters in the State of Alaska for inclusion in the National Park, National Wildlife Refuge, Wild and Scenic Rivers and National Wilderness Preservation Systems. Makes provisions for the management of subsistence uses of fish and wildlife on national lands.

H.R. 40. January 4, 1977. Judiciary. Makes it unlawful for any person to import, manufacture, sell, buy, transfer, receive, transport, own, or possess any handgun or handgun ammunition. Authorizes the Secretary of the Treasury to exempt certain handguns from this prohibition.

H.R. 41. January 4, 1977. Post Office and Civil Service. Requires charitable organizations which solicit in any manner the remittance of a contribution by mail, to include with such solicitations financal information.

Requires such organizations to provide the Postal Service, upon request, with any financial information necessary to verify information required to be included in such solicitations.

Exempts from these requirements: (1) membership organizations soliciting their own members, (2) schools, colleges, and universities when soliciting their students, alumni, faculty, governing boards, committees, or family members of such individuals; and (3) charitable organizations authorized by and exclusively making expenditures to a school, college, or university when soliciting such individuals.

H.R. 42. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug and Cosmetic Act and the Fair Packaging and Labeling Act to require full disclosure of pertinent data on labels of foods and food products. Prohibits misleading brand names under the Federal Trade Commission Act.

H.R. 43. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to require retailers of prescription drugs to post the prices of certain commonly prescribed drugs for the general public.

Empowers the Secretary of Health, Education, and Welfare to enforce the provisions of this Act.

H.R. 44. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to require that in the labeling and advertising of drugs sold by prescription the established name of such drug must appear each time the drug's proprietary name is used.

Permits a pharmacist to fill or refill a prescription for a drug, identified by its proprietary name, with any lower cost and suitable substitute drug under specified circumstances.

H.R. 45. January 4, 1977. Interstate and Foreign Commerce. Amends the Postal Revenue and Federal Salary Act of 1967 to abolish the Commission on Executive, Legislative, and Judicial Salaries.

H.R. 46. January 4, 1977. Judiciary. Empowers the Federal Trade Commission, after a patent on a drug is more than one year old, to review complaints made to it by a qualified applicant for a license under a drug patent, and, upon a finding that the price of the patented drug charged to druggists by the patentee is more than five hundred percent of the cost of production, to order such patentee to grant an unrestricted patent license to any qualified applicant to make, use, and sell such drug.

H.R. 47. January 4, 1977. Merchant Marine and Fisheries; Public Works and Transportation. Establishes a fund for the purpose of paying for otherwise uncompensated losses resulting from oil pollution.

Imposes, within certain monetary limits, joint, several, and strict liability on the owners and operators of each pollution source. Requires petroleum facilities and certain vessels to maintain evidence of financial responsibility in an amount equal to applicable liability limits.

Sets forth procedures for identifying and publicizing pollution sources.

H.R. 48. January 4, 1977. Merchant Marine and Fisheries; Public Works and Transportation. Establishes a fund for the purpose of paying for otherwise uncompensated losses resulting from oil pollution.

Imposes, within certain monetary limits, joint, several, and strict liability on the owners and operators of each pollution source. Requires petroleum facilities and certain vessels to maintain evidence of financial responsibility in an amount equal to applicable liability limits.

Sets forth procedures for identifying and publicizing pollution sources.

H.R. 49. January 4, 1977. Interior and Insular Affairs. Establishes the Nantucket Sound Islands Trust in Massachusetts. Creates commissions to regulate construction of any improvements on lands and waters within the trust area and to provide for the preservation and conservation of the area.

Designates Noman's Land Island in Massachusetts as part of the National Wildlife Refuge System.

Directs such commissions to develop land use control plans for the trust area and to identify new employment opportunities for residents of the area.

H.R. 50. January 4, 1977. Education and Labor. Amends the Employment Act of 1946 to set forth full employment and balanced economic growth policies to be achieved through identification of social and economic goals and the preparation and implementation of a full employment and balanced economic growth plan. Establishes countercyclical, structural, regional, and growth employment programs and a State and local stabilization grant program to supplement the policies included in the plan.

Provides for congressional review of the full employment and balanced economic growth plan.

H.R. 51. January 4, 1977. Armed Services. Prohibits collective bargaining within the Armed Forces.

H.R. 52. January 4, 1977. Judiciary. Grants a Federal charter to the U.S. Submarine Veterans of World War II.

H.R. 53. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to provide that new drugs for human or animal use will be regulated under such act solely to assure their safety, and not their effectiveness.

H.R. 54. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to provide that new drugs for human or animal use will be regulated under such act solely to assure their safety, and not their effectiveness.

H.R. 55. January 4, 1977. Veterans' Affairs. Requires the Administrator of Veterans' Affairs to pay (in addition to any already paid) a monthly pension to each veteran of World War I who meets specified service requirements, or to the surviving spouse of each such veteran, or when there is no surviving spouse, to the child or children of each such veteran.

H.R. 56. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to increase the amount authorized to be appropriated under such Act to $6,000,000,000.

H.R. 57. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to increase the amount authorized to be appropriated under such Act to $6,000,000,000.

H.R. 58. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to increase the amount authorized to be appropriated under such Act to $6,000,000,000.

H.R. 59. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to increase the amount authorized to be appropriated under such Act to $6,000,000,000.

H.R. 60. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to increase the amount authorized to be appropriated under such Act to $6,000,000,000.

H.R. 61. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow limited income tax credits for the installation of solar heating and cooling, and for such installation in residences. Provides for an investment tax credit for the installation of insulation and solar energy equipment in structures used in a trade or business, or held for the production of income, including lodging facilities.

H.R. 62. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited income tax credit for any higher education expenses paid by the taxpayer for himself or a dependent, and for money deposited in any savings account maintained exclusively for meeting his own, or a dependent's higher education expenses when the beneficiary is not enrolled in such an educational program.

H.R. 63. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance Benefits) of the Social Security Act to increase to $5,500 the amount of outside earnings which is permitted an individual each year without any deduction from benefits.

H.R. 64. January 4, 1977. Post Office and Civil Service. Amends the Postal Revenue and Federal Salary Act of 1967 to abolish the Commission on Executive, Legislative, and Judicial Salaries.

H.R. 65. January 4, 1977. Education and Labor. Amends the Age Discrimination in Employment Act of 1967 to make the provisions, formerly applicable to persons between 40 and 60 years of age, applicable to anyone 40 years of age or older.

H.R. 66. January 4, 1977. Judiciary. Entitles any person to receive reasonable legal fees associated with such person's participation in a proceeding before a Federal agency or before a court while challenging any action of such agency if such participation could not be undertaken without such reimbursement, is helpful, and is not entered into for the purpose of promoting unreasonable gain to such person.

H.R. 67. January 4, 1977. Interstate and Foreign Commerce. Requires manufacturers to display on a conspicuous label on each item of durable goods sold to consumers the performance or life of such product. Declares the National Bureau of Standards to have final authority over the designation required by this Act, and requires the Federal Trade Commission to enforce the provisions of this Act.

H.R. 68. January 4, 1967. Interstate and Foreign Commerce. Requires manufacturers to label products as to month and year of manufacture for those goods whose design and performance features change at such a frequency as to make its date of manufacture part of its relevant description.

Empowers the Federal Trade Commission to enforce this Act.

H.R. 69. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 and the Interstate Commerce Act to authorize free or reduced transportation rates for persons over 65 and handicapped individuals and their attendants. Amends the Urban Mass Transportation Act of 1964 to give funding priority under such Act to public bodies which offer reduced rates to such individuals. Authorizes the Secretary of Transportation to prescribe standards for facilities funded under such Act to insure ready access to such facilities by these individuals. Amends the Older Americans Act of 1965 to authorize a grant program for special transportation research and demonstration projects for such individuals.

H.R. 70. January 4, 1977. Public Works and Transportation. Establishes the Airport Noise Curfew Commission to study and make recommendations to the Congress regarding the establishment of curfews on nonmilitary aircraft operations over populated areas of the United States during normal sleeping hours.

H.R. 71. January 4, 1977. Interstate and Foreign Commerce. Requires posting of the selling price and unit price on or near consumer products displayed for retail sales.

Transfers authority to promulgate rules under the Fair Packaging and Labeling Act to the Federal Trade Commission from the Department of Health, Education, and Welfare.

H.R. 72. January 4, 1977. Government Operations. Directs the Secretary of Health,

Education, and Welfare to make grants to States and units of local government to assist in the execution of consumer protection plans.

H.R. 73. January 4, 1977. Post Office and Civil Service. Requires the Civil Service Commission to establish a Special Cost-of-Living Pay Schedule for Federal employees located in any city or metropolitan area having a population of 500,000 or more, such schedule to contain special rates of basic pay representing increases in comparable rates provided by the General Schedule, for the purpose of setting the increased cost-of-living of such employees.

H.R. 74. January 4, 1977. Ways and Means. Amends the Social Security Act to assure a minimum annual income to all elderly residents of the United States.

H.R. 75. January 4, 1977. Agriculture. Directs the Secretary of Agriculture to develop and periodically reevaluate a national program for the conservation of land, water, and related resources. Requires use of program elements in preparation of budget requests to Congress.

H.R. 76. January 4, 1977. Education and Labor. Amends the Fair Labor Standards Act of 1938 to authorize the Secretary of Labor to investigate any proposed business closing or relocation and to provide assistance to certain employees and local governments affected by such action.

Denies specified tax benefits to a business closing or transferring an operation upon certain findings by the Secretary.

Establishes a National Employment Relocation Administration within the Department of Labor and a National Employment Relocation Advisory Council.

H.R. 77. January 4, 1977. Education and Labor. Amends the National Labor Relations Act with respect to: (1) the terms of National Labor Relations Board Members; (2) authority of the Board to delegate its adjudicative power regarding unfair labor practices; (3) procedures and remedies relative to such violations; and (4) determination of collective bargaining units.

H.R. 78.—January 4, 1977. Agriculture. Establishes the National Agricultural Research Policy Advisory Board as a permanent board within the United States Department of Agriculture to coordinate the Nation's programs of agricultural research.

Directs the Department of Agriculture to establish a Clearinghouse for Federal Human Nutrition Research which shall collect and report to Congress information from each Federal agency pertaining to human nutrition research.

Authorizes the Secretary of Agriculture to make grants for certain mission-oriented basic agricultural research and for agricultural and food research.

H.R. 79.—January 4, 1977. Agriculture. Establishes the National Agricultural Research Policy Advisory Board as a permanent board within the United States Department of Agriculture to coordinate the Nation's programs of agricultural research.

Directs the Department of Agriculture to establish a Clearinghouse for Federal Human Nutrition Research which shall collect and report to Congress information from each Federal agency pertaining to human nutrition research.

Authorizes the Secretary of Agriculture to make grants for certain mission-oriented basic agricultural research and for agricultural and food research.

H.R. 80.—January 4, 1977. Rules; Government Operations. Amends the Congressional Budget Act of 1974 and the Budget and Accounting Act, 1921, to require that Federal expenditures not exceed revenues during any fiscal year except in time of war or in a period of declared economic necessity.

Prohibits the Congress from considering the concurrent resolution on the budget if such resolution sets forth a deficit in the budget contrary to this Act.

H.R. 81.—January 4, 1977. Agriculture. Amends the Food Stamp Act of 1964 by revising (1) eligibility standards; (2) the method of determining the coupon allotment; and (3) administration of the program by State agencies.

H.R. 82.—January 4, 1977. Judiciary. Renders applicable to first convictions for using a firearm to commit a Federal felony or for unlawfully carrying a firearm during the commission of such a crime the prohibition against suspension or probationary sentences presently mandatory with respect to second or subsequent convictions.

H.R. 83. January 4, 1977. District of Columbia: Public Works and Transportation. Directs the District of Columbia to enter into an agreement with the Federal Government regarding rates for water delivered to the District through the Washington Aqueduct.

H.R. 84. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an income tax credit for 25 percent of the amount of rent paid by the taxpayer which is equal to the taxpayer's proportionate share of the local and State property taxes imposed on the land and building in which his dwelling is located.

H.R. 85. January 4, 1977. Rules. Terminates budget authority for all Federal programs. Requires Congress to consider whether any such programs merit continuation on the same, a greater, or a lesser level, or termination.

Requires the Comptroller General to identify inactive or inefficient programs.

H.R. 86 January 4, 1977. Rules. Terminates budget authority for all Federal programs. Requires Congress to consider whether any such programs merit continuation on the same, a greater, or a lesser level, or termination.

Requires the Comptroller General to identify inactive or inefficient programs.

H.R. 87. January 4, 1977. Rules. Terminates budget authority for all Federal programs. Requires Congress to consider whether any such programs merit continuation on the same, a greater, or a lesser level, or termination.

Requires the Comptroller General to identify inactive or inefficient programs.

H.R. 88. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 89. January 4, 1977. Armed Services. Amends the National Security Act of 1947 to establish procedures and standards for the classification and declassification of sensitive official information and material. Establishes criminal penalties for unauthorized disclosure of such information or material.

H.R. 90. January 4, 1977. Agriculture. Amends the Agricultural Act by establishing the support price of milk at not less than 90 percent of the parity price and by providing for quarterly adjustments.

H.R. 91. January 4, 1977. Armed Services. Sets forth regulations regarding the discharge of members from the armed forces. Sets forth procedures and regulations regarding separation with a discharge from service.

H.R. 92. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XVIII (medicare) and title XIX (medicaid) of the Social Security Act to require that nursing care facilities provide specified minimum services to their patients. Establishes programs of loans and grants to nonprofit organizations for the construction and rehabilitation of such facilities. Calls for Federal action to end nursing home abuses.

Authorizes the President to call a White House Conference on Long-Term Care.

H.R. 93. January 4, 1977. Judiciary. Prohibits persons engaged in the production of petroleum or petroleum products from acquiring or retaining coal, uranium, or geothermal power assets. Establishes procedures for divestiture of existing unlawful assets, to be enforced by the Attorney General. Imposes criminal and civil penalties for corporate and individual violations of this act.

H.R. 94. January 4, 1977. Judiciary. Sets forth rights of Federal court and grand jury witnesses with respect to contempt.

Requires that witnesses compelled to testify before a Federal court, Congress, or executive agency be given transactional immunity.

Specifies guidelines regarding the size of grand juries, disclosure of and access to grand jury testimony, rights of grand jury witnesses, and grand jury jurisdictions. Grants rights and powers to grand juries including authority to conduct independent inquiries.

Entitles defendants charged with nonpetty offense to a preliminary examination, to be filed by a Federal district judge.

H.R. 95. January 4, 1977. Ways and Means. Increases to $6,000 the amount of outside earnings which is permitted an individual each year without any deduction from benefits under title II (old-age, survivors, and disability insurance benefits) of the Social Security Act.

H.R. 96.—January 4, 1977. Armed Services. Entitles specified reserve members of the uniformed services and members of the National Guard to the same medical and dental benefits enjoyed by members of the uniformed services on active duty.

Entitles the dependents of such individuals to the same medical and dental benefits presently available to the dependents of members on active duty under specified circumstances.

H.R. 97.—January 4, 1977. Armed Services. Grants survivors benefits to dependents of present or former members of the armed forces who die before becoming entitled to retired pay for non-regular service.

H.R. 98.—January 4, 1977. Armed Services. Revises the military retiree point credit system to increase the number of points allowable in any year after June 30, 1975, for nonregular service.

H.R. 99.—January 4, 1977. Armed Services. Entitles members of the armed forces to retirement pay at age 55 if otherwise eligible. Makes members who are at least 50 years of age but less than 55 eligible for retirement pay in reduced amounts.

H.R. 100.—January 4, 1977. Armed Services. Allows enlisted members (regular and reserve) of the Army and the Air Force to retire after 20 years of service. Stipulates that at such time regular enlisted members shall become members of the reserves until their total creditable years of service equals 30.

H.R. 101.—January 4, 1977. House Administration. Establishes within Congress the office of the General Counsel to the Congress, to represent Congress, its officials and employees in any civil or criminal action regarding the performance or nonperformance of any official duties, to sue any official or employee of the Executive Branch in order to compel compliance with any Federal law or any request for information, to review administrative rulemaking to assure compliance with congressional policy, and to appear as amicus curiae in any judicial action in which the constitutionality or interpretation of any law of the United States or the validity of any congressional action is in issue.

H.R. 102. January 4, 1977. Banking, Finance and Urban Affairs. Establishes a presidentially-appointed National Landlord and Tenant Commission.

Directs the Commission to conduct a study of landlord-tenant problems, to review the implementation of the provisions of this Act to grant funds to the States for the estab-

lishment and maintenance of housing courts, in accordance with standards established by the Commission, to develop model lease and rental agreements, and to appoint a body to develop and implement a national rent control plan.

Sets forth the rights and obligations of tenants and landlords.

H.R. 103. January 4, 1977. Interstate and Foreign Commerce. Amends the Communications Act of 1934 to prohibit harassing telephone calls made to collect alleged debts. Requires all telephone companies to notify each telephone subscriber by means of a notice on the front of the local telephone directory of his right to be free from such harassing calls.

H.R. 104. January 4, 1977. Interstate and Foreign Commerce. Establishes a Federal Commission on Boxing to exercise surveillance over the field of professional boxing. Grants to the Commission investigatory powers under the Federal Trade Commission Act.

H.R. 105. January 4, 1977. Public Works and Transportation. Amends the Interstate Commerce Act to specify the motor vehicles used to transport schoolchildren and teachers which are exempt from the provisions of such Act with the exception of maximum hours of service of employees and safety standards regarding operation and equipment. Directs the Interstate Commerce Commission to enforce specified highway safety standards promulgated by the Secretary of Transportation with respect to the owners and operators of motor vehicles employed solely in transporting schoolchildren and teachers.

H.R. 106. January 4, 1977. Public Works and Transportation. Amends the Interstate Commerce Act to authorize motor carrier employees to request the Secretary of Transportation to conduct an investigation regarding motor carrier safety regulations. Prohibits discriminating against employees who request such an investigation. Prohibits discrimination against employees who refuse to operate equipment because of an apprehension of death or serious injury to themselves or others.

H.R. 107. January 4, 1977. Post Office and Civil Service. Makes Flag Day, June 14 of each year, a legal public holiday.

H.R. 108. January 4, 1977. Interstate and Foreign Commerce. Makes unlawful the manufacture for introduction into commerce or the importation of any imitation antique glassware product which is not plainly and permanently marked with the year of manufacture.

Requires the Federal Trade Commission to enforce the provisions of this Act.

H.R. 109. January 4, 1977. Interstate and Foreign Commerce. Directs the Secretary of Health, Education, and Welfare to identify tertiary eye care centers that need upgrading and to make grants to accomplish such purpose. Directs the Secretary to create a commission to assess the present state of eye care facilities in the United States, to develop plans for improving and expanding such facilities, and to make grants to public and nonprofit private tertiary eye care centers to implement such upgrading.

H.R. 110. January 4, 1977. Interstate and Foreign Commerce. Directs the Secretary of Transportation to prohibit individuals engaged in commerce from receiving for shipment or to ship within the United States compressed gas cylinders not inspected in the United States.

H.R. 111. January 4, 1977. Interior and Insular Affairs. Establishes the Chattahoochee River National Recreation Area composed of a 48-mile segment of the Chattahoochee River and adjoining lands in the State of Georgia. Authorizes the Secretary of the Interior to acquire property for such recreation area and provides for its development.

H.R. 112. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to reduce the excise tax imposed on operating foundations whose principle activity is the operation of long-term care facilities.

H.R. 113. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends the Social Security Act to establish the Special Commission on Quality Assurance and Utilization Control in Home Health Care. Directs such Commission to study, investigate, and review the provision of home health care and services to individuals in the United States. Requires the Commission, upon such findings, to develop a detailed plan for quality assurance and utilization control in home health care.

H.R. 114. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited deduction for amounts paid by or on behalf of an individual for an individual retirement account, a trust, or an annuity contract.

H.R. 115. January 4, 1977. Education and Labor. Amends the Age Discrimination in Employment Act of 1967 to make its provisions, formerly applicable to persons between 40 and 60 years of age, applicable to anyone 40 years of age or older.

H.R. 116. January 4, 1977. Judiciary. Requires that the public be given an opportunity to participate in the rulemaking proceedings of a Federal agency. Requires that proposed rules be submitted to Congress for disapproval before they become effective.

H.R. 117. January 4, 1977. Judiciary. Prescribes with specified exceptions, the knowing solicitation, provision, or receipt of anything of monetary value, or the promise of anything of monetary value, for: (1) seeking to place, placing, or arranging to place any child for permanent care or adoption; or (2) coercing any individual to place any child for adoption, to provide any child with permanent care, or to adopt any child under circumstances which result in the transportation of such child or individual in interstate or foreign commerce.

H.R. 118. January 4, 1977. Education and Labor; Judiciary. Amends the Walsh-Healy Act to permit government contractors to have their employees work ten-hour workdays if the workweek of such employees does not exceed four days.

H.R. 119. January 4, 1977. Judiciary. Prohibits the importation, manufacture, sale, purchase, transfer, receipt or transportation of handguns except as authorized by the Secretary of the Treasury. Creates exceptions for handguns utilized by Federal, State, or local governmental law enforcement officials or intended for use as a curio, museum piece, or collector's item.

H.R. 120. January 4, 1977. Armed Services. Makes it unlawful for any individual or entity to solicit to enroll or enroll any member of the armed forces in any labor organization or for any member of the armed forces to join, or encourage others to join any labor organization. Sets forth penalties for violations of this Act.

H.R. 121.—January 4, 1977. Rules; Government Operations; Ways and Means; Education and Labor. Provides for the periodic expiration of budget authority for all Government programs and activities. Amends the rules of the Senate and House of Representatives to provide periodic reviews of all government programs' efficiency and accomplishments.

Requires that each bill and concurrent resolution include an estimate of the proposal's cost.

Amends the Internal Revenue Code to reduce personal income and estate taxes. Increases specified exemptions and deductions.

Amends the Small Business Act to increase the financial assistance available to small businesses. Amends the Comprehensive Employment and Training Act to provide additional incentives for the employment of youths and the chronically unemployed.

H.R. 122.—January 4, 1977. House Administration. Prohibits travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned or retired.

H.R. 123.—January 4, 1977. Interior and Insular Affairs. Establishes in the Department of the Interior the Wounded Knee Compensation Board to compensate victims of the unlawful occupation of Wounded Knee, South Dakota in 1973.

H.R. 124.—January 4, 1977. Ways and Means. Amends the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving Old-Age, Survivors and Disability Insurance benefits.

H.R. 125.—January 4, 1977. Education and Labor. Directs the Secretary of the Interior to enter into any contracts to provide money to meet the general operating costs of any public elementary and secondary schools which are located on or near Indian reservations and which are educating Indian children, when such funds are otherwise unavailable.

H.R. 126.—January 4, 1977. Banking, Finance and Urban Affairs. Amends the Housing and Community Development Act to redefine the term "city" for purposes of Title I of such Act.

H.R. 127. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited income tax credit for expenses paid for the taxpayer's or a dependent's higher education expenses.

H.R. 128. January 4, 1977. Ways and Means. Authorizes any individual who has attained the age of 65 to take a nonrefundable tax credit, under the Internal Revenue Code, for a percentage of the amount of real property taxes or rent constituting real property taxes paid or accrued by the taxpayer during the taxable year.

H.R. 129. January 4, 1977. Government Operations. Amends the Budget and Accounting Act of 1921, to emphasize that the President's annual budget is a proposal only.

Requires that any documents issued by any Federal instrumentality which refer to the President's proposed budget make it clear that such proposed budget is only a recommendation and is subject to such action as Congress may take in approving, modifying, or rejecting it.

H.R. 130. January 4, 1977. Interstate and Foreign Commerce. Prohibits franchisors from prematurely cancelling or failing to renew motor fuel franchises unless written notification is provided and the franchisee has failed to comply with reasonable terms of the agreement.

Specifies that refiners may not increase the percentage of gasoline distributed through refiner operated retail outlets for a two-year period. Directs the Federal Trade Commission (FTC) to report to Congress on methods to promote competition in the marketing of gasoline.

Requires the FTC to prescribe rules for determining octane ratings of gasoline and to display requirements for such ratings.

Prohibits specified unfair practices in the marketing of automotive gasoline.

H.R. 131. January 4, 1977. Judiciary. Grants a Federal charter to the National Humanities Center.

H.R. 132. January 4, 1977. Education and Labor. Amends the Labor-Management Reporting and Disclosure Act of 1959 to require every local labor organization to elect its officers not less often than once every five years (presently not less often than once every three years).

H.R. 133. January 4, 1977. House Administration. Provides that the proceedings of the national encampments of the Italian American War Veterans of the United States,

Incorporated shall be printed as a document of the House of Representatives.

H.R. 134. January 4, 1977. Judiciary. Makes additional immigrant visas available for immigrants from foreign countries which meet criteria set forth in this Act.

H.R. 135. January 4, 1977. Judiciary. Amends the Immigration and Nationality Act to allow the Attorney General and the Secretary of State to jointly prescribe regulations allowing nationals of designated countries to enter the United States as temporary visitors. Prohibits nonimmigrants from having their status adjusted and adds a waiting period to the consideration of an application for a visa for individuals entering pursuant to this Act.

Directs the Attorney General to prescribe procedures for the removal of aliens who have entered the United States as nonimmigrants without a valid nonimmigrant visa.

H.R. 136. January 4, 1977. Judiciary. Grants a Federal charter to the Italian American War Veterans of the United States.

H.R. 137. January 4, 1977. Veterans' Affairs. Provides that recipients of Veterans' pension and compensation will not have the amount of such pension or compensation reduced, or entitlement thereto discontinued, because of increases in monthly social security benefits.

H.R. 138. January 4, 1977. Veterans' Affairs. Permits the Administrator of Veterans' Affairs to recognize representatives of the Italian American War Veterans of the United States in the preparation, presentation, and prosecution of claims under laws administered by the Administration.

H.R. 139. January 4, 1977. Ways and Means. Amends the Tariff Schedules of the United States to increase for a five-year period the customs duty on specified hand tools.

H.R. 140. January 4, 1977. Ways and Means. Amends the Social Security Act to allow Federal officers and employees to elect coverage under Old-Age, Survivors and Disability Insurance.

H.R. 141. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an income tax deduction for one-half of the amounts paid to meet the higher education expenses of any child for whom the taxpayer is entitled to a personal exemption.

H.R. 142. January 4, 1977. Armed Services. Authorizes the recomputation at age 60 of the retired or retainer pay for members or former members of the uniformed services whose retired or retainer pay was computed on the basis of pay scales in effect prior to January 1, 1972, in order to reflect any retired or retainer pay increases for other members which was based on changes in the Consumer Price Index since that date.

H.R. 143. January 4, 1977. Banking, Finance and Urban Affairs. Amends the Flood Disaster Protection Act of 1973 to eliminate flood insurance and community participation in the national flood insurance program as prerequisites for Federal approval of financial assistance for acquisition or construction of, or for lending institution loans secured by, any building, mobile home, or personal property located or to be located in an area having special flood hazards.

H.R. 144. January 4, 1977. Ways and Means. Requires that expenditures by the Federal Government shall not exceed its revenues except in time of war or national emergency declared by Congress.

Establishes a schedule for systematic reduction of the public debt.

H.R. 145. January 4, 1977. International Relations. Restricts funds of the United States which may be used to aid India until the President certifies to the Congress that democratic liberties and civil rights have been restored.

H.R. 146. January 4, 1977. International Relations. Prohibits any department or agency of the U.S. Government from financing or promoting the export of any commodity, product, or service if the use of such export involves energy research and development or exploration in the Union of Soviet Socialist Republics.

H.R. 147. January 4, 1977. International Relations. Prohibits the authorization of any appropriation or the making of any payment to the United Nations or an affiliated agency in excess of the amount determined by division of the total assessment of such organization by the number of member nations as of January 1, of each year.

H.R. 148. January 4, 1977. International Relations. Prohibits the settlement of a debt owed to the United States by a foreign country in an amount less than the full value of the debt, unless approved by Congress by concurrent resolution.

H.R. 149. January 4, 1977. Interstate and Foreign Commerce. Directs the Secretary of Transportation to prescribe rules specifying the color code marking to be used with respect to each gas or type of gas on any receptacle containing such gas or type of gas and the manner in which each marking is to be displayed.

H.R. 150. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to provide that new drugs for human or animal use will be regulated under such Act solely to assure their safety, and not their effectiveness.

H.R. 151. January 4, 1977. Interstate and Foreign Commerce. Reaffirms the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce. Grants additional authority to the Foreign Communications Commission to authorize mergers of carriers when deemed to be in the public interest. Reaffirms the authority of the States to regulate terminal and station equipment used for telephone exchange service.

H.R. 152. January 4, 1977. Judiciary. Amends the Internal Security Act of 1950 to prohibit entrance into the United States or the granting of United States citizenship to any person who has been convicted of, participated in, or advocated any crime of terrorism. Makes it unlawful for any person subject to United States jurisdiction to participate in any way in any phase of terrorist activities.

Grants the United States a civil right of action to impose a constructive trust upon all property which has been acquired by violation of any Federal criminal statute unless such property is found to have been acquired by a good faith purchaser.

H.R. 153. January 4, 1977. Judiciary. Removes Federal court jurisdiction to require attendance at a particular school of any student because of race, color, creed, or sex.

H.R. 154. January 4, 1977. Judiciary. Removes the jurisdiction of the Supreme Court of the United States and the Federal district courts over any case arising out of any State statute, ordinance, rule or regulation, which relates to voluntary prayers in public schools and public buildings.

H.R. 155. January 4, 1977. Judiciary. Amends the Internal Security Act of 1950 to authorize the President to restrict travel by United States citizens and materials to, in, or through any country whose military forces are engaged in armed conflict with the military forces of the United States.

H.R. 156. January 4, 1977. Judiciary. Repeals the Gun Control Act of 1968.

H.R. 157. January 4, 1977. Judiciary. Amends the Gun Control Act of 1968 to remove all restrictions placed on ammunition under that Act.

H.R. 158. January 4, 1977. Judiciary. Makes it a Federal crime to kill or assault a fireman or law enforcement officer engaged in, or on account of action taken in, the performance of duty when the offender travels in interstate commerce or uses any facility of interstate commerce for such purpose.

H.R. 159. January 4, 1977. Judiciary. Authorizes an additional sentence of imprisonment for an indeterminate number of years up to life for those persons committing a crime of violence while armed with any firearm or destructive device. Sets a mandatory one-year sentence as the minimum punishment under this Act.

H.R. 160. January 4, 1977. Merchant Marine and Fisheries. Amends the Marine Mammal Protection Act to prohibit extension of any aid, credit, loan, or loan guarantee to any nation which takes whales in a manner inconsistent with the Marine Mammal Protection Act.

H.R. 161. January 4, 1977. Post Office and Civil Service. Removes the criminal penalties presently applicable to the individuals who refuse or neglect to answer agricultural, irrigation, or drainage census questions.

H.R. 162. January 4, 1977. Post Office and Civil Service. Removes specified criminal penalties for individuals who neglect to answer questions submitted in connection with a census. Increases the penalty for individuals who willfully give false answers relating to the individual, to the individual's family or to the farm or farms of which such person or family is the occupant.

H.R. 163. January 4, 1977. Post Office and Civil Service. Prohibits the Federal Government from requiring any employee to: (1) join or assist any employee organization; or (2) pay dues to such organization.

H.R. 164. January 4, 1977. Rules. Amends the Congressional Budget Act to require that all public bills and resolutions introduced in Congress or reported by a committee contain an estimate of the avarage cost of such measure for each taxpaying family.

H.R. 165. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow as a credit sums paid for tuition to an institution of higher education by a taxpayer for himself, his spouse or a dependent. Allow individuals a credit for charitable contributions to institutions of higher education.

H.R. 166. January 4, 1977. Ways and Means. Increases to $5,004 the amount of outside earnings which is permitted an individual each year without any deduction from benefits under Title II (Old-Age, Survivors and Disability Insurance Benefits) of the Social Security Act.

H.R. 167. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion from gross income for any amount received as an annuity, pension, or other retirement.

H.R. 168. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an income tax deduction for expenses and depreciation attributable to the operation of the taxpayer's motor vehicle to transport a child to a public primary or secondary school which does not provide transportation from the child's residence.

H.R. 169. January 4, 1977. Ways and Means. Amends the Tariff Act of 1930 to require that imported cast and malleable iron pipe fittings be marked with the country of origin.

H.R. 170. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XI (General Provisions) of the Social Security Act to abolish the Professional Standards Review Organizations which were established to review services covered under the Medicare and Medicaid programs.

H.R. 171. January 4, 1977. Ways and Means; Rules; Banking, Finance and Urban Affairs; Education and Labor. Amends the Internal Revenue Code to provide an exclusion for interest income from savings deposits, a cost-of-living adjustment for property depreciation and the general surtax exemption, and a deduction for all dividends paid by domestic corporations.

Directs the Federal Reserve Board to keep monetary releases commensurate with long-term predictions for growth in production and to make quarterly reports to Congress concerning its long and short-term policies. Amends the Congressional Budget and Impoundment Control Act to limit annual growth of total budget outlays by Congress to the growth anticipated for the gross national product. Amends the Fair Labor Standards Act to lower minimum wages for certain youth.

H.R. 172. January 4, 1977. Interior and Insular Affairs. Designates the Loxahatchee River in Florida as a potential addition to the National Wild and Scenic Rivers System.

H.R. 173. January 4, 1977. Interior and Insular Affairs. Designates the Myokka River in Florida as a potential addition to the National Wild and Scenic Rivers Systems.

H.R. 174. January 4, 1977. Armed Services. Sets forth regulations regarding the discharge of members from the armed forces. Sets forth procedures and regulations regarding separation with a Discharge from Service.

H.R. 175. January 4, 1977. Armed Services. Amends the Strategic and Critical Materials Stock Piling Act to direct the Secretaries of the Army, Air Force, and Navy to require the Administrator of General Services to establish a program which: (1) will provide for the acquisition of strategic and critical materials from foreign countries through the barter of goods owned by the United States; and (2) will insure the active cooperation and participation of each appropriate department and agency having custody of goods suitable for barter.

H.R. 176. January 4, 1977. Interior and Insular Affairs. Permits the Secretary of the Interior to accept privately donated funds and to expend such funds on specified property on the National Register of Historic Places.

H.R. 177. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to direct the Civil Aeronautics Board to promulgate regulations prohibiting air carriers from offering passengers alcoholic beverages or tobacco unless the passenger is required to pay for such goods at the time the offer is made.

H.R. 178. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide identical income tax rates for single persons and married couples filing joint returns. Limits the earned income that must be reported by a married person filing a separate return to the amount actually earned by that individual.

H.R. 179. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act to remove the limitation on the amount of outside income which an individual may earn while receiving benefits under such title. Allows benefit payments to a widower, parent, or child despite that person's marriage if the marriage is annulled.

H.R. 180. January 4, 1977. Education and Labor. Amends the Elementary and Secondary Education Act of 1965 to furnish financial assistance to aid local educational agencies in providing security for children, employees, and facilities in elementary and secondary schools by reducing and preventing crimes against them and to assure that crimes committed in schools are reported to local law enforcement agencies.

H.R. 181. January 4, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to condition certain assistance to States, local governments, and agencies thereunder on the adoption of a law enforcement officers' bill of rights.

H.R. 182. January 4, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to authorize the Law Enforcement Assistance Administration to provide monetary assistance to eligible local governments for the purpose of retaining or reattaining employment levels of essential law enforcement and criminal justice employees. Defines an eligible local government as one in which: (1) the number of essential law enforcement and criminal justice personnel who have been or who, but for the assistance extended in this act, would have to be released for budgetary reasons exceeds five percent of such jurisdiction's total law enforcement and criminal justice work force; and (2) reported crime equals or exceeds the national average.

H.R. 183. January 4, 1977. Judiciary. Increases the penalty for use or carrying of a firearm during commission of a felony. Imposes mandatory minimum sentences for second or subsequent convictions.

H.R. 184. January 4, 1977. Merchant Marine and Fisheries. Transfers responsibility for measuring vessels from the Secretary of the Treasury to the Secretary of the department in which the Coast Guard is operating. Sets forth requirements for the measure and remeasurement of vessels.

H.R. 185. January 4, 1977. Merchant Marine and Fisheries. Authorizes the Secretary of the department in which the Coast Guard is operating to provide transportation by motor vehicle or water carrier to and from places of employment for persons employed in, or attached to, the Coast Guard under specified circumstances.

H.R. 186. January 4, 1977. Merchant Marine and Fisheries. Authorizes the President to proclaim the International Regulations for Preventing Collisions at Sea. Exempts from the regulations vessels in harbors, rivers, and inland waters, the Great Lakes, or the Red River. Authorizes the Secretary of the department in which the Coast Guard is operating to promulgate regulations to implement this act. Authorizes the Secretary of the Navy and the Secretary of the department in which the Coast Guard is operating to promulgate rules for certain navigational signals. Imposes civil penalties for violation of such regulations.

H.R. 187. January 4, 1977. Merchant Marine and Fisheries. Establishes a system for the documentation of vessels to be administered by the Secretary of the department in which the Coast Guard is operating. Sets forth requirements for the issuance of a registry, coastwise license, Great Lakes license, fishery license, and pleasure vessel license.

H.R. 188. January 4, 1977. Merchant Marine and Fisheries. Amends the Intervention on the High Seas Act to redefine terms and establish procedures in a manner consistent with the Protocol Relating to Intervention on the High Seas in Cases of Marine Pollution by Substances Other Than Oil, 1973.

H.R. 189. January 4, 1977. Post Office and Civil Service. Amends the Federal Boat Safety Act of 1971 to authorize the President to proclaim annually one week as "National Safe Boating Week."

Repeals the Act which placed "National Safe Boating Week" during the first week of July.

H.R. 190. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a deduction to individuals who rent their principal residences for portion of the real property taxes paid or accrued by their landlord.

H.R. 191. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to decrease from 60 to 45 the entitlement age for otherwise qualified women to receive widow's insurance benefits.

H.R. 192. January 4, 1977. Ways and Means. Amends Part A of Title IV (Aid to Families with Dependent Children) to eliminate the ten percent limitation on the proportion of the total number of recipients of aid to families with dependent children in any State who may receive such aid in the form of restricted or protective payments.

H.R. 193. January 4, 1977. Education and Labor. Amends the Elementary and Secondary Education Act of 1965 to direct the Commissioner of Education to allot funds appropriated by this Act to local educational agencies to assist in reducing crime against the children, employees, and facilities of their elementary and secondary schools.

H.R. 194. January 4, 1977. House Administration. Prohibits any person acting under color of law, in determining whether any individual is qualified under State law to vote in any Federal election, from requiring individuals of one sex to disclose their marital status if the same disclosure is not required of individuals of the opposite sex.

H.R. 195. January 4, 1977. Interior and Insular Affairs. Designates a segment of the Delaware River flowing between Sparrow Bush, New York and Hancock, New York, as a component of the National Wild and Scenic Rivers System.

H.R. 196. January 4, 1977. Interstate and Foreign Commerce. Prohibits, with specified exceptions: (1) the knowing introduction into, manufacture for introduction into, transportation in, or distribution in interstate commerce of tear gas and; (2) the manufacture, sale, or possession of tear gas within any territory or possession of the United States, Indian territory, or the special maritime jurisdiction of the United States.

Increases the maximum fine for, and eliminates certain exceptions relative to similar prohibitions with respect to switchblade knives.

H.R. 197. January 4, 1977. Judiciary. Amends the Immigration and Nationality Act to make it unlawful to knowingly hire an alien not lawfully admitted into the United States. Requires that employees of the Department of Health, Education, and Welfare disclose the names of illegal aliens who are receiving assistance under the Social Security Act.

Makes punishable by a fine or imprisonment the making of false border crossing cards, alien registration receipt cards, and other documents used for entry into the United States.

H.R. 198. January 4, 1977. Judiciary. Authorizes the issuance of 25,000 special immigrant visas to British citizens who are residents of Northern Ireland and who are seeking admissions to the United States to avoid the consequences of armed conflict or persecution. Allows an alien already in this country on a nonimmigrant visa who is eligible for a visa under this Act to adjust his status to that of a permanent resident.

H.R. 199. January 4, 1977. Public Works and Transportation. Amends the Urban Mass Transportation Act of 1964 to direct the Secretary of Transportation to require that any bus or other rolling stock used for mass transportation purposes and any station, terminal, or other passenger loading area, improved or constructed in whole or in part with Federal funds or under authority of Federal law after June 30, 1975, be designed with features to allow utilization by elderly and handicapped persons.

H.R. 200. January 4, 1977. Veterans' Affairs. Provides that the decisions of the Administrator of Veterans' Affairs on any question of law or fact under any law administered by the Veterans' Administration providing benefits for veterans and their dependents or survivors shall be subject to judicial review.

Repeals the requirement that the Administrator determine and pay fees to agents or attorneys in allowed claims for monetary benefits.

EXTENSIONS OF REMARKS

THEY'RE GIVING US GAS, ALL RIGHT

HON. STEPHEN J. SOLARZ
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. SOLARZ. Mr. Speaker, the United States is currently in the midst of a natural crisis which has caused over a million people to be unemployed and placed thousands in jeopardy of losing their home heating. The crisis is alleged to be the result of a shortage of natural gas; yet we in the Congress, who are charged with the responsibility of offering a solution to the current problem, have no way of knowing its real cause.

The reason for our inability to determine the source of the current crisis is that all the figures concerning our natual gas reserves and supplies come from one place: the gas producers themselves, who, as James Nathan Miller pointed out in a recent issue of the New Republic, draw them up in complete secrecy. Thus, as he points out, the information needed to make an informed judgment on this issue is in the hands of a private industry which may gain billions of dollars depending on the data they submit.

Last year the Oversight Subcommittee of the House Commerce Committee, headed by our distinguished colleague Representative JOHN MOSS, discovered information which clearly indicates that the industry has been less than candid in its reporting. Hearings of the subcommittee revealed that the data gathering is dominated by a few of the gas producers, and cast serious doubts on the entire process by which the industry estimates the extent of our reserves. In addition, investigations by the subcommittee into several gas fields in the Gulf of Mexico revealed that the industry deliberately underreported the total reserves to be found in those fields.

All of these revelations raise serious questions about whether our natural gas shortage is a result of actual shortages caused by the finiteness of our natural resources or whether the current scarcity is being caused by artificial shortages induced by corporate greed. Until this question is resolved the Congress will not be in a position to act wisely on our energy problems. I believe we must both initiate a thorough investigation to determine the extent of our natural reserves and create a permanent body with sufficient resources to continually provide us with independent estimates of the extent of our energy resources, so that we can always have a reliable source for the statistics which are needed to make rational decisions.

For those of my colleagues who still have faith in the industry figures, I commend Mr. Miller's article in the New Republic which I insert in the RECORD. I believe they will find it very enlightening:

THEY'RE GIVING US GAS, ALL RIGHT

(By James Nathan Miller)

The companies that supply US energy are trying to convince Congress and the public that the present cold-weather crisis actually does prove that there is a long-term shortage of natural gas. If they succeed, the US soon will have a gas deregulation law that's based on data that are at best doubtful and at worst false. To understand what's involved, it's essential to realize that the deregulation question actually involves two very different kinds of shortage, which press accounts have jumbled together. There is a true, demonstrable shortage in *deliveries* of gas. The reasons for it are the apparent physical inability of pipelines to satisfy the demand created by the record-breaking cold wave, and the unwillingness of producers to meet this emergency demand at a controlled price when they know they can get several times as much if they can force the removal of controls.

The second shortage is something quite different. It is an alleged shrinkage in the country's long-term underground reserves of gas. The companies that own the long-term reserves—and claim that the shortage exists—also claim that the size of their holdings is a trade secret; as a consequence, the figures that could prove or disprove the existence of a reserve shortage are hidden behind a curtain of secrecy that the present cold spell has done nothing to pierce.

For many years the gas industry has claimed that underground stocks of "proved" reserves have been declining at an alarming rate. "Proved" reserves are the only ones that the country can be certain about. They represent gas fields that the producing companies have drilled into, measured with considerable precision and deemed to be economically recoverable. Beyond the "proved" reserves there are others labelled with adjectives representing the spectrum of geological speculation: "probable," "inferred," "possible," etc.

How much does the US now possess in these various categories? The most recent estimate of the industry's trade association, the American Gas Association (AGA), is that there are 228-trillion cubic feet of proved reserves now in the ground, or about a 10-year supply at the present national consumption rate. But nobody expects us to run out in 10 years, because geologists know that there are huge amounts of the less certain categories waiting to be discovered; most estimates conclude there are between 700 and 1200 trillion more cubic feet of gas ultimately available; some go much higher. This means we probably have enough to carry us several decades into the next century *if we go out and prospect for it*. Which brings us to the industry's main argument for deregulation.

The producers say that, because government regulation is holding down the price of gas, they haven't been doing the expensive exploratory work that's necessary to move the "probable," "possible," etc. fields into the "proved" column. According to AGA's figures, the decline in proved reserves began in 1968. From 1945 to 1968, the gas companies managed to discover a lot more gas each year than the country consumed. So for 22 years our proved stockpiles kept increasing, until they reached a peak of 293 trillion feet in 1967. Since then, according to industry figures, new discoveries each year have totalled *less* than consumption, and the proved reserves have shrunk from 293 to 228 trillion feet. At that rate, we will run out of proved by the end of this century.

But the "proved" figures come from only one source: the gas producers themselves, who draw them up in complete secrecy. Thus for the critical set of statistics that underlie the whole deregulation debate, the country depends totally on the chief private participant in the debate. In the last few years several outside investigations have turned up evidence that these figures may be fundamentally incorrect. They may be a statistical delusion—a gross underestimation of the nation's true reserves.

Proved estimates require a large amount of raw data—core samples, pressure readings, voltage measurements, etc.—that can be obtained only by actual drilling into the gas pockets. Acquiring these data for all the country's 6,300-odd gas fields is a colossal physical job, and only the gas industry itself owns the billions of dollars' worth of equipment necessary to do it. The only group the producers are willing to confide some of their information to is the AGA, for its once-a-year survey of the nation's total reserves. Each year the association assigns 100 industry geologists to its so-called Committee on Natural Gas Reserves. These geologists annually canvass the producers in their assigned areas for the necessary data to form their own estimates.

In 1970, responding to suspicions that had been voiced about the accuracy of the figures, the chairman of the Reserves Committee described the system in detail to the Federal Power Commission. He said the drawing up of the estimates was a rigorously supervised process specifically designed to eliminate any chance of manipulation by the producing companies. He said the companies gave the 100 geologists all the data they needed, and that the geologists, regarding themselves as public servants rather than as representatives of their companies, were scrupulous about insulating themselves from company pressure. All the geologists used the same precise AGA estimating formulas, said the official, and the resulting national estimate was "one of the most consistent and reliable series of statistics available anywhere." The FPC, which is known as one of the most supine of regulatory agencies in its relations with the industry it regulates, accepted this testimony at face value, and looked no further.

Last year a House committee headed by Rep. John Moss (D, Calif.) conducted an investigation that drew a very different picture of the way the process worked. Moss's picture was based partly on facts turned up by an investigation by the Federal Trade Commission of AGA's estimates in the Gulf of Mexico, and partly on testimony by industry officials, including some of the geologists who had drawn up the AGA estimates for the Gulf.

What Moss found was that the whole estimating process was dominated by a few of the largest gas producing companies. These companies were allowed to choose the geologists who served on the Reserves Committee, and they regarded these geologists not as servants of the public but as their own representatives. AGA made no attempt to make the geologists follow its own estimating rules, and in fact the AGA man in charge of the program admitted that he had no idea of what estimating methods they used. Under oath, the geologists admitted that they ignored AGA's definition of what constituted "proved" reserves and, in case after case, gave whatever estimates their companies wanted them to give. One admitted that his company drew up all his estimates for him. Another said that when a company refused to give him information on a gas field, he simply listed the field as

"zero"; in one year he listed five such fields. Another geologist said that companies often refused to give him any information at all, and he was forced to make "ballpark" guesses based on scraps of information from the trade press. Moss turned up one huge field containing 400 billion cubic feet of gas that had been unlisted for two years, even though it had two platforms and 13 wells and its existence was known to the entire industry. If this single field had been included in AGA's figures, it would have increased the AGA's 1974 national estimate of new-field discoveries by 23 percent.

The FTC's investigators, after a five-year examination of AGA's estimating methods, had recommended taking the association and the companies to court for "concertedly maintaining a deficient reporting system" that produced "serious underreporting." The FTC commissioners rejected this recommendation on what appear to have been political grounds. Moss uncovered a memo in the FTC files recommending against any legal action that might encourage "continued PPC regulation into the distant future." The FTC investigation, now seven years old, drags on.

The obvious reason the companies have to give AGA incorrect figures is the propaganda value of proving that a national shortage exists. But there is a more immediately practical reason: The Supreme Court ruled in 1968 that the FPC could let producers *increase* the price of gas whenever AGA's figures showed that their rate of new discoveries had *decreased*. Thus the fewer new discoveries the producers tell AGA about, the more they can charge their customers. Interestingly enough, the first drastic drop in the new-discovery figures appeared in the AGA statistics that were issued a few months after this landmark decision.

The industry claims that AGA's figures are accurate because two national surveys of proved reserves—one by the FPC, the other by the Federal Energy Administration—came up with totals that were only a few percentage points different from AGA's. However, FPC and FEA both have been lobbying for deregulation; and though the two agencies claim that their surveys were completely independent of the industry, both surveys actually depended heavily on industry cooperation and in fact couldn't have been carried out without it.

The FPC, in its survey, selected 158 out of the nation's 6,300 gas fields, and asked the industry for the raw data on these fields. On the basis of this information the FPC's geologists projected a national estimate that was only 10 percent different from AGA's. The FPC's methodology was developed by a "technical advisory task force" whose chairman and cochairman were Exxon geologists, and a majority of whose members were industry executives. Three subsequent analyses of the 158-field sample by others all concluded that the sample had been drawn up in such a way as to minimize the possibility of finding underreported fields.

As to FEA's study, its dependence on industry-generated figures was also self-evident. In authorizing the FEA's survey, Congress gave the energy agency power to subpoena whatever raw data it needed from the producers. But FEA chose not to subpoena anything, even when companies refused to provide requested information. Instead, it used only what information the companies were willing to turn over voluntarily. Since this is the same information AGA depends on, it doesn't seem surprising that FEA's and AGA's reserves estimates were almost identical.

Besides failing to report reserves, the companies are withholding from the market large quantities of gas that they *have* reported. By law, when companies discover produceable quantities of gas in fields leased from the federal government, they are required to market it at the federally regulated price. But Moss's staff exposed cases in which companies—at the very time they were warning of a gas shortage—had failed to produce very large quantities of gas available in fields in the Gulf of Mexico developed under federal lease. President Carter's energy chief James Schlesinger was quoted last week in *Newsweek* as saying, "I keep hearing about gas that's been squirrelled away, but whenever we get close to it, it becomes evanescent." He should look at Moss's findings; they are not evanescent.

Here is one example of what the Moss Committee discovered. By law, companies that lease oil- and gas-producing land from the federal government must turn over all their raw data on these leases to the United States Geological Survey. By subpoenaing the AGA's (hitherto secret) estimate of reserves in the Gulf of Mexico (all developed under federal lease) and comparing this USGS's own (hitherto secret) estimate of the reserves in the Gulf, the Moss staff was able to make the first direct comparison between the AGA's detailed estimates of reserves in a specific group of fields and another set of estimates for the same fields that were based on the companies' own raw data. Moss found that the USGS estimate was 60 percent higher than AGA's: 23 trillion feet for USGS, 14.7 trillion for AGA. Thus, in only 153 fields (2.4 percent of the nation's 6300 fields) AGA apparently had missed 8.8 trillion feet of gas. This is a little more than twice as much as the estimated 3.5 trillion feet of delivery curtailments that are involved in this winter's gas crisis.

The AGA insists that to compare its figures with USGS's is comparing "apples" and "oranges," because USGS said it was estimating "measured" reserves, while AGA uses the "proved." But USGS says that the two terms are "essentially synonymous."

From all the above, it seems apparent that the present 3.5-trillion crisis in pipeline deliveries caused by a record-cold winter tells us nothing about the more fundamental question of what the companies' reserves actually are and why they are not making them available in sufficient quantity. The answer to these questions will come when and if Congress uses its subpoena power to conduct a survey of the industry's holdings that is demonstrably and unquestionably independent of the industry's influence. I don't pretend to know what such a survey will prove; perhaps it will confirm the industry's figures. But it is startling to realize that the nation's basic energy policy is being formulated on the basis of fundamentally important set of statistics supplied by an industry that has every incentive to misrepresent them.

AN URBAN CRISIS?

HON. MICHAEL T. BLOUIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. BLOUIN. Mr. Speaker, we are all well aware of the problems of the Nation's large, metropolitan centers. They are serious problems, easily documented and often publicized, and they rightfully demand our close attention.

But there is another sector of our population which confronts problems just as serious and just as urgent—these are the people of rural America. Their problems are not so readily documented and only rarely publicized, but they too deserve our close and immediate attention.

The staff of Rural America, Inc., using a statistical index developed by the Brookings Institution to measure the problems of urban America, has recently measured the severity of problems in rural America and the results are very interesting. In short, the study revealed that the "hardship index" for nonmetropolitan areas, measuring unemployment rates, the percentage of young and elderly dependents, education levels, per capita income, housing density and poverty levels, is 110.2—a few points higher, in fact, than the "hardship index" for central cities 108.5.

The study reinforces a feeling that I have had for some time that we face a crisis of serious proportions in both urban and rural America. A meaningful solution does not lie in bitter and angry confrontations between urban and rural interests, but rather in a growing spirit of cooperation which recognizes the mutual needs and mutual concerns of urban and rural areas throughout this country.

The following article, from the February 1977, issue of Rural America, explains the comparative "hardship indices" for the Nation, and I strongly recommend it to my colleagues from urban and rural districts:

BROOKINGS STUDY OVERLOOKS NONMETRO NEEDS

(By George Rucker)

A "hardship index" worked up by experts at the prestigious Brookings Institution to help analyze the "urban crisis" shows that rural and small town areas are even worse off than the big cities. (Both the cities and the nonmetro areas are in more critical need than the suburban areas, of course.) The Brookings index uses six indicators: unemployment, percentage of children and old people in the population, educational level, per capita income, housing supply, and percentage of families in poverty or near poverty.

A Rural America analysis of the most recent data available found that, taken as a group, the suburbs of metropolitan areas are better off than the national average on all but one of the indicators. In contrast, cities of 50,000 and above as a group and nonmetropolitan areas as a group are worse off than the average on all but one of the indicators. On four of the six individual measures, and on the composite index, nonmetropolitan areas are even worse off than the big cities.

Brookings specialists Richard Nathan and Charles Adams discussed their methodology and findings in *Political Science Quarterly* last year and presented some of their findings in testimony before the House Banking Committee in October. Nathan and Adams used the index to compare major cities with each other and with their own suburban areas.

Staff at Rural America wondered what the index might show about rural and small town needs, and put together the statistics shown in the adjoining table. As can be seen, the metropolitan suburbs are better off than the nation as a whole on each of the factors except the share of their population which is in the pre- and post-earning age brackets. Giving all of the six factors equal weight, the suburbs are about 13 percent better off than the average.

By contrast, the metropolitan center cities (of 50,000 or more population) are *worse* off than the nation as a whole on every factor except dependence, while the nonmetropolitan areas show above-average hardship on every score except unemployment. In terms of the composite index, nonmetro areas have a hardship rating nearly two percentage points higher than that of the central cities. (To those who might argue that nonmetro hardship may be less severe because it costs

less to live in rural areas and small towns, it should be pointed out that the two income-related factors have been adjusted to allow for that difference, just as Nathan and Adams made similar adjustments to allow for regional differences in living costs.)

UNEMPLOYMENT AND POVERTY

Some comments may be in order with regard to the two measures on which the nonmetro areas showed less hardship than the big cities. It has long been recognized that unemployment figures tend to be less reliable for the nonmetro areas than for urban centers. Moreover, the key measure in rural areas and small towns in probably *underemployment*, and we have no good statistics on that at all. Finally, with regard to the unemployment measure, the recession (which is hopefully a temporary phenomenon) has an uneven effect, hitting the central cities harder than either nonmetro areas or suburbs. In 1970, for example, when the economy was closer to normal unemployment, the difference between central cities and nonmetro areas in the unemployment rate was only one-tenth of a percent.

The shift in the concentration of poverty is also a recent development. In part it, too, reflects the recession; in part it is a measure of the flight of the non-poor from the central cities to the suburbs. The 1970 census figures showed 20 percent of all nonmetro families with incomes below 125 percent of the poverty line (even after adjusting for cost of living differences), while the figure for the metropolitan central cities was less than 16 percent. The relative situation has improved in nonmetro areas and in the suburbs. It has deteriorated in the central cities.

COMPARISON OF CITIES, SUBURBS, AND NONMETRO AREAS

	U.S. average	Metro areas: Suburbs	Metro areas: Central city	Nonmetro areas
Unemployment:				
Average annual rate, 1975 (percent)	8.5	8.0	9.6	8.0
Index (United States=100)	100.0	94.1	112.9	94.1
Dependence:				
Percent of 1970 population under 18 and over 64)	4.4	4.4	4.3	4.6
Index (United States=100)	100.0	100.0	97.7	104.5
Education:				
Percent of 1970 population over 25 with less than high school education	44.7	40.8	49.2	54.1
Index (United States=100)	100.0	91.3	110.3	121.0
Per capita income, 1974:				
Adjusted for cost of living	$4,450	$4,891	$4,376	$4,171
Index (United States=100)	100.0	91.0	101.7	106.7
Crowded housing:				
Percent of 1974 units with more than 1 person per room	5.4	4.4	5.6	6.2
Index (United States=100)	100.0	82.1	105.2	115.9
Poverty and near-poverty:				
Percent of 1974 families with incomes less than 125 percent of low income, adjusted for cost of living	13.3	8.5	16.4	15.8
Index (United States=100)	100.0	63.9	123.3	118.8
Composite hardship index	100.0	87.1	108.5	110.2

Note: Socio-economic indicators used are from Richard Nathan and Charles Adams, "Understanding Central City Hardship," Political Science Quarterly, spring 1976. Adjustments in income and poverty figures for cost-of-living differences follow their procedure of utilizing BLS comparative figures for intermediate and lower family budgets, respectively.

Sources: Unemployment figures from Bureau of Labor Statistics; dependence and education figures from 1970 census data; per capita income from current population reports, consumer income; crowded housing from annual housing survey; and poverty and near-poverty data from Census Bureau (unpublished data from Current Population Survey).

CHRISTMAS IN OCTOBER

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. MAZZOLI. Mr. Speaker. Christmas will arrive a bit early this year on Capitol Hill—October instead of December.

That is, unless Congress acts promptly to kill its cost-of-living salary adjustment scheduled for October.

The public is not happy over the "back-door" method by which the recent congressional pay hike became effective.

As I urged on February 8, in my testimony to the Special Ad Hoc Subcommittee on Presidential Pay Recommendations, we should have taken a public vote on this issue.

But, if the public is not happy now, they will be totally outraged soon if a hefty cost-of-living adjustment is added to our paychecks this October—through the same, wide-open backdoor.

I completely oppose this scheduled Christmas-in-October bonanza for Congress.

And, I urge all Members who share my feelings to join in cosponsoring my bill, H.R. 2837, which I shall soon be reintroducing.

If my bill is approved, the upcoming cost-of-living adjustments for Congress would be killed; consideration of all future congressional pay changes would be separated from those affecting all other Federal employees; and, no future salary increases nor cost-of-living adjustments could become effective for Members of Congress without a public vote.

Let us be traditionalists. Let us celebrate Christmas in December—not October.

At the risk of being labeled the Grinch who stole Christmas, I shall periodically return to the subject on these pages.

GAO INVESTIGATION OF FOREIGN AID APPROPRIATIONS TO SOUTH KOREA

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. YOUNG of Florida. Mr. Speaker, as ranking minority member of the Foreign Operations Subcommittee, which has appropriation jurisdiction for most of our foreign aid programs, I am naturally concerned about any possible abuses of the U.S. foreign aid programs.

Many strong allegations have been made in recent months that funds from South Korean interests have been paid to U.S. Congressmen in exchange for a variety of favors. The investigative approach so far, by the congressional committees and the Department of Justice, has been to try to determine who received those funds and why. I feel we should be equally concerned about where those funds may have come from.

In this regard, I have formally requested that the Comptroller General of the United States conduct an immediate investigation of possible abuses of funds appropriated by Congress for the Republic of Korea. The purpose of this investigation is to determine if any of the millions of dollars that the American taxpayer has provided for South Korea, have been directly or indirectly used for unauthorized payments to people in our Government.

The following is a letter I sent to the Honorable Elmer B. Staats, Comptroller General of the United States, formally requesting this investigation:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 16, 1977.

Hon. ELMER B. STAATS,
Comptroller General, General Accounting Office, Washington, D.C.

DEAR MR. STAATS: As Ranking Minority Member of the Foreign Operations Subcommittee of the Committee on Appropriations, which has appropriation jurisdiction for most of our foreign aid programs, I am naturally concerned about any possible abuses of the United States Foreign Aid Programs.

Recent revelations that some U.S. government officials have received gifts and cash payments from Korean sources with close ties to the South Korean Government are not specific enough to rule out the possibility that the original sources might have been American tax dollars transmitted through one of our aid programs.

Since the United States has provided the Republic of Korea with millions in assistance of one form or another, it would be helpful to me in my position on the Subcommittee to know if some of this assistance is finding its way back, directly or indirectly, to some in our own government in the form of unauthorized payments.

In view of the importance of this information to the Members of the Subcommittee on Foreign Operations, and to help me meet my responsibility as the Ranking Minority Member of that Subcommittee, I am hereby requesting a General Accounting Office investigation of this entire matter.

With best wishes and personal regards, I am

Very truly yours,

C. W. BILL YOUNG,
Member of Congress.

WE MUST HONOR THOSE WHO HONOR US

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. BAUMAN. Mr. Speaker, Vietnam is a matter which most Americans would rather forget. The words and actions of the late Gen. Douglas MacArthur better express our national will for victory than our recent history during which resolution and purpose were difficult to find. It can be found, though, in the record of those who served in Vietnam.

Yet the men who served in Vietnam, who died there and those who were left unaccounted deserve more from us than they have been given to date. Erecting a Vietnam war memorial is little enough to show our gratitude, but at least it is a start, and I support such a project.

Richard W. Cooper, Jr., of Salisbury, Md., who died in service to his country in January 1973, honors his family as he honors all of us. Having received a most impressive letter from his parents, Connie and Richard, Sr., I submit this letter is a most moving and reasoned case for the construction of an appropriate Vietnam memorial.

The letter follows:

RICHARD W. COOPER,
ENGINEERING SURVEYS,
Salisbury, Md., January 7, 1977.

Congressman BOB BAUMAN,
Cannon Building, Washington, D.C.

DEAR BOB: There is a personal matter I am concerned with. Our son, and my namesake, was lost over Hanoi in a B–52 raid in one of the last bombings four years ago this last month. He is one of the few MIAs in your district, I believe. He leaves a wife and one daughter, two years old at the time of the incident and another daughter born three months after. The Air Force has been most concerned and considerate in every way and I want you to know of this.

However I would like you to know that Mrs. Cooper and I as parents and as realistic persons do not expect at this late date that Hanoi has really anything to disclose as to the fate of these MIAs, as much as I would like to think so. Therefore I would like for you to stand against any "pay-off" in any way that may be contemplated by our government toward the disclosure of any information they may be withholding. I am aware that there are several rather active organizations that are taking a really forceful position in this matter. However, again I must say with reluctance that it is a very dim cause.

My son was very proud of his duty in the service and he never questioned the reasons for his involvement. Only recently he has been promoted to major, something that would have been a wonderful honor to him. The great tragedy of this whole matter has been the public's general feeling of unconcern and disassociation toward those who gave themselves to the Country's call. Since the news of the downing of the B–52 four years ago, there has been no genuine, local or national, concern in the media about these persons who in any other conflict would have been honored at the hero level. And I believe the media actually reflect the public's feeling of blanking out this unfortunate segment of our history.

I feel that in time the proper recognition will be given to these lost young men and women. It would be well if something tangible could be thought out as a national memorial. Let's think in terms of that rather than any black-mail type of payment to Hanoi. The records show that they used every device to get money from the French when they were under somewhat similar circumstances.

Again let me say that I feel that our citizenry is well represented by you. May you have a rewarding and happy new year of 1977 and with highest regards, I am

Cordially yours,

RICHARD W. COOPER.

LOWENSTEIN APPOINTMENT TO HUMAN RIGHTS COMMISSION PRAISED

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. FRASER. Mr. Speaker, the Carter administration has taken a number of initiatives indicating its intention to give greater priority to human rights in our foreign policy. One of the best indicators of this intention are the kinds of appointments that are made to posts critical for the human rights field. The appointment of Allard K. Lowenstein, former Member of Congress, to the United National Commission on Human Rights is one which I personally believe, is a very significant step for the administration. Mr. Lowenstein has been a leader in the civil rights movement in this country as well as in the effort to obtain greater priority for human rights in our foreign policy. I would like to insert in the RECORD the Department of State's press release announcing Mr. Lowenstein's appointment. I strongly endorse the views expressed by Deputy Secretary Christopher.

The document follows:

ALLARD K. LOWENSTEIN NAMED HUMAN RIGHTS COMMISSION DELEGATION HEAD

Allard K. Lowenstein, former Member of Congress, has been named to head the United States Delegation to the 33rd regular annual session of the United Nations Commission on Human Rights. The announcement was made at a swearing-in ceremony held in the John Quincy Adams Room of the Department of State on February 7, presided over by Deputy Secretary of State-designate, Warren Christopher, and attended by Members of Congress.

The 33rd session of the United Nations Commission on Human Rights opened in Geneva, Switzerland, on February 7 and will last until March 11, 1977. The Commission, which is the principal United Nations organ dealing with human rights questions, will consider a lengthy agenda involving a wide range of human rights issues. The appointment of Mr. Lowenstein, whose distinguished career has featured active involvement with a number of human rights causes, reflects the high importance attached by the Carter Administration to the promotion of international human rights through the United Nations. The broad agenda of the Human Rights Commission will afford Mr. Lowenstein the opportunity to present the views of the new Administration on a number of serious human rights issues which presently trouble the world scene.

In speaking of Mr. Lowenstein, Deputy Secretary of State-designate Christopher said:

"The United States Government is fortunate that Mr. Lowenstein has agreed to head the U.S. Delegation to this important meeting on human rights. A young associate of two American giants in the field of human rights, Frank Graham and Eleanor Roosevelt, Mr. Lowenstein has been at the forefront of the struggle for human rights in the United States and abroad throughout his life. He has been in the vanguard of the civil rights movement in the United States. Years before others took an interest, he demonstrated special concern with rising racial tensions in southern Africa. He has been a leading advocate for the right of individuals to emigrate freely. On behalf of the President and the Secretary of State, I would like to express the appreciation of the United States Government to Mr. Lowenstein for undertaking this important assignment."

Mr. Lowenstein plans to leave immediately for Geneva to join the United States Delegation.

UNITED STATES IMPORTING STEEL AND UNEMPLOYMENT

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. GAYDOS. Mr. Speaker, in recent months there has been considerable interest shown by the domestic steel industry and the American steelworker in the amount of foreign steel being shipped into the United States and its effect on the job market.

The industry and its workers are concerned and, according to the American Iron and Steel Institute, they have justification for their fears.

On February 9, AISI reported that foreign steel had captured its largest share of the American steel market in 4 years. Steel imports in 1976 totalled 14.2 million tons, an increase of almost 19 percent over the 12 million tons shipped here in 1975. The 1976 figure was equal to 14.1 percent of the apparent steel supply in the Nation last year, reflecting an increase from the 13.5 percent of 1975.

The president of AISI, Frederick C. Langenberg, aptly describes the trend as representing the "export of foreign unemployment to the United States. Mr. Langenberg points out that unfair trading practices already have reduced the number of steelworkers employed in this country and the increase of foreign steel to the United States immediately preceded the fuel shortage, which caused the layoff of thousands more by a drastic cutback in production facilities.

Furthermore, AISI also reports that despite the imposition of quotas certain foreign steel categories, there has been a greater penetration of imports in domestic areas.

The importation of stainless steel, for example, totaled 174,712 tons, an increase of 4.5 percent over 1975 and representing better than 15 percent of the apparent domestic supply. Tool steel, also subject to quotas, showed imports of 27,600 tons or 28.1 percent of the domestic market. In 1975, tool steel imports were listed at 24,600 tons.

Mr. Speaker, I call this to the attention of my colleagues for I expect we will

be hearing more about steel imports, their effect on the domestic industry and the need for mandated quotas in the months to come. I hope they will give this matter their full consideration.

H.R. 11, EXTENSION OF THE LOCAL PUBLIC WORKS CAPITAL DEVELOPMENT AND INVESTMENT ACT

HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. MILFORD. Mr. Speaker, during the first disbursement of funds under the Local Public Works Capital Development and Investment Act, many inequities came to light as a result of the formula used to distribute the funds—particularly with regard to major cities throughout the country which have large numbers of unemployed persons but which did not receive any funds. Dallas, Tex., was one of those cities.

At this time, I would like to place in the RECORD the testimony of the mayor of the city of Dallas, the Honorable Robert S. Folsom, before the Economic Development Subcommittee during their hearings on the extension of this program. I believe Mayor Folsom's testimony is indicative of the difficulties experienced by many major cities in receiving these much needed funds:

TESTIMONY PRESENTED TO THE PUBLIC WORKS SUBCOMMITTEE ON ECONOMIC DEVELOPMENT ON BEHALF OF THE CITY OF DALLAS BY MAYOR ROBERT S. FOLSOM, FEBRUARY 2, 1977

Mr. Chairman, it is an honor and a privilege to appear before this committee to discuss a very important subject—the local Public Works Employment Act of 1976.

First, let me say that I believe in the concept of the Local Public Works Act. This type of economic stimulus program not only provides short-term employment opportunities for individuals currently unemployed but also provides the long-term benefit of construction of needed public facilities for local communities.

I am here today to present to you some of the problems that the city of Dallas encountered with the 1976 act and no doubt our experience is similar to that of many other major urban areas throughout the country. In November of this year, the city of Dallas prepared and submitted four applications for funding under the local Public Works Employment Act. The requested funding represented not only a new and expanded employment opportunity for the 17,000 unemployed workers residing inside the city of Dallas, but also financial support for the construction of needed public facilities. The city of Dallas received notification that none of the four projects submitted for consideration was funded, primarily because of the city's low rate of unemployment and comparatively high per-capita income. We had difficulty competing with other areas of smaller size and areas which had more intense concentrations of unemployment.

As previously indicated, that low rate of unemployment, now hovering at 4.2 percent (almost 20 percent in the construction trades)—as a function of the size of the city of Dallas—represents almost 17,000 individuals in the city of Dallas who consider themselves to be a part of the work force and are currently out of a job. Our concern is I'm sure shared by other major cities that did not receive project funding under title I. Because unemployment tends to concentrate itself in major cities, some adjustment to the way funds are distributed inside the State should be developed. In Texas, 40 percent of the State's unemployed work force is located in six major cities—only 24 percent of the State's 55 million dollars in funding under title I was spent in 4 of those cities—Dallas and Fort Worth received no title I funds even though both cities represent almost 10 percent of Texas' unemployed work force.

There are many ways, I am sure, to revise the funding mechanism. Although we would not go so far as to recommend a change at this time, I would certainly encourage your consideration of alternatives which would equitably address the unemployment needs of all jurisdictions and certainly those cities that have a low rate of unemployment, but because of their size, have relatively large numbers of unemployed.

We would also recommend that you eliminate any consideration of per capita income from the funding mechanism, and also implement a requirement that any jurisdiction submitting applications for project funding under this act be required to use only unemployment data from their community as a basis for the submission of their application.

Mr. Chairman, another matter of very grave concern to us in Dallas—and in the State of Texas—is the distribution pattern of the 2 billion dollar appropriation between the States. As you will recall, the economic development administration allocated the appropriation among the States in the following manner:

Sixty-five percent of the appropriation or almost 1.3 billion dollars was distributed to States based upon that State's share of the total national unemployed population.

The remaining 35 percent of the appropriation was distributed among the States based on the severity of unemployment—rate of unemployment and this is the portion of the mechanism which is the greatest cause for concern to us in Texas.

The result of this financing scheme was most inequitable—as you can see from the table that has been distributed to you which I would like to become a part of this official record—Texas, received $55 million. That total when compared on a Statewide unemployed per capita basis to other States dramatically demonstrates the disparity in funding. On an unemployed per capita basis, Texas received $190 per unemployed person, while New Jersey received $391, New York $365, Michigan $459 and California $293. It is interesting to see that Florida which has an unemployed population of 319,000 people received 136 million dollars while Texas, which has 292,000 persons unemployed, barely 27,000 fewer than Florida, received only 55 million dollars.

This funding pattern is, in basic fact, inequitable and suggests that there is some difference, some disparity of circumstance, to being unemployed in Florida rather than Texas. It is our contention that this mechanism used to distribute funds among the States be revised to distribute funds in a more even and equitable manner. We would go so far as to recommend that each State receive a proportion of the final appropriation for this program based only its numerical share of the total rational unemployed work force.

Along with my colleagues on the Dallas City Council I believe that adjustments to the funding mechanism for public works projects could result in a more equitable and even distribution of project funds and would allow major cities, rural areas, suburban communities and other units of general purpose local governments a fair opportunity to meet the objectives of the act:

1. By providing jobs for people currently unemployed; and

2. Financially supporting the construction of facilities which will have a lasting community-wide benefit.

Please accept my gratitude for this opportunity to present these observations regarding the Local Public Works Act. We, in Dallas, are interested in responding to the needs of those 17,000 people in our city who are unemployed and feel quite strongly that our city and its citizens should not be penalized simply because our community-wide rate of unemployment is relatively favorable.

LOCAL PUBLIC WORKS ACT

State	Population [1]	Number of unemployed [2]	Percent	LWPA allocation	Per capita allocation	State	Population [1]	Number of unemployed [2]	Percent	LWPA allocation	Per capita allocation
California	21,185,000	850,600	9.0	250,000,000	293	Oklahoma	2,678,000	81,500	6.8	16,400,000	201
New Jersey	7,316,000	255,400	8.0	100,000,000	391	Florida	7,841,000	319,900	9.6	136,683,000	428
Michigan	9,157,000	344,200	8.8	158,311,000	459	North Dakota	643,000	11,200	4.0	10,000,000	892
New York	18,125,000	637,500	8.5	232,910,000	365	Utah	1,167,000	25,000	4.7	10,000,000	400

H.R. 2235

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. LEDERER. Mr. Speaker, I would like to introduce into the RECORD two statements that were made before the House Subcommittee on Unemployment Compensation on February 22, 1977. The first statement was made by Mr. Thomas L. Langan from Local 98 of the IBEW in Philadelphia; the second was made by Mr. James Mackin, who is the business manager of this Local Union 98 of the IBEW.

These two gentlemen testified on behalf of H.R. 2235, which would extend for an additional year the Federal supplemental benefits program for the full 65 weeks beyond the current expiration date of March 31, 1977:

PHILADELPHIA, PA.,
February 22, 1977.

GENTLEMEN: We are here to ask that H.R. 2235 be passed by this Committee and the Congress as soon as possible. Briefly I would like to say that we came here on buses from Philadelphia with 38 of our 700 (out of a membership of 1650) unemployed. These men are mainly in their 40th week or more of unemployment. If this statute is not passed these men have nothing to turn to but welfare.

To make matters worse, these men are all paying off mortgages. Many mortgage companies refuse payment if you become more than 1 month late unless you make a double payment. We had a case where a member ran out of his 65 weeks and applied for welfare. Due to red tape his check was delayed for six weeks. The Mortgage Company refused a $254.00 payment and demanded $508.00 which he did not have. Foreclosure proceeding has been instigated and he faces a loss of 10 solid years of payments and worse, removal from his home.

Please spare these 38 men and the thousands of others who are in the hands of unscrupulous Mortgage Companies whose whole mission in life is to grab up people's property.

Pass H.R. 2235.

THOMAS L. LANGAN,
Local 98 IBEW.

FEBRUARY 22, 1977.

Mr. CHAIRMAN: I represent a Local Union that has been hit the hardest with unemployment over the last three years. This extension is desperately needed in the Philadelphia area. We have 50 percent of our membership that have lost time and our figure has been 40 percent the last two years. We have people who have exhausted their benefits and many who will in the next month or two. A skilled craftsman unemployed is a man stripped of his dignity for he is not used to prolonged unemployment. Construction work is usually seasonable but a depression knows no seasons. This country is in dire need of rebuilding and modernizing but yet skilled men remain idle. We do not relish unemployment any more than we relish asking the utility companies and mortgage companies for extensions because we are unable to pay. Our people are losing their homes and many marriages are affected by this prolonged unemployment. We are willing to earn our keep and pay our taxes and live normal lives, however this is prevented by the unemployment that surrounds us. The only difference between this depression and the depression of the 20's and 30's is unemployment compensation and the federal extensions. If this extension is not approved, a lot of proud people will have no where to go. We want to go back to a normal life with a job and a paycheck but until this comes about we desperately need this new extension and I beg you, Mr. Chairman and members of this Committee, for my members and all the unemployed Construction men and women extend these benefits to Unemployment Compensation so we can keep our heads high and be proud while we wait for the jobs to come.

Thank you very much,

JAMES MACKIN,
Local Union 98 IBEW.

NEW GENERAL MILLS TEAM

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. FRENZEL. Mr. Speaker, below is an article from the Minneapolis Tribune which gives us an interesting profile of the two top executives of General Mills. The contributions of E. Robert Kinney, new board chairman, and H. Brewster Atwater, Jr., new president, have had a great impact on the success of General Mills, and I salute their efforts and wish them well in their new positions. I recommend the article to my colleagues as an example of how aggressive men with diverse backgrounds rose to the top of a major corporation:

NEW GENERAL MILLS TEAM IS STUDY IN CONTRASTS

(By Dick Youngblood)

General Mills wasn't noticeably impressed about 25 years ago with E. Robert Kinney or the prosperous little seafood-processing company he had started in the kitchen of his apartment in Bangor, Maine.

Kinney's company had agreed to handle the sales, marketing and distribution chores for a struggling Boston cat-food company, a task it performed with such success that the cat-food business soon attracted the acquisitive eye of the Big G.

General Mills bought the cat-food company, but company executives couldn't conceive of how Kinney's operation could match their own marketing expertise.

And so they promptly fired him.

"Whereupon they proceeded to foul the damned thing up," Kinney was saying last week with a pardonable trace of satisfaction. "It was a disaster, and they finally had to sell it."

Kinney, 59, is not a man to hold a grudge, however, and thus has obligingly consented to step into the top job at General Mills this week when James P. McFarland retires as chairman of the board.

Joining Kinney as the other half of the company's new top management team will be H. Brewster Atwater Jr., 45, who succeeds Kinney as president.

The two are a study in contrasts: Kinney a compact man with a full head of pure white hair, Atwater tall and lean with a receding hairline; Kinney the son of a Yankee horse-trader and a graduate in history from a small Maine college, Atwater a product of the Lake Minnetonka establishment with business degrees from Princeton and Stanford; Kinney with the soft, Maine accent and the quiet, easy-going manner, Atwater the businesslike, self-confident and more intense young executive.

"You see the contrast, in physical terms at least, whenever they come into a meeting," an executive was saying last week. "Bob sort of drops in. But Bruce, he arrives!"

There are, however, two key characteristics the two men share, interviews with colleagues and acquaintances indicated last week.

One man summed it up: "They are both very bright," he said, "and they are both damned shrewd businessmen."

Kinney charted the more improbable course to the top of the nearly $3-billion corporation.

The son of a Maine farmer and horse dealer, Kinney was a Phi Beta Kappa graduate of Bates College in Lewiston, Maine, where he took a major in history and a minor in economics.

He had every intention of becoming a school teacher.

But then, in the summer of 1940, it struck him that lobstermen along the Maine coast were throwing away tons of crabs that would creep into their traps, it offended his sense of thriftiness.

Kinney offered to buy the crabs for a penny apiece, and he and his wife started canning them in their kitchen at night.

"I sent three or four cans to a Boston food broker," Kinney recalled last week, "and back came an order for 3,000 cases of 24 cans apiece. We were producing only about a half-dozen cans a night."

Kinney borrowed $300, added that to the $300 a friend had scraped together, and rented a garage and some canning equipment.

Within a year the North Atlantic Packing Co. had 100 employees, and within a decade its revenues topped $2 million a year.

In the 1950s, with his company running smoothly, Kinney signed on as a consultant—and later as president—at Gorton's, an old-time Massachusetts seafood company that had fallen on hard times.

Once again his sense of thriftiness was offended—this time by all the company cars and club memberships and first-class airline tickets that Gorton's was paying for.

And once again he had a bright idea—this time to turn Gorton's fish into a convenience food packaged as fish sticks and precooked dinners.

He also sought federal inspection so he could stamp Grade A on the packages, and installed what he later discovered was called management by objectives.

In 11 years as president of Gorton's, Kinney saw revenues climb from $10.5 million to more than $70 million, and profits from the break-even level to more than $1.5 million.

It was at that point, in 1968, that the Big G started eyeing the New England coastline once again. This time they took no chances—they acquired Kinney along with Gorton's.

A year later, impressed with what he called Kinney's "good, gutsy Maine business sense," McFarland yanked Kinney into Minneapolis and installed him as executive vice president in charge of about 75 percent of the company's business.

It was at this point that the management team that now has emerged might have become unglued.

"I knew all those ambitious young executives were looking at me and wondering how a fish packer who didn't know a cereal package from a box of cake mix could come in here and run the food business," Kinney said.

One of the first he sought to reassure was Atwater, who, while still in his 30s, had recently been named head of the big consumer food group. Now, suddenly, here was an interloper moved in as his boss.

Atwater insists there was never any tension, but Kinney moved nonetheless to ensure that the air was clear.

"I told him I needed his help and that I didn't intend to stand in the way of his career," Kinney said last week, "that I'd go out on a limb to support him every time I thought he was right."

He paused briefly, then added: "And Bruce has a propensity for being right a high percentage of the time."

The result was what colleagues describe now as a "very close working relationship" between the two.

A year after he came to Minneapolis, Kinney became the company's chief financial officer, and in 1973 he became its president. Atwater was named executive vice president in 1970 and in 1971 was elected to the board of directors.

Last summer the succession upon McFarland's retirement was made clear when Kinney was named chief executive officer and Atwater succeeded him as chief operating officer.

Atwater's performance since then has left other top executives confident of his ability to run the company.

"All of Bruce's experience here was in the food business," said one, "but he hasn't missed a beat now that he has the day-to-day responsibilities for the whole thing.

"He picked up a feel for our other, nonfood business faster than enyone else could have possibly done."

It was a variation on a theme: From office to office, in and out of executive row, the book on Atwater describes a man of quick intellect, a quick study who swiftly absorbs detail and reaches a decision.

An outspoken man who once conceded to a reporter that a hot-selling new General Mills food item was a "terrible-tasting product," Atwater is viewed as an innovative manager who believes in taking risks once the facts are in and carefully analyzed.

A Minneapolis native, Atwater was 14 when he went to work in the family business—Scott-Atwater, manufacturer of marine motors. He soon learned it wasn't much fun being the boss's kid.

"The worst was the degreasing pits with the solvent (to remove grease from new engine parts) and the fumes," Atwater recalled last week, "and everybody wondering if the punk kid was going to quit."

Atwater took his bachelor's degree at Princeton and his master of business administration degree at Stanford. After three years on active duty with the navy he joined General Mills in 1958.

Within 10 years he was head of the company's largest and most profitable operation, the consumer food group—a business that has tripled its revenues and more than double its profits since he took it over.

Both Kinney and Atwater have a tough act to follow, for McFarland's stamp on the company is the diversification program he completed in the eight years he was chief executive officer.

Both men warn, however, that no dramatic changes are to be expected.

"The current mix of food and nonfood businesses is sufficient to meet our long-term objective of 10 percent compounded annual growth in earnings," Kinney said, "even without any acquisitions or new directions."

Which is not to say that there will not be any acquisitions or new directions, he was quick to point out.

But given the record of recent years—a 16 percent annual growth rate over the last five years, for example—Kinney and Atwater "would have to be nuts," as one man put it, "to start tinkering with what we've

THE COMPTROLLER GENERAL'S ETHICS PROPOSALS

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mrs. SCHROEDER. Mr. Speaker, in a message to you on January 28, 1977, the Comptroller General made various suggestions on the manner in which a new code of ethics and financial discosure should be established for the officers and employees of our three branches of Government. At that time, the message from the Comptroller General was referred to the House Post Office and Civil Service Committee and subsequently to that committee's Subcommittee on Manpower.

Today, as chairwoman of the Subcommittee on Manpower, I am introducing the two suggested bills which the Comptroller appended to the January 28 message. While I am not in accord with all the suggestions of the Comptroller, I believe that the whole House should have a chance to examine his bills in connection with the discussion of ethical reform we are now having.

For the information of my colleagues, the Comptroller General's message follows:

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, D.C., January 28, 1977.

Hon. THOMAS P. O'NEILL, JR.,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Several bills have been introduced in the Congress to establish a code of ethics and require financial disclosure. To cite a few, see H.R. 1, H.R. 9, and S. 290, of the 95th Congress. The bills both in this and the last session would place the administrative responsibility, the receiving of reports, and investigative functions relating to financial disclosure in the Comptroller General of the United States. In the past I have expressed my concern and opposition to such proposals. I now reiterate my strong opposition to these aspects of the bills and emphasize the serious repercussions they would have on the General Accounting Office (GAO) if enacted.

RESPONSIBILITY FOR ADMINISTRATION

The bills would place the General Accounting Officer in an operational role which is inconsistent with its basic role of audit and evaluation. I believe that the responsibility for administering the system of financial disclosure should not be placed with the Comptroller General or in the General Accounting Office.

The Congress has long looked to GAO to provide objective information and evaluations of how well legislation is being implemented by the executive agencies and to provide it with suggestions for how these programs could be more economical, more efficient, and more effective. Our role is that of an evaluator rather than being responsible for the administration of Federal programs.

My concern with respect to placing the responsibility in the Comptroller General for administering the financial disclosure requirements involving members of Congress is similar to the concern which I expressed when the Congress was considering proposals to place responsibility in GAO for administering congressional campaign financing. I indicated at that time I felt that placing this responsibility in GAO held in it the seeds of friction and distrust which could do great damage to the overall effectiveness of the Office.

We endeavor to remain completely nonpartisan and free from any type of political influence in carrying out the functions vested in our Office. I do not believe that oversight and investigation of the financial transactions of individual members of Congress is consistent with our role as a nonpartisan arm of the Congress, called upon for help daily by committees and members of Congress. Roughly one-third of our entire work now originates with committees or with individual members of Congress.

I recommend most strongly, therefore, that the responsibility for administering a system of financial disclosure not be placed on the Comptroller General or in the General Accounting Office. Moreover, as stated above, placing the responsibility for administering financial disclosure, particularly as it refers to financial disclosure problems of members of the Congress, could potentially do great damage to the overall effectiveness of the General Accounting Office and endanger the close relationship which this Office must have with members and committees of the Congress.

We think there is much to be said for the creation by statute a Commission on Ethics and Financial Disclosure to be responsible for recommending consistent procedures for implementing, administering, and investigating ethical conduct and the financial disclosure system, and for rendering formal advisory opinions and counsel on potential conflict-of-interest matters. The General Accounting Office could then be given specific responsibility for maintaining oversight of these systems.

We believe that if disclosure reports were filed with such Commission, and a copy with individual agencies, the objectives sought could be achieved with minimal disruption and costs and could be merged with existing systems in each branch. Such a system would also enable the responsible officers of each branch to review the reports to determine whether apparent or potential conflicts of interest occur with the employees' official duties. Such reviews are extremely important and are currently required to be performed by each agency in the executive branch. It is essential that the agency head continue to be held accountable for any questionable interests. Agency heads, also, are in a better position to know and to make judgments as to what specific financial interests an employee should not have, based on his current responsibilities.

BALANCING PRIVACY CONSIDERATIONS WITH PUBLIC DISCLOSURE

Obviously, the Congress faces a difficult dilemma in seeking to accommodate the public policy considerations underlying requirements for public disclosure of personal financial information and the right of personal privacy which affects all of us. This dilemma is somewhat the same as is inherent in the public policy aims of the Freedom of Information Act and the Privacy Act of 1974—the one promoting openness in Government administration and the other carefully spelling out the basis upon which "private" information in the hands of the Government may be used and disclosed.

Here the primary concern is promoting confidence in public officials through a code of ethics and full disclosure of their personal financial status. Aside from any philosophical or ethical objections which might be voiced against such disclosure, there are difficult problems that need to be considered—problems which, to my mind, are avoidable without undermining the overall objective being pursued.

Provisions should be made to require notice to the individual involved that disclosure of his financial report has been made and to whom. I also believe the requestor should be required to state his intended use of the information in the file, and that both the identity of the requestor and his stated reason for the request should be made available to the public. I further believe the Congress might require the requestor to make a showing of a conflict of interest or potential conflict-of-interest situation concerning the official whose statement has been requested before the statement is released.

The legislation should authorize the administering agency to issue regulations limiting access to pertinent information in the context of these statements to a conflict of interest or potential conflict-of-interest situation (e.g., interests, gifts or other relationships of officials of the regulatory agencies in companies regulated or affected by their regulations).

With the above considerations in mind, there is enclosed for your consideration a draft bill (Enclosure A) which incorporates many features of the various legislative proposals introduced in the Congress, but with significant modifications. We are not necessarily endorsing all of the provisions of the draft bill. We believe, however, that there is merit in the concept of an independent Commission on Ethics and Financial Disclosure.

In the event Congress should not favor the establishment of a Commission on Ethics and Financial Disclosure we would recommend that legislation be enacted to place the primary responsibility on ethics and financial disclosure of the three branches of the Federal Government in the Civil Service Commission, the Clerk of the House of Representatives, the Secretary of the Senate, and the Director of the Administrative Office of the United States Courts, respectively. To accomplish this concept there is enclosed for your consideration a draft bill (Enclosure B).

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

PANAMA CANAL

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. YOUNG of Florida. Mr. Speaker, I have cosponsored a resolution which pertains to U.S. rights over the Panama Canal. This resolution would express the sense of the House of Representatives that the Government of the United States should maintain and protect its sovereign rights and jurisdiction over the Panama Canal and the Panama Canal Zone, and should in no way cede, dilute, or transfer any of these sovereign rights which are so indispensably necessary for the protection of the interests of the United States and the entire Western Hemisphere.

Most Americans are aware of the great strategic importance of the canal to our national defense, and of our historic investment of money, time and energy into the Canal Zone. History is indisputably on our side with regard to sovereignty over the Panama Canal, yet it appears that the U.S. sovereignty over the Panama Canal is being put in jeopardy as result of decisions of the executive branch of our Government.

It is vital to our national security that the House of Representatives reaffirm its commitment to keeping the Panama under U.S. control.

CONGRESSIONAL PAY AND ETHICS

SPEECH OF

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. McKINNEY. Mr. Speaker, Congress adjourned last Wednesday for a 6-day "district work period" and, as always, I welcome the opportunity to leave Washington and spend a few "working days"—rather than rushed weekends—in Connecticut with you. But the work of Congress continues even now as the clock ticks away the 30-day statutory veto power of the House over the salary recommendations of the Commission on Legislative, Executive and Judicial Salaries. That period, during which either House may disapprove the 29-percent raise, ends February 20; and while the Senate has already cast a procedural vote tacitly approving the raise; the Democratic leadership of the House has cleverly—and unfortunately—scheduled the committee and the House so it is virtually assured no vote will take place.

The explanation for this childish maneuver, which fooled no one, begins in 1967 when Congress, in its astute wisdom and without benefit of my membership, included its own salary in the automatic review procedure for executive and judicial pay raises. By doing so, those brave souls thought they could avoid the politically sensitive spectacle of voting for their own raises. However, as with most matters of sheer political expediency, the solution caused more problems than it solved. Now, as a result, we face the intolerable situation whereby executive and judicial salaries—which under that same 1967 law must be kept at a parity with the congressional pay scale—are "bunched" at so low a level that qualified judges are leaving the bench and experienced executives with the managerial skills needed to make Government more efficient simply cannot afford the sacrifice of public service. Because the Senate rejected a proposed raise 4 years ago, neither Congress, the Federal judiciary nor the executive branch have had a significant pay raise since 1967—with the exception of a 5 percent cost-of-living adjustment last year.

Can you think of anything which does not cost more today than it did in 1967? Can we expect qualified and talented judges and administrators to provide dedicated service with no hope of financial advancement? Beside whether Congress deserves a raise, these are the questions I must face in deciding how best to represent your interests on this issue.

As you may know, I decided to give last year's cost-of-living raise to the cities of the fourth district. I did so not because I believed Congress undeserving of a raise but to point out the irresponsible waste of time and attention spent on "congressional pay politics" while the real problems—such as our cities—"go begging." This year, if given the opportunity, I will support the raise which has the endorsement of both our former and current Presidents. I do so, frankly, because I think judges, Federal administrators and even Members of Congress need and deserve compensation which is commensurate with the taxing responsibilities of those jobs. We are no longer a part-time, frontier Government, and believe me Washington is no frontier town when it comes to prices. If we are to avoid having to put too-young and too-inexperienced persons in jobs with responsibilities easily as broad as those of top corporate executives, then compensation must be adequate.

This is not to say that Government service, even at inflated prices, should not require some sacrifice from those who serve. I seek no pity, but believe me—it does. For 5 days out of 7, most of the honest, hard-working men and women I know in Congress scramble between committee meetings, floor votes, constituents in the office, and incessant phone calls. The cost of cars, a Washington residence, entertaining—another entire set of living costs—must be absorbed along with whatever can be contributed toward "a normal family life." This scenario is simply meant to illustrate that without reasonable salary adjustments, Congress is in danger of becoming a rich man's club.

However, since Wayne Hays and Wilbur Mills did for Congress what Legionnaire's disease did for Philadelphia hotels, it seems everyone is suspect. While I still believe strongly that honesty and morality cannot be legislated, I support current efforts to draft a congressional code of ethics which exacts a measure of accountability from those who draw their salaries from the public treasury. A special Commission has just forwarded its recommendations to the House committee which must now present the new ethics rules to the whole House and, for the most part, I support those efforts.

I qualified my support because I fear the type of overzealous lawmaking which made our election laws onerous watchdogs of tedious detail and enforcers of "paper crimes" while preventing few of the real abuses—abuses only honest men can prevent. In general, new rules regarding foreign travel, gifts, honoraria, testimonials, unofficial office accounts are no problem because I have never taken an expense-paid junket, I return gifts over $10 in value, I rarely accept paid speaking engagements, I raise money only to retire campaign debts, and I maintain no office "slush fund."

However, I differ with the Commission on three specific points. First, I think the proposed 15-percent ceiling on earned income above the salary level is unrealistic. Given the restrictions on the use of official funds and the reporting requirements—which I will discuss momentarily—the ceiling is unnecessary. Pro-

ponents of the ceiling say it is meant to insure that a Congressman spends more time on his official duties than in earning money under his official title. In my opinion, it is a shallow indicator of congressional performance to limit outside income to what one Member I know, a scientist, could make in two or three weekend speeches. I think the quality and quantity of my service is best judged by the people of the Fourth District.

Second, restrictions are also being considered to limit the use of the frank—free mail. The new rules would limit each Congressman to six districtwide mailings per year and would require prior approval of all franked material. To me, that only inhibits communications between the Representative and those he represents while attempting to censor even that. I plan to oppose such restrictions when the ethics proposals come to the floor of the House.

Finally, the ethics code expands financial disclosure requirements to include a listing of every income source over $100, all gifts by source and amount, and all debts over $2,500. As you may know, I have long opposed any dollar-for-dollar financial disclosure on the dual grounds that the nature of outside assets, rather than their amount, indicates any potential conflict of interest, and that my wife—a wealthy woman in her own right—does not wish to have the details of her financial life in public view. After all, she is not the Congressman in the family. However, in that the proposals for reporting debt, business holdings and real estate holdings require only estimates of value, she and I have come to grips with the need to compromise for the sake of public accountability. As presently proposed, I do not oppose expanded financial disclosure for House Members as I believe an increase in pay warrants an increase in openness on the part of public officials.

As I began my remarks, you will recall that I said I supported the congressional pay raise despite the political gamesmenship which is being used to adopt it. I think it important to distinguish between the substantive issue of Government compensation and the procedural issue. On the latter front, I have joined with several of my House colleagues in introducing legislation to end the 1967 back-door approval by separating congressional pay from the other branches, requiring an affirmative vote of both Houses before a raise is approved and delaying any approved raise until the next Congress convenes. In this way, we still don't have to vote for our own raises but we do have to stand up and be counted when the real issue is decided—what do we deserve?

Ladies and gentlemen, throughout 9 years in public life I have found nothing more difficult than explaining my need for a $50,000 salary to a family which struggles on less than $10,000. I would much rather tell them about a national energy policy, or welfare reform, or economic stimulus plans, tax reform, the enviroment. But if I and others who are concerned about these things, concerned about that family, are to be able to continue to serve, then congressional compensation must be determined free of rhetoric, free of politics, and reflective of the tough job yet to be done.

POSTAL SERVICE: A VIEW FROM RURAL AMERICA

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. ABDNOR. Mr. Speaker, during my recent testimony before the Commission on Postal Service, I had the opportunity to discuss the current problems of the U.S. Postal Service, particularly as they related to delivering the mails in rural America. During the questions following my formal statement, it became clear the word "rural" has a different meaning for just about everyone, with very little comprehension of "rural" as we know it in the wide open spaces of South Dakota.

I greatly appreciated the recognition of the Commission that this disparity in definition exists and was very pleased with their request for further insight into the type of postal problems and comments confronting the office of a Congressman from a very rural State.

In my response I cited 70 examples of comments reaching my office during the past year. My letter to Chairman Gaylord Freeman and the other members of the Commission follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 9, 1977.

Honorable GAYLORD FREEMAN,
Chairman, Commission on Postal Service, Washington, D.C.

DEAR MR. CHAIRMAN: When I testified before the Commission on January 24, Commissioner Krebs asked me to submit examples of Postal Service complaints received from my constituents. I am enclosing those examples.

There were more than 25 post offices in my District scheduled for possible closure or conversion when Postmaster General Bailar announced the moratorium on July 1, 1976. Many already had been closed or changed.

While the enclosure is lengthy, it actually is a small sampling of the kind of mail received in my office because many complaints are similar. The amount of mail received in my office dropped off somewhat after enactment of Public Law 94–421, but if I were to include examples from the mail I received from 1975 to December 1975, the enclosure would be twice or triple the length it is. From May 1975 through September 1976, my caseworker frequently spent more than one-half of her time handling mail and telephone calls on Postal Service matters and postal legislation.

The majority of my people in rural areas are truthful when they say their mail delivery service has changed little if any in 20, 30, 50, or more years, although postage rates and postal service costs have continued to increase. My position on small post offices has been primarily that the customers should have a voice in the type of postal service they receive and that the Postal Service survey notices are misleading in that and other respects. Many of these people do not object to a change in their post office when it is clearly explained to them or when they learn the salaries and other costs involved in operating their office and/or route.

Thank you for giving me this opportunity to provide additional information to the Commission from the Second Congressional District of South Dakota.

Sincerely,

JAMES ABDNOR,
Member of Congress.

EXAMPLES OF POSTAL SERVICE COMPLAINTS AND COMMENTS, SECOND CONGRESSIONAL DISTRICT, SOUTH DAKOTA, DECEMBER 1975–FEBRUARY 1977

1. The mail service is needed on Saturdays for business and personal needs. Our country doesn't function just Monday through Friday! If the price of postage must be increased to continue Saturday service, then it must be increased. However, at the same time some positive steps should be taken to increase individual production of the postal employees.

2. As a small town postmaster, I have watched the deterioration of service to the rural areas since the birth of the new U.S. Postal Service. Postmasters have had to cut, or in the case of most third class offices, completely eliminate clerk hours. We have been forced to close local bank accounts and mail daily cash deposits to concentration banks. We are spending more time completing reports than we are serving customers.

3. We protest the closing of our post office. We believe an equivalent service cannot be provided at a lesser cost by a contract post office and rural route. The cost of the CPO may be less but the rural routes required would be as costly in labor and energy.

4. We, as small town businessmen, believe that the closing of rural post offices can only pull the farm community further away from the urban community. We feel we must charge you people, our voices in Washington, with the responsibility of waking up the government to the importance of the American farmer. How high would your grocery bill be if the U.S. had to import the same percentage of food as it does oil?

5. If the Postal Service were to close this post office, for example, it would leave 850 people without the mail service we are accustomed to getting. It would place 28 town businesses, 11 County government offices, the County junior high school and local elementary school, and 2 Federal government offices on rural delivery. Not only that, it would cost some people 45 minutes driving time to get to the nearest post office. Tell us how mail service will be better if the nearest post office is 10 miles away.

6. You would think from the days of 3 cents for first class mail to the 13 cents now, they not only could generate sufficient funds to more than compensate for inflation but would improve the efficiency of the service in terms of mail handling. The opposite is true. They have cut back services, eliminated some post offices, and consolidated postal runs until it has reached the point where I almost pick up a telephone before I mail a letter.

7. My local monthly bills will be hand delivered because 10 at 13 cents is $1.30, and even with gas at 62 cents, it will buy 2 gallons of gas. The most I'll burn up is one-half gallon to deliver the bills. . . . If this means a general appropriation every year, so be it.

8. As a taxpayer and a voter who, hopefully, is usually rational about issues, I just want to let you know that the situation with the United States Postal Service is an insult to the intelligence of the American citizen. The increased rates, with dramatically diminishing and deteriorating service, are enough to destroy any confidence in the system. The time for Congressional action has long passed.

9. This is a complaint about the terrible mail service we have. Instead of being better, as the Postal Service claims, it has deteri-

orated. I mail a letter on a Wednesday to my sister's post office box in California. She used to get the letter on Friday but now she gets it on the next Wednesday. Once recently it was nine days.

10. I do not use parcel post any more as it is so unreliable. UPS is faster, cheaper, and more efficient. We citizens should not have to pay for all the mismanagement and extravagances of the Postal Service by having to pay higher and higher rates for such poor service.

11. A star route would be a disaster for this community. The service would be inadequate, buying stamps as a specific time when the mail carrier arrives. Money orders couldn't be bought on the same day. This is not service, only mail delivery. Instead of billboard signs, we will have a line of unsightly rural mail boxes to clutter our Black Hills scenery, not to mention weather disadvantages, theft, or vandalism to them.

12. I mail many letters and packages by insured mail. How could I mail them this way without a post office?

13. We are very much against having our post office closed because we get our mail in the store building. If the post office is closed, it takes away a place where we can see and visit with our neighbors and friends once in a while. Will it cut back on expenses when all of these post offices are closed? The first thing that will happen is the administration salaries will be raised. They're too high now.

14. A drastic change is in order. . . . Cut out 50 percent of staff earning $20,000 to $30,000 per year. Cut out 75 percent of staff earning $30,000 or more. The system is top heavy in administration.

15. If only there would be some way to eliminate about half the Regional Postmaster Generals and District Managers and their aides. It appears if Washington sent out all orders to SCF Postmasters and let them relay orders to the associate post offices, then some of the 98% of employees added since 1971 could be eliminated!!!

16. I would like to see (name of town) continue as a post office as in the last few years they have closed or discontinued (names of 4 towns). Now all of those patrons receive mail at this post office. If this office was to be closed, many of these people would have to drive 50 miles to a post office.

17. As I understand the "Kokomo plan," the post office would deliver mail by blocks. That is, there would no longer be house delivery but I would get my mail one or two blocks east, west, north or south. My objection to this plan would be the possible amount of pilfering. If you go to the new post office in Rapid City, you will note it has what I call a "widows walk". It is an elevated platform with one-way mirrors so inspectors can watch the help. This walk cost, I am told, one quarter of a million dollars. The post office management cannot trust their employees except through a one-way mirror yet they want me to trust the neighbors two blocks away.

18. In this town, there are a postmaster, a mail clerk, two parttime clerks, and two mail carriers. The postmaster is in the office most of the time, the clerk about ⅓ of the time. He also works in another post office 3 or 4 nights a week. It seems when the clerk is gone a lot of the time, the part-time clerks are in the office. Also the part-time clerks run the post office on Saturdays. Now if the postmaster doesn't want to work on Saturdays, why did she take the job? The two rural mail carriers work about 3 hours, maybe 3½ hours a day and get, as I understand, $50 a day and mileage. Why can't they use these mail carriers in the post office when they need extra help? I'm sure one carrier could run both routes and not have to work over 7 hours a day. Whenever they run short of money, they raise the price on everything. Have they ever thought of getting rid of the dead weight or extra help they don't need to try and make ends meet.

19. We have received word that construction has been ordered to stop on our new post office building even though it is ½ to ⅔ completed. (Construction was resumed and completed.)

20. My transfer is a nice promotion for me even though I would like to stay here. We have a nice home with no market to rent or sell it.

21. I was informed this post office would be made a community post office, and the patrons and I were informed there was nothing we could do about it. My wages will be cut over half, from $5845 to $2400, for the same amount of work and responsibility. I am to keep the office open 4 hours a day. It takes longer than that to get the work done and help people who can't make it to the post office during the time it is open. Some come 40 to 50 miles for money orders and such. The nearest post offices to us are 35 miles east and 45 west.

22. We have people getting mail who live 15 or more miles away. If they are forced to go to (name of town) for mail service, that is contrary to all this energy-saving kick we are trying to cope with. If I am to bid on this as a CPO, they only want a bid of around $3,000 a year to work the same hours I do now. That wouldn't even be minimum wages by the time I pay rent for the post office and expenses, not counting my gas to drive 14 miles a day to and from work.

23. We cringe every time they talk about losing money on small post offices. Certainly they don't generate the incoming postage as they do in the big city offices where there are large mailers such as mail orders houses and other operations. But the mail must get delivered somewhere. It seems that the point of delivery should count for something. We suspect that no one is laughing except folks like Ma Bell and the United Parcel Service and they appear to be laughing all the way to the bank.

24. I feel perhaps the trimming of the "fat" at the top would be much more desirable than cutting out the smaller post offices. I know here this would very much upset our mailings from the bank, besides our purchase of $2,000 to $3,000 of postage each year. I agree that where there are only 10 or 15 boxholders in a post office and a mail carrier perhaps serves only 15 or 20 rural customers, there is no doubt a valid reason to close such an office or combine rural routes.

25. I feel this service is being abused by the ones who are supposed to see to it that we get service. Recently heard that Mr. Ballar gets $60,000 a year and has 14 to 18 men under him who get $40,000 a year. That is way too much money for people who want to take away jobs of anyone trying to make a living.

26. My family lives just a little over a mile from the regular mail route and we and about 5 other families do not get our mail delivered to our farm. It's not only the inconvenience of picking up the mail but getting a letter mailed in the morning.

27. I was in the Postal Service from June 1936 to June 1963, when I reached mandatory retirement age. I started as postmaster at $1,200 a year, worked 6 days a week from 6 a.m. to 6 p.m. with an hour off for lunch, bought my own post office equipment and the government got the rent from the boxes. The population of this area was much larger than it is now and I handled 3 times the mail being handled now. I transferred to rural mail carrier in November 1942, with 135 boxes on the route. Parcel post was more than 3 times what it is now. I started with a salary of $1500 per year and received 6¢ per mile for the use of my car.

The present postmaster works 5 days a week for around $14,000 a year. The rural carrier is getting $16,000 a year and around $4500 for his equipment. This is a small county seat town. I feel the pay schedule of the rural carrier and postmaster could be greatly reduced to comply with other workers in the county offices.

28. I am 100% in favor of abolishing the monopoly created by Congress. I have never heard of a private business which allowed its employees to be so slovenly in their work while being guaranteed such good wages and benefits.

29. . . . do all in your power to keep this post office open. We are 40 miles from town and it would be an inconvenience to mail packages. Some of us live 8 miles from the nearest point where we could have a mail box. It would not be safe to leave money on the rural route for the mailman to pick up packages because our only road is the Oahe access road used by tourists, fishermen, and hunters.

30. On January 9, the Fort Meade VA mailed me a card for an appointment on January 13, but I didn't get the card until January 19. (Traced to employee error in reading zip codes)

31. On "Opinion Please," the SCF Postmaster said they need the junk mail to take care of their slack time. Because of the unions one could not ask people ever to work a broken shift, say four hours in the morning and 4 in the afternoon. It seems to me that if one wanted a job they would work the hours it takes to do the job.

32. The zip machines are a disgrace, too. The letters are missent, lost, and late in delivery if delivered at all.

33. The UPS strike is killing the small business man. Just got a package by mail May 11 which was sent April 6 and haven't received many packages yet.

34. We received letters April 13 from the Consumer Advocate assuring that no changes were planned for our post office, that if changes were anticipated our opinions would be solicited as part of the decision-making process, and that any changes would be made only at the end of a 90-day period. These assurances have proven to be false. On April 21, the USPS executed an agreement with the postmaster to transfer to another position, posted a bid solicitation for a contract for a community post office, and began canvassing patrons to get signatures agreeing to such a change.

35. In January a relative in Florida mailed me 2 packages. These contained the family Bible and family diaries dating from the Civil War to 1918. In February, Mr. Cooper received a wrapper from the Chicago post office but not the contents. I have now received the Bible and all but 4 or 5 of the diaries. They came in very good shape, thanks to the Chicago Postmaster and Main Post Office.

36. If our post office closes, we'll have to drive 100 miles for postal services. We'll lose our rural stores, too, if the post offices close.

37. Discontinuing Saturday mail delivery would be a big inconvenience for the public, especially when there is a Monday holiday.

38. Our mail service is deteriorating more with each raise in postage rates. On a 3¢ stamp, our daughter in Kansas got our letters in 3 days at the most, a package in 5 days; now it takes 7 days for a 13¢ letter and 10 to 14 days for a package at higher rates, so the money is being mismanaged some place. Instead of taking our post offices away, I think they need to look in higher places for their inefficiency.

39. I am highly concerned by a news story that a letter carrier is to be suspended because he refused to walk across customers' lawns to save time in delivering mail. . . . This is the most ridiculous thing we have ever heard, especially considering the many real and serious shortcomings that prevail in the postal service management system. It is my understanding that mail will not be delivered to locations where there is no side-

walk, yet the carriers are being ordered to trample people's lawns to save time.

40. This is my letter—to hell with the postal department!

41. We would not object to the closing of our post office if we could get our mail out of (name of town) instead of (town).

42. About noon on May 25, a Rapid City businessman picked up a "pile"of Abdnor addressed mail from the roadside. These were acknowledged May 25 by a note from the SC Director for Mail Processing—"about 60 undelivered pieces of the bulk mailing sent out by James Abdnor in March 1976 with enclosure "Guide to Federal Consumer Services." Someone from the Rapid City post office called my local field representative May 26 to say they were sorry one of the carriers "put them on top" of his truck and they "fell off." They said they would have a "talk" with the carrier to see that it does not happen again.

43. Our office has received information that a cutback in allotted clerk hours is planned at our post office. Our cooperative sends all outgoing mail through this post office. This amounts to 18 mailings per year to 2,500 subscribers, plus at least 13 incoming mailings from these subscribers annually. In 2 months, we will be operating 6 acquired exchanges that will double to and from our business office. There are another cooperative and a business here with similar large mailings.

We have helped generate sufficient postage revenue and mail volumes to insure us a good and well-manned post office. We do have a highly competent postmaster and staff who do a very efficient job. It is my understanding that the allocation of clerical hours for outlying post offices may be used at the sectional center instead of at our post office. Apparently, our post office is instructed to bag up and send mailings to the center for sorting when large mailings create distribution problems. It appears to me to be more prudent management to allocate required clerical hours to our post office so this work can be done locally.

44. It has been rumored that a new postmaster will not be appointed but that our post office in this county seat town (a second class office) will be a substation of the neighboring post office. They said they would save $4,000 a year but I doubt this.

If they send a clerk over, I am sure they would have to pay him mileage. Also, I am informed our present postmaster is paid $19,000 and one of the clerks about $15,000. I am sure they do not start out at that salary so there might not be that amount of saving. After all, there are only 2 post offices in South Dakota that pay their own way, and I am sure that $4,000 is a small amount compared to what others are costing. (Postmaster has been appointed. In this large, sparsely populated county, however, proposals have been made to close or convert all three post offices.)

45. Enclosed is a petition protesting the downgrading of our post office . . . There is intense feeling among the customers because a neighboring post office with only 10 boxes has been allowed to remain as is. (The smaller office was proposed later for CPO but not converted prior to moratorium.)

46. The Postal Service has just cut our post office 90 hours a week. This is the second cut in hours this year and all 2nd class post offices are being cut. And these postmasters were told not to write their Congressmen. What kind of country is this? As a school administrator, I feel that all the parents in my district should take any complaint about my conduct to the board and I should be able to defend my position before them and the public.

47. The SCF Postmaster wrote us: "we presently have many post offices who are closed or should be closed on Saturday afternoon. We have had clerks in the offices for the purpose of placing newspapers received in the afternoon in the post office boxes. This requires only a few minutes but we are required to keep them employed for two (2) hours. We will discontinue this practice." Our newspaper will join the many other publications seeking other means of delivery completely independent of the U.S. Postal Service. Their commitment of increased rates and less service does not offer much choice.

48. We need our post office. It would be most inconvenient for us to get registered mail, COD's, and money orders as the carrier could not be at a box at any given time.

49. The small post offices in rural areas mean a great deal to us as we do much business by mail, get repairs for our machinery by mail, and bank by mail. The SCF Manager tells the Postmasters the reason for closing is that they are losing money. He offers these postmasters more money to go to work in the sectional center. Now is that the way to save money?

50. My clerk hours have been cut to 3 per day, with 4 on Thursday, plus I got 3 hours every other Saturday. Now they are closing a nearby post office and that postmaster is to take my Saturday hours to save his retirement.

51. For over 30 years we had mail delivery on Tuesday, Thursday, and Saturday. Recently our carrier was transferred and our route consolidated. Now, our delivery is Monday, Wednesday, and Friday. We get our weekly advertising paper and our daily paper up to 3 days late. It seems a little foolish to pay for a 3-day-old newspaper. And if there is a Monday holiday, we get mail only 2 days a week.

52. A package mailed here on Saturday morning doesn't leave town until Monday evening.

53. I started as a regular clerk with 40 hours per week. I decided not to transfer so my hours were cut to 32 hours a week, then to 27 hours, and now to 15½ hours a week. I am a 25-year man who has worked in 1st class offices and on trains and highway post offices. They did not cut hours of regular clerks in big offices and they did not cut back on the management after all the hours were cut. If Mr. Ballar sees fit to cut the clerks by 200,000 and reduce other clerk hours, he should reduce management by at least half because there are less employees to manage. A 2nd class office clerk has to do the book work and compute 2nd and 3rd class bulk mailings while the 1st class clerk has a supervisor who does this.

54. In the past few years at the same location, we have experienced zip code changes, box number changes, raises in box rents, raises in 'postage due' and 'address correction' rates, raises in bulk permit fees, and now another zip code change. I believe it's about time to quit changing things and just do a better job with what you have, especially since nothing that was changed has improved the postal service.

55. Effective in August our post office is open from 8 a.m. to 12:30 p.m. and from 1:30 to 5:00 p.m. on week days and there is no window service on Saturdays. No window service on Saturdays creates a considerable handicap for some 800 people who receive mail by general delivery. That is the day they get their unemployment and other assistance checks. (Service was restored after review.)

56. A switch to CPO's should not hurt in some cases. These postmasters drawing $7500 a year and up for 4 hours a day and taking care of from 5 to 60 customers are doing little more than receiving unemployment compensation. But this isn't going to put the Postal Service in the black.

57. A substitute rural carrier became a partisan candidate for office and was forced to resign by his employing postmaster without the Civil Service Commission review required by law. He was subsequently reinstated by the District Director of Employee and Labor Relations, USPS, after having been advised by the SCF Manager: "You needn't worry about the legality of our hiring procedures. They are closely scrutinized by several interested parties."

58. The window isn't open at all on Saturday. There isn't a stamp machine in the lobby either.

59. Our concern is the poor delivery of our weekly newspapers to distances. Complaints seem to be mostly from Arizona where both our weekly and a South Dakota daily paper are received days later than for long years and often several copies received in one delivery. Our mailings are in paper wrapper, each addressed from metal plates, bundled when 6 or more to a city, and sacked in our office for delivery to the mail truck. They leave here without fail at 5 p.m. on Thursdays. When a make-good is required, we use a mailing envelope for special attention but in one instance this failed to arrive. We have no reports that the newspapers are poorly addressed or wrapped when delivered.

60. We have 1 rural route operating daily. We also have 2 star routes run by the same driver serving each route 3 days a week on alternating days. The combined mileage of all 3 routes is about 130 miles. I believe these 3 routes can be reorganized to 1 route and serve everyone every day at little or no extra cost.

61. We have recently been notified that our post office will be closed whether we like it or not. They are proposing to move our postmaster from this 3rd class office to a 2nd class office. This will require at least 4 or 6 weeks of training for our postmaster who has only 9 months left before he retires.

62. The window service on Saturday now is only from 8 to 9 a.m. although they say the lobby is open from 7 am. to 8 p.m. The sign in the lobby states the lobby is open from 9 a.m. to 6 p.m. but it has been found locked during those hours.

63. Our post office is open 8:30 to 11:30 am., then from 1:30 to 4:30 p.m. Mail is put out on Saturday but no window service. Please tell me how a teacher, businessman, or laborer can get any window service unless he takes time off from his job.

64. Post office notice: "Effective Saturday, September 11, we will place your paper in a special box section which will be on the north side of the post office. The publisher has added a box number to the label on your paper; this will be the same as your post office box number and the outside box section will have a separation labeled with this number." My constituent says: "They spent enough money on boxes to put Saturday papers in to pay a clerk for 2 hours on Saturday for quite a while."

65. We have window service on Saturdays and that time is from 7:15 to 8:15 in the morning.

66. The USPS advised me, "no post office in the 2nd District is closed all day Saturday or open for just one hour." Among constituent reaction is: "Queer you should have gotten a letter from the Postal Service stating otherwise."

67. Our post office is closed for an hour during the middle of the day on week days and open for a half hour on Saturdays. If this is a tactic to antagonize the taxpayer to pressure his Congressman for more subsidy, I say I am antagonized by any subsidy whatsoever to anything. I feel that today we would be more efficiently served by private enterprise.

68. The Postal Service has misinformed you about post office schedules, particularly as far as our post office is concerned.

69. Retail Mail, a project of the U.S. Postal Service, threatens to take away advertising insert business from newspapers. Supplements are a natural and important part of a retail firm's newspaper advertising. These firms pay newspaper advertising rates, less cost of printing and newsprint. With the

tremendously increased second class postal rates, this income from supplements is a must for newspapers our size. The Post Office gets paid for these supplements at the same rate as any other advertising part of the newspaper. Newspaper supplements also produce a saving for the Postal Service as they get paid for the additional weight, yet don't have to handle any additional pieces as the supplement is folded into the newspaper.

70. I have been living here for 40 years. My parents lived here first and we have driven 4 miles every day to get our mail. There's no change for the guy who has the mail box far away, only for the one who has it close; he gets it closer.

KREMLIN CRIES "FOUL"

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. DERWINSKI. Mr. Speaker, one of my most renowned constituents, Mr. Alex R. Seith, who is chairman of the Cook County Zoning Board and was an adviser on the foreign affairs plank at the Democratic Convention, has recently been named to the new Presidential Advisory Board on Ambassadorial Appointments.

Mr. Seith, who is also a columnist covering the field of foreign affairs, touches on the subject of the Communist reaction to the Helsinki accords in his column of February 16, in the Harvey (Ill.) Star Tribune:

KREMLIN CRIES "FOUL"

(By Alex R. Seith)

There's a sweet sound out of Moscow these days. It's the sound of Communists crying "foul." America is hitting below the belt, says the Communist party newspaper, Pravda, because our government has begun to talk up about the suppression of human rights in Communist countries.

Hardest hitting criticism of the Communists has come from Radio Free Europe and Radio Liberty. For years, these U.S.-financed stations have been beaming broadcasts into Eastern Europe in the languages of the various peoples. And, for years, listeners have gotten more straight facts from these two stations than all the Communist media combined.

But in the past few weeks, the broadcasts have been joined by the State department in hitting the Communists where it hurts them the most: Their failure to fulfill the "human rights" promises of the 35-national Final act of the European Conference of Co-operation and Security, signed in Helsinki in August 1975. Known simply as the Helsinki agreement, it was initially hailed in the East as a triumph by Lenoid Brezhnev and denounced in America as a "sell-out" to the Soviets.

Critics complained that President Ford was "taken" by the Russians because Basket One of the Helsinki accord acknowledged that the present national borders in Europe are permanent and inviolable." It was a give-away" said foreign policy experts like Democrat George Ball and newspapers like the New York Times. But, having traveled 5,000 miles through Eastern Europe in the weeks preceding and following the Helsinki accord, I wrote that Ford had not been so badly "taken" as his critics contended.

What Ford gave up had been lost 30 years earlier when the Red Army stormed across Eastern Europe as Hitler's decimated Wehrmacht retreated. Without the Red Army, Communists would not have come to power, and without the Red Army they would not remain in power. But no one expects the Red Army will voluntarily leave soon, certainly not before the year 2000, more than a half century after these Communist occupiers first imposed Communist governments on unwilling peoples.

Basket One at Helsinki only acknowledged the unhappy fact that starting World War III is not the preferred way to get the Red Army to go home. Yet, Brezhnev so desperately wanted Basket One that he gave us Basket Three, the human rights portion of the Helsinki accord. It was the first time that all the Communist regimes of Eastern Europe at one time and in one document gave official international recognition to the rights of individuals within their countries.

Attempting to be clever propagandists, the Communists had the full text of the Helsinki pact printed in their controlled newspapers. The Communists then bragged that they had thereby complied with Basket Three and that they were giving their people more information than America's free press because none of our newspapers was willing to devote several pages to publication of the lengthy text.

It was a typical Communist trick. By filling their papers with tens of thousands of words about Helsinki—while not calling attention to human rights—the Communists hoped that the people would miss the meaning of Basket Three.

For a while the Communist trick seemed to be succeeding. In part, that success resulted from the West's failure to speak up about human rights. Oddly, Gerald Ford was silent about Basket Three when he should have boasted about it.

But it is really the Communists who are against Helsinki. And, suddenly, the U.S. government has publicly said so. In quick succession, the State department issued formal criticisms of the Czech Communists for the suppression of Charter 77, a declaration of rights by Czech writers; and the department warned the Kremlin that harrassment of scientist Andrei Sakharov would violate Helsinki's Basket Three.

These were only the opening shots. In June the 35 signatories of the Helsinki pact will assemble in Belgrade to assess "progress." Until the U.S. government started speaking up, the Communists thought Belgrade would be a free ride: Propaganda for their leaders and no "progress" for their people. Now they have been forewarned. If the Communists continue to renege on human rights, Belgrade will be the forum for an indictment the world will applaud.

HOW GUN CONTROL WORKS—IN PRACTICE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. McDONALD. Mr. Speaker, a tragedy took place in New York the other day. A violence-oriented lunatic snuffed out six lives, including his own. In his possession were four handguns. As usual the advocates of gun control have pointed to this incident as an excuse for more repressive gun control legislation.

The fact is that every one of those handguns was illegally in his possession. New York has the strictest gun control law in the country. This law in no way prevents criminals and lunatics from obtaining weapons. Gun control laws are only effective with law-abiding citizens. In New York where many of the illegal guns are stolen from interstate and international shipments, the gun control laws have not reduced violent gun-related crimes.

The only way to cope with crime is to punish the criminals. The police must be given the opportunity to surveil violence-oriented individuals, and criminals must be apprehended and punished for their crimes.

The answer is control of criminals, not of guns.

CODE OF ETHICS OR SPECIAL INTEREST LEGISLATION FOR MEMBERS OF CONGRESS?

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. BAUMAN. Mr. Speaker, it has been my honor to serve on the House Commission on Administrative Review since its creation last July. Its latest recommendations regarding full disclosure by Members of the House, restricting the franking privilege and tightening congressional travel are among some commendable reforms.

But I take strong issue with the plans of the majority of the Commission for severely restricting the right and ability of Members to earn additional income outside their congressional duties. I personally have never had amounts of income which would fall within these proposed restrictions, but many Members do and the voters in their districts are free to judge this fact. With full disclosure the public will learn even more about all Members' income.

But the Commission proposals only restrict the income of those in Congress who are professionals, lawyers, writers, public speakers, while placing no limits on those who have great personal or family wealth.

The practical aspects of such proposals are graphically illustrated in an article in today's Wall Street Journal:

CONGRESS, TRYING TO PUT LID ON OUTSIDE INCOME, HEADS FOR SHARP DEBATE

WASHINGTON.—Pretend, for a moment, that you are a member of Congress.

Beginning this week, your congressional salary increased 29%, to $57,500 a year from $44,600. Now, as part of the pay-raise package, you are obliged to help draw up a new code of ethics for Congress, including new rules on what outside income should be permitted for lawmakers.

Answer these questions:

1. Should House Republican Leader John Rhodes of Arizona be allowed to continue drawing a $32,000-a-year salary from a life-insurance company?

2. Is it all right for Sens. George McGovern of South Dakota and Barry Goldwater of Arizona to take $25,000 each for one week's work as political commentators on network television?

3. How do you feel about Rep. Frederick Richmond of New York drawing $122,000 a year in salary as chairman of Walco National Corp., which also pays him about $300,000 in dividends?

4. Should Rep. Morgan Murphy of Illinois

be forced to quit moonlighting as a lawyer, which brings him $40,000 to $60,000 a year? If so, is it fair to let Sen. John Heinz of Pennsylvania continue collecting roughly $400,000 a year in dividends, interest and other income from his famous family's fortune?

Those questions, reflecting real-life situations of the lawmakers mentioned, give just a taste of the complex and controversial debate that is about to embroil both houses of Congress. Senate and House members trying to draft strict new codes of conduct are finding that it is much easier to give speeches about ethics than it is to clamp meaningful and fair limits on the outside earnings of themselves and their colleagues.

"Ethics reform" has been a big speechmaking topic in Congress in recent months as various scandals piled atop one another: the Elizabeth Ray-Wayne Hays affair, disclosures of corporate payments to lawmakers, evidence of cash-laden lobbying by South Korea's government. The sinking image of Congress is reflected in a recent Louis Harris poll that was commissioned by the House and that showed the public ranks Congress ninth on a list of 11 American institutions in terms of ethical standards.

THE LINK TO A PAY RAISE

The need for urgent action on ethics, however, is linked more directly to the politically controversial pay increase of nearly $13,000 a year that members of Congress have just accepted. Now that they have allowed the raise to go into effect automatically, without a vote, House and Senate leaders know they are under heavy pressure to deliver on their promises of stricter codes of conduct.

The topics have been linked ever since a presidential commission last December recommended that higher salaries should be accompanied by "major reform" of congressional ethics, including "rigorous restrictions" on outside income. Both former President Ford, who formally proposed the salary increase, and President Carter, who endorsed it, stressed the linkage of the pay and ethics issues.

Both houses are hurrying to demonstrate a commitment to higher ethics. In the House, a special commission headed by Rep. David Obey of Wisconsin has drafted a new set of rules that should reach the House floor for a debate in early March. In the Senate, a committee headed by Sen. Gaylord Nelson of Wisconsin is working against a March 1 deadline to draft a similar code for a floor debate. Eventually the two houses aim to meld their separate codes into a law that might be extended to cover the Executive and Judicial Branches as well as the legislative bodies.

The political pressure on Congress makes it almost certain that some significant tightening of ethics rules will pass. "When it comes to the crunch," one House member predicts, "it'll be tough to vote against tougher ethics, especially with the pay raise going through."

THE OUTSIDE-INCOME ISSUE

Some aspects of the code tightening are relatively noncontroversial. Most lawmakers seem ready to approve much stricter rules for disclosing personal finances, tighter limits on free-mailing privileges, a ban on privately financed office accounts known as "slush funds," and curbs on taxpayer-paid travel. But a bruising battle looms on the effort to restrict members' outside income from speechmaking, legal fees or business ties.

"The limitation on outside income clearly will be the toughest fight in the ethics code," predicts Fred Wertheimer, vice president of Common Cause, the self-styled public-interest lobbying group that is pushing hard for stricter rules. Alerted by cries of protest from Senators and Congressmen who fear their outside incomes are threatened, code drafters in both houses expect a major effort to be made to water down the proposed limits on such earnings.

Furthermore, the code drafters are discovering that it is practically impossible to draw up rules on outside income that aren't vulnerable to attack as arbitrary or unfair. Sen. Nelson, who heads the Senate's code-drafting committee, admits he has discovered that "the questions are a lot tougher than I thought they were at first."

The issue is complicated by the fact that members of Congress earn extra money in so many ways: as businessmen, farmers, lawyers, investors, writers, television personalities and speechmakers. And it is further complicated by tough philosophical questions: Should lawmakers be sealed off from contact with the "real world" of making money? Should the outside-income rules be so tight that they would discourage small-business men or farmers from running for Congress? Will Congress perform better if it is made up of only millionaires and career, salaried politicians, rather than people from all walks of life?

Both houses are finding it tough to deal with these questions and complications. In the House, Rep. Obey's commission has proposed that outside earned income be limited to 15% of a member's salary, or $8,625 a year, but that proposed limit has plenty of loopholes and is under severe attack by some Congressmen. In the Senate, the Nelson committee hasn't yet drafted a limit but is under some pressure to raise the 15% House lid, even though Sen. Nelson would prefer to ban all outside earnings.

THE PROBLEM OF EQUITY

A look at the outside-income situations of many lawmakers shows how hard it is to draft a fair, comprehensive rule.

Congress is full of part-time businessmen, but the proposed income restrictions wouldn't treat all their incomes alike. Code drafters have concluded it is unreasonable to require lawmakers to sell family businesses or farms. Thus, profits from them would be exempt from any limit. So would so-called unearned income, such as dividends and interest on stocks and bonds. But salaries or other fees for personal services would be subject to the 15% ceiling, according to the Obey commission's proposal.

Arizona's Mr. Rhodes, the House GOP leader, says he took a salary of $32,573.06 last year from Farm & Home Life Insurance Co., an Arizona concern in which his family is the largest stockholder. Mr. Rhodes isn't sure whether that qualifies the company as a "family business" but believes he might have to give up the salary.

Congressman L. A. "Skip" Bafalis, a Florida Republican, owns a one-third interest in a coal-brokerage concern, from which he expects to derive $35,000 to $40,000 this year. But his income wouldn't be affected by the proposed limit because it comes in the form of dividends rather than salary. Mr. Bafalis says he has told Rep. Obey that most businessmen in the House can easily "restructure" their affairs so they wouldn't lose much or any income.

That seems to be true. Rep. Don Edwards, a California Democrat, says he drew $21,000 in salary and $18,000 in dividends last year from a family-owned title-insurance firm. Mr. Edwards supports the proposed income restrictions but says: "If it goes into effect, I'll change the salary to dividends."

Democrat William Hefner, a North Carolina Congressman, says he draws $26,400 as president of a radio station that he and his wife own in Kannapolis, N.C. He says he would reduce or relinquish that salary, under the proposed income limits, and use the money to pay the station's mortgage—which would increase his equity in the concern.

"I'm going along with Dave Obey" on the proposed income limits, comments New York's Rep. Richmond, a millionaire who owns 51 percent of Walco National Corp., a publicly held maker of steel forgings, motors, machinery and burial caskets. His $122,000-a-year salary as company chairman apparently would fall victim to the $8,625 limit proposed in the House, although he presumably could recoup some of it through dividends, to add to the $300,000 or so he collects each year.

THE PRACTICING LAWYERS

These congressional businessmen are willing to disclose such details of their financial affairs in response to reporters' queries. The present rules don't require such disclosure, although the proposed rules would.

Many other lawmakers refuse to disclose their outside incomes. For instance, Rep. William Armstrong, a Colorado Republican, declines to say what he earns from a Colorado Springs newspaper and an Aurora, Colo., radio station that he owns. But he does note that these family concerns wouldn't be affected by the proposed income ceiling. "It's not fair that my outside income wouldn't be affected because it's a family business while someone whose income comes from public speaking would be affected," Mr. Armstrong remarks. But he is against any limit.

Practicing lawyers in Congress are especially angry about the proposed limit. In 1975, 53 members of the House reported income from law firms exceeding $1,000, and some earned many times that amount. They are outraged that the proposed rule would ban such income while leaving dividends and other unearned income untouched.

"I understand the concern for ethics, but this is a rich man's bill," asserts Rep. Morgan Murphy, a Democrat and senior partner of a Chicago law firm. He argues that he needs the extra $40,000 to $60,000 a year to educate his three children, among other things. Mr. Murphy says none of his constituents has ever complained about his law practice, which he says takes less than one-third of his time; he has been reelected by huge margins despite his publicized sideline.

"It's a wonderful reform—for millionaires and for people who have never had to earn a living outside the public trough," a sarcastic Rep. Otis Pike complains. The New York Democrat earns an undisclosed amount as a practicing lawyer and salaried director of a psychiatric hospital. "If anyone had told me that I'd have to burn all my bridges as far as earning a living is concerned, I'd have never run for Congress," Mr. Pike says.

THE SPEECHMAKERS

Lawmakers who derive most of their outside income from "honoraria," or fees for speaking appearances, feel that the proposed ethics codes may discriminate against them also. Present rules permit members of Congress to earn up to $25,000 a year in honoraria. Mr. Obey's commission recommended that such fees be subject to its $8,625-a-year limit.

"I hope they don't cut out honoraria," says Sen. Goldwater, who reports he earned $20,000 to $24,000 last year in such fees. The Arizona Republican also earns handsome fees as a TV guest. "I get $2,500 for doing a Dean Martin show—and I've done four of those—and $300 for a Dinah Shore show," he comments.

Mr. Goldwater and Sen. George McGovern also were paid $25,000 each last year by the ABC Television Network to serve as commentators during the political conventions. Mr. McGovern took in another $24,766 during 1976 in honoraria for speeches, mostly on colleges campuses. The South Dakota Senator, an aide says, is against any new restriction on such earnings if other forms of income, such as dividends, are exempt.

Of course, the really rich men in Congress wouldn't be hurt by the proposed income limits. Pennsylvania Sen. Heinz, heir to the famous pickle-and-ketchup fortune, thinks this is "very unfair" to his less-wealthy colleagues.

Mr. Heinz, who discloses much more about his personal finances than present rules require, had income of $424,670 in 1974 from family trust funds and other assets that total more than $13 million. "Many Senators have a source of unearned income, such as stocks and bonds," he notes. "It would be most unfair to the others if you wouldn't allow them to work extra-hard to earn money to put their children through college, for example," Mr. Heinz declares.

Many lawmakers, including Mr. Heinz, contend that it is impossible to fairly limit outside income. Instead, they argue only for full disclosure of a member's assets, debts, and sources and amounts of outside income. Their theory is that the voters should know about an elected official's financial dealings, and then the voters can decide at the ballot box whether to accept or reject the politician's behavior.

Sen. Goldwater shares that view, but he doesn't want this disclosure business to go too far. "I'd resist very much exposing anything more than my financial status," he says. He adds: "If I have to mention my gun collection and my works of art, it would just invite every thief to break into my house."

IS THERE MEAT IN YOUR FUTURE? PART 1

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. ABDNOR. Mr. Speaker, Americans have become so accustomed to finding quality meat products in their supermarkets—and of a variety to suit every taste and diet—that their only conscious thought as they make their selection is: "What's the price today?" Regardless of what that price might be, it is "too high," irrespective of the fact that Americans have the best meat values anywhere.

The constant bombardment through the media of the "rising cost of living," and "food prices heading up again," is rarely balanced with any exposition of where our food and fiber comes from, what entered into the price the customer pays, and what happens if the producer can no longer make enough to cover production costs.

A series of four recent articles in the Washington Post touched on some of these latter questions. I commend the first two to the attention of my colleagues:

(First of a Series)

U.S. BEEF ECONOMY AT A CROSSROADS

(By Dan Morgan)

WALDEN, COLO.—In the back country ranches of the Rocky Mountains, ranchers such as Bob Brownlee have been fighting a constant battle against winter this year.

On a recent day when the temperature was near zero, Brownlee and his son-in-law, Newell Geers, were hacking a hole in the frozen creek with a double-edged axe to find water for the cow herd, and giving out whoops of joy when a trickle of water appeared. Then they were off in their pickup truck, bumping across a washboard pasture and dropping off hay for the animals.

It was all part of the cycle of work at the far end of the country's beef pipeline, the $20-billion-a-year system that keep Americans supplied with the juicy steaks and hamburgers that are almost a national symbol of American affluence.

Yet raising beef animals today is anything but a sure way to prosperity.

The threat of economic ruin hangs over the cattle industry, and the American beef economy is in the throes of major changes brought about by the heaviest losses since the Dust Bowl days of the 1930s.

Even in this remote valley, circled by mountains and once populated mainly by prairie dogs, antelopes and Indians, ranchers are feeling the painful effects of sweeping economic and social developments over which they have had virtually no control.

Brownlee reckons that he lost $30,000 on his 1,500-acre operation in 1976, and he may have been lucky. As far as he is concerned consumers are getting a bargain on beef while he has been taking a financial beating. Brownlee and the ranchers around here have lost money most of the last 36 months. Yet the price of steaks and hamburger in supermarkets is about what it was three years ago.

Paradoxical as this situation may seem, economic analysts say it is logical. But the same logic holds that the situation is certain to be reversed. Then it will be the turn of American consumers to pay more for beef.

Starting in 1967, cattlemen steadly increased the size of their herds, from 108 million head then to 131 million head in 1975.

By late 1973, there was too much beef going to market. Retail stores had to keep prices low in order to sell it all. These low prices were passed back through the beef pipeline to wholesalers, meat packers, cattle fattening yards, and finally to ranchers.

All through the period, inflation and higher prices of hay, corn and other animal feeds were adding to the costs of running ranches and farms, even as the prices that the cattlemen received when they sold their young steers and heifers in the fall was staying too low to make money.

Ranchers began reading the economic message they were getting two years ago and reacted by reducing the size of their herds. Since then, a beef slaughter unprecedented in the history of the United States has been underway.

In 1973, only 22 million animals were buchered. The number jumped to 36 million the following year, then to a record 40 million in each of the next two years. The total number of cattle in this country declined in 1976 by 4 million. More important than that, the country's cow herd—the "factory" that produces tomorrow's steers and heifers—has been drastically depleted.

In 1976, 10 million cows were killed, about twice as many as three years earlier. Most of them were ground up for hamburger meat.

Consumers have been the immediate benefactors of this massive slaughter. It has helped to hold down beef prices at a time when everything else seems to be going up.

Consumers ate up all the meat that came to market, but only after retail stores had set a price for it that was low enough to induce them to buy. Americans tend to spend a constant 2.5 per cent of their money for beef. When it is a good bargain they buy more, and when it is expensive they switch to other food, such as cheaper pork or chicken. With beef prices fairly reasonable in 1976, they ate a record 129 pounds per person, compared with 116 pounds four years earlier.

In effect, Americans are eating their way out of a huge surplus of beef.

Brownlee and ranchers such as him still have a fundamental faith in the laws of supply and demand. They figure that when less meat goes to market, prices should start to rise again and they can begin turning profits.

But nobody knows for sure when the losses will end in the cattle industry. If the prices of steak and hamburger rise too abruptly, consumers might switch to pork, poultry, or even spaghetti. That happened in the 1973 beef boycott, and it sent prices plummeting. If it happens again, it could signal a fundamental change in the American diet.

Americans have eaten a steadily increasing amount of beef since 1920, but there are at least some signs that the trend is ending. If it is, cattlemen could be in for some further unpleasant shocks.

In the 90 years since settlers moved into this valley the grassy ranges have been fenced, a railroad spur has been driven through from Wyoming, and oil and coal companies have dug wells and opened surface mines. But cattle is still a mainstay of the economy.

At Brownlee's Bar-Slash-Bar ranch, the cycle of breeding and birth sets the agenda for the farm work. The 550 cows in the herd will have their calves in April. Brownlee, Geers and a hired hand will take up a 24-hour vigil then, checking on the mothers and calves and scaring off intruding coyotes with spotlights. It costs about $176 to keep one of the cows for a year. That is money down the drain when a young calf dies or is killed.

In August, the father and son-in-law will become cowboys, riding horses to round up cows and head them back to the pens around the barns for artificial insemination with bull semen.

They will also turn bulls loose in the herd as a failsafe measure in case the artificial breeding doesn't work. There are no second chances for cows. If they fail to get pregnant, they are sent to the packing house.

This same breeding cycle also imposes a rigid, economic framework on the rancher's operations.

In a few months, Brownlee will be making decisions that could have financial repercussions in 1980.

This fall, Brownlee will decide how many of this spring's calves to keep as replacements for old cows sold for hamburger. These heifers won't be bred until the summer of 1978. They will calve in the spring of 1979, and the steers or heifers they produce won't be ready for slaughter until mid-1980. Only then will Brownlee get a return, unless he decides to sell the animals when they are younger.

Brownlee finds himself locked into such a cycle now. He figures he needed to get 65 cents a pound for the 450-pound steer calves he was ready to sell last December. But the best offer he got was 36 cents a pound. Rather than lose money, he decided to place them in a fattening yard in Greeley, Colo. He says he needs 45 cents a pound for the fattened animals. But packinghouses were paying under 40 cents in late January.

Last fall he lost $26 a head on the full-grown animals he sold to a packinghouse. At some periods in the last three years, cattlemen have lost as much as $100 a head, according to the U.S. Department of Agriculture.

The atmosphere was all gloom at a weekly cattle auction at the Greeley Producers Public Stockyards in January.

Standing in front of a big sign that said, "Enjoy Beef Everyday," a professional auctioneer called out asking prices and offers to rows of overalled cattlemen, as a cowboy cracked a whip and drove the animals into a sawdust covered corral. When the animals got rambunctious, cowboys in the corral stepped behind wooden barriers.

Tom Nix, a 61-year-old farmer from Eaton, Colo., sold 35 steers to another farmer, Don Anderson, Nix had bought the animals in September and "grained them," fed them corn for the last month, waiting for cattle prices to start up. But he had grown tired of waiting.

"I don't know how he (Anderson) can buy 'em and still expect to make money," he said.

The government doesn't have any exact estimates of the cattlemen's losses, but bankers say they are in the billions of dollars. The cattle industry is stretched financially to the breaking point.

Denver banker Ron Hays says the debts of ranchers and cattle fatteners are "staggering," because they have acquired huge long-term mortgages from banks to cover the costs of their losing operations.

Hays said that because of the great demand for money insurance companies such as Prudential, Connecticut General and Connecticut Mutual have moved aggressively into agricultural lending in the West, using land as collateral.

There have been few actual foreclosures of the kind that swept the West after the 1930's Depression. However, many hard-pressed cattlemen have had to raise money to keep operating by putting first and second mortgages on their property. This has been possible only because land values have risen rapidly.

The rising land values have provided a safety net for the western cattlemen. East of the Rocky Mountains, in Colorado, South Dakota, Oklahoma and Texas, undeveloped pastureland that can be irrigated for crops has jumped in price from around $150 an acre to near $1,000.

Inflation, climate and population growth have played a part in rising western land values, but so has the increased return on crops such as wheat and corn after 1972.

Thousands of acres of grasslands have been switched to crops as prices of those grains rose.

The equation of land, crops and cattle does not seem to be working to the long-range advantage of consumers. At some point, beef prices will have to reflect the price of the land on which the cattle are raised. If they do not, farmers and ranchers will find other uses for their valuable real estate. That can only mean less beef at higher prices.

[Second of a Series]

CATTLE FEEDLOTS IN ECONOMIC PINCER

(By Dan Morgan)

KUNER, COLO.—Today's beef animal has been called "a hide stuffed with corn."

That is a good description of the 75,000 cattle living at Monfort of Colorado, Inc.'s sprawling computerized fattening facilities just east of the Rocky Mountains here.

Each animal will devour more than a ton of corn during the four months it spends in Monfort's mile-and-a-half-long, labyrinthine feedlot. At the end of the four months, the animals will weigh a half-ton each and will be ready to go to Monfort's own high-speed slaughtering plant 15 miles away.

Twenty-five years ago such mammoth beef fattening facilities were almost unknown in the United States, just as they still are in most other countries. But today most of the choice steaks and ribs that Americans buy in stores and restaurants have been carved from animals fatttened in places like it.

Looked at one way, Monfort's feedlot is a highly efficient factory for turning the protein of plants into meat.

A computer calculates daily feed rations of corn, silage, wheat, hormones, vitamins, and supplements for the cattle in each pen, according to the age, weight and condition of the animals.

Corn hauled in by the rail carload is processed into corn flakes to make it easier to digest. Nutritionists check the progress of the animals, and when all goes well each steer gains 2.6 pounds a day until it reaches 1,100 pounds and is ready for slaughter.

For all their efficiency, huge cattle feedlots such as this one are under attack as wasteful and possibly uneconomic—as symbols, in fact, of an era of American agricultural abundance and luxury that may be passing.

It takes about six pounds of corn to add a pound of meat, fat and bone to beef animals. Humanitarian organizations say this is wasteful in a world of widespread hunger and malnutrition.

Others say it is unhealthy. The Senate Select Committee on Nutrition and Human Needs issued a report in January saying that the American diet, which includes a steady fare of fatty, grain-fed beef, contributes to obesity and illness.

And in the last three years, a sharp increase in the price of corn—the raw material of these fattening facilities—has raised doubts about their economic future.

Fifty years ago, grass was the main food of beef animals. Cattle came off ranges and pastures to be slaughtered after eating hay, wheat shoots, alfalfa, or the plentiful mesquite, brome and buffalo grasses of the western plains and prairies.

As the nation's corn supply became more plentiful because of new hybrid seed varieties and powerful chemical fertilizers, some Corn Belt farmers started buying young steers from western ranches and fattening them on local grain.

These animals reached full weight faster than if they had been fed only grass and hay, and their meat tasted jucier and was less lean.

Then, in the 1950s, another phase began with the opening of giant commercial facilities that could fatten from 30,000 and 100,000 animals at a time.

These enormous feedlots which had a voracious need for more and more corn, had a major impact on American agriculture and on American diets. Many of these commercial cattle fattening operations set up in dry southwestern states such as Texas and Arizone rather than in Iowa and Illinois where animals often lost weight slogging through the Corn Belt's winter mud.

And the rapid growth of the big feedlots, made possible by a plentiful supply of extremely cheap corn, vastly increased the amount of inexpensive, grain-fattened beef that consumers could buy.

Between 1960 and 1976, Americans increased their beef eating from 85.1 pounds a year to almost 120 pounds each. And the number of cattle fattened in feedlots nearly doubled from 7 million head to over 12 million. The animals in the feedlots are only one stage removed from the juicy steaks treasured by American consumers.

Today, however, fundamental and perhaps permanent changes are under way in the American beef economy, spurred by a bewildering array of social and economic developments. And the big feedlots are at the center of the storm.

One of the major developments is the rise of the fast food industry. The billions of hamburgers sold by McDonald's so far is indicative of the evolution of this country into a hamburger eating society. Fast-food restaurants specializing in hamburgers are spreading, and almost half of the beef eaten in the United States is now in hamburger form.

Hamburger meat doesn't have to be made from beef animals fattened on corn. Some of it comes from the ground-up trimmings of carcasses of beef animals from feedlots. But a substantial amount is made from lean, imported beef, or from ground-up cows that spent most of their life eating hay and pasture.

At the same time, a sharp increase in corn prices that started in 1973 has completely upset the old profit-and-loss equation that made feedlot operators rich in the 1960s and early 1970s.

In 1972, it cost less than 30 cents to add one pound to a beef animal in a fattening yard; today it costs as much as 45 cents, and in some periods of the last three years the cost was more than 50 cents. The increased price of corn is the main reason.

These changes have already caused substantial adjustments in the operation of feedlots. Monfort and other operators are economizing by shortening the time they feed corn to animals.

Even so, the fattening yards have been caught in an economic pincer of high feed cost and low market prices for the fattened cattle. Monfort, which may be the world's largest, lost $10 million on its feedlot operations in the last fiscal year.

Surprisingly, the company's president, Kenneth W. Monfort, says he feels the adjustment may be a good thing. When corn was very cheap some calves were put on a heavy corn diet when they weighed as little as 350 pounds and left in fattening pens for a whole year. The final month tended to add fat but not much meat.

Monfort says this practice was extremely wasteful. "We're in the process of going back to a more reasonable industry," he says. "We have a cattle feeding industry with twice as much capacity as we really need. We're trying to eat our way out of a problem."

When grain prices were low and cattle were bringing good prices in the 1960s, the beef business was a glamour field. Thousands of wealthy outsiders, ranging from Hollywood stars to big city dentists, bought steers from ranchers and turned them over to professionally managed feedlots for fattening.

The beef boom encouraged the spread of commercial cattle fattening in the Southwest, particularly in the Texas panhandle. At the peak of the boom nearly half the cattle being fed corn were in those big commercial feedlots, the government estimates.

Outside newcomers, nicknamed "Wall Street cowboys," owned a substantial amount of the cattle, and corporate conglomerates, meatpacking companies and grain exporting firms also bought up some feeding facilities. Many private investors were apparently lured by the possibility of using the feedlots to shelter some of their income from federal tax liabilities.

Subsequently, these investors lost millions of dollars, and may have withdrawn their money.

"We overbuilt our feedlot capacity in this country by 20 per cent," says Bill Jones, executive vice president of the National Cattle Feeders Association. "Before the energy crunch it looked as if the demand for meat protein would never stop growing. We were jerked up short," he said.

Some of the big commercial feedlots built in Texas have closed down, and at least one major one went bankrupt.

The farm magazine, Agri Finance, reported last summer that outside investors were "waiting in the wings" to buy cattle again as soon as it became more lucrative.

Yet, many farmers, feedlot operators and their bankers are wondering when, if ever, that will be.

The cattle fattening industry in the United States, and the era of inexpensive grain-fed beef, was based upon a seemingly endless supply of cheap corn. That luxury existed in no other country in the world and it helped to explain why the cattle feedlot is a uniquely American institution.

Beef animals eat nearly one-sixth of the country's corn crop every year—and America grows half of all the world's corn.

Today, it is by no means certain that corn will ever again be available at bargain prices. The price of growing corn has been increasing, because the higher costs of petroleum-based fertilizers and pesticides, and rising land prices, have made crop farming a costly business.

The American beef economy is also indirectly experiencing the impact of global economic and diplomatic developments over which it had little or no control. The demand for American corn has been steadily increas-

ing abroad, as foreigners eat more hogs and poultry and need grain to raise the animals.

In 1972 and 1973, U.S. corn exports jumped from 27.1 million metric tons to 43.1 million tons, partly because of the Russian grain purchases, which were part of Washington's detente strategy.

Then the weather gave the agricultural economy another jolt.

In 1974, the drought-stricken crops in the United States were so poor that the country would have had to import grain if American livestock and dairymen had used as much grain as they had in 1973. They didn't though, because corn prices reached record levels as foreign buyers outbid users of corn here at home. In Washington, officials argued that the country needed these sales abroad to help offset the cost of importing more and more expensive oil.

In that respect, the American beef industry has been a major victim of the 1973 price hikes by the oil producing countries.

Many farmers slaughtered their animals instead of paying more for grain. This process of killing animals instead of feeding them is still under way in the beef industry.

Most predictions are that there will be much smaller supplies of corn-fattened beef coming to market by late this year. That could push up prices. If consumers refuse to pay those prices—which should then begin to reflect the higher price of corn—cattlemen might be forced to turn to more economical ways of producing beef for the nation.

Cattle industry officials insist that there can be no permanent return to the days of raising beef on grass and pasture. They say there is not enough good grazing land to support the country's 127 million head of cattle. That is especially true in the West, where most of the cattle are.

The American National Cattlemen's Association disputes claims that animals could be raised more cheaply on grass. ANCA says farmers would have to keep animals a year longer on hay and pasture than on corn to reach full weight. During that time, ranchers would have to pay for hay (now selling at $50 a ton) and other expenses. Ultimately, ANCA insists, a grass-fed steer would cost only a few dollars more than a corn-fed one, and its carcass would produce less usable meat.

Young steers and heifers could be slaughtered instead of being sent to feedlots—but at that stage of their growth their carcases are bony, not meaty.

Yet farmers do raise beef cattle on nothing more than pasture, hay and silage. That is done in the East and South, where extremely thick pastures can support large numbers of cattle per acre.

To some, that seems to be an appealing model.

"There will be less and less beef that's fed a lot of grain," says a Denver banker. "The fact is you can still turn out a beef animal into the desert and he'll survive. He'll put on half a pound a day instead of two and a half—but he'll survive."

RABBI ABRAHAM SCHEINBERG

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. SOLARZ. Mr. Speaker, it is with great sorrow that I rise today to announce to my colleagues in the Congress the death of Rabbi Abraham Scheinberg.

Rabbi Scheinberg, the spiritual leader of the Hebrew Alliance of Brighton Beach, was one of the foremost Talmudic scholars in America and a leading community activist in my own congressional district.

His service as president on the Oceanfront Rabbinical Board was typical of the large role he played in the communal life in Brooklyn.

Known to his congregation as an "illuy" or genius, Rabbi Scheinberg spent a life of pious study and service to both God and man. He edited a number of books on American Jews and his weekly column in the Jewish Press was thought of as the final word in the laws and customs of Jewish life in the modern world.

I join with the entire Jewish community in mourning his loss, but we can be reconciled to know that the monuments he leaves behind are an inspiration to us all.

ESTABLISHING A MIA/POW PRESIDENTIAL TASK FORCE

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. GILMAN. Mr. Speaker, on January 26, 1977, I introduced House Concurrent Resolution 82, expressing the sense of the Congress that the President should establish a Presidential task force for the purpose of first, advising the President with regard to achieving the fullest possible accounting of all Americans who are prisoners of war or missing in action as a result of the Vietnam conflict and second, recommending to the President the adoption of national policies with regard to the MIA's and the POW's.

Subsequent to the introduction of this concurrent resolution, many colleagues expressed an interest in my proposal. Accordingly, today I am reintroducing this measure, which is cosponsored by the following 39 Members:

LIST OF COSPONSORS

Mr. Andrews of North Dakota.
Mr. Bafalis of Florida.
Mr. Beard of Rhode Island.
Mr. Buchanan of Alabama.
Mr. Byron of Maryland.
Mr. Carter of Kentucky.
Mr. Cohen of Maine.
Mr. D'Amours of New Hampshire.
Mr. Dornan of California.
Mr. Eilberg of Pennsylvania.
Mr. Fisher of Virginia.
Mr. Goodling of Pennsylvania.
Mr. Horton of New York.
Mrs. Holt of Maryland.
Mr. Hughes of New Jersey.
Mr. Kemp of New York.
Mr. Lagomarsino of California.
Mr. Lederer of Pennsylvania.
Mrs. Lloyd of Tennessee.
Mr. Long of Maryland.
Mr. McDade of Pennsylvania.
Mr. McDonald of Georgia.
Ms. Mikulski of Maryland.
Mr. Mineta of California.
Mr. Mitchell of New York.
Mr. Murphy of New York.
Mr. Nowak of New York.
Mr. Pepper of Florida.
Mr. Quayle of Indiana.
Mr. Rose of North Carolina.
Mr. Ryan of California.
Mr. Stockman of Michigan.
Mr. Treen of Louisiana.
Mr. Walsh of New York.
Mr. Waxman of California.
Mr. Bob Wilson of California.
Mr. Charles H. Wilson of California.
Mr. Young of Florida.
Mr. Zeferetti of New York.

A complete text of House Concurrent Resolution 82, together with my remarks is located in the CONGRESSIONAL RECORD of January 26, 1977, on pages 2436–37 and 2394–95.

Mr. Speaker, 2,505 servicemen and civilians did not return from the Vietnam conflict, including 647 men who are presumed dead but whose bodies have not been recovered, as well as approximately 786 MIA's and POW's. President Carter has stated that he "would like to see—a proper accounting for the 2,505 Americans who were lost," and according to the Washington Post of February 18, 1977, the President has asked Vietnam to receive a high level U.S. delegation "to seek a full accounting of U.S. servicemen missing in action and to open discussions on mending relations between the nations."

I applaud the President's initiative to seek the fullest possible accounting of our missing men and I urge my colleagues to join with us in encouraging the President to establish a task force that would devote its full efforts in obtaining this objective.

MUSEUMS AND OLDER AMERICANS

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. BRADEMAS. Mr. Speaker, in examining the changing roles of museums, one soon learns that museums are no longer regarded simply as the depositories of the past but as centers of learning that make positive contributions to their communities. Indeed, museums are making special efforts to build new audiences and attract new groups. The elderly are part of the growing number of individuals who are now taking advantage of museum programs.

In an effort to make museum administrators aware of how their institutions can better serve older people, the National Center on Arts and Aging, under the aegis of the National Council on Aging, offers workshops, seminars, and technical assistance to those interested in building a closer relationship between the elderly and the arts.

Mr. Speaker, as chairman of the Subcommittee on Select Education with jurisdiction over matters relating to the elderly as well as to the arts, I call to the attention of my colleagues a useful and informative article by Jacqueline T. Sunderland, director of the National Center on Arts and Aging, which appears in the current issue of Museum News, and shows what some museums have done to increase the participation of older Americans in the programs of our Nation's museums:

MUSEUMS AND OLDER AMERICANS

(By Jacqueline T. Sunderland)

Over the past decade, museums have made a conscious effort to attract new audiences.

The departments of community programs, outreach divisions and expanded education departments that have appeared in many institutions are signs that museums know they must become accessible to a larger public. But a part of that public has thus far been overlooked: the nation's older population, approximately 31 million people who are for the most part removed from the mainstream of community life. Older Americans have been excluded by public and private policies and by society's attitudes—many based on myth—that prevent their utilization as a valuable resource and that deny them access to cultural experiences.

THE ELDERLY IN COMMUNITY LIFE

Museums belong to the people and are committed to delivering specialized services to a growing public. The current price tag for those services is formidably high, but money spent now to expand museum audiences and to spark continued interest is expected in the long run to reap dividends that benefit everyone, including older persons.

Americans who are 60 years of age or older make up 14.7 percent of the population. They want to stay in the mainstream. They want choices to make, opportunities to function as productive members of society. Many cannot and do not exercise these options because they are victims of ageism, a form of discrimination described by Dr. Robert Butler in his Pulitzer prize-winning book, "Why Survive? Being Old in America."

Butler, the director of the National Institute on Aging of the National Institutes of Health, defines ageism as "a process of systematic stereotyping and discrimination against people because they are old." He compares it to racism and sexism, and adds that "old people are categorized as senile, rigid in thought and manner, old fashioned in morality and skills."

NATIONAL CENTER ON ARTS AND AGING

The National Council on the Aging (NCOA) has worked since 1950 to bring about the creation of services and programs that could make older people's lives more meaningful and personally gratifying. The National Center on the Arts and Aging, a program of NCOA, aims to enrich the lives of older persons through their increased participation in and broader access to cultural programs and services. The center seeks to make arts administrators more aware of how their organizations, public and private, can serve and be served by older people. Concomitantly, representatives of agencies and organizations in the field of aging are motivated to become active advocates for older persons in the arts. Older people can, the center believes, be participants, supporters, volunteers, paid professionals, molders of public opinion. They are part of a new, expanded audience for the arts.

The Washington-based center is a clearinghouse for program ideas and information. Supported in part by a grant from the National Endowment for the Arts, it sponsors workshops, seminars and conferences and offers technical assistance and consultation to individuals and organizations interested in developing a closer relationship between older persons and the arts.

OLDER PEOPLE SEEKING THE ARTS

Why should museums consider the needs of older persons? "The Myth and Reality of Aging in America," a national survey conducted for NCOA by Louis Harris Associates, produced results that point to older Americans' interest in community arts facilities. However, only one percent of those surveyed had visited a museum during the preceding year, a fact that underscores the inaccessibility of museums to the aging.

According to census data, the median number of school years completed by those 65 and over in 1970 was 8.7. By 1990, it is estimated that the median will have jumped to 11.9. As Americans become more educated, they will make more demands on the nation's cultural resources. We may at least tentatively conclude, then, that cultural institutions, as they prepare for increased demands on their facilities and services, must also prepare for a better-educated public whose interest in the arts will not diminish with age.

It is also important to realize that by 1980, the total U.S. population will be three times as large as it was in 1900. The number of citizens who are 65 or older will have increased eight times. Older persons comprise the country's largest minority and the fastest growing segment of the population.

In an address to the 1976 AAM annual meeting, U.S. Commissioner on Aging Arthur S. Flemming referred to a survey made by the Center for Arts Administration at the University of Wisconsin. Entitled "Older Americans: An Unrealized Audience for the Arts," it showed that older persons represent just 10 percent of the audience in 80 percent of the surveyed museums and arts organizations.

One-half of the administrators surveyed indicated a desire for younger visitors; only seven percent wanted to attract older audiences. The authors of the survey report concluded that "only museums seem to want more senior citizens, while the rest of the organizations would prefer younger age groups."

Flemming urged that museums become acquainted with local agencies on aging, the counterparts to local arts agencies (see "Where to Find" in this issue). "These agencies, as they build their budgets and plans, can contribute to building bridges between the older person and the services [museums] can offer," he said.

OPENING MUSEUMS TO THE ELDERLY

Programs and services for the aging should appeal to all segments of that population: the poor, the financially secure, minorities, ethnic groups and the physically vulnerable as well as the able-bodied. Real or perceived barriers to older persons' participation must be recognized. These include poor public transit, fear of crime and of going out at night. Older people hesitate to attend events alone and often feel uncomfortable in new situations. They are discouraged by architectural impediments and by admittance fees they cannot afford. Recognition of these barriers—as some cultural institutions already know—is not enough. Problems must be solved and difficulties must be ironed out if museums are to attract older audiences. Some institutions have come to grips with the problems and are successfully delivering cultural services to an older public.

Some of these services were described at the first national conference in the arts-aging field, sponsored last October by the Center on the Arts and Aging under NCOA's aegis. Representatives of two major museums and of Museums Collaborative in New York reported on their programs that involve older citizens.

SENIOR VOLUNTEERS IN MUSEUMS

The Metropolitan Museum of Art's program, which uses older people as resources for planning and conducting special activities, began in 1972, when a group of senior citizens was trained to give slide lectures on the museum's collection in senior centers, nursing homes and at day programs for the elderly. The training course has been repeated each year, and the roster of over-65 volunteers now includes 85 active community lecturers, according to Catherine Chance, director of the Department of Community Programs.

Each volunteer gives at least one lecture a week; they meet at the museum once a month to coordinate lecture assignments and plan other museum-related activities for the city's senior citizens. Their training is a continuing process: every volunteer spends six to eight hours a week in the art reference and slide libraries to prepare and develop lecture topics. Regular consultations are held with the staff coordinator and department heads. The volunteers also give lectures in connection with special exhibitions. Last summer, for example, a group served as guides for blind visitors to a tactile exhibit of musical instruments. A selected number of volunteers attend docent training sessions with the curatorial staff and give gallery lectures to groups of older visitors. At least three such groups visit the museum each week.

Committees of senior volunteers plan special activities for older museum visitors. An annual party for 300 people (a different group is invited each year) is held in the Medieval Tapestry Hall, where the museum's Christmas tree stands. The entertainment has been provided by such groups as the Sirovich Senior Center symphony orchestra, a piano quintet from the Institute of Retired Professionals at the New School for Social Research, a choral group from the A. Phillip Randolph Center and a trio from the Hope of Israel Center. Refreshments are served and each guest receives a museum souvenir.

Each May, in recognition of Senior Citizens' Month, an exhibition of paintings, sculpture and crafts is installed in a museum gallery. The works of art are chosen from among projects produced in art instruction programs in the city's senior centers. Senior citizen volunteers conduct special lectures to coincide with the exhibition.

MUSEUM PROGRAMS FOR OLDER PEOPLE

An annual conference for senior center directors, program leaders and city agency personnel is held to discuss the museum's elderly public, to share resources and to make recommendations for services the museum could provide. As a result of suggestions gleaned from these conferences, senior citizens may rent recorded tours and listening devices at special rates, they are admitted free of charge to certain events in the museum auditorium, and study groups and educational programs may arrange special gallery tours.

Experience with a pilot program led the Baltimore Museum of Art to develop a three-stage program for senior citizens. The first week, a docent visits the group at their gathering place (usually a community center or church) and presents an illustrated introduction to the museum. The following week, free transportation takes the group to the museum. A slide lecture on a more specific topic is given the third week, again at the senior citizens' own gathering place.

The museum also discovered that there are many older Americans interested in crafts who never had time to pursue these hobbies. Special Thursday and Friday tours are held for people with a particular interest in this area.

Museums Collaborative's voucher system, which reaches out to the aged as well as other groups, is described in Gary Bridge's article, "Cultural Vouchers" (Museum News, March/April 1976).

More details of these and other cultural programs will be published in the proceedings of the NCOA/Center on the Arts and Aging conference, "Arts and Aging: An Agenda for Action," to be available in early 1977. Requests for copies should be directed to the National Center on the Arts and Aging, National Council on the Aging, 1828 L St., N.W., Washington, D.C. 20036.

The social, economic, intellectual and cultural opportunities available to any group in our society depend on the resources, capabilities and aspirations of that group, but also to a great degree on the resources, capabilities and aspirations that the general public attributes to it. Older Americans are no

exception. The potential contributions that they can make depend in large measure on the confidence that the public at large, and decision makers in particular, place in them as contributing, vital human beings.

Today's older Americans grew to maturity during times when art was spelled with a capital "A" and bore the cachet of privilege. The arts are now an open field, providing opportunities in which old and young, rich and poor can share. The time is ripe for policy makers in the field of aging to broaden definitions of social and human services to embrace cultural services, and for museum staffs to open their institutions' doors wider and with enthusiasm to more aging persons.

BILL TO PROHIBIT BRIBERY

HON. BOB ECKHARDT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. ECKHARDT. Mr. Speaker, today I am introducing a bill to prohibit bribery by U.S. companies of officials of foreign governments. The Watergate proceedings unveiled the existence of a number of secret corporate political slush funds. Subsequent investigations by the Securities and Exchange Commission revealed that these secret pools of money had been used in connection with the corporation's overseas operations for the purpose of bribing officials of foreign governments. The Commission has maintained that such "off-book" payments not only make the published financial statements of the corporation materially misleading in many cases, but are also of particular shareholder interest inasmuch as they reflect on the integrity of management and the manner in which the corporation derives its overseas business.

Moreover, these revelations have had a substantial adverse impact upon the governments of the countries involved. For example, payments by Lockheed alone have had well-publicized repercussions in Japan, Italy, and the Netherlands. Lockheed is by no means alone, however. Hundreds of additional corporations, either through legal proceedings initiated by the Commission or voluntarily, have disclosed illegal or questionable payments to officials of foreign governments aggregating hundreds of millions of dollars.

The public concern about this kind of corporate behavior is expressed by the Senate's 86 to 0 passage during the last Congress of the Proxmire bill (S. 3664) which would have criminalized foreign bribery.

If legislation in this area is to be effective, it must serve as a deterrent. Legislation merely requiring disclosure permits the corporation to weigh the anticipated costs of the disclosure against the anticipated benefits of the bribe. For this reason, disclosure alone is inferior to the direct sanctions normally used by society to prevent antisocial behavior.

The companies generally involved in international payoffs deal in multimillion-dollar commodities such as airplanes, tanks, and power generators, which are bought by governments rather than private corporations or individuals In transactions of such magnitude, the penalties clearly must be commensurately large to have any real deterrent value.

The bill I am introducing today would apply the existing criminal penalties of the Securities Exchange Act of 1934—5 years or $10,000—to individuals who bribe foreign officials. However, the fine which a court may impose upon a corporation engaged in these activities has been increased to a maximum of $1,000,000.

In addition, this bill insures that those persons in the corporate hierarchy who were instrumental to the bribe, although they personally may not have forwarded the payment, do not escape punishment. It provides that any corporate officer, director or controlling person who authorized or acquiesced in the prohibited transaction would be as culpable as if he had made the payment himself. Finally, the corporation would be prohibited from paying the fine of anyone found guilty of violating the provision of this bill.

The bill is divided into two sections, which are summarized as follows:

Section 1 applies to corporations subject to the jurisdiction of the SEC by virtue of the reporting requirements of the Securities Exchange Act of 1934. It applies the existing criminal penalties of the securities laws—up to 5 years imprisonment and a fine of up to $10,000 for individuals and a fine of up to $1,000,000 for companies—for payments, promises of payment, or authorization of payment of anything of value to any foreign official, political party, candidate for office, or intermediary, where there is a corrupt purpose. The corrupt purpose must be to induce the recipient to use his influence to direct business to any person or to influence any official act or decision of a government.

Section 2 applies the identical prohibitions and penalties provided by section 1 to any domestic business concern other than one subject to the jurisdiction of the SEC pursuant to section 1. Violations of the criminal prohibition under section 2 by persons not subject to SEC jurisdiction would be investigated and prosecuted by the Justice Department. Violations under section 1 would normally be investigated initially by the SEC, but referred for criminal prosecution to the Justice Department. Since the 1934 act provides the SEC with authority to enforce its provisions by civil injunction, similar authority is granted the Justice Department to enforce the provisions of this section.

PERSONAL EXPLANATION

HON. MARTHA KEYS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mrs. KEYS. Mr. Speaker, on Wednesday, February 9, 1977, I was unavoidably absent from the House. Had I been present, I would have voted on matters coming before the House as follows:

"Yea" on House Resolution 252, to authorize and direct the Committee on Standards of Official Conduct to determine whether Members of the House accepted anything of value, directly or indirectly, from the Government of the Republic of Korea or representatives thereof;

"Yea" on H.R. 692, to amend the Small Business Act and the Small Business Investment Act of 1958 to increase loan authorization and surety bond guarantee authority; and to improve the disaster assistance, certificate of competency and Small Business set-aside programs.

ALL VOLUNTEER FORCE—CURRENT STATUS AND PROSPECTS: PART V

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. STEIGER. Mr. Speaker, two questions often asked about the volunteer army are what are its prospects, with fewer young people entering the supply pool in coming years and enhanced employment prospects and what is the Defense Department's sustainment strategy?

Today, the military services need to attract one of every three qualified and available young men. However, the population of males aged 17 to 22 will decrease about 19 percent between 1979 and 1989.

Chapters 6 and 7 of the defense transition document offer a thoughtful analysis of some serious problems which will have to be addressed by Defense Department manpower specialists. The transition report concluded that—

An alert, flexible, and competent management approach promises to be the best guarantee for the successful sustainment of the all volunteer force.

Alternatives are available to decrease the requirement for new men each year: Open more positions to women; convert others to civilians; and reduce the continued excessive rate of attrition before the end of the first term. Increasing the numbers in the "available and qualified" category; that is, increasing the supply can be done by minor adjustments in medical standards; improved screening for motivation and adjustment to reduce reliance on the overly broad categorization of "high school graduate." Importantly, the Army should remember that if it is having difficulty attracting the quality it claims it needs, the Air Force and Navy have both demonstrated an ability to do so. There are many roles and missions—such as in support functions—that should be reviewed as potential for shifts to other services.

Those chapters follow:

CHAPTER 6—FUTURE PROSPECTS: SUPPLY AND DEMAND

SUPPLY AND DEMAND

Rough estimates can be made of the supply pool of qualified and available young males (ages 17–22)[1] who would be likely

[1] This appears appropriate since the bulk of recruits (about 96%) come from the 17–22 age group.

candidates for the military. These estimates are based on the following assumptions: maintenance of the present levels of military and civilian pay, stability in the current personnel policies and practices, and no major shifts in the attitude of American youth toward military Service.

Starting with the 17-year-old population and following this age group through age 23, the proportion of qualified and available men who will have to volunteer for military service to meet projected requirements can be calculated. The qualified and available population is derived by eliminating: (1) the unavailable (men confined to various training and corrective institutions) and the unqualified (men who are precluded from military service because of mental, physical or moral limitations); and (2) those not likely to volunteer, including third and fourth year full-time college students.

Table 16 summarizes the ratios required of each population category required to meet enlisted accession needs through 1990.

TABLE 16.—17-YEAR-OLDS IN 1975, 1980, 1985, AND 1990, RESPECTIVELY LIKELY TO BE QUALIFIED AND AVAILABLE FOR MILITARY SERVICE AT SOME TIME BEFORE REACHING AGE 23

[Manpower in thousands]

Supply pool categories	1975–80		1980–85		1985–90		1990–95	
	Pool	Requirements	Pool	Requirements	Pool	Requirements	Pool	Requirements
17-year-old population (+)	2,134	1/5.6	2,073	1/5.5	1,735	1/4.6	1,914	1/5.0
Cannot volunteer:								
Institutionalized (−)	28		27		23		25	
Unqualified (−)	668		649		543		599	
Qualified	1,438	1/3.8	1,397	1/3.7	1,169	1/3.1	1,290	1/3.4
Not available:								
College enrollmnt (−)	557		541		452		499	
1st and 2d year college dropouts (+)	209		203		170		187	
Qualified and available	1,090	1/2.9	1,059	1/2.8	887	1/2.3	978	1/2.6
Accession requirements used in above requirements ratios	[1] 380		[2] 380		[2] 380		[2] 380	

[1] The 1975–80 enlisted requirements of 380,000 is an average of the following: 1975, 381,000; 1976, 368,000; 1977, 391,000; 1978, 370,000; 1979, 373,000; and 1980, 394,000.

[2] The average of the 1975–80 enlisted requirement was used as a projection for the 1980–95 period.

In the 1975–1980 period, the task of recruiting 380,000 DoD male volunteers (all Services) can be stated as follows: to maintain an all volunteer armed force of 2.1 million active duty personnel under current policies will require that about one out of every three (34%) qualified and available men will have to volunteer for active military service before age 23. Viewed this way, the 1/2.9 rate for DoD appears quite formidable. However, young men enlisted at a similar 1/3 rate in 1975 and 1976.

Long term projections indicate the task will be more difficult in the future. The population of males (ages 17–22) decreases about 19% between 1979 and 1989. This decrease will cause male accession requirements to shift from the 1/2.9 ratio in 1975–1980 to a 1/2.3 ratio in the 1985–1990 period. The rough nature of these estimates cannot be overemphasized.

If reserve non-prior service enlisted requirements (91,000 accessions annually) are also considered, the ratios for qualified and available become: 1/2.3 for FY 1975–80, 1/2.2 for FY 1980–85, 1/1.9 for 1985–90 and 1/2.1 for 1990–95.

Future accession needs are shaped by a range of dynamic factors such as manpower management dynamics, (e.g. future strength requirements and losses), changing world conditions, defense decisions and public attitudes which are difficult to forecast.

For the 1985–1990 period, several options could be considered which could return the 1/2.3 ratio to the currently obtainable 1/3 ratio. These options would simultaneously reduce demands on the male qualified and available pool and increase the supply of possible candidates. To illustrate the possible options, the projected 1985–1990 requirement (demand) of 380,000 male non-prior service youths and the estimated supply of 887,000 qualified and available 17–22 year old male population has been examined. Table 17 illustrates the possibilities for shifting the ratio from 1/2.3 to 1/3.1.

TABLE 17.—*Demand/supply illustrative adjustments for male non-prior service accessions, fiscal year 1985–90, qualified and available males (ages 17–22)*

[Manpower in thousands]

REDUCED DEMAND	
Demand base	+380
Recruit more women (up to 15 percent of DoD end strength)	−20
Reduce current losses among first-term personnel (reduce first-term attrition by 20 percent)	−24
Replace military men with civilians (convert 50,000 military positions to civilian positions)	−10
Recruit more prior service veteran males (lateral entries also increase prior service accessions by 20 percent)	−5
Decrease support manpower requirement (5 percent)	−10
Change first-term to career ratio from 60/40 to 55/45 mix	−15
Adjusted demand base	+296
INCREASED SUPPLY	
Supply base	+887
Attract 5 percent of the jr. college grads, and 3d & 4th year college students	+14
Reduce physical requirements—relax weight standards by 10 percent	+18
Adjusted supply base	+919

Adjusted ratio = +296/919 = 1/3.1.

If such adjustments are made, the task of sustaining the AVF may not be much more difficult than in the 1975/1976 period. As a final fallback position, several costly supply increasing options including increased recruiting Budgets, expanded bonuses, and higher pay levels, could be considered.

Such fine tuning of the marketplace may or may not be necessary, but options are available for these demand/supply adjustments. It will be the responsibility of AVF managers to make such adjustments if needed.

IMPACT OF UNEMPLOYMENT

Another factor which could impact on the supply of male volunteers is a reduction in the current general unemployment rate. Rough estimates[2] indicate that for every 1 percent reduction in the general unemployment rate, another 21,000 individuals in the qualified and available military manpower pool would be able to obtain civilian employment. Taking a worse case approach—namely, that each of these individuals is in such an attractive job that DoD cannot compete for them—the qualified and available pool is reduced by 21,000. For example, assume that general unemployment is reduced from 8.1 percent to 5.1 percent. The impact on supply would be a reduction of 63,000 males, reducing the male supply in the 1985–1990 adjusted pool from 0.919 to 0.856 million males. The revised demand/supply ratio then becomes 1 in 2.9, about the same ratio experienced in the successful 1975/1976 period.

These projections, when combined with past experience, indicate that enlistment supply need not be a problem, even during the mid and late 1980's. To the extent that there is a problem, its resolution comes in (1) making more efficient use of the current supply pool (i.e., relaxing physical standards for enlistment, etc.) and (2) reducing demand (i.e., reducing attrition, more females, etc.).

[2] Estimates from General Research Corporation Enlistment Supply Model. Rand Corporation models yield similar results.

CHAPTER 7—SUSTAINMENT STRATEGY

There are two primary strategies that the DoD can apply to its pursuit of a viable accession program: the requirements approach and the market approach. The requirements approach sets specific quality standards and determines desired mixes in accession input. If there is an insufficient supply of desired quality individuals, then this approach would lead to either shortfalls or require an increase in incentives.

In contrast to the requirements approach where specific quality standards are established, the market approach utilizes flexible quality standards. When supply is plentiful, standards are raised and high quality accessed. When supply is scarce, standards are lowered and personnel and training systems are adjusted to cope with the lower quality input. As currently practiced, the Services assume that higher quality is always desirable. Under the market approach, the Services attempt to recruit "whatever the market will bear". This strategy makes it appear that the Services are always at the edge or margin of their recruiting capabilities as they achieve 95 or 98 percent of their recruiting objectives. One disadvantage of the market approach is that during periods when civilian employment is high or youth population declines, and where AVF managers have not employed the supply increasing or demand decreasing options which are available, accession quality levels will periodically decline from their previous inflated levels, and the AVF may appear to be failing.

Looking to the late 1970's and 1980's, it is likely that the AVF can be achieved and relatively high quality standards can be maintained through the utilization of both strategies. However, DoD managers must be prepared to accept some fluctuations in quality

input, remembering that definition and measurement of quality remain an imperfect art, at best.

Several areas involving accession quality are candidates for future study and analysis. The various parameters of quality, including survivability, trainability, and job performance, need to be better distinguished and understood; improved screening and training techniques for lower quality recruits may offer great benefits in developing a more cost-effective accession program; and finally, if quality levels decline to a point where improvement is desired, contingency plans must be readily available to minimize the lead-times inherent in the management options discussed in the previous section. An alert, flexible, and competent management approach promises to be the best guarantee for the successful sustainment of the AVF.

A CALL FOR NATIONAL ACTION

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. BINGHAM. Mr. Speaker, I insert herewith an impressive memorandum on the need for national action with respect to the problems of America's cities, prepared by Rev. Msgr. James J. Murray, executive director of Catholic charities of the archdiocese of New York:

A CALL FOR NATIONAL ACTION

I. INTRODUCTION

The fiscal problems of New York City have been looked on by so many across the country—and even in New York State and parts of New York City—as a unique problem isolated to the City government itself.

Because we are the biggest and perhaps the most vulnerable, the primary attention of the media has been focused on the city and its fiscal problems, not on the human dimension.

Our points are three:

(1) that there is not a New York City crisis but rather a national urban crisis;

(2) that this national urban crisis is a fiscal one but affects the human lives of millions of American citizens and their families;

(3) that the root causes are national in scope, are beyond the ability of local governments to eradicate and call for federal action.

Before I address our first point let me say parenthetically that when I refer to an urban crisis, I am not just referring to cities with a population of over 200,000. I am also including local units of government particularly at the county level across the country. Just a brief example—Westchester County and Suffolk County, because of continued unemployment, have greatly increased their public assistance and medicaid costs. Breadwinners have exhausted Unemployment Insurance benefits; the jobs aren't there; their resources are depleted and they have to go on home relief. Taxpayers have become service and revenue recipients. And the counties don't have the wherewithal to solve this problem.

II. THE CRITICAL SITUATION NATIONALLY

Which cities are in trouble? A year ago last November your Joint Economic Committee, in a report, noted the appearance of danger signals for 22 of the largest central Cities in the United States.

A recent study for the National Urban Policy Roundtable listed 8 cities as being on the critical list; New York, Buffalo, Detroit, Newark, St. Louis, Boston, Cleveland, Philadelphia, with 100 others listed in serious condition.

A study recently released by Brookings would indicate that 29 cities are in a hardship situation from which can't bounce back.

In simple terms, New York is like the child in the family who is always the first to get sick. When that child gets sick the parents know that it's not going to be over until all the children go through the sickness.

Many of these cities suffer from the same root causes—a long term socioeconomic decline. Their revenue bases are stagnant or declining because of the exodus of people and businesses at the very time that their expenses are going up because of inflation, recession, unemployment and a great increase in a service-dependent population.

Twelve of these sick cities have local tax bases that declined between 1970 and 1975. Five of these cities have a higher percentage of their population receiving welfare payments than New York has.

In short for all of them as a class, their economy is going nowhere, their tax payers are going elsewhere and their tax beneficiaries are left behind. They are finding it increasingly difficult to balance their budgets and more and more difficult to have access to the short-term money market at reasonable interest rates. Already this means, in more than 10 of the cities, that they have to commit more than 10% of their revenues to debt service for short-term borrowings.

At the same time that their tax base is being committed more to debt service and less to human services, their populations and their local economies are declining.

Seventy-three percent of cities with populations over 200,000 lost population in the 70's. And central cities lost population 4 times as fast between 1970 and 1975 as they did between 1960 and 1970. Four cities—Buffalo, Cleveland, Pittsburgh and St. Louis lost more than 20% of their population between 1960 and 1973.

The number of jobs in troubled cities has been going down. As bad as New Yorks economy is, eleven cities have lost a higher percentage of jobs. Detroit's job loss is 18.8% and Buffalo's is 15.8%.

If employment and jobs in New York City—whose job level has now declined to the level of 1950—had grown at the national rate we would now have 4.43 million jobs in New York City instead of 3.4 million.

III. NATIONAL PROBLEM—NATIONAL RESPONSE?

Gentlemen, these are not short-term problems. The sickness is there for many cities—and its spreading fast.

Home remedies won't help. No sick city can control the national problems of housing, unemployment, inflation, recession. No sick city can control the municipal credit market. No sick city has the resources for the type of massive economic development programs that are necessary to close the gap between local expenditures and local revenues while continuing to maintain the quality of life of their families and individuals.

Which really is our third and final point—we are not just seeking federal action for New York City. Because we see a problem national in scope we are here to advocate federal initiatives not just for New York but as part of a national strategy to save our cities and the millions of people who live and work and raise their families in them—as well as for all the people—the aged, the poor and the handicapped—who need their cities, who can't afford to move away and who are entitled to have us maintain the quality of their lives.

Because we are so heavily into this issue affecting the central cities we would also appreciate your advice on how we can help to work on this not just for New York but for all other cities and local units of government which need help fast.

Rev. Msgr. JAMES J. MURRAY.

THE GRAND JURY REFORM ACT OF 1977

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. CONYERS. Mr. Speaker, I am pleased to introduce, with 13 of my colleagues, the Grand Jury Reform Act of 1977.

Grand jury reform was long overdue when I introduced my first bill to restore decency and due process into the grand jury chamber in 1974. It is even more so today. The panel that the authors of the Bill of Rights wrote into the fifth amendment for our protection has become a vehicle for our persecution.

Indeed, stepping into the grand jury chamber is like stepping back through time—way back, back past the two centuries of struggles Americans have waged to defend and extend our constitutional guarantees of liberty and freedom, back past the centuries of sacrifice that built our English heritage of individual rights, back to those medieval times when justice meant trial by "ordeal."

For that is just what the modern grand jury process can be: an ordeal. Under current grand jury procedures, for instance, any person in the United States can be subpenaed before any Federal grand jury, even if that grand jury is 3,000 miles away. A person can be ordered to appear at a moment's notice and never be told why he or she has been called or what the grand jury is supposed to be investigating.

The grand jury chamber itself is off limits to basic constitutional guarantees and rules of courtroom fairplay. Prosecutors may ask grand jury witnesses any questions they wish. They may badger witnesses, who are not allowed to have the assistance of counsel inside the grand jury room, with abusive threats and unfounded charges. They may bias grand juries against witnesses by introducing irrelevant or hearsay evidence that would not be admissible during a trial.

Should a witness object to this kind of treatment by invoking the fifth amendment right to silence, the prosecutor may have the witness immunized. Once immunized, the witness must either tell the Government what it wants to know or go to jail for contempt. Witnesses jailed for civil contempt in this manner are not entitled to a jury trial. Their confinement can theoretically last indefinitely because while a witness can only be jailed for as long as a sitting grand jury wants his or her testimony, there is nothing to stop the government from resubpenaing a silent witness before a second grand jury once the term of the first expires.

"The grand jury witness," summed up Prof. Melvin Lewis of Chicago's John Marshall School of Law last fall, "is the least favored person known to the Constitution."

With grand jury prerogatives like these to work with, prosecutors can wreak almost limitless havoc. They can destroy

hard-earned reputations, stigmatize dissenters and disrupt their activities, handcuff—both literally and figuratively—journalists, strikers, and defense attorneys. In short, under the grand jury's umbrella, prosecutors can engage in the very sorts of behavior the grand jury was originally meant to prevent.

This turn of grand jury events was certainly not foreseen by James Madison and his contemporaries when they wrote into the Bill of Rights the provision that "no person shall be held to answer for a capital, or otherwise infamous crime" unless a panel of his or her fellow citizens—the grand jury—decided that there was enough evidence to warrant further prosecution. The generation of 1776 saw the grand jury as an independent body that would prevent criminal activity from either being trumped up or covered over, the former by thoroughly scrutinizing the government's case against an accused, the latter by investigating alleged instances of government wrongdoing that government officials could not be trusted to investigate themselves.

Modern Federal grand juries, at least one of which is in operation in every Federal district at all times, function in a way that bears little resemblance to this Bill of Rights ideal. The 23 members of the grand jury, who normally meet once a week or less for several hours at a time, play an essentially passive role. The U.S. attorney in charge of each grand jury panel selects the cases the grand jury will consider, the witnesses the grand jury will hear, and the evidence the grand jury will see.

Upon the completion of the prosecutor's presentation, the grand jurors, without the prosecutor present, decide whether or not to indict. Predictably, grand jurors almost always vote to indict. Why shouldn't they? All grand jurors know about the cases they are deliberating is what the Government wants them to know.

For the conscientious grand juror who really wants to make a contribution to justice, grand jury service can only be, as one grand juror noted last December, frustrating. That grand juror, Robert Pitzer, was the foreman of a Federal grand jury in Atlanta. When his panel's term ended, it analyzed its experience in a fascinating report.

"There have been times," the report noted, "when the members of the Pitzer grand jury have felt that they were simply there to be used at the whim or desire of whatever attorney in the U.S. attorney's office needed a 'warm-bodied grand jury' to hear testimony."

Given this depressing and demeaning grand jury reality, it is perfectly understandable why some observers have called for the grand jury's abolition. I have not, for two chief reasons. Since the grand jury indictment is required by the Constitution, abolishing the grand jury as a method of charging would mean amending the Constitution, a long, wearying process. Specifically, abolishing the grand jury would mean amending a part of the Constitution that has never been amended before, the Bill of Rights. Dare we risk setting such a precedent? I think not.

Moreover, the grand jury is one of only two institutions in our criminal justice system—the trial jury the other—where citizens have decisionmaking authority. I believe it would be a mistake to eliminate the grand jury at a time when popular participation in our political and legal institutions needs to be encouraged, not discouraged.

I also believe it would be a mistake to tolerate the sorry grand jury status quo a moment longer, and the impetus for the changes we need must come from Congress. It was the Congress, after all, that institutionalized the grand jury into our criminal justice system when it drafted the fifth amendment in 1789. Now it must be the Congress that puts an end to the practices that have distorted the grand jury intended by the Bill of Rights almost beyond recognition.

This is the purpose of the Grand Jury Reform Act of 1977. This legislation would break the lockgrip prosecutors now hold over the grand jury process and give grand jurors an active and vital role to play in the charging process. It would safeguard the rights of all those called to appear before grand juries and cripple the manipulation of grand jury proceedings for improper ends. It would help the Federal grand jury finally function as the democratic institution it was designed to be.

While the reforms embodied in this legislation touch many aspects of grand jury procedure, the heart of the bill is its proposal for an overhaul of current immunity law.

Immunity can be a very useful juridical device. By promising safety from future prosecution, the Government can elicit valuable testimony from a low-level criminal conspirator against a higher-up, testimony that the Government would not otherwise be able to obtain.

But immunity can also be a very dangerous device. Witnesses who refuse to answer questions inside the grand jury chamber can be immunized against their will and forced to choose between testifying or going to jail for contempt.

"This," a spokesman for the International Longshoremen's and Warehousemen's Union, Pat Tobin, said last September, "is the kind of choice that faces citizens of lands ruled by juntas. It should not be a choice confronted by Americans."

When we give prosecutors the power to force people to answer their questions, the result is predictable. Some prosecutors will use this power to demand the answers to questions they should not be asking, and that is exactly what has happened. Since the passage of the Organized Crime Control Act of 1970, that abominable document that broadened the immunization powers of Federal prosecutors, U.S. attorneys have compelled lawyers to testify about their clients, reporters about their sources, strikers about their unions, dissidents about their politics and scholars about their research.

Immunity has also made many grand jury panels little more than unwitting partners of FBI misconduct. FBI agents do not have subpena power. No police agent in the United States can yank people off the streets and force them to answer questions. Thus, it is perfectly legal for a person approached by FBI agents to refuse to answer their questions. Many people, especially political activists who suspect the motives behind FBI questions, have decided to take this course. They see FBI inquiries as attempts to gather intelligence on legitimate political dissent, intelligence that will later be manipulated to harass and discredit their activities. These fears are not paranoid delusions. They spring directly from the three-plus decades of FBI illegality examined in detail over recent years by congressional and media investigations.

What do FBI agents do when faced with people who exercise their legal right not to answer Bureau questions? Over and over again during the past 7 years, they have responded by obtaining a grand jury subpena from the nearest U.S. attorney's office. The silent person, who, remember, is charged with no crime, is hauled before a grand jury and asked the same questions the FBI wanted answered. Once immunized inside the grand jury chamber, the person has no right to refuse to answer. At this point, continued silence means a contempt confinement.

What this adds up to has been starkly described by the president of the National Organization for Women—NOW—Karen DeCrow:

> Through the grand jury process, the Bureau has gained the ability to maneuver its targets behind bars without having to go through the bother of proving them guilty in a court of law!

The Grand Jury Reform Act of 1977 would prevent incarcerations like these by making every grant of immunity consensual. If enacted, no person could be brought before a grand jury and immunized unless he or she consented.

Making immunity consensual is not the precedent-shattering step it may seem. Though prosecutors are presently under no legal compulsion to obtain a witness' consent before proceeding with an immunity order, wise prosecutors—that is, Government attorneys looking for evidence, not headlines—do anyway. These prosecutors already use immunity consensually. They treat it as a bargaining tool and trade immunity for a witness' testimony. They do not force immunity onto witnesses who have made it clear that they will not testify .

Why do they not? Peter Richards, an experienced Federal and New Jersey prosecutor and an expert on immunity, put it plainly at a Cornell University Institute on Organized Crime conference last August. Forcing a witness "to testify by court order over his clear objections," he said, "we don't like to do it because we have found that it normally does not work. The situation where a witness refuses to cooperate in the first place, then comes into the grand jury and changes his mind and cooperates and tells you the truth and gives you something valuable is extremely, very, very, very rare. I don't think I've ever seen it happen, as a matter of fact."

The enactment of consensual immunity would not hamper the work of fair-minded prosecutors. It would, however, end the manipulation of immunity to

punish witnesses for the "crime of silence."

Like my proposal for consensual immunity, other provisions in the Grand Jury Reform Act of 1977 are designed to facilitate proper grand jury functioning.

To function properly, a grand jury needs, above all, information, solid evidence untainted by either unfair innuendo or illegality. This legislation would require that prosecutors let grand jurors know of any evidence in their possession that would tend to show an accused's innocence. It would enable defense attorneys to challenge indictments based on hearsay or other evidence that would be inadmissible at trial. By permitting defense attorneys to accompany their clients inside the grand jury room, it would discourage prosecutorial interrogations designed to turn a grand jury against a witness.

The Grand Jury Reform Act of 1977 would also insure that grand jurors be kept up-to-date on what the prosecutor plans to do and why. It would require a grand jury majority vote before any subpena could be issued by a prosecutor, immunity offered or contempt pursued.

Most importantly, the act would facilitate proper grand jury functioning by taking grand juries out of the witness harassment business. Under its provisions, strict limits are set on prosecutors' ability to disrupt people's lives with grand jury subpenas. A 6-month lid is placed on contempt confinements. Contempt confinements based on questions that violate a witness' constitutional or statutory rights are prohibited all together.

These provisions have considerable public backing behind them. The nearly two dozen national bar, church, labor, women's, and civil liberties groups that comprise the Washington-based Coalition to End Grand Jury Abuse have testified in favor of similar reforms I have proposed in earlier grand jury reform legislation. Many of the provisions of the Grand Jury Reform Act have also been endorsed by leading figures in the American Bar Association.

In fact, there are precious few students of the modern grand jury system who have not concluded that this institution desperately needs a sweeping overhaul. Unfortunately, in recent years, most of them have been concentrated in the Department of Justice. Last year, then Attorney General Edward Levi, in testimony before Representative JOSHUA EILBERG'S Judiciary Subcommittee investigating the grand jury issue, opposed every significant check on prosecutorial conduct that grand jury reformers have put forth.

Past Justice Department leadership, however, has not always been as insensitive to the dangers posed by prosecutorial misconduct. I would hope that our new Attorney General, the Honorable Griffin Bell, will heed closely the warning of one of his most thoughtful predecessors, Robert Jackson.

"The prosecutor has more control over life, liberty, and reputation than any other person in America," Attorney General Jackson said in 1940, a year before he was to become a Supreme Court justice. "While the prosecutor at his best is one of the most beneficient forces in our society, when he acts from malice or other base motives, he is one of the worst."

The grand jury was supposed to shield us from prosecutors who act from "malice or other base motives." It is time to fashion the framework that can allow the grand jury to fulfill this noble goal.

A summary of the Grand Jury Reform Act of 1977 follows:

SUMMARY OF THE GRAND JURY REFORM ACT OF 1977

RECALCITRANT WITNESSES

Requires 12 or more grand jurors to vote that the refusal of a witness to testify is without just cause before government attorney may apply for a show-cause hearing order.

Gives the witness 10 days notice of a contempt hearing. Upon showing of special need, a notice of not less than five days may be given to a trial witness.

Guarantees right of counsel at a contempt hearing and for such counsel to be appointed for those unable to afford one.

Provides that imprisonment shall be in a federal institution, unless the witness waives this right. Upon showing of hardship, witness may be imprisoned at institution near family, work or attorney.

Reduces the period of contempt confinement to six months and prohibits reiterative contempt by making the six months cumulative, applying it against any confinement resulting from prior, subsequent or related grand jury investigations.

Requires that a witness found in contempt be allowed bail pending appeal unless it affirmatively appears appeal is frivolous. Appellate court must act within 30 days or the witness will be released pending determination of the appeal.

Prohibits imprisonment for civil or criminal contempt afer a witness has once been imprisoned for criminal contempt for refusing to answer the same questions.

Provides that a refusal to answer questions or provide other information shall not be punished if the question or request is based on any violation of the witness' constitutional or statutory rights.

Applies all of the above protections to witnesses subpoenaed to trial as well as grand jury witnesses, with the exception of grand jury voting, where in trial the determination is made by the court.

NOTICE TO THE GRAND JURY OF ITS RIGHTS AND DUTIES

Requires that the district court judge who empanels the grand jury give instructions to the grand jurors at the beginning of their term, including: grand jury powers with respect to independent investigations, its right to call and interrogate witnesses, its right to request documents and evidence, the subject matter of the investigation, the necessity of legally sufficient evidence to indict and the power of the grand jury to vote before a witness may be subpoenaed, granted immunity, be given a contempt hearing or indicted.

Proscribes that failure to so instruct the grand jury is just cause for a refusal to testify or for dismissal of an indictment by that or by a subsequent grand jury on the same matter.

INDEPENDENT INQUIRY

Allows the grand jury, upon notice to the court, to inquire on its own initiative into offenses committed by government or former government officials.

Authorizes the grand jury to ask the court to appoint a special attorney to assist its investigation upon a vote of at least 12 grand jurors. The special attorney would sign any indictments.

RIGHTS OF GRAND JURY WITNESSES

Requires an affirmative vote of 12 or more grand jurors to issue a subpoena. The subpoena would not be returnable on less than seven days' notice without the witness' express consent.

Requires each subpoena to inform the witness of the right to counsel, the right against self-incrimination, whether the witness' own conduct is under investigation, the criminal statutes involved and any other rights and privileges which the court deems necessary and appropriate.

Bars the prosecution from calling a witness who has given the prosecutor advanced written notice that s/he intends to claim the Fifth Amendment unless a grant of immunity has been obtained.

Permits representation by counsel inside the grand jury room. Frees witness' counsel from the secrecy rule.

Gives the court in the district out of which the subpoena was issued, the court in the district where the subpoena was served and the court in whose district the witness resides concurrent jurisdiction over motions to quash and other relief.

Limits permissible venue of a grand jury investigation to only where the grand jury is investigating both substantive criminal offenses and conspiracies to commit such offenses. In such cases, only a grand jury sitting in a district where the substantive crime took place would be permitted to question witnesses.

Forbids a second grand jury investigation into a matter which has led one grand jury, after considering the evidence, not to return an indictment, unless there is a showing that additional relevant evidence has been discovered.

Requires complete recordation of grand jury proceedings. Allows the witness or counsel to obtain a copy of the witness' testimony before the grand jury and thereafter submit clarifying statements.

Requires the government to turn over to the witness before questioning copies of any statements made by the witness related to the subject matter of the grand jury investigation.

Provides that no person shall be required to testify or be confined if the court, upon evidentiary hearing, finds: (1) the primary purpose of the subpoena is to secure testimony for trial evidence for a person already under indictment, (2) the testimony of the witness would be unreasonable, oppressive, cumulative or privileged, (3) the testimony would have a disparaging effect on a confidential or privileged relationship which would outweigh the value of the testimony, (4) the primary purpose is to harass the witness.

Requires that all questions and requests or other objects be relevant to the matter under investigation by the grand jury. Prohibits coercive threats or statements, or opinions as to the truthfulness of a witness' testimony from being made by an attorney for the government to the witness or the grand jury.

IMMUNITY OF WITNESSES

Abolishes all forced and use immunity before grand juries and courts. Transactional immunity is allowed with the written consent of the witness, and by affirmative vote of 12 grand jurors; or, in the case of a trial proceeding, with the consent of the witness and the application of the U.S. attorney.

Provides transaction immunity for witnesses before Congressional committees and agency hearings.

REPORTS CONCERNING GRAND JURY INVESTIGATIONS

Requires the Department of Justice to submit to Congress and the Administrative Office of the United States courts annual re-

ports concerning grand jury investigations and the use of immunity orders. Requires reports in eight specified areas, set forth according to judicial district.

EVIDENCE

Requires the government to introduce all evidence in its possession tending to prove the innocence of a potential defendant.

Prohibits the grand jury from returning an indictment on the basis of hearsay evidence alone.

UTILITY BILLS SQUEEZE CONSUMERS

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. HARKIN. Mr. Speaker, we must not forget the consumer in our discussions of the present energy crisis. Many consumers who have heeded the pleas to conserve energy have done a magnificent job only to find that their utility bills continue to climb.

One of my constituents, Mrs. Mary Ellen Godbout of Red Oak, Iowa, has written a most eloquent letter to President Carter about the need to give consumers a break.

The Godbouts have taken many steps to conserve energy, such as adding insulation and storm windows to their home and lowering their thermostat. The proof of their success is that last December they consumed 13 percent less electricity and 49 percent less natural gas than they had 3 years earlier—all this in the face of a severe winter.

Despite their heroic efforts, their energy bill was higher in 1976 than it was in 1973.

Mrs. Godbout's letter speaks for itself. I commend it to the attention of my colleagues:

DEAR PRESIDENT CARTER: I have never before written to a President but I feel so strongly over my concern about our natural gas crisis that I'm praying you will give this letter much consideration. When is somebody going to start looking at the consumers' side of this crisis? I realize we need to seek new ways and means for new energy and this takes money, but the consumer can't pay for it all. Why can't some Federal money be made available for this? The average and below income families cannot continue to pay prices such as we are now for gas much longer. From all indications the price of gas will go even higher and it will soon be impossible to pay our bills—what do we do then? Another year or so like this and I'm sure many people will have to consider going on welfare rolls or have some assistance available to keep warm. We have no choice as to where to buy gas other than from monopolies such as Iowa Power & Light and they continue to impose rate increase upon rate increase upon us. Plus they are allowed to pass along to the consumer energy cost adjustments.

This hardly seems fair to me. Seems to me that that when something is sold to me at a set amount that's what I should be expected to pay, but this energy cost adjustment varies from month to month and is passed along to the consumer. I'm very depressed over the future outlook. I feel like I'm backed in a corner with nowhere to turn for help so I'm taking this means in writing to you and other heads of Energy. We are constantly being asked to conserve (and believe me we have conserved) and for our efforts and sacrifices we are thanked by having to pay these high prices for gas and told it will go even higher.

We have done everything possible in our home to conserve energy and I don't know of anything further we can do. Is it fair that I have to continue to pay even higher prices for gas? Listed below are some of the means we have taken.

1. Insulated attic, all side walls and put on storm windows in 1974.
2. We have caulked around all window and door casings.
3. We have gradually dialed down—as of this winter (76–77) the thermostat is set at 64–66. (your pleas to the nation to dial down to 65 didn't affect us—I already know how uncomfortable that temperature is)
4. At night we dial down to 56.
5. I pull shades and close drapes at the windows at nights on days the sun doesn't shine.
6. We have steam heat and we shut off upstairs radiators when we get up in the mornings and turn them back on at night.
7. We have shut off and don't heat rooms we don't need.
8. I dry about half of our laundry on lines in the basement and I wash in cold water.
9. We keep high humidity in our house because we have health problems that require this.
10. I don't have a dishwasher or self cleaning oven, etc.

What more can be expected from a consumer?

Next are some facts and figures which will prove that I have conserved. This is taken off our Iowa Power and Light bills.

December 1973 (before we took steps to conserve):
Used, 912 kwh; cost, $25.37.
Used, 635 ccf; cost $66.83.
December 1975:
Used, 913 kwh; cost $36.12.
Used, 320 ccf; cost, $48.16.
December 1976:
Used, 791 kwh; cost $32.26.
Used, 323 ccf; cost, $61.79.

You can see that we used nearly half as much gas this December as we did in 1973 but the cost is nearly the same. It would be impossible for me to pay the bill if I had used the same amount as I did in 1973 at the current rates. Also notice that we used only 3 ccf of gas more this December than in 1975 and the Iowa Power representative commented to this fact that we had conserved because this December 1976 was 20 percent colder than December 1975. I also paid a difference of $13.63 for those 3 ccf in a year's time. When I see increases like that on 3 ccf it makes me shudder—what justifies increases like that? How can anyone be expected to keep up with rising costs such as these? My combined bill with sales tax was $96.87 for this past December. I have to cut down on food in order to pay it and I cannot continue to pay such prices. Mr. President, what am I to do if gas continues to rise?

For these reasons, President Carter, I plead with you to set up some kinds of programs that would give the consumer that conserves a break in the cost of gas. I don't see how it is humanly possible for me to conserve much more or for my husband to increase our income anymore. He is a teacher and he supplements our income by coaching during the school year and painting houses in the summer, Yes, there are people who have not done their part in conserving but as a whole most families have taken means to conserve, so why not introduce a program that would benefit the conserver and let those who don't, pay the consequences.

Excuse this poorly typed letter but I am a homemaker and have not typed for years and find I've lost my touch and it is difficult to type with cold hands.

I am praying for some action to benefit families across the nation such as us. May God direct you, Mr. President, to help people like us—your people. I must say I am happy about the steps you have taken to cut energy cost and consumption since you've taken office. I'm disturbed with our local state in the fact that they say they will not dial down to 65 in the State Office Building. Why should the houeholder then? I pray God will send some answers to this problem.

Yours truly,

MRS. MARY ELLEN GODBOUT.

BLINDING JUSTICE: THE CAMPAIGN TO OUTLAW THE U.S. INTELLIGENCE AGENCIES

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. McDONALD. Mr. Speaker, on February 15, three organizations working to extinguish America's foreign and domestic intelligence-gathering capability held a Capitol Hill press conference to publicize proposed Federal legislation which they drafted to outlaw domestic intelligence-gathering. The three organizations are the American Civil Liberties Union, ACLU, the Fund for Peace's Center for National Security Studies, CNSS, and the Committee for Public Justice, CPJ.

The three groups were presented in the media account of the press conference as "civil liberties" organizations. In fact the three are civil liberties groups only in the sense that they are working to set up conditions under which the civil rights guaranteed under our Constitution will be destroyed. The draft legislation, for which congressional sponsors are being sought, will be considered separately. First, a review of the organizations and individuals sponsoring it is in order.

The ACLU was founded by socialists who, though preferring nonviolence themselves, cooperated for decades with totalitarian Marxist-Leninist organizations under the direction of the Soviet Union. Although professing concern for individual liberties, the ACLU continues to have among its leaders and membership Communist Party, U.S.A. activists, and other Marxist-Leninists who can under no circumstances be considered civil libertarians.

In its 1970–71 annual report, the ACLU announced:

The ACLU has made the dissolution of the Nation's vast surveillance network a top priority. * * * The ACLU's attack on the political surveillance is being pressed simultaneously through a research project, litigation, and legislation action.

The ACLU's Project on Privacy and Data Collection, called more accurately the "antisurveillance project" by activists, is headed by Frank J. Donner, identified in sworn testimony by three witnesses as a member of the Communist Party, U.S.A. For 20 years, Donner has been a leader of the Communist Party's efforts to end all investigation of subversive activities.

The Committee for Public Justice was founded in 1970 by Lillian Hellman who

presents herself as a "victim of McCarthyism." The facts of Miss Hellman's career are quite different.

When called to testify before the House Committee on Un-American Activities, HCUA—with which the late Senator from Wisconsin had no connection—Hellman admitted under oath that she had joined the Communist Party, U.S.A. in 1937 and said she had left the Communist Party about 1950. Citing her fifth amendment privilege against self-incrimination, Hellman refused to specify a date for her leaving and would not answer questions about how and why she was separated from the Stalinists. Nor would she discuss her CPUSA activities nor those of any of her associates.

Miss Hellman, a mistress of the new revisionist history, tells in her "Scoundrel Time," part three of her memoirs, of a conversation she had with Henry Wallace, head of the Progressive Party which the Communist Party, U.S.A. controlled.

> When we had walked for a while he asked me if it was true that many of the people, the important people, in the Progressive Party were Communists. It was such a surprising question that I laughed and said most certainly it was true. He said, "Then it is true, what they're saying?" "Yes," I said, "I thought you must have known that. The hard, dirty work in the office is done by them and a good deal of the bad advice you're getting is given by the higher-ups. I don't think they mean any harm, they're stubborn men." "I see," he said, and that was that.

Hellman's duplicity and Henry Wallace's incredible naivete speak for themselves.

In 1956, 4 years after her appearance before HCUA, Lilliam Hellman was prominent in the Senate Internal Security Subcommittee's list of the 82 most active and typical sponsors of Communist front organizations. Hellman went on from her HCUA appearance to continue her career as a successful Broadway playwright and novelist. She did not continue a Hollywood career in which she had produced some strongly pro-Soviet film scripts.

Hellman installments of her memoirs provide some intriguing glimpses of the Comintern and CPUSA circles in which she moved from the early 1930's. One excerpt of Hellman's "Pentimento" is about to be released as a motion picture, Julia, starring Jane Fonda. It is a fictionalized account of Hellman's activities as a courier smuggling funds to the German Communist underground.

In view of Hellman's successful career, it is difficult to see how she has suffered other than apprehension at what HCUA investigators had discovered about her activities on behalf of Soviet, German, and American Communists; and perhaps an embarrassed red face at public scrutiny of her red politics.

But Hellman, one of the most vindictive of the revisionists, herself is a blacklister of anti-Communists. A few months ago, Hellman forced her publisher, Little Brown & Co., to censor passages in a book by Diana Trilling, widow of the anti-Communist liberal critic Lionel Trilling, which were critical of Hellman and her activities.

Operating from offices at 22 East 40th Street, New York, N.Y. 10016—212–686–1245—the CPJ made its first public notice with a 1971 Princeton conference attacking the FBI's monitoring of violence-prone and subversive organizations. CPJ funding has come from the sale of books based on its antiintelligence seminars; from radical chic fundraising affairs; and from the Field Foundation via the ACLU. Established by Marshall Field, the Field Foundation has long been noted for its funding of extreme left causes, and several of its officers and trustees are CPJ members including Mrs. Ruth P. Field, Robert Coles, Justine Wise Polier, and Mrs. Fiona Field Rust.

In 1974, CPJ representatives met with officials of the FBI at the request of Senator—now Vice President—MONDALE to make "detailed proposals to end unlawful surveillance, wiretapping, mail opening, burglaries and other abuses." In fact, as CPJ, the ACLU and CNSS—also funded to a large part by the Field Foundation—make clear, they consider all surveillance of subversives and violence-oriented Marxist-Leninist conspiratorial groups "illegal" unless Federal crimes are already known to have been committed. In effect, CPJ, ACLU, and CNSS are attempting to eliminate the preventive aspects of the legal system.

More recently, CPJ has organized meetings in New York, Los Angeles, and Chicago in which the stars of the anti-intelligence speaking circuit, such as Daniel Ellsberg, Morton Halperin, and Victor Marchetti were joined by congressional figures and media luminaries like Tom Wicker, 1972 recipient of the annual award of the National Emergency Civil Liberties Committee, a Communist Party front, to denounce intelligence-gathering.

The CPJ's executives and committee members are a roll call of supporters of Communist Party, U.S.A. fronts and causes; "radical chic" figures from the entertainment world; and alleged liberals who have been around long enough to be expected to recognize a Stalinist operation when they see one:

CPJ EXECUTIVE COUNCIL

Lillian Hellman, Robert B. Silvers, *Co-Chairmen;* Raymond S. Calamaro, *Executive Director;* Norman Dorsen, Leon Friedman, Willard Gaylin, Stephen Gillers, Milton Gordon, John Hersey, Ephraim London, Aryeh Neier, Eleanor Jackson Piel, Orville H. Schell, Jr., Stanley K. Sheinbaum, Telford Taylor, Hannah Weinstein, Jerome Wiesner.

COMMITTEE MEMBERS

Sheldon Ackley, Archie Alexander, Jr., William Van Alstyne, E. Clinton Bamberger, Jr., Warren Beatty, Derrick A. Bell, Jr., Viola Bernard, Felicia Bernstein, Leonard Bernstein, Edward J. Bloustein, Thomas Brandon, Wiley A. Branton, Ralph S. Brown, Jr., Edward Burling, Haywood Burns.

Hodding Carter, III, Ramsey Clark, Mrs. Robert Claytor, Benjamin Cohen, Robert Coles, Daniel G. Collins, Henry Steele Commager, Barry Commoner, Jack Conway, Vern Countryman, William C. Cunningham, Adrian W. DeWind, William Doering, Ronnie Dugger, Marian Edelman, A. Whitney Ellsworth, Jules Feiffer, Mrs. Marshall Field.

Moe Foner, John Kenneth Galbraith, Mrs. Elinor Gimbel, Albert Gore, Ernest A. Gross, Thomas H. Guinzburg, Jose A. Gutierrez, Morton H. Halperin, Charles Halpern, V. W. Henderson, Aileen Hernandez, Theodore M. Hesburgh, Charles Horsky, Frank Jones, Kenneth Keniston, George Kirstein, George B. Kistiakowsky.

Donald S. Klopfer, Terry Lenzner, John Lewis, Duane Lockard, J. Anothony Lukas, Shirley MacLaine, Burke Marshall, Louis Martin, Anne Martindell, Jessica Mitford, Charles Morgan, Jr., Paul Newman, Mike Nichols, Martin Peretz, Frances Fox Piven, Richard Poirier, Justine Wise Polier.

Louis H. Pollak, Jo Pomerance, David Ramage, Bernard Rapoport, William M. Roth, Mrs. Fiona Rust, Carl Sapers, Andre Schiffrin, Norbert A. Schlei, Arthur Schlesinger, Jr., Stephen Schlossberg, Faith Schwarz, John Seigenthaler, Gordon Sherman, William L. Shirer, David Shoup, Neil Simon.

George Slaff, McNeill Smith, Jean Stein, Philip Stern, William Styron, Percy Sutton, James Vorenberg, Dorothy A. Wadsworth, John William Ward, Grace K. Warnecke, James Watson, Bethuel M. Webster, Joseph Weinstein, Harris Wofford, Leonard Woodcock, G. Vann Woodward, Adam Yarmolinsky.

The Center for National Security Studies, CNSS, a project of the Fund for Peace, has its offices in a townhouse rented from Fund for Peace trustee Stewart Mott at 122 Maryland Avenue NE., Washington, D.C. 20002. CNSS is the principal organizer of the newly-formed Campaign to Stop Government Spying, CSGS, which emerged at the National Conference on Government Spying held in January in Chicago. (See CONGRESSIONAL RECORD, Jan. 31, 1977, 2843; and Feb. 1, 1977, 3200).

The campaign describes itself as "a coalition of religious, educational, civic and labor organizations which have joined together to call for strict controls on the operations of local, State, and national intelligence agencies." Actually, the campaign is the grass roots pressure organization which will try to convince Congress that large numbers of their constituents demand an end to Federal intelligence programs.

The CSGS for the most part is composed of the same organizations which were previously active in Communist-directed coalitions supporting the Vietcong and which are now active in the Friendshipment coalition for reparations and U.S. foreign aid to the Vietnamese Communist regime; in the National Council for Universal and Unconditional Amnesty, NCUUA; and in the Coalition for a New Foreign and Military Policy, CNFMP.

The Campaign to Stop Government Spying has its offices at 201 Massachusetts Avenue NE., No. 112, Washington, D.C. 20002—202/547–4644. Coordinator is Peggy Shaker. Member organizations responsible for campaign direction and policymaking include:

American Civil Liberties Union.
Americans for Democratic Action.
American Friends Service Committee.
Center for National Security Studies.
Center for Science in the Public Interest.
Church of Scientology, Commission on Law Enforcement and Social Justice.
Commission on Social Action for Reform Judaism.
Counter-Spy.
Environmental Policy Center.
Federation of American Scientists.
Friends of the Earth.
Fund for Constitutional Government.
La Raza Unida.
Leonard Peltier Defense Group.

National Committee Against Repressive Legislation.
National Conference of Black Lawyers.
National Emergency Civil Liberties Committee.
National Jesuit Social Apostolate.
National Indian Youth Council.
National Lawyers Guild.
National Organization for Women.
National Student Association.
People's Business Commission.
Political Rights Defense Fund.
Public Education Project on the Intelligence Community.
United Church of Christ:
Office for Church in Society, Commission for Racial Justice.
Urban Policy Research Institute.
United Presbyterian Church, U.S.A.: Washington Office.
Women's International League for Peace and Freedom.
Women Strike for Peace.

Cooperating organizations who support CSGS goals and are in communication with the CSGS include:

Americans for Amnesty.
Catholic Peace Fellowship.
Center for Women's Policy Studies.
Chicago Police Surveillance Litigation and Education Project.
Children's Foundation.
Fellowship of Reconciliation.
Fund for New Priorities.
International Longshoremen's and Warehousemen's Union.
Midwest Research Group.
National Association of Social Workers.
Protect Political Rights.
Repression Information Project.
Southern Regional Council.
Unitarian Universalist Association.
War Resisters League.
Women's Lobby.

The Campaign To Stop Government Spying outlines its three basic principles:

End Covert Operations Abroad: Clandestine organizations and covert intervention in the affairs of other countries have no place in a democracy. Paramilitary operations and political interference by the CIA should be ended and the Clandestine Services Branch disbanded. (Many of the organizations and individuals involved in the Campaign believe that the end of secret government can only be accomplished by a prohibition of all secret spying in peacetime.)

End Political Spying in the United States: Spying on Americans engaged in political activities violates the Constitution and inhibits the free participation so important in our democracy. The CIA, FBI, military, state and local police should be clearly prohibited from spying.

End Secret Budgets and Secret Charters of the Intelligence Agencies: The Constitution requires a public accounting of all government spending. Secret funds and secret charters encourage crime and distort the open democratic process. The budgets and functions of the intelligence agencies should be made public.

Contrary to what the anti-intelligence extremists assert, secret operations have a strong role to play in protecting the interests of our country and of the free world from its enemies. Looking at satellite photos and reading Pravda and Izvestiya or meeting with Soviet officials in international forums will never tell us what we need to know about the men in the Kremlin, the new secret weapons systems under development, the new policies being developed, or new salients being considered.

Also contrary to the claims of the anti-intelligence extremists, the courts have repeatedly found that law enforcement also has a preventive function. If violence-prone members of a picket line are inhibited from mayhem by the fact they are being watched and photographed, then society has benefited. If violence does erupt, the lawbreakers can be identified from the photos, and society benefits. And the courts have repeatedly found that the mere fact of surveillance does not violate the Constitution.

The organizations which take their operational guidelines from Marx, Lenin, Trotsky, Hitler, and Mao are prepared to use any illegal method of imposing their will whenever they feel such tactics will be successsful.

The mere fact that these organizations also carry out legal activities does not lessen the threat to all our freedoms. As former Supreme Court Justice Arthur Goldberg has said:

The Constitution of the United States is not a "suicide pact." The Nation has the right and duty to protect itself from acts of espionage and sabotage and from attempts to overthrow the Government.

When the CPJ/CNSS/ACLU draft legislation comes before us, we should take into consideration its origins and purpose as the "left stalking horse" for other bills to maim our intelligence agencies.

LITHUANIAN INDEPENDENCE DAY

HON. PETER W. RODINO, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. RODINO. Mr. Speaker, today, approximately 1 million persons of Lithuanian descent are living here as citizens of the United States, enjoying all the unalienable rights and freedoms that our country offers. Ever since the Republic of Lithuania declared its independence 59 years ago on February 16, 1918, the United States has fully recognized and wholeheartedly supported its right to exist freely, serving as an example to all freedom-loving peoples everywhere. It is these fine people of Lithuania and of Lithuanian descent that we commend.

Ever since Lithuanian immigrants started coming to the United States as early as 1688, they have offered a type of Eastern European lifestyle that has added immensely to our overall melting pot of culture. The many achievements made in Lithuania over the past century in the fields of literature and music, inspired by the national folklore, have been brought across the ocean in the minds and the hearts of the people.

The Lithuanians are a spirited people. They have survived many years of oppression, intermittently fighting off enemy occupation from every side. They have never lost their love of freedom, independence, and national identity which they first developed over 180 years ago. That is why those Lithuanians who have migrated to American soil cherish deeply and hold in great respect those individual rights and freedoms that many of us often take for granted.

In Lithuania, the people are still striving to obtain this freedom and they look to us, a country once involved in a battle for independence itself, for support. Many Americans of Lithuanian descent and friends of Lithuania will remember with grateful feelings the approval of House Resolution 864 back in 1975 by the U.S. House of Representatives expressing the concern this body had over the political status of the three Baltic States: Lithuania, Latvia, and Estonia. The United States must continue to act on behalf of any country that seeks to govern itself under a democratic system.

As we commemorate Lithuanian Independence Day, let us remember that the United States, too, was once a struggling nation, seeking its independence. Because of this, let us pay tribute to those Lithuanians who wish to build themselves a more perfect society and commend those Americans of Lithuanian descent who have contributed so much to ours.

COUNTY ENGINEER TALKS ABOUT UNSAFE BRIDGES

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. HARKIN. Mr. Speaker, on January 26 I reintroduced the Bridge Safety Act of 1977. The bill is aimed at providing some urgently needed Federal assistance to help States deal with a serious and growing problem: financing the repair or replacement of unsafe bridges.

In a statement which accompanied introduction of the bill on that day, I included a number of alarming statistics concerning the magnitude of the bridge repair and replacement problem in this country. The cold numbers and facts are perhaps not the best measure of this problem. State and local government officials, primarily county engineers, offer the most convincing arguments in support of increased Federal involvement in this area.

As an illustration, I insert today for my colleagues' information a news article appearing in the Council Bluffs, Iowa, Nonpareil on January 24:

BRIDGE REPAIR BILL WELCOMED

A bill in the U.S. Congress to increase federal funds for emergency bridge repair would be a welcome relief to Pottawattamie County's Engineer.

"It boggles the mind when you think of the amount of money it takes to replace bridges," Engineer Charles W. "Gene" Hales said Monday.

Last year the county spent $1,670,000 to replace 55 wooden bridges, Hales said.

From 1973 to 1976, 188 bridges have been replaced at a cost of $4,529,000. "The entire county system has 700 bridges so I think we're working at a fairly good rate," Hales said. But added, "it could be better."

Bridge replacement and repair is the county engineers' office top priority, he said.

"It's essential to keep such traffic as farm equipment and school buses moving."

Federal bridge repair legislation introduced last week by Congressman Tom Harkin,

D-Iowa, comes at a good time, Hales said, because he anticipates some more costly bridge work in 1977.

Hales said he and other Southwest Iowa county engineers have been working with Harkin on the problem and keeping him informed of the local situation.

Harkin said his studies have indicated that nearly half of Iowa's 35,000 farm to market roads have deteriorated so much they can no longer carry the weight they were originally built to hold.

He also said about 900 Iowa bridges qualify for emergency federal assistance.

Harkin said county engineers feel that funding for the bridge repair program is so slow, "they don't even bother to apply."

Engineer Hales agreed by saying, chances today of getting federal funding are "pretty remote."

Harkin's bill would boost funding for the bridge program from the present $180 million to $720 million.

ILLEGAL ALIENS

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. YOUNG of Florida. Mr. Speaker, according to Leonard F. Chapman, Jr., Commissioner of U.S. Immigration and Naturalization Services, U.S. border patrol officers guarding only a 30-mile stretch of the Mexican border, apprehended 1,100 illegal aliens in one night trying to cross the border without authorization. Mr. Chapman estimates that on the same night 2,000 more spilled into the country undetected. This is a problem we must all become more aware of, because it is a problem that eventually touches every one of us.

It is the hard pressed labor market that is most effected by these uninvited intruders. Aliens are drawn to the United States in such masses, because of extremely high unemployment rates in their own country, with their primary motivation being to get a job here. Generally they are successful. Many, as unskilled laborers, such as field and ranch hands, where they are frequently exploited by employers who know they can hire them for $50 a week less than they can hire unskilled American employees. But they do not always work at unskilled jobs. In New Hampshire, for example, an illegal alien was discovered working as a metallurgical engineer for $12,000 a year, and another, employed on the Alaska pipeline had been making $11 an hour. When he was deported, he took with him $18,000 in savings.

A Cabinet-level committee reported in January that there is a real attraction for employers to hire illegal aliens. Their low cost availability raises the income of the employer and lowers the prices of his goods and services. That may not sound all bad, unless you consider that jobs are denied Americans who should be filling those positions, and forces unnecessary public support of those unemployed Americans.

I have recently introduced legislation designed to penalize employers who knowingly or unknowingly hire illegal aliens. The bill provides for an orderly progression of monetary fines and subsequent imprisonment of employers who deliberately hire illegal aliens. It also provides for a "first warning" to employers who may hire illegal aliens unintentionally. An estimated $10 billion every year is lost in wages to American workers who are replaced in the job market by illegal aliens. Unemployed Americans need those jobs, and as they are denied those jobs the burden is shared by every American taxpayer who must support our already burdensome unemployment program.

I urge my colleagues to study H.R. 3395 and to support it, and to take any steps necessary to assure its expedient passage by this House.

AIDING THE VISUALLY HANDICAPPED

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. KOCH. Mr. Speaker, last fall the Division for the Blind and the Physically Handicapped of the Library of Congress and the Congressional Research Service arranged to have legislation relevant to the aid of our Nation's handicapped recorded on cassettes for the benefit of those individuals who cannot read conventional print material. As I have been active for some time now in developing legislation for the handicapped, I am pleased that this step was taken to help our disabled citizens learn what is happening in Washington on their behalf.

These recordings are part of the Division's Talking Book Topics series. Talking Book Topics is a bimonthly magazine that sends a list of recordings to over 500,000 individuals on their mailing list as well as to the Division's regional and subregional libraries. Now, interested persons are able to request a recorded summary of relevant legislation on a free loan, much in the same way recorded books and magazines are delivered.

The response to this addition to the Talking Book series has been gratifying. According to Mr. Frank Cylke, Chief of the Division for the Blind and the Physically Disabled, more than 30 requests for the cassette have been received, and the number grows daily. I have appended to this announcement a letter from Mr. Cylke describing the success of the project.

I would like to thank Mr. Cylke and his staff, and Mr. Norman Beckman, Acting Director of CRS and his staff, for taking steps to involve these disabled citizens in the legislative process.

LIBRARY OF CONGRESS,
Washington, D.C., January 11, 1977.

Honorable EDWARD I. KOCH,
House of Representatives,
Washington, D.C.

DEAR MR. KOCH: At your suggestion we have produced, in cassette form, a summary of bills submitted in the 94th Congress which affect handicapped persons in some manner.

The response from users of our library program has been gratifying. Since announcing the availability of this new service in our bimonthly magazine, Talking Book Topics, additional requests are being received daily.

To further serve this demonstrated need among the handicapped population for information about pending legislation we plan to issue a similar compilation of bills submitted in the current Congress. This new summary should appear within the next several months and will be announced through our program.

Your interest and assistance in this project are greatly appreciated.

Sincerely,

FRANK KURT CYLKE, *Chief.*

DIVESTITURE NO SOLUTION

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. ABDNOR. Mr. Speaker, there is no question it has been a cold winter, but in our haste to find a solution to the energy problem, there is little merit in warming over bad legislation which died with the end of the 94th Congress. That idea is breaking up the big oil companies and it has surfaced again.

The big oil companies have their faults, to be sure, but there is little merit in curing the faults by destroying the main reason we have had abundant energy so cheaply for so long.

In a recent radio editorial on station KKLS in Rapid City, S. Dak., Abner Hunter George said pretty well what I perceive to be the feelings of most South Dakotans on this issue:

The following comments are from an editorial by Abner Hunter George on February 9, 1977.

Here we go again . . . another effort to break up the big oil companies has surfaced. . . . This time in the House of Representatives. Associated Press reports that a group of 31 Congressmen has introduced legislation to break up the major oil companies. And this time they're going all out . . . they're swinging a double bladed axe at the people who have the best chance of keeping our growing demand for energy supplies. This bill would require both horizontal and vertical divestiture. Not only would one company be forbidden to engage in business in more than one energy source, but would also be prohibited from participating in more than one phase of the business. An oil company would be prohibited from dabbling in coal . . . A coal company could not become involved in the search for nuclear fuels. New companies would have to be formed to develop solar energy and they couldn't branch out into the geothermal area. And if that is not enough . . . the coal miners could not transport their coal to an energy plant. A power company could not own its own coal mine or other fuel source. Oil companies could no longer establish their own retail outlets . . . The service stations that distribute their products to the public. What a hodge podge we would have. Think of the multiplicity of potential "weak links" in the chain between search and discovery; sale and delivery; production and marketing. The thought should be terrifying to a nation so dependent on a firm, reliable supply of energy to meet the growing demands of an expanding economy. Yet here are 31 Congressmen who feel we must make the gamble . . . a gamble with the economic lifeline of an entire country.

But the most formidable obstacle I see in such a plan is the years-long lead time needed to bring new energy sources to the point that they can be delivered and put to use by those who need them. That lead time is also capital consuming time. Do the Congressmen propose to subsidize the multitude of new companies they envision as bringing their so called new competition into the energy picture? It takes vast capital resources to venture into the new and sophisticated energy sources that must become the source of supply for the greatest industrialized nation on earth. Even if the government was to finance those ventures, the money must still come eventually from the profits of private industry. That is the one source of income the government has . . . it is the one place which can provide the jobs for the people who produce an ever increasing gross national product. Government employment contributes nothing to that. . . . Government regulation is counter productive.

Breaking up the major oil companies would be a sad. . . . and I fear, a fatal mistake.

Thank you.

WAYS AND MEANS OVERSIGHT SUBCOMMITTEE TO HOLD HEARING ON TAX DISCLOSURE LAWS

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. GIBBONS. Mr. Speaker, as chairman of the House Ways and Means Oversight Subcommittee, I have scheduled a hearing to explore the impact of new provisions of the Tax Reform Act of 1976 limiting Government access to taxpayer information.

Testimony will focus on two administrative provisions of the 1976 act, sections 1202 and 1205. Section 1202, which became effective January 1, 1977, restricts the use of tax returns outside the IRS and provides penalties for unauthorized disclosure, including disclosure to other Federal law enforcement agencies. Section 1205, which becomes effective March 1, 1977, limits the availability of third-party summonses by which the IRS obtains such information as a bank's records of a taxpayer's financial dealings.

Federal law enforcement officials have publicly complained that the new restrictions will hamper their ability to verify information on a taxpayer's return. Supporters of the provisions contend that they are necessary to preserve individual privacy.

In a recent letter to the chairmen and ranking minority members of the House Ways and Means and Senate Finance Committees, Attorney General Griffin Bell asked for legislation to suspend section 1202 and to postpone the effective date of section 1205, both for 6 months.

Before section 1202 became effective, tax return information could be disclosed to certain Government agencies outside the Internal Revenue Service under regulations prescribed by the Secretary of the Treasury and approved by the President. These regulations permitted such disclosure to the Justice Department, among others, in the pursuit of tax fraud investigations. Section 1202 limits such disclosure and authorizes civil suits against Government employees who make unauthorized disclosure.

Section 1205 will limit the availability of administrative summonses by permitting taxpayers under investigation to prevent third parties from giving the IRS the third party's financial records concerning the taxpayer. It also authorizes taxpayer intervention in third-party summons enforcement actions brought by the Government, as well as taxpayer appeal rights.

The 1-day hearing will begin at 10 a.m., Thursday, February 24, 1977, in the Ways and Means Committee main hearing room on the first floor of the Longworth House Office Building. Witnesses invited to attend include representatives of the Department of Justice, the Internal Revenue Service, the legal, judicial and investigative professions, the banking industry, and public interest groups.

SMALL BUSINESS, JOB CREDIT TAX ACT

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. YOUNG of Florida. Mr. Speaker, it is my pleasure to join as a cosponsor of H.R. 3404, the Small Business, Job Credit Act. This bill, which provides a 50-percent tax credit against wages for a new job created for an unemployed person, is one that can only be viewed as beneficial to all Americans.

In my opinion, this bill has three significant points in its favor. To begin with, it is not just another giveaway program. By offering such an incentive as the 50-percent tax credit, it shows the small businessman that Government is willing to go half way with him to help solve the unemployment problem. It is estimated that the cost of each new job stimulated by this program will cost the Government about $3,000. This is opposed to an estimated cost of $8,500 for a Government employee in the public service field, and $10,000 or more for an employee in the public works program.

The second plus in this proposal is its straightforward approach to the immediate problem of unemployment. It should produce almost immediate results while creating very little of the infamous "Government redtape" that usually accompanies a jobs incentive program. To participate, an employer would simply declare his involvement in the program when he files his income tax return. His return would, of course, be subject to an IRS audit, as it always is. The program requires a minimum of paperwork and no large, costly, bureaucratic organization to oversee it.

Finally, it has built into it a series of necessary and very sensible controls that should accompany any legislation of this kind. The bill provides that no private business may take part in the program beyond the hiring of 10 new employees with a maximum tax credit of $80,000 per year. This provision virtually eliminates its usefulness to large industry which can afford to ease the unemployment problem without any help from us, and focuses on small business and industry. There is also a provision for the tax credit to expire in 5 years, thereby eliminating a permanent tax burden that has a chance to outlive its usefulness. And, there is a stipulation that requires the Secretary of the Treasury to report to Congress during the second and fourth years of the program to keep us informed of the impact of the program and its cost to the Government.

It has been estimated that this bill could create as many as 1½ million new jobs in the private sector, which now employs 80 percent of the American work force. And those jobs can begin to materialize almost as soon as Congress passes the bill and the public is informed. New jobs in private enterprise means immediate cash flow and increased supplies of goods and services to stimulate our economy. Just as important, they provide a decrease in unempolyment, which is a burden on everyone.

The need for our help in providing ready solutions to the current unemployment problem is without question. This very sensible and sound effort to provide a low cost, fast action solution must be supported by the Members of this House as quickly as possible.

STATISTICS FOR NEIGHBORHOODS

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mrs. SCHROEDER. Mr. Speaker, I am today reintroducing for consideration in the 95th Congress a bill to entitle municipalities and recognized subdivisions of municipalities to census statistics which relate to their jurisdictions. The bill is identical to H.R. 15148, which I introduced too late in the 94th Congress for final action. I am happy to say that Congressman PAUL SIMON and BILL LEHMAN—who is taking the chair of the Subcommittee on Census and Population from me—are cosponsoring the bill.

There is a growing effort in this country to retain or revitalize neighborhood consciousness particularly in its urban areas. Some cities have already enacted statutory decentralization programs in recognition that government, even at local levels, has become too unaccountable and unable to respond to the needs of its citizens.

As the neighborhood movement grows, so does the need for relevant neighborhood information. During the 94th Congress, as chairwoman of the Census and Population Subcommittee, I was particularly interested in assisting neighborhood organizations in their efforts to receive census data in a way that is us-

able for their needs. The Bureau of the Census has pledged its cooperation to work closely with these groups, and I hope that the Bureau will now become a major source of information for neighborhoods.

The Neighborhood Statistics Act will assure that this process works. It will allow neighborhood organizations which are recognized by statute, and which have elected officials, to have the Bureau of the Census provide census statistics for their neighborhoods.

In many instances, census tracts do not parallel statutory neighborhood entities, and this right now causes problems in interpreting census statistics for such neighborhoods.

The cost of this legislation will be miniscule. Its passage will be invaluable and welcome assistance in the effort to save our neighborhoods and improve local government.

REORGANIZATION OF THE EXECUTIVE BRANCH

HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. ASHLEY. Mr. Speaker, President Carter's request for limited authority to reorganize the executive branch of the Federal Government must be honored by this Congress.

He has asked, in effect, for the identical power exercised by five American Presidents from 1949 to 1973. He does not seek to reshape the entire executive branch by fiat, unaffected by congressional opinion. Rather he seeks the right to create, prune, and consolidate agencies and departments at the sub-Cabinet level, subject to the veto of this House and the Senate. It is essential that we bear in mind both the historical precedent for President Carter's request, and the preeminent role the issue of executive reorganization played in his election effort. We must not deny President Carter by design, what we have extended by rote to Presidents Truman, Eisenhower, Kennedy, Johnson, and Nixon.

Based upon President Carter's proven administrative record and the nature of his reorganization authority request, it is clear that the process of governmental reorganization will be streamlined. By providing only for a congressional veto, the spectre of obstructionism will be averted, and no legitimate plan will be talked to death in committee or on the floor. In recent years, similar authority to that sought by President Carter has permitted the advent of the Environmental Protection Agency, as well as the amalgamation between the Commerce and Interior Departments which resulted in the formation of the National Oceanic and Atmospheric Administration.

It is easy to paint this as a threshold battle for supremacy between the new President and Congress, or even in more historical "separation of powers" terms, but that is simply not coincident with the facts. In no way will Congress be abdicating its constitutional authority as a policymaking body if we accede to President Carter's request. We will retain sufficient review powers over any proposal simply by means of the veto power.

Finally, it is essential we recognize that this proposal is not tied to the ghost of Watergate. Much has been made of the fact that former President Nixon used a similar authority to create the Domestic Council; the implication that the resultant abuses of power were inherent in the authority now sought by President Carter, and not in the people staffing Nixon's Domestic Council, is specious.

I call upon all of you to put selfinterest and partisanship aside, and support the President in his effort to streamline the executive branch.

THE BELGRADE CONFERENCE—A SECOND OPPORTUNITY

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. EILBERG. Mr. Speaker, this summer, the United States will be attending the followup Conference on European Security and Cooperation in Belgrade, Yugoslavia.

The people of Lithuania are anxiously awaiting the outcome of the Belgrade Conference, because it represents the only foreseeable means for them to benefit from the Basket 111 provisions of the Final Act of the European Security and Cooperation Conference in Helsinki.

Lithuania, a sovereign nation since 1251, reestablished its independence on February 16, 1918, but was invaded by the Soviet Union in 1940, and was forcibly annexed with Latvia and Estonia into the Soviet Union that same year.

For more than three decades, the Lithuanian people have endured religious persecution, political repression, complete denial of their basic human rights, and concentrated programs of Russification of their country by the Soviet Union.

Lithuanians have not suffered in silence. The Western World has seen and heard of the sacrifices of Lithuanian patriots, despite attempts by the Soviet Union to suppress all such communications with the Western World. The underground publications, "The Chronicles of the Lithuanian Catholic Church" and "Ausra"—The Dawn—are published and disseminated by Lithuanians, in spite of the constant threat of arrest and imprisonment by their Russian occupiers.

The Soviet Union has blatantly ignored the human rights provision of its own constitution, the provisions for human rights in the United Nations Charter, and most recently it has ignored the implementation of the Basket III provisions of the Final Act at Helsinki.

There is worldwide concern for Soviet Jewry, and justly so, however, Lithuanians, Latvians, Estonians, and the people of the other captive nations also deserve our concern and action.

We have a second opportunity, at the Belgrade Conference, to bring the force of world public opinion and the diplomatic power of the Western World to bear on the Soviet Union's disregard of the human rights provisions of the Final Act of Helsinki. The Commission on Security and Cooperation in Europe, established by the U.S. Congress last year, has documented evidence of the Soviet Union's noncompliance with these provisions.

Since the Soviet Union seeks better relations with the Western World for its own purposes, let us make compliance with the Final Act of Helsinki a condition on which those relationships depend.

HOW RESPONSIVE IS GOVERNMENT?

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. CONABLE. Mr. Speaker, I must acknowledge that I rarely find myself operating on the same wavelength as Anthony Lewis, one of the regular editorial page writers for the New York Times. In the Monday, February 21 edition of the Times, however, Mr. Lewis explored the paradox of Government unresponsiveness to public policy. His piece goes beyond his conclusion that the Government itself is one of the most flagrant polluters of our environment, to study the reasons for this and other examples of apparent Government insensitivity and unresponsiveness. In view of President Carter's entirely appropriate goal of a system more responsive to the citizens' needs, Mr. Lewis' interest in the Harvard study which provoked his comment should find ready response here. The column follows:

A MOST INGENIOUS PARADOX

(By Anthony Lewis)

BOSTON.—Federal law establishes a policy objective for the country: to reduce air pollution, for instance, or hire more women and minorities. In trying to enforce the policy, the Government should have an easier time persuading its own agencies than private industries.

Right? Wrong, says James Q. Wilson, professor of government at Harvard, and Patricia Rachal, a graduate student there. Writing in the winter issue of the quarterly The Public Interest, they argue convincingly that it is usually harder for government to change the attitudes of public agencies than of private institutions.

One example they give is the Labor Department's Office of Federal Contracts Compliance, which is supposed to make Federal agencies see to it that contractors doing business with them have programs to hire minority employees and women. O.F.C.C. is widely considered to have little or no impact on the other Government departments. The Civil Rights Commission has said it is such a failure that it should be abolished.

Or compare the pollution performance of the Tennessee Valley Authority with that of private utilities subject to Federal environmental regulation. The authors conclude that T.V.A. generating plants foul the air more than many private plants.

Why should Government agencies be slow to carry out Government policy? Professor Wilson and Miss Rachal explore the paradox and suggest a number of reasons having

to do with the forces that operate on the managerial mind, such as law and money and bureaucracy.

If a private institution fails to carry out a law or regulation, the Government may go to court. The Environmental Protection Agency, for example, is actively engaged in litigation to make industry reduce pollution.

But one Government agency cannot usually sue another. It will be a long wait until the O.F.C.C. sues, say, the Defense Department for failing to see that its contractors increase minority hiring. It would be a remarkable event if the E.P.A. tried to bring the Tennessee Valley Authority into court.

Financial incentives may also be relevant. If electric utilities have to install scrubbers in their smokestacks to remove sulfur compounds, they ordinarily can pass on the cost. Indeed, a pollution tax has been suggested, so that companies reducing pollution would pay less in taxes. But the T.V.A. has a different purpose in life: to produce electricity as cheaply as possible, as a "yardstick." It is not subject to the same rate or tax incentives in installing anti-pollution devices.

Then there are bureaucratic realities. If a low-ranking civil servant in the O.F.C.C. tries to force change on the Defense Department, he is not likely to get much of a hearing. After all, he cannot cut the department's budget or sue it or penalize it in any other effective way—unless he can get the White House interested, and that is unlikely.

But private institutions have to listen, like it or not, when the same civil servant speaks to them. He may have the power to cut off the contract, or involve them in litigation. He is not just one bureaucrat maneuvering against another.

Underneath all these things there is politics. Federal agencies have allies, in Congress and the country. That is why it is hard to make them change policy. Wilson and Rachal point to the example of Veterans Administration hospitals. The Office of Management and Budget has tried to reduce their spending, but the veterans' lobby has been too strong.

Similarly, the Government has been trying to cut noise pollution since 1972. It is involved in some prickly controversies with the private sector, such as the attempt to force modification of noisy aircraft. But it has shied away from some obvious public noisemakers. There are no noise standards for subway trains, and the law exempts military aircraft.

The Public Interest article is a start at what ought to be a fresh way of looking at the old argument about public and private enterprise. Its paradoxical-sounding argument should provoke political thinkers in both the United States and those Western countires with more socialized economies, such as Britain and France. Wilson and Rachal go so far as to suggest that nationalization may be inconsistent with effective regulation.

One reason often given for nationalizing industries is that they will become more responsive to public concerns. But British experience with nationalization hardly provides overwhelming support for that theory. Such state-owned entities as the railroads and the gas companies can be more contemptuous of their customers than private business.

In this country, the problem of inefficient and unresponsive government was a main theme of Jimmy Carter's campaign. He is now pressing his answer: reorganization of the Federal Government. There plainly is a need for reorganization; in an encrusted system, change itself is a good thing. But this analysis reminds us that there are deeper difficulties in making the bureaucracy respond to public policy.

FIRE SAFETY IN OUR NURSING HOMES

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. O'BRIEN. Mr. Speaker, today I am introducing a bill which addresses a major need of the Nation's nursing homes—namely, to provide financial assistance to skilled and intermediate care facilities so they can provide the maximum degree of fire safety to their residents.

This bill was sponsored in the 94th Congress by then Representative, now Senator HEINZ who is again introducing it in the Senate today.

The bill would require skilled and intermediate care nursing homes to install automatic sprinkler systems as a condition of certification under medicare, medicaid, and veteran's programs. In testimony before the Select Committee on Aging's Subcommittee on Health and Long-Term Care, numerous witnesses pointed out that automatic sprinklers are the most effective means by which a fire can be contained before causing death or extensive damage to the facility.

Current fire standards for nursing homes are embodied in the 1973 Life Safety Code, as developed by the National Fire Protection Association. The 1973 code requires that all new nursing homes be equipped with automatic sprinklers and all other nursing homes contain such a system unless those buildings are of fire resistive, noncombustible materials. In addition, many homes are exempted from the requirement by waivers granted by HEW. The Social Security Act allows the Secretary of HEW to waive portions of the Life Safety Code, such as the automatic sprinkler requirement, if compliance with the code would result in unreasonable hardship upon the nursing home. The waiver itself, however, must not adversely affect the health and safety of the patients.

Unfortunately, the 1973 code has not been stringent enough to protect the lives of nursing home residents. Last January, a tragic fire occurred in the Wincrest Nursing Home in Chicago, resulting in the deaths of 32 people and injuries to 50 others. The Wincrest Home was of fire resistive construction materials and was further protected with a noncombustible roof. It complied with other Life Safety Code features, but it did not have the lifesaving sprinklers.

One of the major drawbacks in assuring that nursing homes are protected with sprinklers is the cost of purchasing and installing the systems. The bill which I am introducing today will meet the need of many nursing homes so they can install these vitally important sprinklers.

The bill would authorize long-term, 20-year loans to eligible facilities in an amount necessary to cover the purchase and installation of automatic sprinklers. The loans would bear a low interest rate, set at not more than 1 percent higher than the average discount rate set by the Fed at the time the loan is made.

This is also a vital grant feature in this bill which will help nursing homes serving primarily rural, medically underserved or low-income populations. The grants also would be applicable to homes which have at least 85 percent of their recipients enrolled in a State plan approved under the medicaid program. The grants would also be available to homes which are either publicly owned or tax exempt.

For those homes which, due to the size or nature of construction of the home, still cannot meet the costs of installing automatic sprinklers without causing unreasonable hardship, the Secretary of HEW would be authorized to make waivers of this requirement. In this latter instance, the waiver would assure that the home does not become ineligible for compensation under medicaid, medicare and veterans' programs. In such cases, the Secretary of HEW would require other fire safety features to assure that the health and safety of the residents is not imperiled.

I would urge my colleagues to take a look at and seriously consider cosponsoring this bill in the near future.

LITHUANIAN INDEPENDENCE DAY

HON. FLOYD J. FITHIAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. FITHIAN. Mr. Speaker, I would like to join my colleagues in the House of Representatives in commemorating the 59th anniversary of Lithuanian Independence Day.

Lithuanians have maintained their separate identity against heavy odds. Like the other Baltic peoples they have continued their West European character. The determination shown by the Lithuanian people to preserve their national identity, their cultural heritage, and their religious liberty is impressive.

On February 16, 1918, the Lithuanian National Council unanimously declared Lithuania's independence and formed the first government of the independent Republic of Lithuania. In 1920, Lithuania and the Soviet Union signed a peace treaty and from 1920 to 1922 Lithuania was recognized by other free states.

Then in 1940 this freedom came to an end when the Lithuanians were invaded by the Soviets and thousands of their citizens were arrested and deported to Siberia.

The citizens organized a revolt against their occupiers in 1941 and restored the Lithuanian Government. This freedom lasted less than 2 months when the Nazis invaded and occupied their country for 3 years.

Between 1944 and 1953, the people of Lithuania fought against their Soviet oppressors. Sixty thousand persons died in battle, in prison, or in exile.

Today, despite the fact that many nations accept Lithuania as part of the Soviet Union, the U.S. Government has

maintained a policy of nonrecognition of this illegal seizure of Lithuania.

The people of Lithuania continue to struggle for their independence through underground newspapers, preservation of their national and cultural heritage, and a strong moral spirit of resistance.

Over 1 million people of Lithuanian ancestry live in the United States. Let us join with them in the commemoration of Lithuanian independence and pay tribute to the people who have continued to pursue the goals of freedom and independence.

COUNCIL ON WAGE AND PRICE STABILITY ACT

HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. ASHLEY. Mr. Speaker, I am today introducing a bill to amend the Council on Wage and Price Stability Act to require the preparation of economic impact statements as a condition precedent to the adoption of proposed rules and regulations by all Federal departments and agencies.

Such an amendment will protect the businessman and taxpayer against unreasonable and cost-ineffective regulations, and it will help to limit the everburgeoning costs of Federal regulation. It will also operate as a valuable check on the regulatory decisionmaker and rulemaker. Too often, regulatory decisionmakers have operated in a vacuum, oblivious to the fact that their activities have a real and direct effect on the economy as a whole, in addition to the lives of small businesses and individuals.

The raison d'etre of this amendment is, however, efficiency. The operative question is not whether regulatory goals should be pursued, but how they can be pursued more effectively and efficiently. Increased efficiency is the inevitable result if the cautionary mechanism called for by this amendment is enacted.

From a cost standpoint, it has been estimated that over 3 billion was spent in 1975 on regulatory activities per se by the Federal Government. Overall, it has been estimated that some $130 billion annually is spent on Federal regulation. And, doubtless there are additional and substantial "hidden" costs imposed by the regulatory process on our Nation's businesses and individuals. Requiring economic impact statements prior to promulgation of a given regulation or rule, however, will cut the waste from this massive annual outlay. It is high time that Congress reasserted its authority in this area.

At the risk of understatement, I would point out that a concensus of Americans has come to believe, as I have, that, while the scope of Federal regulation has grown apace, the growth of benefits derived therefrom has not been commensurate. This amendment will go a long way toward insuring benefit by forcing agency review of regulations prior to adoption. It will, in brief, do away with regulation for regulation's sake. I urge its adoption.

SOLARZ QUESTIONS CIA BRIBES TO FOREIGN OFFICIALS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. SOLARZ. Mr. Speaker, I was most disturbed by the revelations this past weekend indicating that a number of foreign leaders, including King Hussein of Jordan, were regular recipients of secret Central Intelligence Agency subsidies. These subsidies, according to unnamed White House officials, have now been terminated.

I find that a policy of illicit payments to foreign officials—if these stories prove accurate—is shocking and disturbing. It is not only a question of whether an agency of the U.S. Government should be in the business of making secret payments around the world. I have serious enough concerns about the appropriateness of this kind of policy.

Perhaps even more disturbing is the apparent ignorance of Secretary of State Cyrus Vance, hours from a meeting with King Hussein in the beginning of a new round of Middle East peace explorations, about the payments right up until the time the bribe story hit the front pages of the Washington Post.

And there is the final question whether the Congress, through the CIA system of briefing various committees of Congress, was made aware of the continuing payments.

With these allegations remaining unanswered and unexplained, I feel that it is of the utmost importance for the International Relations Committee to begin hearings to investigate this matter as rapidly as possible.

The Members of the House might be interested in the Saturday, February 19 editorial in the Washington Post on the payments that was sarcastically titled "Oversight." The editorial raised the serious point whether, after the many scandals that have racked the CIA which have given rise to the image of an agency out of control, the much ballyhooed system of oversight over CIA operations has really meant any difference in terms of effective control over, and even knowledge of, CIA activities. If the Secretary of State and the Congress have indeed been deceived once again by the CIA, there are certainly more reforms required in the near future.

At this point in the RECORD, I insert the Post editorial:

OVERSIGHT

Even as the early editions of yesterday's Washington Post were appearing on the streets Thursday night telling about 20 years of secret CIA subsidies to King Hussein of Jordan, the former director of the CIA, George Bush, was appearing on WETA's "Agronsky at Large" program, telling about the current state of CIA "oversight":

Mr. Bush: . . . in the future as in the recent past, covert actions . . . are staffed out very differently. And there are presidential findings, and those findings are reported in timely fashion under the law to seven committees of the United States Congress. So we are protected in this country. . . .

Mr. Agronsky: I wonder how protected we are. . . .

Mr. Bush: Well, I know more about it than you do, and I'm telling you it works according to the law and according to the procedures set out by the President in the executive order. . . . I think the directives are such, and I think the executive order is such, and then I think the education of the culture is such that the rights of the American people are properly safeguarded against the kind of (covert) abuses you're talking about.

So much for the way 'oversight" supposedly had been reformed and made fool-proof under the Ford administration. The question remains: How much of this new approach to supervision of the CIA actually carried over in transition to President Carter? Mr. Bush had something to say about this as well:

I had five sessions with (Mr. Carter), three rather long, intensive briefings, in which we covered not only the trouble spots in the world . . . it also covered the most sensitive aspects of the business that the President must know about it, the sources and methods part of the business. . . .

From the foregoing it would seem safe to conclude that President Carter knew just about everything of significance that his predecessor knew about current CIA operations of all kinds, and that the congressional overseers of the CIA were equally well-informed. In particular, it would seem safe to conclude that Mr. Carter knew about the payments to King Hussein, which CIA officials are now explaining entirely in terms of exceedingly sensitive "sources and methods" of intelligence gathering. But if that is so, how could it be that;

(1) President Carter apparently professes not to have heard about the U.S. government's clandestine financial relations with King Hussein until this week, and, thus, could not have known that President Ford had continued the subsidies in the face of a finding by his own Intelligence Oversight Board that the payments constituted an "impropriety"; (2) Secretary of State Cyrus Vance, right up to the moment of his arrival in Amman yesterday to visit the Jordanian monarch, was reportedly ignorant of an arrangement that one would have thought was a rather important item in U.S.-Jordanian relations; (3) the Senate Intelligence Committee, which was set up last year to provide a sounder system of oversight of CIA, "was not given the full story . . . of the secret payments to Hussein," according to Bob Woodward's report in yesterday's Post.

Those are the questions about the CIA's so-called payoffs to King Hussein that we find most interesting—and most disquieting. If you have to pick and choose among the CIA abuses and excesses over the past two decades or so, bribing foreign heads of state strikes us as measurably less offensive than blowing up their palaces or—if you will forgive an expression appropriate to the mentality of those who were thinking up these schemes—bumping them off. It is not that we would condone bribery; it is simply that in the year 1977 it is hard to understand the state of affairs in Jordan and the Mideast 20 years earlier—and when you do understand it, still harder to make categorical judgments about the nature of American aid to King Hussein. The United States was not then supporting the "lifestyle" of a "playboy prince." Hussein was not then a prince; by 1957, when the "payoffs" began, he had been king for four years and the issue was not so much his lifestyle as his life, and that of his kingdom whose "integrity and independence" was then held by John Foster Dulles to be "vital" to the national security of the United States. Whether, in 1977, this is an appropriate way to protect vital American interests is an important question. But it is not nearly as important, in our view, as the question of whether there now exists an "oversight" system that does, in fact, provide

those "protections" to the American public that George Bush was talking about Thursday night.

"Oversight," our dictionary says, means "supervision, watchful care." But when it is used in quite another way, it can also mean something altogether different—a "failure to notice or consider, an omission or error due to carelessness." In the light of the revelations of the CIA/Hussein connection, it becomes necessary to ask all over again just what meaning of the word administration officials and members of Congress have in mind when they talk so assuredly about "oversight" with respect to the CIA.

TUNA RULING

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. BOB WILSON. Mr. Speaker, the American tuna-fishing industry has been reeling for months from the regulatory blows dealt to it by the Federal Government. Most recently, it was hit with what could almost be termed the final killing stroke—a ban on the "on porpoise" method of fishing, whereby the fishermen set their nets on schools of yellowfin tuna who habitually swim in company with porpoise.

In a strict interpretation of the Marine Mammal Protection Act which states that "the incidental kill or serious injury of marine mammals during the course of commercial fishing be reduced to insignificant levels approaching a zero mortality or serious injury rate," the National Marine Fisheries Service imposed a quota on the incidental taking that virtually eliminated the fisherman's ability to pursue his livelihood.

Some respite is seen in a recommendation to the Marine Fisheries Service from the administrative law judge who presided over extensive hearings into the matter. Based on the evidence presented and the testimony heard, the judge believes that the quota should be increased. One of the most respected marine biologists in our country concurs, and I believe the following article from the January 13 edition of the San Diego Union will provide for my colleagues a most succinct presentation of what is at stake.

The article follows:

TUNA RULING IRKS MARINE EXPERT

Dr. Carl Hubbs, acknowledged by peers to be one of the world's greatest marine biologists, said he is "very strongly in sympathy" with tuna fishermen and that the government's stringent ban on porpoise deaths associated with fishing should be relaxed immediately.

Hubbs said "strong-minded" fishermen are partly responsible for the crisis presently threatening the U.S. industry based in San Diego, but that "emotional conservationists" are mainly to blame.

"I am very strongly in sympathy with them (tuna fishermen) and I think it is a pity that the emotional conservationists have gone so far as to say that fishing must cease if they catch a single porpoise," Hubbs said in an interview.

NO HARM

"It would do the porpoise population no harm to lose a moderate percentage every year.

"We are in danger of losing one of our great industries here and a wonderful source of food."

Hubbs said he believed that porpoise lovers and fishermen, particularly those who were slow to adopt porpoise-saving measures early, "sort of unintentially joined hands in bringing on this potential catastrophe."

Asked if he believes that the courts have been too responsive to the environmentalist demands by refusing to moderate porpoise mortality quotas, Hubbs responded:

"Very much so. This is an example of swinging too far, instead of taking a reasonable, step-by-step course (of implementing porpoise-protection technologies in fishing).

"They (environmentalists) are becoming the executive branch of the government. They are way out of balance . . ."

Hubbs, who described himself as a practical conservationist," said the same kind of emotional hysteria has been leveled unreasonably against the whaling industry, zoos and aquatic parks like Sea World.

"There is no question but that the numbers of whales have been enormously reduced," he said. But I think that there isn't one chance in 100, that any will be completely exterminated because if they get scarce enough to be in danger of going out, the commercial operations will cease."

BLUE WHALE

Hubbs, 82, also rejected a suggestion that the blue whale, the largest animal that has ever lived and the most decimated by whalers, might be in serious danger.

The blue whale is not anywhere near extinction." Hubbs said. "We have a considerable number that come up off the Baja coast from the tropics every year. Yes, blue whales."

LITHUANIAN NATIONAL DAY

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. DELANEY. Mr. Speaker, the 16th of February is a very significant date in modern history. This year it marked the 59th anniversary of the establishment of the free and independent Republic of Lithuania.

With the defeat of Germany and the turmoil of revolution in Russia, a 20-member national council proclaimed Lithuanian independence on February 16, 1918. Although attempts were made to enforce a Communist government, the Red Army was driven back and signed a solemn pledge "voluntarily and forever renouncing all rights over the Lithuanian people and territory."

These courageous Baltic peoples thrived for more than 20 years. No nation more clearly demonstrated its ability for self-government, freedom, and social progress. However, in August of 1940, the Kremlin declared Lithuania a "constituent" part of its Union of Soviet Socialist Republics and from that infamous day, the Lithuanian people have suffered under the yoke of the hammer and sickle.

Mr. Speaker, as I have stated many times throughout my years in Congress, the United States never has and never will recognize this forcible annexation. As our Representative to the United Nations' Human Rights Committee emphasized in November, "basic freedoms and particularly religious expression" are denied in the Baltic States. We continue to protest in the strongest possible terms the oppressive measures of the KGB against the Lithuanian Church and the national honor of the Lithuanian people. Despite incredible harassment, Lithuanian citizens themselves have established a group to monitor observance of Russia's Helsinki Declaration and to document human rights violations.

We insist that the Kremlin live up to its treaty obligations. We salute our fellow countrymen of Lithuanian descent who have so richly contributed to our American dream since first coming to these shores over 289 years ago. And we pray that the dream of those they left behind in their motherland may soon become a reality.

NO CHANCE TO VOTE ON PAY INCREASE

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. LEHMAN. Mr. Speaker, it is unfortunate that the pay increase for Members of Congress has gone into effect without a vote on the floor of the House.

Had I been given the opportunity to vote on this question, I would have voted against any pay increase going into effect during the 2-year term to which we were all very recently elected.

To underline my feelings on this matter, I am including in the RECORD a copy of the statement I submitted to the Ad Hoc Subcommittee on Presidential Pay Recommendations:

STATEMENT OF WILLIAM LEHMAN

Mr. Chairman, I welcome this opportunity to make my views on the proposed Congressional pay raise known to your subcommittee. As you may well have noted in the course of these proceedings, there will always be arguments and questions regarding the proper salaries of elected public officials. What I find disturbing, however, is not necessarily the level of pay, but the manner in which these salary adjustments take effect.

When a candidate is elected or re-elected to a term of office, he is elected at a pre-determined rate of pay. The candidate is essentially accepting a pay contract for a certain length of time. I believe that this "agreement" with the electorate should remain in effect without change during the term of office. To this end, I have joined Congressman Whalen in introducing legislation which would delay pay increases for Members until the following Congress.

I should also like to address two other aspects of the pay raise question. I support the establishment of a strict code of ethics for the House of Representatives whether linked to the pay raise or considered independently. In particular, I strongly support the principle of full financial disclosure. Secondly, it is obvious that we need to pay competitive salaries to our judges and senior officials in order to attract and keep talented individuals in government service. We should not, however, allow this matter to become unduly politicized by tying it to Congressional salaries.

Mr. Chairman, this ad hoc subcommittee is providing a useful forum for a thorough dis-

cussion of this delicate and complex issue. It is my hope that this discussion will result in positive action.

ADMIRAL RICKOVER ON AIRCRAFT CARRIER RESCISSION

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. BENNETT. Mr. Speaker, today Adm. H. G. Rickover appeared before the Seapower Subcommittee and testified with respect to the *Nimitz* class attack aircraft carrier authorized and appropriated for by Congress last year and now facing a Presidential rescission request. I wish to draw attention to Admiral Rickover's remarks and therefore include them at this point in the RECORD:

TESTIMONY OF ADMIRAL RICKOVER

Mr. Chairman, over this last week-end I reviewed the letter to the Congress of January 19, 1977, from President Ford in which he proposed that two smaller conventional aircraft carriers be substituted for the fourth NIMITZ Class carrier. That letter did not give any comparison of the capabilities of the proposed conventional carriers and the NIMITZ Class ship. The letter merely states:

"After reviewing the missions and force levels of the Naval strike forces in the past year, I have also concluded that it is in the national interest to begin procurement of a conventionally powered aircraft carrier sized for Vertical/Short Take-off and Landing (V/STOL) aircraft.

"While our recent aircraft carriers have been nuclear powered, the reduced size of the V/STOL carrier raises serious questions regarding the benefits to be derived from nuclear power. The FY 1979 authorization request for the Department of Defense includes $1,250.0 million for the first ship of the new class of aircraft carriers."

The President's letter indicates that the cost of the fourth NIMITZ Class carrier, CVN 71, would be $2.11 billion. However, if you look at the table attached to the President's letter you will see that this pricing is based on providing only $130 million in FY 1978 which would stretch out the delivery of the ship to FY 1986 and increase its cost over $100 million. Just to set the record straight I would like to point out that the Navy's current end-cost estimate for the CVN 71 is $1,984 million provided the $350 million appropriated in FY 1977 is released to procure long lead equipment and an additional $410 million is appropriated in FY 1978 as provided in your bill H.R. 1755. This week-end I also reviewed the transcript of the hearings held by the Defense Subcommittee of the House Appropriations Committee on February 17, concerning the proposed rescission of the advance procurement funds for the CVN 71. I note that throughout those hearings the cost of the CVN 71 was cited as $2.3 billion—15 percent or $300 million higher than the Navy estimate. Also, the cost of the smaller conventional carrier was cited as $900 million—$350 million less than the cost of the carrier President Ford cited in his letter for the FY 1979 program.

I haven't been able to find anybody who can tell me just what the FY 1979 carrier will actually look like—a situation I find surprising for a major combatant ship expected to be authorized next year. However, just to give you some feel for the relative capabilities of smaller conventional carriers and the CVN 71, I would like to refer you to my letter to the Chief of Naval Operations of November 12, 1974, which is published on page 3679 of Part 3 of the Seapower Subcommittee Hearings on the FY 1976 authorization. In that letter, I described a smaller conventional carrier called the CVX. The Navy spent $2 million on the conceptual design of this ship. The Navy presently estimates it would cost $1.25 billion to build it. Therefore, I think the characteristics of the CVX are indicative of what you can expect if you buy a smaller conventional carrier in FY 1979.

The CVN 71 would have the following substantially superior military characteristics compared to the tentative baseline characteristics of the cost constrained CVX conceptual design:

a. All the advantages of nuclear propulsion, including nuclear cores capable of providing 13 years of normal operation. In this regard, it should be noted that these cores contain the equivalent of 11 million barrels of oil. At today's prices it would cost about $330 million to buy and deliver this much oil to the conventional carrier.

b. Capacity to carry and support a 50 percent larger air wing.

c. Capacity for almost three times the aircraft ammunition and more than four times the aircraft fuel.

d. Four catapults and four elevators in lieu of two each for the CVX, which provides greater mission reliability and at least twice the aircraft launch rate. In this regard, it should be noted that an FY 1979 aircraft carrier will operate with aircraft which require catapulting for a number of years, even if V/STOL aircraft eventually replace catapult launched aircraft for first line missions. In this regard, it should be noted that much of the improved technology planned for V/STOL aircraft would also improve the performance of catapult launched aircraft, making it difficult for V/STOL aircraft to out-perform catapult launched aircraft of the same vintage.

e. Better sea-keeping capabilities which reduces the likelihood that air operations will have to be suspended due to sea conditions. Last year's Navy carrier study showed that a ship the size of the CVX would have to suspend air operations during winter in the North Atlantic twice as frequently as a *Nimitz* Class carrier. It could also be expected to have twice the night-landing accident rate when weather permitted air operations.

f. About four knots greater speed. The CVX could not keep up with nuclear carrier task forces and would thus be more vulnerable to submarine attack.

g. Four propulsion shafts in lieu of two for the CVX, which provides greater propulsion reliability.

The CVX had a combat load displacement of 60,000 tons. If an even smaller carrier is to be built, as some have suggested, its combat capabilities would be degraded further. In this regard, it should be noted that last year's Navy carrier study concluded that a carrier with the air wing capabilities of the CVX could generate only half the number of sorties that could be generated by the air wing on the CVN 71. The study also concluded that the air wing which could be accommodated on a carrier the CVX size would be "marginally capable of operation in the force projection role in low threat areas and incapable in high threat areas due to limited numbers of aircraft available for essential functions combined with the inability to generate required sortie rates." The study also concluded that a carrier of this size "could not serve effectively in the multipurpose sea-control role again, because too few aircraft could be accommodated."

FOREIGN DEBTS

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. YOUNG of Florida. Mr. Speaker, as the ranking minority member of the Foreign Operations Subcommittee of the House Appropriations Committee, I am increasingly aware of the full extent of overdue debts owed to the United States by foreign nations. The United States is presently owed more than $980 million by foreign government. It is time for the U.S. Government to make every possible effort to collect this money.

In this regard, I am introducing a resolution which would express the sense of the Congress that it shall be the policy of the United States to require repayments of these longstanding debts which are delinquent.

Those who bear the burden for failure to collect overdue debts are the American taxpayers. While deliquent debts increase, the real value of that money is decreasing, and it is the American taxpayer who makes up the difference. At a time when the United States is facing a budgetary and balance-of-payments problem of its own, it is ludicrous not to insist that nations owing us longstanding debts begin to make regular payments and to honor the terms of their contracts made in good faith.

The following is a chart showing country by country, the principal, and interest due and unpaid 90 days or more as of June 30, 1976, on U.S. Government foreign loans and credits:

FOREIGN LOANS AND CREDITS OF U.S. GOVERNMENT AGENCIES DUE FROM OFFICIAL FOREIGN GOVERNMENT OBLIGORS

SUMMARY BY COUNTRY AND TYPE OF OBLIGOR

Excluding indebtedness of foreign governments arising from World War II as of June 30, 1976.

Country and principal and interest due and unpaid 90 days or more:

ABUSES OF POWER

HON. J. DANFORTH QUAYLE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. QUAYLE. Mr. Speaker, we in this House of Congress are well aware of the many abuses of power committed by the Occupational Safety and Health Administration. Each week our offices receive letters from employers and employees alike, citing unnecessary demands handed out by OSHA inspectors. Many of these demands seem to be promulgated without regard to reasonableness, but they must be complied with nonetheless or the employer faces stiff fines, continued harassment by OHSA inspectors, or expensive litigation and court costs.

Obviously what is needed here is a complete overhaul of the Occupational Safety and Health Administration. Such legislative action, however, would require much time to enact, time during which OSHA is still running rampant, inflicting its damage on American industry.

I am proposing an amendment to the Occupational Safety and Health Act which would exempt from its coverage those people hardest hit by its mandates: Businesses which employ 25 or fewer persons. These small businesses, especially farming operations, are least able to afford the all-too-often costly procedures necessary to comply with OSHA regulations. Neither can they afford the legal recourse sought by larger firms, or the time-consuming delays. The result is that small businesses and family farms—the backbone of the American economy—are being driven out of business by OSHA harassment and/or compliance demands.

Some of the most incriminating evidence in this regard is furnished by OSHA itself, in a report entitled "OSHA's Impact on Small Business Employers." In this report, OSHA lists some of its reasons for the admittedly bad image it enjoys with small businesses:

> It is argued, additional burdens of understanding regulations and coping with regulatory procedures are not only unreasonable but detrimental to small business financial performance. OSHA's requiring familiarity with several hundred and standards and accountability should an inspection occur, it is also argued, is having a directly deleterious impact on small business.

The document goes on to state the "most frequent complaints about OSHA from business in general and small business in particular" which include:

> Inconsistency in inspections from compliance officer to compliance officer;
>
> An excessively militant or insensitive manner on the part of the compliance officer;
>
> Lack of advice on specifics of a violation and the most expeditious way to abate the violation;
>
> Citation of standards which are not directly related to health and safety;
>
> Lack of clarity of standards; and
>
> Unfairness of financial penalties on first inspection or violation.

Mr. Speaker, bear in mind that these are problems cited by OSHA itself. OSHA keeps no data on the number of businesses which must close due to their pronouncements; evidently they feel that this is not necessary. But if the generalities which they list are not enough, then there are numerous horror stories supplied by the affected businessmen which prove the point. To whit:

A worker in a Pennsylvania mining machinery plant wrote that OSHA inspectors decided that the workers in the plant had to begin wearing hard hats on the job. When it was pointed out that the only objects likely to fall on anyone's head were 500-pound objects being moved by cranes, the inspector replied that, of course, the hard hats could not protect against that, but perhaps there were oil cans or wrenches on the cranes which might fall. Now, everyone conceded this probability—even though the hats gave some of the men headaches, and obscured necessary working vision for others—but these workers still do not understand why they must wear the hats during lunch. Said one worker:

> I guess they think someone will get hit by a flying roll or bun!

The owner of a small business in the Midwest wrote that OSHA inspectors found that 12-foot doors at the front and back of his small—seven-person—shop were inadequate means of egress. He was told to place exit signs over each of the doors "so in case of a fire, a newly hired employee could tell where the door was." The business owner's question was a logical one: If the new employee could not see a 12-foot door, how was he supposed to see a 12-inch sign?

One business was ordered to have signs printed in both Spanish and English, since there was one employee of Spanish descent. The only problem with this is that the Spanish employee speaks only English.

These are fairly humorous examples. I do not believe I have to mention the now-famous—or is it infamous?—regulation requiring toilet facilities within a 5-minute walk of those working on a farm. There are many other examples which border on harassment—instances of fines increased when the businessman or farmer complained about the first fine; extra visits by inspectors when the businessman showed any sings of resistance; petty, nitpicking citations for no apparent purpose other than to burden the businessman.

Mr. Speaker, the least we can do, until OSHA is reformed, is to free this important sector of our economy from this terrible burden. Small businessmen and farmers were the founders of this land, and it was against OSHA-like inspections, fines and regulations that they rebelled in the American Revolution. Is this Congress to encourage the disrespect and discontent of American business by continuing to emulate King George III?

I invite my colleagues to join me in supporting this measure which will relieve small businesses and farms from the onerous tyranny of OSHA. Our heritage demands it.

HITTING IT RIGHT ON THE BUTTON

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. KOCH. Mr. Speaker, all 1976 congressional and Presidential candidates were responsible for conducting their campaign in accordance with the provisions of the recently enacted Federal Campaign Act. That legislation—which I supported and voted for—was and is necessary but it does contain at least one bizarre provision which we in the Congress should remedy.

In issuing their guidelines for congressional candidates last year, the FEC interpreted the law as precluding congressional candidates from using in their campaign material any reference to the Presidential and Vice Presidential candidates of their party, whose campaigns were publicly financed and who therefore were forbidden to accept cash or in-kind contributions.

During the course of my own campaign, I prepared a button which simply bore the following names—"Carter, MONDALE, KOCH"—in that order. When I was informed that the FEC had directed congressional candidates to remove billboards which included the names of the Presidential candidates, I decided I would request from the Commission a ruling on the legality of the "Carter-MONDALE-KOCH" campaign button. I advised the Commission that my campaign committee, New Yorkers for KOCH, had purchased 3,000 buttons for which I had paid the enormous sum of $409.28 and further advised that the order, concept, design, and purchase of the button had never been discussed with Gov. Jimmy Carter or Senator WALTER MONDALE. After considerable deliberation, the Commission rendered a solomonic decision applicable only to my button and me stating that—

New Yorkers for Koch may, under the circumstances set forth above and limited to the facts described in your letter, purchase and distribute the buttons, without the cost counting as a contribution in-kind to the Carter/MONDALE campaign.

To permit this ridiculous situation to persist year after year to the frustration of future candidates for local and national office is out of the question. Surely congressional and other local candidates should have the right to make clear in their literature, buttons, and bumper stickers that their campaigns are linked to the heads of their respective tickets. Indeed, much of the public indifference in the last political campaign can be attributed to the inability of candidates to distribute literature and other campaign paraphernalia demonstrating this intra-party support.

To deal with this problem, I am introducing legislation today to amend the Federal Election Campaign Act so as to permit on a reasonable basis the linkage of candidates' names through buttons, literature, and bumper stickers.

My bill would allow all candidates to produce and distribute, without limit, buttons and bumper stickers mentioning any other candidate without the costs being treated as a contribution to the latter candidate.

The per election limits would be 2 cents times the voting-age population of a State for statewide candidates, and $6,000 for all other candidates. These dollar amounts would be subject to a yearly cost-of-living adjustment.

With enactment of my bill, any of us as candidates for the House could associate him or herself with any other candidate we wished. Our candidacies could be joined with a Presidential, gubernatorial, or local candidate if we so desired, without fear of violating the law.

The buttons, stickers, and songs have little substantive impact, Mr. Speaker, on a voter's ultimate decision at the polls, but they are the sparkle and glitter of which our campaigns are made. To sacrifice this campaign excitement to the bureaucracy is unthinkable. My bill would not affect the valid objectives of the FEC, of which I heartily approve; namely, to stem the runaway costs of campaigning. But it would serve to remedy an unforeseen deficiency in the law.

STATEMENT OF CHURCH OF THE BRETHREN ON NATION'S MILITARISTIC OUTLOOK

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. FITHIAN. Mr. Speaker, the Church of the Brethren is a religious body dedicated to improving human conditions in this country and around the world. In the past, they have pointed out the need for increased educational, social, and ethical endeavors and recently they have made a policy statement on the B–1 bomber. I, therefore, direct your attention to the following message from this highly respected group.

CHURCH OF THE BRETHREN,
January 13, 1977.

From: Louise Denham Bowman, Acting Washington Representative.

Today, the Church of the Brethren regards with sorrow and deep concern our nation's increasing movement toward a permanently militaristic outlook.

The Church of the Brethren, since its beginning in 1708, has repeatedly declared its opposition to war and militarism. As a historic peace church, we have consistently supported peaceful, nonviolent means of resolving conflicts. Church members are encouraged to divorce themselves as far as possible from direct association with military service or with defense industries in both employment and investment.

But the Church also encourages its members to study international relations and foreign policy and to confer with legislators, government executives, and other policy makers concerning American military and international affairs.

Using the above guidelines provided by the Church of the Brethren's Annual Conference, today this office reaffirms its opposition to any further funding of the B–1 bomber. We beleive the government can better serve its citizens by meeting human needs rather than by adding the B–1 bomber to the world's arsenal of weapons.

We call upon President-elect Jimmy Carter to stop the B–1 as his first step in bringing peace to a troubled globe.

FEDERAL MINIMUM WAGE: A DEVASTATING IMPACT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. McDONALD. Mr. Speaker, a large increase in the minimum wage this year would have a devastating impact on the Nation's economy, particularly as regards employment of the Nation's youth, and could help in starting another inflationary spiral. Those of us who oppose such an increase can only welcome such well reasoned opposition as appeared in a column by Patrick J. Buchanan on this this subject in the Richmond Times-Dispatch of February 15, 1977. I commend this thoughtful article to the attention of my colleagues:

FEDERAL MINIMUM WAGE: A DEVASTATING IMPACT

(By Patrick J. Buchanan)

WASHINGTON.—Mr. Labor is on a long losing streak. After pulling his oar for the Carter crew, George Meany has yet to receive even a doggie bag from the vast banquet table of political spoils.

His recommendation for secretaries of defense and labor, the two posts Meany cared about, were ignored. When the jobs-and-tax-relief bill was shipped off to Capitol Hill, it had written all over it "rejection" of the advice proffered by the AFL–CIO.

Nor is the losing streak likely to end soon. While the President is committed, against his better judgment, to sign legislation repealing 14(b) of the Taft-Hartley Act—the section giving Georgia and 19 other states their right to outlaw mandatory unionism—labor is unable to line up the Senate votes to have it passed.

The right-to-work folks are claiming 45 votes solid. Another nine are listed as uncommitted. Even inside labor's "solid" bloc, there is a cuckoo in the nest. Gary Hart, Colorado ultra-liberal, has privately promised a Denver constituent that if 14(b) comes up he will bolt labor's camp and vote with the right-to-work folks. "I do not favor repealing Section 14(b) at this time, and would vote accordingly," the senator wrote on January 12.

But there is a battle up-coming where labor's prospects appear bright. That is the drive for a 30 percent increase, from $2.80 to $3 an hour—or to $120 a week—in the federal minimum wage. The legislation might better be retitled the Anti-Poor-and-Black Law.

Its adverse effects would be dual. First, it would drive forever from the labor market the least educated, least literate and least skilled of our workers—and force them into the indignity of a life on the dole. Second, it would push above 50 percent the number of black teen-agers unable to find work.

Years back, the University of Chicago produced a study showing a correlation between rises in the minimum wage since 1956 and rises in teen-aged unemployment. The study was ridiculed as right-wing propaganda by the then labor-civil rights coalition. But since 1971, when the minimum wage was

raised by stages, 44 percent to $2.30 an hour, the realization has grown among the unorganized, the unskilled and the poor that they are the victims, not the beneficiaries, of this law.

In a recent *Wall Street Journal* interview, Betty Jack, a black social worker in South Florida, the mother of four, lamented: "It would be just awful for the kids if [the federal authorities] raise the minimum wage again. . . . It's bad enough now; but if the floor comes up again, the kids simply won't ever get hired."

Labor dismisses the contention. A $3 minimum wage, the AFL–CIO asserts, would "benefit the entire economy by generating additional purchasing power and additional jobs." But if that be true, why not raise it up to $4 an hour and generate even more "additional purchasing power and additional jobs?" Labor knows the answer.

Where a $3 minimum wage would only push tens of thousands out of the job market for the rest of their lives, $4 an hour would drive the unskilled out by the hundreds of thousands, perhaps millions—and push black teen-aged unemployment up toward 90 percent.

The federal minimum wage has long been idolized as an altar piece of "progressive legislation." It is nothing of the kind. It is among the most regressive and reactionary laws ever passed by Congress. It provides organized and skilled workers with an elevated floor from which to make their demands for higher wages. At the same time, its impact upon the unskilled, the unorganized, the illiterate, the young, the poor and the black is devastating.

WORLD DIALOG: A WORTHWHILE TRADITION

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Ms. MEYNER. Mr. Speaker, when the Marquis de Lafayette addressed the House in 1824, he became the first in an historic series of foreign dignitaries to address the Members of Congress. Since those early years of the Republic almost 50 distinguished foreign visitors have appeared before either the House or a joint meeting of Congress. From the King of Hawaii to our present guests, chiefs of state, and heads of government have come before us to offer their views on bilateral relations and world peace.

These visitors tell us much about their nations and how they perceive themselves in the international system. More than that, however, they tell us something about ourselves, how we are seen to act and what role we might play in world affairs.

When a head of state addresses Congress he or she speaks not only to 535 elected officials, but to the American people and the family of nations as well. His words may praise or caution, advise or applaud, but in any case they will be heard. While they are rarely words of solace, they are always words of sincerity which merit the attention of all those who value dialog between men and women of reason.

The visiting head of state is more than the authoritative voice of his nation's foreign policy. He is the embodiment of his people and their aspirations. When we in Congress hear him we pay respect to those for whom he speaks, for the nation which he represents. We also demonstrate that cooperation between our countries depends upon the efforts of Congress as well as the President.

I urge that we continue to encourage a worthwhile and symbolic tradition. We need to listen to our visitors just as the House listened with emotion to the words of Lafayette. We in our day should hear the world's voices and listen for words of peace.

RESOLUTIONS OF THE CONFERENCE OF BLACK LAWYERS

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. RANGEL. Mr. Speaker, the National Conference of Black Lawyers—NCBL—at their sixth annual meeting, October 21–24, 1976, adopted resolutions which call upon the Federal Communication Commission and giants in the industry to promote fair play, balanced programing, and equal opportunity. It is time now to move the issues cited in the resolution to the front burner. Mr. Speaker, the NCBL resolution sets the parameters for a meaningful action agenda and I am pleased to insert it in the RECORD for the edification of my colleagues:

RESOLUTIONS OF THE COMMUNICATIONS TASK FORCE OF THE NATIONAL CONFERENCE OF BLACK LAWYERS

Whereas the electronic media have systemically ignored the needs, interests and desires of Black persons in this country;

Whereas there exists both the need and statutory mandate for greater responsiveness both by electronic media and regulatory authorities to concerns of Black communities;

Whereas the National Conference of Black Lawyers (NCBL) has steadfastly demanded forthwith cessation of all vestiges of oppression, the suppression of ideas, and the distortion of news and information;

Whereas equity and justice demand immediate corrective action on these concerns:

Therefore be it resolved that:

(1) NCBL recognizes, contrary to an executive order of August 1975, the non-participation of Blacks generally on Federal Communications Commission (FCC) Advisory Committees and particularly on World Administrative Advisory Committees, and accordingly demands that Black persons be included forthwith in the planning and development of domestic international satellite positions; and further, that Black persons be made an official part of all United States delegations involved in either discussions and/or development of international satellite policies;

(2) NCBL voices strong opposition to the CPB/PBS Satellite Inter-connection Network application because of the total non-involvement of Black persons in this proposal;

(3) NCBL opposes the proposed Federal Communications Bar Association rulemaking on reimbursement, but strongly supports any proposals that provide for direct reimbursement of expenses to citizens groups because of participation in F.C.C. proceedings;

(4) the NCBL is committed to and shall assist in organized and individual efforts designed to monitor, inquire, educate, challenge, and exert influence and pressure on the television and radio industry and the press to develop a positive image of Black people in the media. Roles must be created to reflect the basic humanity of Black men and women, our strength of character and decency, the necessity of a strong, viable family structure, and our concern for building a drug-free and crime-free society;

(5) the NCBL express its concern to the American Broadcasting Company, the Columbia Broadcasting System, the National Broadcasting Company, and the Public Broadcasting System and local stations concerning the imbalance in coverage of news events and issues pertaining to Black persons in radio and television, both locally and nationally, and that NCBL encourages all electronic media to take affirmative steps to provide balanced and ongoing coverage of all Black persons, wherever situated;

(6) the Federal Communications Commission, the Federal Trade Commission, and the Commerce Department initiate hearings immediately into problems that discourage and effectively prohibit the entry of Blacks and other minorities into the ownership arena of broadcast properties. The hearings should explore, among others, the areas of financing, market-place policies and practices that generally discourage minority ownership.

(7) the NCBL encourage the Public Broadcasting System to set up and provide funding for a Black training workshop to provide national programming for Black persons similar to the Children Television Workshop Production Center funded by the Public Broadcasting System.

(8) the Federal Communications Commission investigate the networks to determine the extent and degree that they control the programming and practices of their affiliates and also to determine the scope and affect the network contracts have on the discretion and responsibility of affiliate licensees.

(9) the NCBL continues to extend its wholehearted support of the National Black Media Coalition and its efforts to insure a balanced coverage of Black persons, fair portrayal of Black concerns, equity in ownership and other issues of access, advertising and international transmission of information.

(10) be it resolved that NCBL recognizes, both in commercial and public broadcast facilities, the absence of African and African American viewpoints on controversial and significantly important issues, such as United States involvement in Angola, Zimbabwe and Mozambique, and accordingly demands more balanced programming in these critical areas of public importance, and further, NCBL recognizes that certain vehicles are readily available which could immediately provide contrasting points of view, such as "Last Grave at Dimbaza" and "O Pero Organizado," and thus would strongly support full and equitable utilization of such opposite views and, as well, the increased utilization of Black producers and writers.

(11) NCBL wholeheartedly supports the position of National Black Media Coalition on the sale of WMAL AM/FM, Washington, D.C., and accordingly demands F.C.C. rejection of the proposed sale to the American Broadcasting Company.

(12) NCBL recognizes the insensitivity of commercial and public broadcasters towards the necessity of insuring positive Black male images in television, and accordingly questions the absence of strong images (i.e., why was John Amos, formerly of "Good Times," constantly unemployed); and further, the question should be responded to not only by broadcast licensees, but as well by advertisers, producers and major production houses.

(13) NCBL expresses concern over apparent discrimination by national and regional advertisers against Black-owned broadcast facilities and accordingly urges the F.C.C. to launch formal inquiries into this matter.

(14) that NCBL deems it to be in the public interest to have strong and viable Black-owned broadcast and cable facilities, and thus would request the F.C.C. to invoke those procedures that address the deficiencies in this public interest standard.

(15) NCBL strongly urges the F.C.C. to institute an inquiry into the apparent discrimination Black persons are suffering in attempting to acquire first class licenses.

(16) NCBL shall make available to the F.C.C. its resources and talents as the Commission plans for the Minority Ownership Conference scheduled for Spring 77, in Washington, D.C., and, simultaneous therewith would request viable participation in both the planning and working sessions conference.

(17) that NCBL shall make available to the House Subcommittee on Communications its resources and talents as the committee inquires into a proposed rewrite of the Telecommunications Act of 1934, and would, simultaneous therewith request viable participation in appropriate phases of the congressional exercise.

NATIONAL HEALTH CARE AND THE ELDERLY

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. McKINNEY. Mr. Speaker, perhaps the only thing more disgraceful than the absence of a national energy program in this country is the absence of a program to insure adequate health care for senior citizens. The injustice suffered by millions of Americans as a result of our failure to adequately provide for them is borne out by some appalling statistics.

Of the 22 million older Americans—approximately 10 percent of the national population—nearly 13 in every 100 must exist on an income below the nationally recognized poverty level. While the cost of living has risen 72 percent in the last 10 years, the average retired wage earner receives an annual social security income of $2,616. From that paltry income senior citizens must house, feed, and clothe themselves as well as deal with the unbelievable growth in health care costs.

A problem of this magnitude obviously did not develop overnight. Consequently, any solution will require ample time and proper planning to be effective. Many well-intentioned persons have proposed the immediate introduction of National Health Insurance—NHI—as a means of assisting the elderly and poor. While I have long contended that a comprehensive program of mandatory health insurance for all Americans is ultimately the answer we must seek, I seriously doubt whether our struggling economy could survive under the burden of any of the many NHI proposals that have been made to date. Certainly, from a purely administrative point of view, we are not ready to assume the economic responsibility for a program of the scope of the Kennedy-Corman Health Security Act. This legislation would immediately establish a federally financed and administered health insurance program for the entire population, covering a wide range of services with no provisions for cost sharing by the patient. Neither private industry nor the Federal Treasury are prepared to absorb the financial drain on payroll taxes and general revenues such a program would require.

Even the less ambitious health insurance proposals that have been submitted in this Congress are somewhat ill timed when viewed in the context of present economic conditions. In recognition of this fact, President Carter's newly appointed Secretary of Health, Education and Welfare, Joseph Califano, has stated that the administration holds no hope of introducing any NHI proposals in 1977.

Regardless of the state of the economy, I would still prefer to see a more gradual approach to national health insurance. Great Britain's experience in this regard is instructive in that their program has many positive and beneficial aspects but has grown into an insatiable budget monster with no cost controls. Rather than subject our economy—health or otherwise—to the severe impact of an immediate and all-inclusive national health care program, we should approach the implementation of national health insurance systematically. First, we need a catastrophic insurance program to broaden the actuarial base and thus reduce the cost of protection against physical—and usually financial—crisis. Then broadened medical insurance coverage for the elderly, the very young and the chronically ill could be added using those parts of the present medicare and medicaid programs worth salvaging.

It is important to stress that all phases of this step-by-step approach would include Federal standardization of policy terms but would pool existing private insurance carriers to provide the coverage. It is hoped the full participation of the private insurance industry, in addition to Federal cost cutting efforts, would institutionalize thrift and keep program costs to the minimum.

The essential difference in gradual as opposed to immediate implementation may very well mean the difference between short term success and long term failure for the program. Not only would an incremental introduction afford experts the time and experience to perfect the delivery of services and reduce costs, it would afford us the opportunity to assess the performance of the private insurer in the national plan.

Delaying the creation of a full scale national health insurance plan by no means precludes the immediate introduction of other effective health care improvements for the elderly. Indeed, many of the health care proposals which I have introduced or supported in this Congress are designed to help lay the groundwork for a national insurance plan in the future.

For instance, I am currently a sponsor, along with several of my House colleagues, of legislation to provide for the cost of prescription drugs under the medicare program. This measure would expand benefits for millions of elderly and disabled persons who suffer the double jeopardy of chronic illness and financial insecurity. Under the provisions of this proposal, a list of drugs eligible for coverage would be compiled by a committee of physicians, pharmacists, and other health professionals and would focus attention on the treatment of chronic illnesses such as high blood pressure, diabetes, and arthritis.

There are many other improvements which can be made in the medicare program while awaiting the inevitable implementation of NHI. In addition to extending medicare coverage to prescription drugs. I am presently sponsoring legislation to expand that coverage to embrace the services of physician extenders in rural areas, as well as psychologists and chiropractors. The promulgation of a nursing home bill of rights to standardize in-patient care for the elderly, and the expansion of the meals-on-wheels program are two other areas upon which I am focusing my attention and lending my support. Obviously not all of our senior citizens are in need of direct Federal assistance for chronic illness or nursing care. However, an occasional lapse from good health can become a serious financial burden for an individual living on a retirement income. In recognition of the financial realities of life on fixed income in an inflationary age, I have again joined with several House Members in seeking the elimination of the outside earnings limitation for social security recipients. The limit imposed under present law is $3,000. That is, for every dollar earned above that amount, social security income is taxed 50 cents. Not only does this harsh law discourage older Americans from seeking employment, it unfairly taxes earned income while allowing investment income to accrue without a social security penalty.

Of course, with the expansion of Federal services such as those I presently support comes the need for program accountability. In order to insure the effectiveness of these programs as well as control unwarranted expenses, we must simultaneously direct our attention to the issue of standards of operation for health services. Few can dispute the need to improve services for the elderly. However, both Congress and the new administration have been reluctant to make services, such as home health care, available without some assurance that the public dollars paying for that care are well-spent. I am presently a cosponsor of a home health care standards bill which would establish guidelines and minimum qualifications for cost-effective home health programs.

Further, in an effort to assist Federal and State officials to reduce costs and restore a degree of integrity to the medicare and medicaid programs, I have recently sponsored legislation to strengthen and define the penalties for fraud in these expensive programs. These antifraud amendments and standards of practice are not the final answer, but I believe they can be honestly viewed as initiatives in the right direction.

ANDY DEVINE

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. BADHAM. Mr. Speaker, I would like to call to the attention of my colleagues the sad fact that Andy Devine, the actor and my friend, died on Friday, February 18 at the age of 71.

And I would like to ask that the text of the Washington Post's obituary of Sunday, February 20, be inserted into the RECORD to publicly and officially acknowledge the accomplishments of this fine man who brought laughter to so many who best knew him as "Jingle Jones, Deputy Marshal to Wild Bill Hickok," on the long-running television series.

On behalf of all of his friends and fans in the 40th Congressional District, I want to thank Doagie Devine for sharing Andy with us these many years. I extend our sincere condolences to her for her personal loss.

The obituary follows:

ANDY DEVINE, DIES, TV, FILM COMIC

(By Martin Weil)

Andy Devine, 71, the Hollywood actor whose broad girth and rasping, whining voice made him memorable in numerous roles as the comic sidekick in westerns and adventure stories, died Friday in a hospital in Irvine, Calif.

Mr. Devine had suffered from leukemia and required periodic hospital treatment. He had been hospitalized in July for pneumonia and kidney problems.

An actor since the days of silent films, Mr. Devine appeared by his own estimate in "several hundred" movies, including such classics as "Stagecoach."

In the 1950s, he became widely known as the deputy to Guy Madison's marshal Wild Bill Hickok in a long-running television series. "I'd get everybody into trouble and Guy'd get 'em out," Mr. Devine recalled.

Whether playing Jingles Jones in the 118-episode Hickok series or starring in "Andy's Gang," a children's show, Mr. Devine found that his voice was his fortune.

Along with his weight, which reached a high of 358 pounds, Mr. Devine's voice made him almost indispensable for years. Directors continually discovered that their posses, pirate crews or calvary troops required at least one heavy-set, good-natured character who delivered his lines in a high-pitched gravel-voiced croak.

In a Motion Picture Herald poll for 1948–49, Mr. Devine won a place as one of the top 10 money makers in western movies.

But, as Mr. Devine recalled it, there was a time when his voice threatened to jeopardize his embryonic career. It was when silent pictures were giving way to the talkies.

"When sound came in, they threw me right out into the street," he once said. "With my voice they thought I'd clear the theaters."

Instead, it catapulted him into comedy. "Some other portly guys went dramatic," Mr. Devine said, "but I couldn't go any other way than I did with my voice. Imagine me playing a famous trial lawyer or a nasty villain."

Sometimes described, at least in later years, as falling between a factory whistle and a fog horn, Mr. Devine's voice became a legend. "Folks are always sending me cures for what ails me," Mr. Devine was quoted in the 1930s.

A 1939 news report traced the origin of Mr. Devine's distinctive voice to an incident that occurred when the Flagstaff, Ariz., native was five years old. As the account goes, he was jumping on a davenport with a pointed stick in his mouth. He fell, and the point pierced the roof of his mouth.

When Mr. Devine regained his voice, weeks afterward, he reportedly said, "It was kinda whiney." And subsequently, despite efforts to speak normally, he said, "I just kept on whining."

By another account, Mr. Devine was born with the cracking voice generally considered a characteristic of adolescence.

Before winning fame with it, he studied briefly for the priesthood, took drama courses and played football at the University of Santa Clara, and held jobs as a lifeguard, farmer, telephone lineman and photographer.

He broke into silent movies in the mid-1920s, starting as an extra. In addition to "Stagecoach,' in 1939, in which he played the driver, some of the films in which Mr. Devine appeared are "The Red Badge of Courage," "Adventures of Huckleberry Finn," "Ali Baba and the 40 Thieves," "Two Rode Together," "Spirit of Notre Dame" and "Around the World in 80 Days."

His favorite role was as the pal of the starlet in the original version of "A Star Is Born" in 1937.

Later, he served as a sidekick to Roy Rogers in a series of films that were shown on television.

In the 1930's, he began a five-year stint on the Jack Benny radio show.

In his 60s, he toured widely in such stage productions as "Showboat," "Never Too Late," "On Borrowed Time" and "Anything Goes."

Mr. Devine was in the movies as recently as last year, when he played in "Won Ton Ton, the Dog That Saved Hollywood."

More than 1,000 people went to Mr. Devine's home for a celebration of his 70th birthday. They included John Wayne and Claire Trevor, who played in "Stagecoach" with him, as well as Guy Madison.

"It's been a helluva life," Mr. Devine said. "I can't think of anything I would want to change." Then, he added referring to a movie he was known not to have regarded highly, "well maybe I should have passed up 'Yellowstone.'"

He and his wife, Dorothy, whom he married in 1933, lived for years in Van Nuys, Calif., where he was "honorary mayor." The family moved in 1957 to Newport Beach. In addition to his wife, survivors include two sons, Tad and Denny.

CHARLIE DAVIS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. EDWARDS of California. Mr. Speaker, I want to bring to the attention of my colleagues the record and accomplishments of one of Santa Clara County's most distinguished and able citizens.

Charlie Davis has been a longtime personal friend and dedicated labor leader for many years in the bay area. He has been a crusader for fair employment practices, unemployment compensation, occupational health and safety, and many other causes for the protection of working men and women in California. Charlie also has an outstanding record of service to our community. Over the years, he and his union, the Brotherhood of Painters and Allied Trades, have assisted in many worthwhile causes including the American Cancer Society, Boys Town, Little League, Hope for Crippled Children, the Police Athletic League, churches of all faiths, and veterans' societies. In addition, he has been a most able leader in handling the day to day problems and concerns of his membership and coworkers.

Charlie will retire in April of this year from his post of president of local 507. He will be missed by those who have worked with him professionally but I am sure that he will remain a pillar in our community for many years to come.

BLISS

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. FINDLEY. Mr. Speaker, a few days ago Robert R. Bliss, editor and publisher of the Hillsboro and Montgomery County News, Hillsboro, Ill., marked his 60th anniversary in the country newspaper business. He is a member of a family which has been identified with the same newspaper for 85 years and Bob has announced that he expects to be plugging away when the family marks the "centennial of Bliss" in 1992. Knowing Bob as I do, I am sure that he will be just as vigorous in the battle for community advancement and good government, perhaps even a bit more so, when that year arrives.

Bob is one of those rare people who combines professional skill with limitless good humor.

A country newspaperman myself, I have special nostalgia reading Bob's review of his 60 years at the News office. Here is the text of his anniversary statement:

HERE AT THE RIGHT TIME

The whole lot has been blessed, that's why the name—Bliss.

And we're doubly blessed because we're part of the lot and we have enjoyed the longest, a 60-year love affair with a thriving business, a stimulating profession and a community which has appreciated arduous effort.

Our time of involvement has been the best because we have been privileged to experience all of the great changes in our own industrial technology as well as having had a front-row seat in observing the giant strides of others.

Our love affair with this business began as a first-grader at Winhold school and our first paying job—the Main street paper boy whose route included delivering papers to business houses and professional offices—which gave us personal acquaintance with the community's merchants and professional men. In six decades that represents a throng.

Our walks to and from school usually required a trip through the "office" to see what was going on. Progression included janitorial duties, then pressroom responsibilities with added reporting and writing chores for high school sports contests. We have been mechanic, electrician, plumber, photographer, engraver, buyer, estimator, sales-

man, reporter, editor, during this long amorous odyessy. At first it was 25c a week, up to $4 a week for janitor and $15 a week after college. With the exception of time out for college we have had income from this business for nearly 3,000 paydays.

During that span of time the objective has always been the same and continues today—to give readers and advertisers a better newspaper.

Everything was hand set except the type for columns of reading matter when our career started. One Linotype machine was the lone mechanical marvel. In succeeding years all the typesetting processes were mechanical and mechanical feeders replaced hand-operated presses. We often boasted that we could keep every machine in the place in operating order. That boast has gone the way of a lot of other prowesses.

The advent of electronic, computerized typesetting and printing via photography and chemicals has put us back where we started. We well subscribe to the adage "ignorance is bliss!"

These great changes were effected at great effort and expense. They're worth it.

The news is capable of quality and content never dreamed of only five years ago. The capabilities of craftsmanship extend beyond composition and reproduction of news and advertising materials. There is greater competence in the fourth generation than in the first, second and third. This is as it should be.

Few are the businesses that have been continuously managed by members of one family for four score and five years. The News reached it 100th anniversary as a Hillsboro institution in 1969 and with a little bit of luck there will be a family member at the helm for the centennial of Bliss at the News fifteen years from now in 1992. Then, our love affair will have endured three-quarters of a century.

We plan to be around.

TRIBUTE TO EDUCATOR JIM GARLAND

HON. FLOYD J. FITHIAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. FITHIAN. Mr. Speaker, today I would like to recognize Jim Garland, a government teacher at West Lafayette High School in Indiana, who has helped to shape the character of our high school students for the better.

In his government class, Mr. Garland required that they become actively involved with the workings of government In the last election his students worked for the party of their choice so they could learn the issues and techniques of our democratic process at first hand. In another instance, his students participated on a project for the Survey Board of Parks and Recreation. Their plans were so competent that they are among several being considered for the final draft.

As a graduate of Lake Forest in Illinois and Purdue University in Indiana, Mr. Garland has been awarded a lifetime teaching certificate for social studies and is qualified to teach in several other fields. He is a dedicated public spirited citizen who serves his community as a member of the City Council.

Mr. Speaker, it is my pleasure to acknowledge the contribution Jim Garland has made to his students and his community. I make this acknowledgment with the hope that his example will inspire others to become involved.

CLIMATE, WEATHER, ARIDITY

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. TEAGUE. Mr. Speaker, the climate problems with which many of us in arid and semiarid regions must contend are among the most important yet difficult either to solve or do much about. Nonetheless, genuine efforts are underway, including the one described in the following excerpts from an article in Mosaic, which is published quarterly by the National Science Foundation. The work being done by John F. Griffiths, a meteorologist at the Texas A. & M. University, and others like him, can prove to be of enormous value to humans everywhere eventually—and indeed may be essential if civilization is to survive as we know it today.

The article follows:

CLIMATE, WEATHER, ARIDITY

Climate changes. Climate has always changed, in long-eon-consuming sweeps that may or may not contain patterns—that may or may not contain cycles.

Among some climatologists today there is a feeling—not yet a consensus—that there is current evidence of worldwide climate change. And, while there are major differences among climatologists about the causes, nature, and direction of climate change, there is general agreement that climate variability is a phenomenon whose existence has been underestimated or ignored until now, and that more knowledge about climate change is needed urgently.

There is also considerable agreement that any climatic change could have a dramatic impact on that one-third or so of the Earth's land area where predictability is already minimal, where rainfall is always marginal and often irregular, and life is at its most precarious—the Earth's arid regions. If, as many climatologists suspect (not all, certainly. "Agnosticism seems to me to be the only reasonable attitude of the present time," says one abstainer), the Earth is currently emerging from a period of unusually steady, favorable weather into an era of greater, unpredictable variability, the implications for the arid lands could be profound.

"An increase in variability is serious anywhere, but it is extremely serious in marginal areas such as arid and semiarid lands," says John F. Griffiths, a specialist in the meteorology of aridity at Texas A&M University. "If you expect 10 inches of rain a year and get 20 inches one year, the rivers can't take it and homes are washed away. If you get zero inches the next year, that is just as bad. It doesn't average out in the long run as far as crop yield or grazing or anything else is concerned."

Earlier in human history, when mankind's numbers could be counted in the millions or tens of millions, climate change—even the slow but inevitable descent of massive glaciers or the implacable encroachment of aridity where life was once lush—might have been of less concern than the daily vagaries of weather or the slow and ultimately comprehensible sweep of seasons. Human links to a piece of ground, to a way of life, while always strong, must have been easier to break; the gradual discovery that a piece of land, a habitat, an ecosystem was not producing the sustenance an earlier generation might have gleaned could lead to the shift of a village, the extension of a hunting range, the move over one River Jordan or another to some new "land of milk and honey." As anthropologist William S. Laughlin of the University of Connecticut at Storrs, whose study involves the early population of North America over the Bering Land Bridge, puts it, those early, Ice Age "migrants" were not migrants at all; rather they were citizens of a new place—occupying new pieces of it, from generation to generation, as climate change nudged rather than drove them to populate new lands. It has also been suggested that the upheaval in Egypt that led the ancient Hebrews to cross the desert and occupy Canaan had a climatological base.

But mankind today—four billion going on seven—has occupied the earth, perhaps all of it that is habitable. His works are massive; his civilizations, his technologies, his food production techniques, his energy resources, have all developed around a climatological array that may be considerably less fixed in time than mankind is fixed in place. Even desert nomads, a kind of anthropologic relic of an earlier, more flexible time, are being sedentarized by social and ecological forces beyond their control.

So successfully has mankind obeyed the injunction to go forth and multiply that a shift of climate in any direction, any long-term shift of wind and weather associated with either a warming or cooling of the earth by only a few degrees, could have massive impacts of which recent droughts, crop failures, and famines are only a foretaste.

A DATA GAP

A major problem in the effort to determine the future of the arid lands in a time of climate change is a lack of data. One way in which climatologists study the future is by peering intently into the past. But the scientists who are looking for past patterns, probabilities, or cycles that can be extended into the future find an especially severe shortage of data in the arid lands, which tend to be relatively uninhabited. For example, the only long-term rainfall information for the Sahel, the broad belt of arid and semiarid lands running across Africa south of the Sahara, comes from a single weather station in Dakar, Senegal, which itself is located just outside the Sahelian zone.

Even where more weather stations exist, as in the Great Plains of the United States, records rarely go back more than a century. And the fitful nature of weather in arid regions makes interpretation from data difficult. Unlike the steadier precipitation of temperate regions, rainfall in arid and semiarid, lands often comes in violent bursts. A single major rainstorm may bring such a region an appreciable portion of its annual rainfall. It was just such a rainstorm, points out Walter Orr Roberts, former director of the National Center for Atmospheric Research, that kept 1974 from being labeled a drought year in the Great Plains.

And different arid regions require different interpretations. In Eurasia and Africa, the isotherms and isohyets—lines showing equal temperature and equal rainfall—of the arid lands tend to run east-west and to be close together, so that there is a steep gradient in both temperature and rainfall patterns. In the Sahel, for example, a move of 100 miles from north to south can mean a difference of 300 millimeters in annual rainfall.

In North America, isotherms run east-west

but the isohyets of the Great Plains run from north to south. Temperature and rainfall gradients are more gradual, so that patterns for given localities are more discernible—at least in theory. And yet the 400-millimeter isohyet can wander seven degrees of longitude in a quarter century.

The data gap is starting to be filled. There is a drive to establish more weather stations in arid regions. Weather satellites are providing data of a kind never before available. Climatologists are continuing to study the past by examining ancient tree-ring patterns, pollen deposits that show the advance and retreat of grasslands, and similar phenomena. But there is still great uncertainty about the climatic past—no less present and future—of the arid lands—and indeed, of the whole globe. . . .

BUILDING A DATA BASE

The difficulties of using current climatic knowledge to diagnose a specific situation were shown by discussions of the Sahel drought. Proponents of the theory that the Earth is cooling saw the drought as support for their view. Even a slight southward shift of rainfall patterns, so steep is the rainfall gradient, could turn large areas from semiarid to desert lands.

An opposing point of view is that severe droughts can be expected to occur periodically in semiarid lands such as the Sahel. While records are vague, there are indications that severe droughts have hit the Sahel about once every generation, and that the drought of the 1970's is not unusual in that respect.

There is agreement that human activities have worsened the drought and perhaps intensified the trend toward desertification of the Sahel: Overgrazing has destroyed vegetable cover; the cutting down of trees has left the land open to the southward march of the Sahara's sand dunes.

In addition, several specific mechanisms have been proposed to link mankind's activity with desertification even of meteorological origin: Jule Charney of the Massachusetts Institute of Technology says that overgrazing removes vegetation and increases the reflectivity of the land. The higher reflectivity causes the air column to cool and makes air sink over these areas. Sinking air is dry air, and this land gets no rain. Another climatologist, Russell Schnell of NOAA in Boulder, Colorado, proposes that the loss of vegetation decreases the concentration of tiny organic particles in the air, and that the lack of these particles removes nuclei on which raindrops customarily form.

One reason why climatologists approach such theories cautiously is that they are reluctant to accept the corollary that mankind's activities can increase rainfall. One of the most tragic episodes in the recent history of the arid lands came in the 1870's when immigrants rushed to occupy homesteads in the American West, which was then enjoying a rainy spell, under the belief that "rainfall follows the ploy." A prolonged drought in the 1880's destroyed that belief.

In the case of the Sahel, John Kidson of MIT has studied the available records and has found a steady downward trend, a reduction of about seven millimeters of rainfall a year, for the period from 1951 to 1975, with the drought years being a dip in this gradual decline. This long-term decline could be a reflection of a change in global circulation which has caused a weakening of the easterly winds in the upper atmosphere, Kidson says. The reason for such a change is unknown.

In Texas, Griffiths has begun to study the variations in rainfall patterns in the American Southwest. A long-time student of drought, Griffiths points out that detailed information about the number of rainfall days and the average amount of rainfall per storm could be nearly as important as data on the total amount of rainfall during dry periods. Such information could help farmers make a better selection of crops as well as guide irrigation schedules, Griffiths says, and it may help determine whether rainmaking is feasible.

Griffiths and other scientists in the field stress that the climatic future of the arid lands cannot be disentangled from global patterns of climate. And much of the climate research that bears directly on the arid lands is being done far from any desert. For example, Fritts now is spending much of his time trying to confirm a suspected relationship between high-altitude weather patterns over the Pacific Ocean and China and past climatic changes, in North American arid lands, that first showed up in tree-ring studies.

For another, certain deep-ocean cores taken by the research ship *Glomar Challenger* included a layer of wind-abraded sand grains that had been carried long distances by ancient windstorms—evidence of the early formation of the Sahara Desert. Other studies of past rain and temperature patterns from data on tree-ring variations, fluctuations in the isotopic ratios in Antarctic ice cores, changes in pollen patterns on forest fringes—all these and more are being correlated with more detailed, year-by-year information on recent weather changes in the arid lands, gathered by patient gleaning of written records.

TWIN PRIORITIES

Most climatologists would extend Stockton's call for conservatism to specific predictions about the changing climate—particularly short-term changes, where the signal-to-noise ratio—the ratio of climatological information to the "noise" or variability of the system—is distressingly small. One current tenet is that the weather, no less the climate, might never be totally predictable, since there are indications that the two sets of starting conditions, differing only in microscale turbulence fluctuations, as far as can be determined, will in as little as two weeks' time produce large differences in weather. "The climatic system may be so complex that alternative climatic states may be compatible with a given set of boundary conditions," says Kutzbach.

Not surprisingly, climatologists have established twin priorities to help resolve these uncertainties: they need more data about weather and the factors that shape it, and they need better computer models into which that data can be put.

Current computer models, says Stephen Schneider, are good at "one-dimensional" modeling—predictions of what would happen if all conditions but one remained constant. In the real world, he says, no condition can be assumed to remain constant. Thus, computer-based predictions about the effect of a doubling of carbon dioxide or an increase in volcanic activity or any other single factor must be treated cautiously, Schneider says.

There is equal uncertainty about the data used to study climate change. According to John Griffiths, "If you look at the rainfall recorded for many years at some observatory, you'll usually find one of two things. Either the location has been moved at one time or another—and a move of a few miles is enough to change the kind of weather being observed—or the observatory once was outside a city and since has been swallowed up by the city, so that we now are measuring a city climate rather than a rural climate."

Efforts are under way to correct both deficits. Modelers are working to make their models more complex, better able to handle the complexity of the climate system. And a number of efforts have been started to gather more and better data—international efforts such as the Global Atmospheric Research Program and the World Meteorological Organization's drive to establish a chain of weather stations in the Sahel, and national efforts such as the meteorological satellite program of the United States or the research programs supported by the National Science Foundation's recently established Climate Dynamics Program.

The climate is changing, in ways that no one so far can predict. Mankind's best strategy, say the climatologists, is to prepare for harder times and worse weather, while we try to find out more about the weather machine in which we live.

CAPT. JAMES G. TAPP

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. ANDERSON of California. Mr. Speaker, the presence of the U.S. Navy has long been one of the outstanding features of the Los Angeles-Long Beach Harbor area. A vital part of our defense system, the Naval complex has also served as a positive and important economic force in our community.

On February 28 of this year, one of our top commanding officers will retire after nearly 33 years of active service in the U.S. Navy. Capt. James G. Tapp, officer in charge of the Naval Regional Procurement Office in Long Beach, Calif., since August of 1973, will be missed by his coworkers and by the many people in the community who have come to know him so well.

Born in Buford, Ga., in 1926, Captain Tapp entered the U.S. Navy in April of 1944 after attending Emory Junior College for 1 year. Following 15 months of enlisted service, Jim Tapp entered the U.S. Naval Academy in June 1945. Graduating in 1949 with a bachelor of science degree in electrical engineering, he received a commission as an ensign in the Supply Corps.

During the Korean war, James Tapp served as assistant supply officer aboard the USS *Bayfield* and as supply officer on the U.S.S. *C. T. O'Brien*. Captain Tapp's other duties afloat included assignments as supply officer on the U.S.S. *Bexar* and as planning officer with the staff, Commander Service Group 3 embarked in U.S.S. *Ajax*.

Captain Tapp has also had many tours of duty onshore, including assistant supply officer, supervisor of shipbuilding and industrial manager, Ninth Naval District; control division officer, Naval Station, Adak, Alaska; supply officer, Naval Amphibious Training Unit, Coronado, Calif.; contracting officer, Naval Ordnance, White Oak, Md.; executive officer, plans and management directorate, Defense Contract Administrative Services; and contracting officer, headquarters, Military Sealift Command, Washington.

Personal decorations Captain Tapp has received during his Navy career, include the Meritorious Service Medal and the Joint Service Commendation Medal. In addition he has received the following campaign and service medals: American Campaign Medal; World War II Victory

Medal; Navy Occupation Service Medal; National Defense Service Medal; Korean Service Medal; United Nations Service Medal; Expert Rifle Medal; and Korean Presidential Unit Citation.

As officer in charge of the Naval Purchasing Office for the southern California area, Captain Tapp has been responsible for procurements totaling hundreds of million of dollars every year in support of research and development and the fleet weapons systems' modifications. Under his leadership, the Procurement Office became a major economic force in our community, awarding more contracts to socially and economically disadvantaged areas than any activity in the Navy. Captain Tapp has become actively involved in many community support organizations, and has been very supportive of annual opportunity conferences for small business in our area, which my office sponsors to help local businesses learn about how to obtain Federal contracts and subcontracts.

Mr. Speaker, when Capt. James G. Tapp retires, the Navy will have lost a fine and capable officer. My district will lose a valuable friend, who made the U.S. Navy an important asset to our community. I understand that he will shortly be moving to Huntington Beach, where he and his lovely wife, Patricia, will be able to enjoy life to the fullest.

My wife, Lee, joins me in congratulating Captain Tapp on his long and successful Navy career, and wish him the best of fortune in the years ahead. We are sure that Patricia and their daughter, Barbara, and son, Robert, are very proud of his many accomplishments.

PUBLIC WORKS AND JOBS

HON. DONALD J. MITCHELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. MITCHELL of New York. Mr. Speaker, shortly we will be considering a $4 billion extension of title 1 of the Public Works Employment Act of 1976. Given the circumstances existing in our Nation today, I am confident Congress will give an overwhelming vote of approval for this much needed legislation.

However, I must admit concern over a move afoot in the Senate which threatens to undermine our basic purpose with this extension. That purpose is to mount an aggressive attack on unemployment where it is most serious.

A February 21, 1977 New York Times editorial addresses my point of concern. I bring it to the attention of my colleagues with the hope and expectation they will join in expressing opposition to any proposal which would compromise the basic intent of the legislation. Our task, and it is one deserving of the highest priority, is to reduce unemployment where it is most serious and to do so with the greatest dispatch.

The editorial follows:

PENNSYLVANIA PORK AND PUBLIC WORKS

To help stimulate the economy and create jobs, President Carter is proposing to allocate $4 billion for public works—the construction of new schools, sewers, roads and whatever else local governments would like from a Federal list of qualified projects. At the moment, the list of eligible projects is about $22 billion long, so spending the money should present no problems. But Congress is finding problems anyway.

The formulas to determine who shall get how much pork from this public-works barrel are developed along two tracks, in the House and Senate. So far, the House Public Works Committee is holding to last year's formula, which gives weight to the total number of unemployed in each state but provides additional money where unemployment exceeds the national average. By this House formula, New York would receive $466 million over the next two years, New Jersey $200 million and Connecticut $97 million.

The Senate, however, due to the efforts of Senator H. J. Heinz 3d, Republican of Pennsylvania, is considering a new "simplification"—elimination of the special weight for above-average unemployment. Coincidentally, this will enhance Pennsylvania's share of the public works pork by 26 percent, while reducing the share of eight states. New York would lose $94 million (20 percent), New Jersey $41 million (20 percent) and Connecticut $23 million (24 percent). Because more states will benefit than lose from the revision, the Heinz amendment will be difficult to stop.

We do not know what depresses us more: the amendment itself or Senator Heinz's rude salute to his Northeast neighbors.

The difference between a good public-works bill and a bad one does not turn only on the question of whose pork is being gored. In this year's package, for instance, the Carter Administration was seeking maximum economic stimulus but with a minimum risk of causing more inflation.

A public-works dollar that is spent in a city with heavy unemployment in the construction industry would put less pressure on prices than the same dollar spent in a region with a tight labor market. The overall unemployment figures are not sufficient clue to the idleness of construction workers because the nature of unemployment varies from region to region. In some places, most of the jobless are victims of layoffs induced by recession. But elsewhere, the unemployed total reflects so-called structural problems, that is, workers shunned by industry because they are too young, too old or lack skills.

Structural unemployment has persisted through the best of times, unrelieved by such programs as public-works construction. That is why Congress began to target extra funds to areas with above-average unemployment rates. Those regions are more likely to contain pools of high-quality labor that could be put to work with little impact on wages or prices.

Senator Heinz's amendment would treat equally unemployment in Texas—almost entirely structural and not responsive to public-works relief—and in New Jersey where many of the unemployed could be recruited.

So the amendment itself is distressing. Equally so is the defection of Senator Heinz from the Snowbelt caucus. The industrial economies of the Northeast and Upper Midwest have been steadily losing ground to the South and Southwest. Some of this shift in economic strength was inevitable, a reflection of the lure of good weather and plentiful resources. But the trend has been accelerated by Federal policies, by a pattern of aid and expenditure that, arguably, discriminates against the older industrial regions. Reversing this trend in Federal policy requires the collective effort of the affected states. Senator Heinz's unfortunate dash for the caucus exit at first whiff of a little extra cash for Pennsylvania makes us wonder whether the needy states can learn to work together.

NEED FOR THE EQUAL RIGHTS AMENDMENT

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. DRINAN. Mr. Speaker, in the January 1977, edition of the American Bar Association Journal, Prof. Ruth Bader Ginsburg of Columbia Law School examines the history of women's rights under the Federal Constitution. She notes the uneven and sometimes inconsistent interpretation which the courts have given to the relevant clauses. From that checkered history, Ms. Ginsburg concludes that the ERA is indispensable "for a society that believes in the essential human dignity and interdependence of each man and each woman."

While passage of the ERA will undoubtedly remove a number of "gray areas" from constitutional disputation involving official action, it will not resolve all the inequities nor eliminate all gender-based discrimination, as the recent decision by the Supreme Court in the Gilbert case demonstrates. Regular attention to and revision of statutory law will be needed if the promise of the ERA is to be fulfilled.

Professor Ginsburg's article is a very helpful discourse on the need for the equal rights amendment.

The article follows:

LET'S HAVE ERA AS A SIGNAL

(By Ruth Bader Ginsburg)

Last year we celebrated the two hundredth anniversary of the Declaration of Independence, but for most American women it's more important to look at four questions that relate to the present decade of the 1970s. First, how have jurists treated official line drawing by gender before the present decade? Second, how has the judicial response altered in the current decade? Third, what is the purpose and function of the equal rights amendment to the federal Constitution? And finally, how may the presence (or absence) of the equal rights amendment affect Supreme Court precedent?

THE STATE OF THE ART TO 1971

"Anything goes" seems to be a fair summary of the Supreme Court's decisions until 1971. The Court consistently had affirmed governmental authority to classify by gender, as a trilogy of cases illustrates—*Muller* v. *Oregon*, 208 U.S. 412 (1908); *Goesaert* v. *Cleary*, 335 U.S. 464 (1948); and *Hoyt* v. *Florida*, 368 U.S. 57 (1961).

In 1905, in the now long-discredited *Lochner* v. *New York*, 198 U.S. 45, the Court rebuffed a state's attempt to enact protective labor legislation for all workers, men and women alike. But in 1908 in *Muller* the Court upheld a ten-hour day for women only. The decision reflects themes first sounded in nineteenth century decisions—first, that women's place in a world controlled by men is divinely ordained (a thought Justice Bradley expressed in his concurring opinion in *Bradwell* v. *Illinois*, 16 Wall. 130 (1873)); and second, that while men can fend for themselves, women must "rest upon and look to [men] for protection." "Somewhat inconsistently, the Court added in *Muller* that women require the aid of the law "to protect her from the greed as well as the passion of man."

Next in the trilogy, *Goesaert* illustrates the danger lurking behind "protective" labels. This decision upheld a Michigan statute that

allowed women to work as waitresses in taverns but barred them from the more lucrative job of bartender. The law protects women, said the state, while male bartenders plus their union joined in a chivalrous chorus.

One of the plaintiffs was a female bar owner whose daughter, a coplaintiff, assisted in operating the business. The state had protected away mother's and daughter's right to compete with male bar owners. If the Goesaerts would not pay a man to do a job the two women were fully capable of doing themselves, they would have to close up shop. The Supreme Court opinion in Goesaert declares and proceeds from this premise: "Michigan could, beyond question, forbid all women from working behind a bar."

Increasingly, as this century has worn on, women who needed jobs to support themselves and in many cases their families became skeptical of this kind of "protection" from the law. From their vantage point, restrictive labor laws operate less to protect women than to protect men's jobs from women's competition.

In the last in the series, Hoyt, a unanimous Supreme Court held it permissible to limit women's jury service to those who volunteered. This system yielded the result that lay participation in the administration of justice was virtually all male.

By the late 1960s a revived and burgeoning feminist movement spotlighted the altered life patterns of women. Two factors contributed in particular to this changed atmosphere—the virtual disappearance of food and goods cultivated or produced at home and the access to more effective means of birth control. The Equal Pay Act of 1963 (29 U.S.C. § 206(d)) and Title VII of the Civil Rights Act of 1964 (42 U.S.C. § 2000(e) *et seq.*) began to focus national attention on the adversely discriminatory treatment that women encountered in the labor market.

THE JUDICIAL RESPONSE AFTER 1971

The United States Court of Appeals for the District of Columbia Circuit in 1974 summarized the post-1971 developments this way: Supreme Court precedent with respect to gender-based discrimination is "still evolving," "rapidly changing, and variously interpreted" (509 F. 2d 508, 510). In the same year in an article in the *New York University Law Review* Prof. John Johnston, Jr., commented that the courts are "not certain what constitutes sex discrimination, how virulent this form of discrimination is or how it should be analyzed in terms of due process and equal protection." My own appraisal, expressed in an article in *The Supreme Court Review, 1975*, is that the Supreme Court had taken a few remarkable steps in a new direction, but it had shied away from doctrinal development and had left open avenues of retreat.

The first break from the "anything goes" pattern was *Reed* v. *Reed*, 404 U.S. 71, in which the Supreme Court declared unconstitutional an Idaho law providing that as between persons "equally entitled" to administer a decedent's estate, "males must be preferred to females." A year and a half later, in *Frontiero* v. *Richardson*, 411 U.S. 677 (1973), married women in the uniformed services were held entitled to the same fringe benefits as married men. Under the law that the Supreme Court declared unconstitutional, married men automatically received a housing allowance and medical care for their wives, while married women received these benefits only if they supplied all their own support and more than half of their husband's.

In 1974 the Supreme Court retrenched, first in *Kahn* v. *Shevin*, 416 U.S. 351, a decision upholding exclusion of widowers from the Florida statute that grants widows a real property tax exemption. This exemption saved the real-property-owning widow the grand sum of fifteen dollars annually. A benign favor for (widowed) women? The Supreme Court said the fifteen dollar saving compensated women for past economic disadvantage. Florida gave three classes this little tax break: the blind, the totally and permanently disabled, and widows.

Later in 1974 the Court returned a decision impossible to rationalize as a favor to women. In *Geduldig* v. *Aiello*, 417 U.S. 484, the court upheld a California statute that excluded women disabled by pregnancy from a workers' income protection disability insurance plan. On the other hand, the Supreme Court has held that school teachers may not be dismissed or placed on involuntary leave arbitrarily at a fixed stage in pregnancy (414 U.S. 632 (1974)) and that pregnant women ready and willing to work may not be denied unemployment compensation (423 U.S. 44 (1975)).

Absence of a consistent, comprehensible approach to this issue was further indicated last month. In *General Electric Company* v. *Gilbert*, 45 U.S.L.W. 4031 (December 7, 1976), the Court confronted an employer's plan providing nonoccupational sickness and accident benefits to all employees, save only those with disabilities arising from pregnancy. Construing Title VII of the Civil Rights Act of 1964, the Court declared this exclusion entailed no gender-based discrimination at all!

With no pregnant problems on its calendar, 1975 brought the Supreme Court back to the 1971–73 track. In *Taylor* v. *Louisiana*, 419 U.S. 522, the Court overturned its 1961 *Hoyt* women's jury service decision and declared unconstitutional a Louisiana provision that restricted jury service by women to volunteers. In *Stanton* v. *Stanton*, 421 U.S. 7, the Court declared unconstitutional a Utah law that required parents to support a son until he is twenty-one but a daughter only until she is eighteen. And in *Weinberger* v. *Wiesenfeld*, 420 U.S. 636, the Court struck down one of a series of Social Security sex lines. It held a widowed father to be entitled to the same benefits to care for his child that a widowed mother receives.

Is *Wiesenfeld* a men's rights case? Only derivatively. The discrimination started with Paula Wiesenfeld, a wage-earning woman. When she died, her social insurance provided less protection for her family than the social insurance of a wage-earning man. Paula Wiesenfeld paid social security taxes without any discount. But the payout to her survivors, husband Stephen and son Jason Paul, was subject to a drastic discount.

DO WE NEED THE ERA?

The key to the Supreme Court's performance in the 1970s is not so much the specific results of decided cases but how those results were reached. The justices so far have avoided articulating general principles and have shown a tendency to deal with each case as an isolated instance in a narrow frame. No opinion attracting five votes acknowledges a clear perception of what computer runs or federal and state statues so plainly reveal—that the particular statutes presented to the Supreme Court are part of a pervasive design, a design reflecting distinctly nonneutral notions about "the way women (or men) are."

Why does the Court shy away from doctrinal development? For an altogether understandable reason. Justice Powell explained the problem in his *Frontiero* concurring opinion. The Court must act with particular circumspection, he said, in the dim zone proper judicial task) and constitutional amendment (a job for federal and state legislatures).

But the equal protection guarantee exists for all persons, and the Supreme Court has indeed acknowledged that women are "persons" within the meaning of the Fourteenth Amendment. Why, then, the reluctance to interpret the equal protection principle dynamically in this area? Because it is historic fact that neither the founding fathers nor the Reconstruction Congress had women's emancipation on the agenda. When the Thirteenth, Fourteenth, and Fifteenth amendments were added to the Constitution, women were denied the vote, the most basic right of adult citizens. If they were married, in many states they could not contract, hold property, or litigate on their own behalf. Courts are sensitive to that history.

Race discrimination decisions may be anchored with some security to the design of those who drafted the Constitution. Indeed, in the 1872 *Slaughter-House Cases*, 16 Wall. 36, the Court said that the Fourteenth Amendment's equal protection clause is so clearly a provision for the black race that the Court doubted whether any other form of official discrimination would ever be held to come within its purview.

Recognition of women as "persons" occurred in the Supreme Court's 1874 *Minor* v. *Happersett*, 21 Wall. 162, opinion, a decision rejecting a woman's claim to the franchise. Beyond doubt women are "persons" and may be "citizens" within the meaning of the Fourteenth Amendment, the Court said. So are children, it went on to explain, and no one would suggest children have a constitutional right to the franchise.

The adoption of the equal rights amendment would relieve the Court's uneasiness in the gray zone between interpretation and amendment of the Constitution. It would remove the historical impediment—the absence of any intention by eighteenth and nineteenth century Constitution makers to deal with gender-based discrimination. It would add to our fundamental instrument of government a principle under which the judiciary may develop the coherent opinion pattern lacking up to now. It also should end the legislative inertia that retards social change by keeping obsolete discriminatory laws on the books. And, as Justice Stevens observed in his confirmation hearings, the amendment would have symbolic importance. It would serve as a forthright statement of our moral and legal commitment to a system in which neither sons nor daughters are pigeonholed by government because of their sex. Rather, so far as laws and officialdom are concerned, males and females will be free to grow, develop, and aspire in accordance with their individual talents, preferences, and capacities.

WHAT ARE THE CONSEQUENCES?

What are the consequences of the High Court's unwillingness to articulate a principle of general application governing legislative line drawing by gender?

A look at the Court's docket for this current term indicates the situation. First, Oklahoma's 3.2 beer law is before the Court (No. 75–628). This is a "protective" statute with an unusual twist in that it permits girls to buy 3.2 beer or work in a beer parlor at the age of eighteen, while boys must wait until they are twenty-one. The plaintiff, Carolyn Whitener, is an entrepreneur who sells 3.2 beer, and her coplaintiff is an apparently thirsty young man. It is an embarrassment that a law of this kind is retained by a legislature and must occupy the attention of the highest court in the nation.

Second, there is another Social Security Act challenge (No. 75–699). W, a wage earner, dies. H, her spouse, is not himself covered under social security. H seeks survivors' benefits under W's account. The law says H is not entitled unless W outearned H three to one. For a spouse to qualify under a female wage earner's account, the female must provide all her own support, plus half of his—in other words, three fourths of the total family support.

If the situation were the other way around—if a male were the covered worker,

a female the survivor—the survivor would qualify for benefits without regard to H's and W's respective contributions to family income. Women are put on a par with men for social security contribution purposes, but the payout under a woman's account is less than the payout under a man's.

That very same gender differential was declared unconstitutional in *Frontiero* v. *Richardson*, the 1973 military fringe benefits case. And *Weinberger* v. *Wiesenfeld*, the 1975 social security case, overturned a differential that the solicitor general described as "closely analogous." Yet despite a unanimous decision in *Wiesenfeld* and a near unanimous (eight-to-one) judgment in *Frontiero*, the Court did not deem it appropriate to affirm summarily. And the solicitor general argues, with some justification, that each precedent in the 1970s was written for one case and one day alone.

With the E.R.A. on the books, we may expect Congress and state legislatures to undertake in earnest, systematically and pervasively, the law revision so long deferred. History should teach that the entire job is not likely to be done until the E.R.A. supplies the signal. In the event of legislative default, the courts will be guided by a constitutional text clearly and cleanly in point.

Without the E.R.A., the judiciary will continue to be plagued with a succession of cases challenging laws and official practices that belong on history's scrap heap. The Supreme Court will confront again and again the need for principled decisions to guide the the lower courts and the difficulty of anchoring those decisions to the text of eighteenth and nineteenth century draftsmen.

The American Bar Association endorsed the equal rights amendment in August of 1974. The resolution aroused scant opposition. No one spoke against it in the House of Delegates; only a dozen or so "nay" votes were audible. The resolution included a commitment to work for ratification by the number of states required to write the amendment into the Constitution.

That commitment is hardly fulfilled. It is my hope that the Association, as a reasoned voice for the profession, will move swiftly this year to carry out its 1974 undertaking and its pledge to play an active role in educating the public. For the American Bar Association, perhaps more than any other professional organization, has the capacity and resources to dispel misunderstanding on this issue and to explain why the E.R.A. is the way for a society that believes in the essential human dignity and interdependence of each man and each woman.

CONGRESSIONAL PAY

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. KOSTMAYER. Mr. Speaker, I strongly support a resolution requiring a vote of the full House on the recommended pay raises of the President's Commission on Salaries.

I do so because we ought to have the guts to accept or reject the raises. It may be that some persons occupying positions in the legislative, judicial and executive branches do merit a salary increase. I note the last pay raise for some of these positions was in 1969, and I think the Federal Government should have a salary schedule which reflects changes in the cost of living and is attractive enough to attract high-caliber individuals while being competitive with the private sector.

What troubles me about the Quadrennial Commission's recommendation and the reason I favor a vote is that Congress is by its action or lack of action only furthering public sentiment that already regards us as political cowards. Mr. Speaker, the people are right and we are wrong.

Article I of the Constitution imposes a duty on the Congress to establish compensation for its Members and other Federal employees. Congress has structured the Commission in such a way that its proposal if sponsored by the President, becomes law if the House or Senate does not object within 30 days. I am a cosponsor of legislation to change that, Mr. Speaker.

By this formula Congress has relieved itself of just one more responsibility. We who are here sought the responsibility of bearing the burdens this job imposes. We should accept those burdens.

If raises are necessary, Congress should accept the recommendations. If in its collective judgment the raises are unjustified, Congress should reject them.

Some would argue that Congress is in a particularly sensitive position in that it can vote itself a raise, something few other people in our society have the privilege of doing. Under this reasoning, it is proper for Congress to ask an impartial body to determine reasonable compensation.

I agree, but the Commission, the impartial body, should have only the power to propose, not enact, the level of compensation. The Congress should legislate the compensation. We, not they, are the legislature. We, not they, are elected.

A Member of Congress has to vote on many difficult issues every year, and I am sure every Member has felt obliged to take unpopular stands and absorb criticism at home. Certainly, the issue of a higher salary is not so thorny that it must be avoided. A Congressman knows his worth and should be willing to defend his opinion of himself.

I must also comment disfavorably on the parliamentary maneuvering which has brought the disapproval resolution to the Post Office and Civil Service Committee. Apparently, there is no way that this committee can report out the resolution in time to kill the pay raises. I am disturbed that the leadership should go to such lengths to avoid a vote.

It is this type of maneuvering which has given the public such a cynical view of Congress. The behind-the-scenes plotting we have seen on this issue will just reinforce the public's opinion of this body.

OLIVER E. MEADOWS

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. TEAGUE. Mr. Speaker, the Congress of the United States and the veterans of this country have lost one of the most able and knowledgeable man in Mr. Oliver E. Meadows, who retired last year from the post of staff director of the House Committee on Veterans' Affairs.

It was my privilege to have met Oliver Meadows back in 1945 at McCloskey General Hospital in Texas where the two of us were recovering from wounds received in World War II. Shortly after Oliver's separation from the service, he took up a post as deputy director for the State approving agency in Austin, Tex. This was the State agency which had jurisdiction over the approval of schools and courses for veterans desiring to avail themselves of the benefits of the GI bill.

In 1950, I sought and gained authority to put together a select committee for the purpose of investigating the abuses to the GI bill. By 1951, much of the groundwork of the committee had been completed, but it lacked direction. It was at this time that I prevailed upon Oliver Meadows to come to Washington and assume the leadership of this committee. The records will show and reflect the job that he accomplished in the 4 years that this select committee labored in this field.

In 1954, when I became chairman of the House Committee on Veterans' Affairs, I asked Oliver to assume the position of staff director, a position he held from that date to his retirement in December of 1976. I cannot think of any one individual who knows more about veterans' benefits and the attendant laws than does Oliver Meadows. His stewardship of these benefits during the more than 20 years of his service reflect great credit to his devotion to his job and an innate understanding of those involved in the writing and administering of these laws. In addition, I do not believe there are many chairmen of committees who have enjoyed the support and complete loyalty of a staff director as I have on the part of Oliver Meadows.

Very few people realize that the budget for the Veterans' Administration ranks second in expenditure of Federal dollars. No one was more aware of this fact than Oliver Meadows and in each consideration on legislation, he brought this to bear in the deliberations; weighing benefits against cost in order that our entire veterans program did not become top-heavy and crumble from within. I, along with the present chairman of the Veterans' Affairs Committee, the Honorable RAY ROBERTS, and the chairman of the House Committee on Appropriations, the Honorable GEORGE MAHON, both of whom were well aware of the capabilities of Oliver Meadows, recommended him unhesitatingly to the new Carter administration for appointment as the Administrator of Veterans' Affairs. He would have been a decided asset to both the Carter administration and to the veterans of this country.

Unfortunately, Oliver Meadows was not contacted. He is however enjoying retirement in Texas where he is building a home for him and his wife of many years on the property he purchased under the Texas State veterans land program, and where he had been ranching for the past 20 years. I wish both him and his wife

well in their retirement. He has earned it; and perhaps in view of some of the recent proposals relating to the future of the Veterans' Administration and the benefits they administer to millions of veterans in our country, which run counter to the program which Oliver Meadows shepherded through the Congress over the years, he may be better off. I hope so.

NEW JERSEY FISH KILL

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. FORSYTHE. Mr. Speaker, ocean dumping of sewage sludge is a highly visible target and, as such, is frequently blamed for a host of problems. One such example is the recent fish kill in New Jersey. Although I strongly oppose continued dumping of sewage sludge in the ocean, I feel that in this instance dumping was not the major culprit. Accordingly, I would like to bring to the attention of my colleagues in the House a detailed analysis of the occurrence which I have developed. I have followed up my discussion with a brief presentation of how to avoid degradation of yet another ocean area:

NEW JERSEY FISH KILL

During the summer of 1976, two environmental disasters occurred in the mid-Atlantic region: in July, "floatables" washed up on the Long Island shoreline, and, throughout the summer, an extensive fish kill plagued New Jersey's coastal waters. Some observers have incorrectly charged that the ocean dumping of sewage sludge was a major cause of these disasters. The vast majority of the scientific evidence, however, is summarized by David Wallace, Associate Administrator for Marine Resources of the National Oceanographic and Atmospheric Administration during our Committee's hearings in July of 1976: "It is evident from all information available that the dumping of sewage sludge at the existing site had a negligible effect in causing either the wash-up of floatables on Long Island's south shore beaches or the fish kill off the coast of New Jersey." [20]

Unfortunately, some involved parties are reacting to these disasters in a somewhat expedient and opportunistic manner. For example, David Bardin, Commissioner of the New Jersey Department of Environmental Protection, has partially based a recommendation which has potentially grave ramifications—moving all ocean dumping to a site 106 miles offshore—on the questionable assumption that such a move would reduce the likelihood of another fish kill. At the same time Mr. Bardin makes this recommendation, he adds, "Given the pitifully inadequate data on both the biological and physical conditions not only at the 106 mile site but also for the entire edge of the continental shelf and slope off New Jersey, this [recommendation] is in large part a matter of judgment and unfortunately not based on the firm and solid evidence we would prefer."

I believe the decisions regarding dumpsite locations and, more generally, the interim steps which must be taken to expedite the phase-out of ocean dumping should not be affected by events unrelated to sewage sludge dumping, such as this summer's fish kill. A summary of the scientific evidence assembled to date, presented below, will support the testimony of John Rhett, Deputy Assistant Administrator for Water Program Operations, EPA, before our Committee last October; Mr. Rhett stated the algae bloom which triggered the fish kill "would have occurred anyway," [21] even if there had been no sludge dumping.

The precise mechanism by which the Atlantic ocean waters off the coast of New Jersey became anoxic is not completely understood and, in all likelihood, may never be understood. In an attempt to determine the cause of anoxia on the Middle Atlantic Shelf during the summer of 1976, the National Science Foundation International Decade for Ocean Exploration convened a scientific workshop on October 15 and 16, 1976.[22]

The widely-accepted theory accounting for the anoxic conditions involves algae. In January, a massive bloom of algae occurred from Cape Cod to Cape May along the outer part of the Continental Shelf. In February, the bloom was located from 30 to 100 miles off the New Jersey coast, covering an area approximately the size of New Jersey.

This tremendous bloom of algae moved towards New Jersey's shoreline as southwesterly winds transported offshore waters towards the coast. The algae consumed oxygen during its respiratory process. After it died, oxygen was consumed as the algae decomposed. Whether the algae was solely responsible for the observed oxygen-depletion could not be definitively determined by the workshop. The possibility of other, as yet unknown, phenomena contributing to this oxygen-depletion can never be ruled out; however, the preponderant weight of evidence points to the algae bloom as the cause of anoxic conditions in waters off New Jersey's coast.

The workshop also addressed the cause of this year's large bloom of algae. It is known that the algae must feed on nutrients—such as nitrogen and phosphorous—in order to thrive. Such nutrients are available naturally and are also introduced into the marine environment from sources such as sewage sludge and ocean outfalls.

While there is a possibility that human-introduced contaminants may have contributed to the 1976 mid-Atlantic algae bloom, it is important to note at the outset that similar algae blooms have occurred frequently in the past without that stimulus of human-introduced nutrients. As far back as 1882 and 1899, local reports indicated that extensive algae blooms occurred in the New York Bight area. In fact, Dr. Theodore J. Smayda of the University of Rhode Island's Grade School of Oceanography noted that blooms of algae are very commonplace. This year, for example, Dr. Theodore Packard of the Bigelow Laboratory for Ocean Sciences observed a large algae bloom off the coast of Peru. Mr. Frank Steimle of the National Oceanic and Atmospheric Administration noted that a bloom similar to the 1976 bloom off of New Jersey occurred in 1966.

Considerable evidence has been presented which demonstrates the insignificant role of ocean dumping as a source of nutrients feeding the algae bloom. The State of New Jersey DEP estimates that sewage sludge dumping is responsible for just 7% of the nitrogen, 4% of the phosphorous, and 11.5% of the organic carbon which is introduced by humans into New Jersey's coastal waters. Furthermore, the nutrients introduced by humans are a fraction of the level of nutrients occurring naturally in the marine environment. Dr. John Sharp has estimated in the NSF workshop report that estuarine input and sludge dumping contribute less than one-fourth of all nutrients present.

While any theory that sewage sludge dumping alone caused this summer's fish kill has no credibility, other theories explaining this past summer's unusually large algae bloom have been advanced. For example, Dr. John J. Walsh, Director of the Oceanographic Sciences Division of Brookhaven National Laboratory, notes that menhaden, a type of fish known to eat the algae, were largely absent from the affected area in 1976. If these fish—which have been present in much greater numbers in recent years—were responsible for stifling the growth of the algae, then the menhaden's absence could be largely responsible for the extensive growth of algae. Furthermore, Dr. Walsh estimates that an idealized school of menhaden could crop the mid-shelf spring bloom in as short a time as seven hours if the fish were present.[23] Corroborative evidence may be found in Peru. In 1976 unlike other years, anchovies were missing from Peru's coastal waters. The absence of these anchovies, a species also believed to feed on algae, could explain the large algae bloom observed off Peru.

While many interesting theories were advanced to account for this year's massive bloom of algae, the workshop concurred that current data did not warrant any final conclusions regarding its cause. However, evidence introduced at the workshop indicated that natural factors were clearly dominant.

Although evidence suggests that this year's anoxic conditions stem from a phenomena of nature—algae blooms—scientists will probably never resolve with 100% certainty the precise cause of oxygen-depleted waters off of the New Jersey Coast. However, much more important than the original cause of the anoxic conditions are the factors which allowed these conditions to persist.

As the situation evolved, deep waters on the Mid-Atlantic shelf became oxygen-depleted, while surface waters remained oxygen-rich. Under the vast majority of meteorological conditions, surface and deep waters will intermix, and anoxic conditions will quickly abate. Under such usual meteorological conditions, the anoxic condition will be highly transient, leading to slight or no loss of marine life.

Meteorological and climatological data in 1976 explain why a large area of deep ocean water could remain oxygen-depleted for such an extended period, causing a major loss of marine life. In 1976, according to Henry Diaz of the National Climatic Center, several very unusual meteorological conditions occurred which acted synergistically to prevent any exchange between surface waters and deeper waters. First, surface water temperatures were much higher than usual. Also, monthly sea level pressures were much higher than normal in early 1976. Importantly, there was a dearth of storm activity in the area which became anoxic. In the first half of 1976, the incidence of these storms was down by over 60% from previous years.

The net effect of these highly unusual conditions was that surface waters became much warmer than deep waters. About twenty meters below the water's surface, a thermocline (area where the water temperature changes drastically) developed, blocking the mixing of waters above and below the thermocline. Thus, when water below the thermocline became oxygen-depleted, the existence of a thermocline prevented oxygen replenishment from oxygen-rich surface water. It should be emphasized that natural phenomena alone created this thermocline off the New Jersey coast; and without the thermocline, any kill of marine life would have been slight.

The anoxic condition in the ocean's water first developed well off the coast of New Jersey. However, highly uncommon weather conditions occurred which are probably responsible for moving offshore anoxic water into coastal regions. The National Climatic Center reports that winds in the New York Bight area had an uninterrupted southerly

Footnotes at end of article.

component from February to August. These unusual conditions, according to Dr. Charles A. Parker of the National Oceanic and Atmospheric Administraiton, may very well have brought offshore anoxic waters close in to the coast, a region heavily populated by marine life.

The net sum of the data, then, indicates that the algae bloom and subsequent fish kill were largely natural phenomena. Dr. Charles Parker echoes my analysis of the problem when, in the NSF workshop report he notes "the atypical, possibly synergistic, set of circumstances which will probably be involved in explaining the fish kill/anoxia problem and which will probably provide major portions of the definitive scenarios," and adds, "I personally believe that the fish kill has been basically controlled by natural phenomena." [24]

The reason I have dwelt upon this summer's fish kill is that I want to make it perfectly clear this disaster has no bearing on a decision regarding possible locations of dumpsites. Sewage sludge dumping and the likelihood of future fish kills are completely unrelated. Furthermore, there is absolutely no scientific evidence that moving all ocean dumping to the 106-site will have any effect on the likelihood of possible future fish kills. Moreover, this year's fish kill was caused by an algae bloom which started along the edge of the Continental Shelf. One could argue that if locating dumping activities at the Continental Shelf's edge were to have any effect on future fish kills, it would tend to increase their frequency and likely extent.

PROPOSED ACTION

While scientific evidence demonstrates that the ocean dumping of sewage sludge had no significant causal role in the fish kill of 1976, the problem of ocean dumping cannot and will not be ignored. Scientific analysis shows that ocean dumping causes tremendous environmental damage in the immediate area of the dumpsite; therefore, steps must be taken to ensure that no new dumpsites are used.

Today, I am announcing a plan which will ensure that harmful ocean dumping is phased out as quickly as possible. This plan was formulated and developed only after a careful analysis of the current situation. Two important observations have been made: first, as long as ocean dumping is the cheapest means of disposing of wastes, alternatives will be neglected; second, money put into alternatives will serve to reduce their cost.

Based on these two observations, a constructive and direct method of phasing out ocean dumping can be formulated. I am proposing that, upon application for a permit, ocean dumpers shall be assessed a substantial penalty fee. If the dumper applies for an Interim permit (granted when wastes have an unacceptable adverse impact on the environment), the ocean dumper shall, by law, be required to pay for all administrative costs involved in processing ocean dumping permit applications. Also, the dumper will be required to pay an additional fee equal to the dollar difference between the cost of dumping the wastes in the ocean and the cost of disposing of the wastes by means of a constructive alternative. This fee will be used for research into the alternative methods, which will have the effect of reducing the costs of the alternatives.

A dumper applying for a Special permit (granted when the dumping of wastes is shown to have no significant adverse impact on the environment) will be assessed the full administrative costs involved in processing permit applications. However, no additional fee for research will be levied against "safe" dumpers.

Footnotes at end of article.

This plan will accomplish several different goals. First, the administrative costs of processing permit applications of ocean dumping will no longer be borne by the general taxpayer. Rather, these costs associated with ocean dumping will be entirely supported by the dumpers themselves. I feel that this structure is considerably more equitable than the current situation where nominal fees are charged, and much of the cost is shouldered by the general public.

Under the plan I am proposing today, ocean dumpers will have no incentive to continue ocean dumping. The money they pay out for ocean dumping permits will equal or exceed the cost of disposing of wastes by means of constructive alternatives. Thus, it will be a natural step for ocean dumpers to utilize constructive alternatives—by doing so they will save themselves money and save our nation the social cost of continued pollution of the ocean.

While dumpers will be anxious to turn to alternatives as soon as practical, ocean dumping may continue during an interim period. During this time, revenues will be generated which will be used for research purposes. Such research will tend to reduce the costs of more constructive alternatives—a benefit for all of society.

Some have argued that schemes such as moving the dumpsite an extra 100 miles offshore will force dumpers to turn to alternatives by increasing the cost of ocean dumping. For example, the New Jersey Department of Environmental Protection proposal would increase costs of dumping by $24 million a year. The New Jersey DEP did not include in their cost estimates the increased fuel cost and the cost of acquiring additional ocean dumping barges.

I cannot bring myself to give serious consideration to any proposal which literally pours in excess of $24 million a year down the drain, which increases the strain on our energy supplies, and which degrades a deepwater site in a way which may, over the course of time, have long-term effects on Northwest Atlantic fisheries. Frankly, I can see no merit in a proposal of this nature.

It's obvious to me that ocean dumping can be phased out in a more effective, more constructive way. Why should we waste millions of dollars a year to degrade a deepwater site when the money could just as well be applied for constructive purposes? Why should we risk serious long-term environmental degradation and potential contamination of Northwest Atlantic fisheries for no apparent reason? Should we turn our back on the scientists who tell us—

Moving dumping activities from the Bight area will do little to improve that area and much to destroy the deep-water site;

That moving the dumpsite will have no effect on the likelihood of a future fish kill similar to that of the summer of 1976—an event which had virtually no relationship to sewage sludge dumping;

That dumping in deep water areas will permanently degrade the ambient marine environment with repercussions that may be felt for years, including contamination of red crab, flounder, porgy, butterfish, lobster, squid, and hake fisheries.

I firmly oppose such attempts to squander our resources. Surely funds in excess of $24 million annually should not be wasted. I am confident that the plan I have proposed will more effectively and expeditiously phase out ocean dumping than alternate proposals such as moving ocean dumping activities to the 106-mile site. I strongly believe that the time has come to move decisions regarding the environment outside of the arena of political expediency and into the arena of rationality. It is in this spirit that I announce a new approach to ending the problem of ocean dumping. My staff and I are currently in the process of drafting legislation to amend the Marine Protection, Research, and Sanctuaries Act to implement this proposal. I anticipate that the Fisheries and Wildlife Conservation and Environment Subcommittee, of which I am the Ranking Republican Member, and the Oceanography Subcommittee of the House Merchant Marine and Fisheries Committee will consider this legislation and hopefully, share my conviction that the time has come to logically and efficiently end ocean dumping in a manner which will minimize environmental degradation.

CONCLUSION

In sum, a careful analysis of the scientific data clearly suggests that dumping should be confined to the present dumpsite. Only if monitoring of existing sites indicates, in the future, that the sites are becoming more heavily stressed should the alternate dump sites 25–30 miles off the New Jersey shore be used. These sites have been carefully studied, likely consequences of dumping in these areas are understood, and the shallow waters are known to recycle wastes. However, the measures I am introducing today to hasten a phaseout of the ocean dumping of sewage sludge should ensure that these alternate dumpsites will never be used.

Proposals to move ocean dumping of secondarily treated sewage sludge to the 106-site are indefensible on a scientific basis. Calling for such use of the 106-site can only be based on expedient political motives. The mentality involved in suggesting such a short-sighted quick fix non-solution is reflective of the mentality responsible for the serious pollution problems our society faces today. The philosophy of "out-of-sight, out-of-mind," with its long-term and potentially devastating environmental consequences, is no forthright and respectable way to approach the problem of ocean dumping. Rather, I believe the direct and constructive steps I have outlined today represent a positive approach to the problem of ocean dumping—an approach which is above political motives and which benefits all of society.

RECYCLING MUNICIPAL WASTEWATER FOR DRINKING WATER

HON. JAMES P. (JIM) JOHNSON

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. JOHNSON of Colorado. Mr. Speaker, this year's serious lack of adequate snowfall in the mountains of the West and the lack of normal rainfall in the Western States further demonstrates the need for deliberate and constructive programs to emphasize and implement the careful and wise use and reuse of the already scarce and vital water resources of the West. Much has already been done by local, State, and Federal governments to minimize the excessive loss and imprudent use of this life-supporting resource, but more must be done if potential disaster is to be avoided. Drought conditions exist in many areas of the West at this moment, and the continued lack of adequate snowfall and rain in the West and Midwest provides

the potential for even more serious drought conditions over a wide expanse of the country within the next several months. Rationing of water supplies is occurring right now in some areas of the West. Just recently President Carter declared 13 counties in Colorado disaster areas because of severe drought conditions which have seriously affected our farming and ranching activities, which in turn impact on the Nation as a whole.

Water reclamation and conservation programs must continue if a resolution of the water supply situation is to be found. All methods of water use and reuse must be investigated and implemented to provide for the future. Among the long-range programs to meet the problems of scarce water supplies is a national water recycling program. Under provisions of the Federal Water Pollution Control Act, the Water Resources Research Act, the Saline Water Conversion Act, and the Safe Drinking Water Act, progress has been made regarding recycling of our water resources, but more must be done. According to the EPA, under the provisions of the Federal Water Pollution Control Act and the Safe Drinking Water Act, over 360 projects are underway to investigate and implement programs to recycle municipal wastewater for irrigation, industrial reuse, groundwater recharge, and recreation. Those programs should continue and be enlarged so that health and technical information can be gathered to facilitate the most effective reuse of municipal wastewater. According to the EPA, the total wastewater reuse projects presently in place in the United States still 2 percent of the total amount of wastewater which is available for recycling for various purposes.

Unfortunately, one aspect of the municipal wastewater reuse program which has not received adequate EPA support and attention is the recycling of municipal waste water for use as drinking—potable—water. Specifically, the EPA has not taken any substantial positive action to request the appropriation of $25 million in funds for potable reuse demonstration projects as authorized in Section 1444 of the Safe Drinking Water Act of 1974 (P.L. 94–523). Mr. Speaker, on December 23, 1976, I wrote a letter to EPA Administrator Russell Train, inquiring as to why the EPA has not followed through with the will of Congress, as expressed in Public Law 94–523, regarding the providing of cost-sharing grants for potable reuse demonstration facilities. The following is the reply I received from Deputy Assistant Administrator for Water Supply, Victor J. Kimm:

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, D.C., February 2, 1977.

Hon. JAMES P. JOHNSON,
House of Representatives,
Washington, D.C.

DEAR MR. JOHNSON: This is in response to your letter of December 23, 1976, in which you expressed your concern regarding the apparent lack on the part of the Environmental Protection Agency (EPA) to pursue the establishment of demonstration facilities to examine the reuse of municipal wastewaters for potable purposes. The demonstration of municipal wastewater reuse is authorized by Congress under Section 1444 of the Safe Drinking Water Act.

The Agency did not request funds under Section 1444 of the Act between Fiscal Years 1976 and 1977. We concluded that the small increase in funding available for the water supply program was better devoted to increasing grants to the States in order to facilitate the States' ability to assume primary enforcement. In addition, there are many technical uncertainties concerning reuse that take us to the limits of current knowledge of the health significance of small quantities of a variety of contaminants which would make assessing current demonstration projects very difficult.

Nonetheless, our Agency is still very much interested in potable reuse of municipal wastewater. However, within EPA's current budget constraints and the immediate mandatory goals directed by the Safe Drinking Water Act, our Agency is unable to support the demonstration of municipal wastewater reuse for potable purposes.

We thank you for your interest in municipal wastewater reuse and we hope that this information has added to your knowledge on this subject.

Sincerely yours,

VICTOR J. KIMM,
Deputy Assistant Administrator for Water Supply (WH–550).

Mr. Speaker, Mr. Kimm refers to the "technical uncertainties" among the reasons why EPA has not requested funding under section 1444 of Public Law 94–523. I would point out that these technical uncertainties as well as related health questions are precisely the areas of concern which can only be fully investigated and resolved through a practical demonstration size facility which would qualify for cost-sharing grants under the provisions of the Safe Drinking Water Act. Such demonstration projects would, over a period of several years necessary to fully investigate the health and technical aspects of the program, provide the necessary basis for full scale wastewater reuse facilities to provide potable water which will assist in the overall national goal of conserving and making the best possible use of our water resources.

I am today introducing legislation which would provide for a simple amendment to the Safe Drinking Water Act. The amendment would remove the present discretionary language in the act regarding cost-sharing grants for potable reuse demonstration plants and substitute language to require the EPA Administrator to offer such grants. The text of my amendment reads as follows:

H.R. —

A bill to require the Administrator of the Environmental Protection Agency to exercise his authority under the Safe Drinking Water Act to make grants for certain demonstration projects

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (a) of section 1444 of the Public Health Service Act (42 U.S.C. 300j–3(a)) is amended by striking out "The Administrator may make grants" and inserting in lieu thereof "The Administrator shall offer grants".

(b) Subsection (c) of section 1444 of the Public Health Service Act (42 U.S.C. 300j–3(c)) is amended to read as follows:

"(c) For the purposes of making grants under subsections (a) and (b) of this section, there is authorized to be appropriated $10,000,000 for the fiscal year ending September 30, 1978."

Mr. Speaker, I ask for your support and the support of my colleagues on the Interstate and Foreign Commerce Committee and its Subcommittee on Health and Environment, as well as the support of all my colleagues from Western and Midwestern States who are vitally concerned about the proper and efficient use of our water resources, for the extension of the provisions of the Safe Drinking Water Act and inclusion of language to insure the offering of cost-sharing grants for demonstration projects designed specifically for the recycling of municipal waste water for use as drinking water. The technology exists and has been proven in pilot size facilities in several parts of the Nation. It is essential that the technology be refined and proven in a large-scale facility of demonstration size, and it is also essential that the health-related issues be thoroughly investigated and resolved through such a demonstration size facility. I ask for the support of all my colleagues in this effort to provide the necessary authorization and subsequent appropriations for this vital program.

THE GARRISON DIVERSION UNIT AND CANADA

HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. RYAN. Mr. Speaker, last Friday, in a major reversal of its previous position, the Department of State acceded to a Canadian request that construction on a controversial feature of the Garrison Diversion Unit be halted until the International Joint Commission completes its review of the boundary waters issues generated by the project. The feature in question was the proposed Lonetree Reservoir in central North Dakota, which was to be the subject of a Department of the Interior contract award in March 1977. The Department of State assured the Canadian Government that the Lonetree Reservoir contract will not be awarded until the two Governments have had an opportunity to review the International Joint Commission's recommendations on Garrison, which are due in June.

The Canadian Government has objected to the Garrison project since 1970. In a number of formal diplomatic notes over the past 6 years, the Canadians have charged that the project would violate the Boundary Waters Treaty of 1909 by polluting rivers crossing the border to the detriment of health and property in Canada.

In 1974, the Department of State agreed to halt all construction on the project which potentially affected Canada until an agreement is reached. But, unfortunately this agreement did not specify which portions of the project were to be deferred and which were to be

allowed to continue. Subsequently, the Bureau of Reclamation, interpreting the agreement to its advantage, announced intentions to continue construction on Lonetree Reservoir and associated dikes and dams.

In 1975, the Conservation, Energy and Natural Resources Subcommittee of the House Government Operations Committee began a review of the Garrison Diversion Unit in an effort to propose solutions to some of the complex economic, environmental and international issues surrounding the project. This investigation resulted in the issuance of a comprehensive report on Garrison by the Government Operations Committee in July 1976 (H. Rept. 94–1335).

In House Report 94–1335, the committee examined, among other issues, the international boundary dispute with Canada. Based on our complete review of all available information provided by the Department of the Interior, the State Department and the Canadian Government, the committee determined that under the present project plan authorized by Congress, the Lonetree Reservoir does possibly affect Canada. According to the report:

> . . . the Bureau of reclamation recognizes that the overall project plan, including the McCluskey Canal and the Lonetree Reservoir, do potentially affect Canada. However, as a matter of convenience to allow continued construction, it takes the position that the project will affect Canada only at that point where construction would begin on features falling within the Souris River basin . . .

The committee took exception to the Department of the Interior's interpretation of the Canadian-United States agreement and recommended that land acquisition and construction on the Lonetree Reservoir be halted "until the Canadian and U.S. Governments have agreed upon an acceptable alternative to the present project plan."

This matter became the subject of a hotly contested debate in the House of Representatives during consideration of the fiscal year 1977 public works appropriation bill last summer. At that time an amendment proposed by the gentleman from Minnesota (Mr. FRASER) to defer funding for the Lonetree Reservoir, failed by a vote of 151 to 257.

Then, in October 1976, the Canadian Government formally requested that Lonetree Reservoir Reservoir construction be halted until the IJC completes its study.

Mr. Speaker, the Garrison controversy is one of several issues that has strained our good relations with our northern neighbor in recent years. It is only fitting, therefore, that on the eve of Prime Minister Trudeau's visit to the United States the Carter administration has taken positive and necessary action to comply with a very reasonable Canadian request.

It is well known that the Garrison project has been the subject of a growing domestic controversy as well. The project needs to be reevaluated. By acceding to Canadian demands, the Carter administration bought valuable time to reevaluate the Garrison project and to study the possible alternatives necessary to solve the boundary dispute and domestic environmental and economic problems.

This was a tough and courageous decision for Secretary Andrus to make as it was for Secretary of State Vance. Nevertheless, I believe it to be wise and necessary, and I am encouraged by the willingness of the new Carter team to do what they believe to be right regardless of the political heat that might result. This decision reflects a desire to take charge of the bureaucracy and to make decisions based on sound information. It is a refreshing change from what we have experienced in recent administrations.

A BILL TO INCREASE THE MINIMUM WAGE RATE

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. DENT. Mr. Speaker, today I am introducing a bill to increase the Federal minimum wage rate. The purpose of the legislation is twofold. First, the bill will assist low-wage workers by increasing their purchasing power which has been undermined by the continuous increases in the cost of living. I am referring not only to the majority of low-wage workers whose last minimum wage increases became effective more than 1 year ago, but also to those workers who received their last legislated increase the first of this year. If we do not enact legislation within the next few months to provide further increases for all these workers, they will continue to experience the full brunt of inflation as the cost-of-living increases while their earnings stagnate.

Second, the legislation will initiate a new, orderly method for the imposition of regular incremental increases in the minimum wage rate, in order to avoid the kinds of economic disparities just discussed. As drafted, the bill provides for an initial increase, 30 days after enactment, resulting in a minimum wage rate equivalent to 55 percent of the 1976 calendar year average of the average hourly earnings in manufacturing. Effective January 1, 1978, and for each succeeding year, the minimum wage will be 60 percent of the same earnings base data, except that the period from which the annual average will be derived is the 12 months preceding September 30 of the year prior to the effective date. The coverage distinction between nonagricultural employees will be eliminated. That is, all nonagricultural employees will be entitled to the same wage rate increases at the same time. The coverage distinction for agricultural employees will be phased out. Thirty days after enactment, the wage rate for agricultural employees will be 5 cents less than that of nonagricultural employees. Effective January 1, 1978, and for each succeeding year, agricultural employees will be entitled to the same minimum wage rate as nonagricultural employees.

Mr. Speaker, having been engaged in the minimum wage debate for many years, I am convinced that despite the laudatory efforts of successive Congresses, it is time to require minimum wage increases in a regular predictable manner. The wage-setting process I am proposing, commonly referred to as "indexing," has many advantages over the highly irregular and frequently chaotic legislative process:

First. Low-wage workers would benefit by a system of annual increments rather than waiting several years for Congress to legislate a larger increase.

Second. A series of smaller increases, instead of erratic major increases, would provide greater stability to the wage setting process.

Third. Employers would benefit by being able to anticipate changes in the minimum on a regular basis. Our low-wage workers should no longer have their livelihoods dependent upon legislative delays and sometimes inaccurate wage rate forecasts.

Providing yearly minimum wage increments based on a percentage of average hourly earnings in manufacturing will enable minimum wage workers to maintain continually the "minimum standard of living necessary for health, efficiency, and general well-being." Average hourly earnings in manufacturing was chosen as the indexing series through a process of elimination. Other earnings series or indexing bases were considered and rejected. The CPI, used, among other things, to determine the cost of living for support payments under the Social Security Act, has proved to be not only erratic but overly influenced by precipitous price changes. Average hourly earnings for the nonfarm private economy includes production workers and nonsupervisory employees at the minimum wage level as well as employees exempt from the law. Indexing the minimum to this earnings series possibly could produce a built-in multiplier effect on future minimum wage rate determinations. The Hourly Earnings Index, though adjusted to exclude certain effects on wages, is not adjusted for the influence of overtime premium pay in the nonmanufacturing sector, the sector which includes the largest segment of employees affected by changes in the minimum wage. Again, a multiplier effect could develop. Conversely, average hourly earnings for production workers on manufacturing payrolls does not have the disadvantages of the foregoing earnings series, yet the manufacturing earnings data reflect a generally national wage trend on which a minimum wage rate could be based.

A minimum wage rate that is 60 percent of an annual average of average hourly earnings in manufacturing will provide at least a subsistence wage. Workers will be able to look forward to regular, moderate wage adjustments rather than having to subsist on outdated "real earnings" while awaiting legislative enactments. I am also confident that after employers compare the advantages of being able to predict fairly accurately their future wage rate responsibility, to the disadvantages of trying to "second-

guess" Congress as to when we will raise the minimum and by how much, they will welcome this new wage-setting mechanism I am proposing.

The other provision of my bill will repeal the provision in current law which allows employers to credit toward their minimum wage liability a percentage of tips received by their employees. A tip is a gratuity, not a wage. Every employee should be guaranteed a basic wage rate. Any additional remuneration should flow from his or her industriousness and quality of service. Therefore, I am proposing to repeal the tip credit provision.

I hope my colleagues will scrutinize the provisions of my bill. Once the provisions have been studied and debated, I feel confident everyone will agree that this proposal is preferable to the wage-setting procedure currently in effect.

My Subcommittee on Labor Standards will hold hearings on the bill on March 3, 8, and 9, 1977.

The bill and a summary follow:

H.R. —

A bill to amend the Fair Labor Standards Act of 1938 to increase the minimum wage rate under that Act, to provide for an automatic adjustment in such wage rate, and to repeal the credit against the minimum wage which is based on tips received by tipped employees

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) This Act may be cited as the "Fair Labor Standards Amendments of 1977".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Fair Labor Standards Act of 1938 (29 U.S.C. 201–219).

INCREASE AND AUTOMATIC ADJUSTMENT IN MINIMUM WAGE

SEC. 2. (a) Section 6(a)(1) (29 U.S.C. 206(a)(1)) is amended to read as follows:

"(1) during the period beginning on the thirtieth day after the date of enactment of the Fair Labor Standards Amendments of 1977 and ending December 31, 1977, not less than 55 per centum of the average hourly earnings for the year which began January 1, 1976, of production workers on manufacturing payrolls, and during the year beginning January 1, 1978, and during each succeeding year not less than 60 per centum of the average hourly earnings for the twelve-month period ending on September 30 next preceding the beginning of such year of production workers on manufacturing payrolls; except as otherwise provided in this section;".

(b) Section 6(a)(5) (29 U.S.C. 206(a)(5)) is amended to read as follows:

"(5) if such employee is employed in agriculture—

"(A) during the period beginning on the thirtieth day after the date of enactment of the Fair Labor Standards Amendments of 1977 and ending December 31, 1977, not less than the minimum wage rate in effect under paragraph (1) less $.05, and

"(B) after December 31, 1977, not less than the minimum wage rate in effect under paragraph (1).".

(c) Section 6(b) (29 U.S.C. 206(b)) is amended by striking out "wages of the following rates:" and paragraphs (1) through (4) and inserting in lieu thereof the following: "wages at the following rate: Effective on and after the thirtieth day after the date of enactment of the Fair Labor Standards Amendments of 1977, not less than the minimum wage rate in effect under subsection (a)(1).".

(d) Section 6(a) is amended by adding after and below paragraph (5) the following:

"Not later than November 30 of each year, the Secretary shall publish in the Federal Register the average hourly earnings, during the twelve-month period ending on the next preceding September 30, of production workers on manufacturing payrolls.".

(e) The amendments made by subsections (a), (b), and (c) of this section shall take effect on the thirtieth day after the date of enactment of this Act, except that on and after the date of enactment of this Act the Secretary of Labor shall take such administrative action as may be necessary to enable such amendments to be implemented on and after such day.

TIP CREDIT

SEC. 3. Effective on the thirtieth day after the date of enactment of this Act, the last two sentences of section 3(m) (29 U.S.C. 203(m)) are repealed.

SUMMARY OF THE PROPOSED FAIR LABOR STANDARDS AMENDMENTS OF 1977

BRIEF SECTION-BY-SECTION ANALYSIS

Section 1. Short Title.—Provides that the Act may be cited as the "Fair Labor Standards Amendments of 1977."

Section 2. Nonagricultural employees.—Provides that thirty days after enactment, the minimum wage rate for nonagricultural employees shall be not less than 55 per centum of the 1976 calendar average of average hourly earnings of production workers on manufacturing payrolls. Effective January 1, 1978, and each succeeding year, the minimum wage rate for nonagricultural employees shall be not less than 60 per centum of the annal average (the annum will be the twelve month period preceding September 30 of the year prior to the effective date) of average hourly earnings of production workers on manufacturing payrolls.

Agricultural Employees.—Provides that thirty days after enactment the minimum wage rate for agricultural employees shall be not less than five cents less than the minimum wage rate for nonagricultural employees during the same period. Effective January 1, 1978, and each succeeding year, the minimum wage rate for agricultural employees will be the same as the minimum wage rate for nonagricultural employees.

This section also establishes the procedure for determining the earnings amount on which the minimum wage rate will be effective January 1, 1978, and each succeeding year. The Secretary of Labor is directed to publish in the Federal Register, not later than November 30 of each year, the average hourly earnings of production workers on manufacturing payrolls for the twelve-month period preceding September 30 of each such year. This prescription is necessitated by the fact that the monthly earnings figure published by the Bureau of Labor Statistics is a preliminary figure. Two months later the Bureau has received sufficient information to either verify or modify the preliminary figure which is then validated as the permanent figure for the given month.

Section 3. Tip Credit.—Provides that thirty days after enactment, the tip-credit provision of the Act is repealed.

A PERCEPTIVE LOOK AT CONGRESS

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. HAMMERSCHMIDT. Mr. Speaker, the distinguished New York Times journalist, William Safire, recently devoted his editorial column to a look at the Congress—an acutely perceptive look, I might add, which I thought might be of interest to my colleagues.

The ability to look at one's self in the revealing light of self-examination is one which I am sure all of us desire. I therefore submit Mr. Safire's column, "Perpetrating Outrage," to the attention of this body, in the hope that it will help us to understand why some Americans view us the way they do and, in the process, to better understand ourselves:

[From the Washington Star, Feb. 18, 1977]

(By William Safire)

PERPETRATING OUTRAGE

Nearly a century ago, Speaker Thomas B. Reed, Republican of Maine, broke the back of minority rights in the House of Representatives by taking away its power to filibuster. "The right of a minority is to draw its salaries," "Czar" Reed scorned, "and its function is to make a quorum."

Speaker Reed is remembered today for the way he liked to inform the helpless minority leaders of his decisions: "Gentlemen, we have decided to perpetrate the following outrage."

The times, they are not achangin'. In this era of "reform," with its new emphasis on "ethics" and its sensitivity to the rights of minorities, the House of Representatives is run as imperiously as in the days of Reed, with corruption concealed and responsibility evaded as it was in the days of the first House "czar."

How does the unrestrained power of the speaker manifest itself? Let us count the ways:

1. The I-Never-Voted-For-It-But-I Couldn't-Stop-It Pay Raise. This is a trick, devised by the House Democratic leaders in 1967, to evade accountability for a pay increase. The charade is for the President to make salary recommendations for federal employes, which become law automatically unless either chamber passes a resolution of disapproval.

But it would take 218 members of Congress to blast such a resolution out of committee and onto the floor for a vote disapproving the 30 per cent pay hike. The speaker quietly shakes his head; no vote. The minority leader introduces a bill to make it possible for House members to vote for or against the pay raise. The speaker smiles, and bottles that bill in his Rules Committee, where it will die.

Maybe a pay raise is fair; perhaps not. But representatives are elected to represent, and to vote, and to be held accountable for their votes by the voters. Under Speaker O'Neill, we are witnessing who-me? legislation, providing shelter from embarrassment to congressmen too cowardly to vote for the pay raise.

2. *The anti-dissent organization rules.* Why did every Republican vote against the adoption of the rules of the 95th Congress last month? Because the minority was slammed up against the wall in a display of arrogance that (had it been practiced by anyone but certified Good Guys) would be attacked as dictatorial by every liberal commentator.

To make a quorum so as to conduct business, the number of members needed within a committee has been changed. It used to be a majority; now it is one third. What with the small sprinkling of opposition members, this little trick means that Democrats can hold committee meetings and mark up bills without any Republican participation. That, in political terms, is called playing hardball without a glove.

3. *The "Forgive and Forget" ethics code.* The proposal that Czar O'Neill laughingly

calls his "ethics code" resolutely forgets the past and calls on solons to be kind, truthful and reverent in the future. The hot reforming zeal of the O'Neill of 1973 suddenly cooled when it comes to investigating Democrats.

Minority Leader John Rhodes has proposed a select committee, made up of an equal membership of both parties (like the Senate's Watergate Committee) to conduct a thorough audit of all members' accounts for the past six years.

In the light of the quickly shushed scandal in the accounts of O'Neill's deputy, Democratic Majority Leader Jim Wright, this would clearly be in the public interest. But Czar Tip has crushed the minority proposal.

He has denied the public an independent audit because there is a rot in the House, and I suspect that rot extends into the office of the speaker.

4. *Recess reform.* Lest this department be considered unduly severe on a genial old pol, whose $500 "tips" to obedient congressmen were in the grand tradition of influence purchasing, and whose intercession with building officials on behalf of fundraiser James Wilmot recall the halcyon days of William Marcy Tweed, a word in his favor:

Tip O'Neill's forthright and fearless decision to change the name of the time Congress goes out of session from the lackadaisical "recess" to the dynamic "district work period" deserves the approbation of euphemists around the world.

SENATE COMMITTEE MEETINGS SCHEDULED

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure beginning February 21, and until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the right of the name of the unit conducting such meetings.

Meetings scheduled for Wednesday, February 23, may be found in the Daily Digest section of today's RECORD.

The schedule follows:

SCHEDULED MEETINGS

FEBRUARY 24

9 a.m.

Agriculture, Nutrition, and Forestry
To continue hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act of 1973.
Until noon 322 Russell Office Building

Appropriations
Subcommittee on Agriculture
To hold hearings on proposed budget estimates for fiscal year 1978 for the Department of Agriculture.
S–128, Capitol

Temporary Select Committee to Study Senate Committees
Business meeting, to consider final recommendations of the committee.
S–146, Capitol

9:30 a.m.

Appropriations

APRIL 1

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.
5110 Dirksen Office Building

HOUSE OF REPRESENTATIVES—*Wednesday, February 23, 1977*

The House met at 3 o'clock p.m.

Pastor Paul I. Nussle, Grace Lutheran Church, Santa Barbara, Calif., offered the following prayer:

Members of the House, you are shepherds of a people and caretakers of this pasture called America. Let us pray to the Good Shepherd of us all.

Shepherd, nurture our vision of shepherd: to listen, watch, search, care, risk. Yes, uphold us in risk.

Help us to hear the voice of history which declares that when moral leadership weakens, communities decay and die.

Help us to hear the voices of those who speak from experience, giving us humility to heed their call to stability.

Help us to hear the voices of those who speak in ignorance, giving us sensitivity to hurts needing healing.

Help us to hear Your voice, Good Shepherd, as it teaches us that love for persons and care for creation is the foundation of true shepherding joy.

Convince those who hold this office that its symbol not be a jewel-covered scepter, but the worn, crooked end of shepherd's staff—caring, risking. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks.

The message also announced that the

Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 2647. An act to amend the Small Business Act and the Small Business Investment Act of 1958 to increase loan limitations and to increase surety bond authorizations.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 2647) entitled "An act to amend the Small Business Act and the Small Business Investment Act of 1958 to increase loan limitations and to increase surety bond authorizations, request a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. NELSON, Mr. MCINTYRE, Mr. NUNN, Mr. HATHAWAY, Mr. HASKELL, Mr. CULVER, Mr. JAVITS, Mr. WEICKER, Mr. PACKWOOD, Mr. BARTLETT, and Mr. LAXALT to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 10. Concurrent resolution revising the congressional budget for the U.S. Government for the fiscal year 1977.

PASTOR PAUL I. NUSSLE

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, my colleagues, on this Ash Wednesday it gives me great pleasure to have had here in the House Chamber my constituent, and our guest chaplain, the Reverend Paul I. Nussle, who delivered the invocation today.

Originally from Chicago and now a resident of California, Reverend Nussle is senior pastor of the Grace Lutheran Church in Santa Barbara and secretary of the Pacific Southwest Synod, of the Lutheran Church of America. Active in numerous community affairs, Reverend Nussle was a former chaplain at Cal-Poly in San Luis Obispo and has a strong commitment to helping our young people.

I am sure my fellow Members have benefited from his prayer and I thank the reverend for being here today.

RESIGNATION AS MEMBER AND APPOINTMENT AS MEMBER OF BOARD OF VISITORS TO U.S. AIR FORCE ACADEMY

The SPEAKER laid before the House the following resignation as a member of the Board of Visitors to the U.S. Air Force Academy:

WASHINGTON, D.C.,
February 9, 1977.

Hon. THOMAS P. O'NEILL, JR.,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I appreciate very much the honor of being appointed, for the third year, to the Board of Visitors of the United States Air Force Academy. It has been a privilege to serve with the other members of the Board during the last two years.

It was my intention, however, to decline reappointment so that some other member of the House might have the opportunity to serve on the Board. Prior to my taking action in this respect, my reappointment was recommended. Accordingly, I understand that it is necessary that I officially resign in order to make room for someone else. Accordingly, I respectfully request that you consider this as my resignation from the Air Force Academy Board of Visitors.

Permit me to emphasize again that my resignation does not imply a desire not to serve, but simply to give someone else an opportunity for this meaningful experience.

Sincerely,

DAVID C. TREEN,
Member of Congress.

The SPEAKER. Pursuant to the provisions of 10 U.S.C. 9355(a), The Chair appoints as a member of the Board of Visitors to the U.S. Air Force Academy the gentleman from California, Mr. BOB WILSON, to fill the existing vacancy thereon.

APPOINTMENT AS MEMBERS OF BOARD OF VISITORS TO U.S. NAVAL ACADEMY

The SPEAKER. Pursuant to the provisions of 10 U.S.C. 6968(a), the Chair appoints as members of the Board of Visitors to the U.S. Naval Academy the following Members on the part of the House: The gentleman from Pennsylvania (Mr. FLOOD), the gentleman from Utah (Mr. MCKAY), the gentleman from New York (Mr. KEMP), and the gentlewoman from Maryland (Mrs. HOLT).

APPOINTMENT AS MEMBERS OF FRANKLIN DELANO ROOSEVELT MEMORIAL COMMISSION

The SPEAKER. Pursuant to the provisions of section 1, Public Law 372, 84th Congress, as amended, the Chair appoints as members of the Franklin Delano Roosevelt Memorial Commission the following Members on the part of the House: The gentleman from New York (Mr. MURPHY), the gentleman from New Jersey (Mr. HOWARD), the gentleman from New York (Mr. FISH), and the gentleman from Maryland (Mr. STEERS).

APPOINTMENT AS MEMBERS OF THE JAMES MADISON MEMORIAL COMMISSION

The SPEAKER. Pursuant to the provisions of section 1, Public Law 86–417, the Chair appoints as members of the James Madison Memorial Commission the following Members on the part of the House: The gentleman from West Virginia (Mr. SLACK), the gentleman from Pennsylvania (Mr. YATRON), the gentleman from Virginia (Mr. WAMPLER), and the gentleman from Virginia (Mr. ROBERT W. DANIEL, JR.).

APPOINTMENT AS MEMBERS OF SPECIAL COMMISSION ON MODERNIZATION OF HOUSE GALLERY FACILITIES

The SPEAKER. Pursuant to the provisions of section 499(a), title 4, Public Law 91–510, the Chair appoints as members of the Special Commission on Modernization of House Gallery Facilities the following Members of the House: The gentleman from Louisiana (Mr. WAGGONNER), chairman; the gentleman from California (Mr. DANIELSON); the gentleman from New Jersey (Mr. MINISH); the gentleman from Tennessee (Mr. QUILLEN); and the gentleman from Alabama (Mr. DICKINSON).

PERSONAL EXPLANATION

Mrs. HOLT. Mr. Speaker, as I was unavoidably absent on Tuesday, February 22, I did not have an opportunity to vote on H.R. 27, designed to increase the availability of air service for the elderly and the handicapped, and to improve air service for passengers using intrastate air carriers in California.

H.R. 27 would authorize CAB to approve on a standby basis reduced air fares for senior citizens over age 60 and retired, or over age 65; and also for handicapped persons. In addition, the bill would also mandate CAB to review the feasibility of reduced fares for youth. Were I present and voting yesterday, I would have voted "yea" in support of the bill.

AUTHORIZING AWARDING OF A SPECIAL GOLD MEDAL TO MISS MARIAN ANDERSON

Mr. FAUNTROY. Mr. Speaker, I ask unanimous consent that the Committee on Banking, Finance and Urban Affairs be discharged from further consideration of the joint resolution (H.J. Res. 132) to authorize a special gold medal to be awarded to Miss Marian Anderson, and ask for its immediate consideration.

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). Is there objection to the request of the gentleman from the District of Columbia?

Mr. LEACH. Mr. Speaker, I reserve the right to object.

Mr. FAUNTROY. Mr. Speaker, will the gentleman yield?

Mr. LEACH. I yield to the gentleman from the District of Columbia.

Mr. FAUNTROY. Mr. Speaker, this bill was unanimously favorably reported by the Subcommittee on Historic Preservation and Coinage of the Committee on Banking, Finance and Urban Affairs. The bill would direct the Secretary of the Treasury to cause to be struck a gold medal for presentation to Miss Marian Anderson.

Marian Anderson, America's great singer, has already become a legend to millions across the world, like few in the history of music. She has been honored by almost every country in the world for her musical accomplishments and for her humanitarian efforts. These include the highest medal or other equivalent honors from Sweden, Japan, Finland, Haiti, Liberia, France, the Philippines, as well as countless State and municipal governments. In the very near future, the United Nations will bestow upon Miss Anderson its Medal of Peace, and Mayor Beame will present to her the Handel Medallion on behalf of New York City at

ceremonies which will be attended by many of my colleagues, the Speaker, and our First Lady, Rosalynn Carter. It is interesting to note that this country stands among those which have failed to give Miss Anderson its highest honor.

The medal authorized in the resolution would be a "national medal" which we have awarded to many individuals since the American Revolution. In recent years, these medals were awarded to Americans, such as Dr. Jonas Salk, Admiral Rickover, Robert Frost, Dr. Tom Dooley, Bob Hope, Walt Disney, Roberto Clemente, and Gen. Charles Yeager. While the list of individuals so honored goes back to George Washington and leaders of the Revolutionary era, one will discover that no black American has ever been the recipient of this honor.

I believe Miss Anderson's accomplishments can easily speak for themselves, and the Subcommittee on Historic Preservation and Coinage recommends her as the next recipient for this honor.

Mr. Speaker, I ask that we pass in the House our House Joint Resolution 132.

Mr. LEACH. Mr. Speaker, I wish to extend my support to the chairman of the subcommittee, the gentleman from the District of Columbia (Mr. FAUNTROY) and would like to further point out that we are unanimous in our support of this legislation that would honor Miss Anderson, a woman of great stature. It is a privilege to do this.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from the District of Columbia?

There was no objection.

The Clerk read the joint resolution as follows:

H.J. RES. 132

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That in recognition of the highly distinguished and impressive career of Miss Marian Anderson for a period of more than a half a century during which she has been the recipient of the highest awards from a score of foreign countries, for her untiring and unselfish devotion to the promotion of the arts in this country and throughout the world including the establishment of scholarships for young people, for her strong and imaginative support to humanitarian causes at home, for her contributions to the cause of world peace through her work as United States delegate to the United Nations and her performances and recordings which have reached an estimated seven million people throughout the world, and her unstinting efforts on behalf of the brotherhood of man, and the many treasured moments she has brought to us with enormous demand on her time, talent, and energy, the President of the United States, or his delegate, is authorized to award to Marian Anderson, in the name of Congress, an appropriate gold medal. For such purpose the Secretary of the Treasury is authorized and directed to cause to be struck a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary.

SEC. 2. The Secretary of the Treasury shall cause duplicates in bronze of such medal to be coined and sold, under such regulations as he may prescribe, at a price sufficient to cover the cost thereof (including labor), and the appropriations used for carrying out the provisions of this section shall be reimbursed out of the proceeds of such sale.

SEC. 3. There is authorized to be appropriated the sum of $2,500 to carry out the purposes of this resolution.

AMENDMENT OFFERED BY MR. FAUNTROY

Mr. FAUNTROY. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FAUNTROY: on page 2, following line 20, insert:

SEC. 4. The gold medal and the bronze duplicates are national medals within the meaning of section 3551 of the Revised Statutes (31 U.S.C. 368)."

Mr. FAUNTROY. Mr. Speaker, the purpose of offering this amendment is to accomplish the general intent of this resolution by specifying that the medal is an official national medal.

Mr. RICHMOND. Will the gentleman yield?

Mr. FAUNTROY. I yield to the gentleman from New York.

Mr. RICHMOND. Mr. Speaker, I rise in support of House Joint Resolution 132, a resolution to award a Special Congressional Gold Medal to Miss Marian Anderson, and to thank Chairman FAUNTROY and the Banking Committee for their prompt cooperation.

During her professional career of nearly 70 years, Miss Anderson has emerged as one of this country's beloved artists and has become a legend to millions of people throughout the world. Because of her abundant talent, and her dedication to excellence in her field, she has been the recipient of many of the world's highest honors including awards from Finland, Sweden, Japan, Haiti, Liberia, the Philippines, as well as numerous decorations from other organizations, cities, States, and universities. The United Nations has already announced its intention to award Miss Anderson its highest honor, the Peace Medal.

Marian Anderson has always been unstinting and unselfish in her devotion to this country and to others. Her worldwide concert tours and recordings, which have enabled her to reach millions of people throughout the world, have made enormous demands on her time and energy. She has performed numerous benefit concerts, and has assisted young, talented men and women in the pursuit of their educational goals through the establishment of Marian Anderson Awards. She has worked among Harlem's underprivileged children, has served as U.S. delegate to the United Nations, and has long carried the title of this country's foremost "Ambassadress of Good Will."

Miss Anderson's accomplishments are a reflection of all those values which this country cherishes most—excellence in her chosen field, respect for her neighbor, service to those less fortunate than herself, and devotion to her country.

Therefore, I encourage this body to approve House Joint Resolution 132, which shows our appreciation for all that Marian Anderson continues to contribute.

The SPEAKER pro tempore. The question is on the amendment.

The amendment was agreed to.

Mr. LEDERER. Mr. Speaker, Marian Anderson is a Philadelphia black American opera star who has known worldwide acclaim because of her talent as a contralto singer. She was born in 1902 and was educated in Philadelphia public school systems through her high school years. A number of her high school teachers noticed that Miss Anderson had an unusually clear voice for her age and advised her to take private music lessons. Her church pastor arranged to have a concert in her benefit which established funds that enabled her to study with many excellent Italian music teachers. Under their guidance, Miss Anderson entered a contest with 300 other persons, of which she won first prize. From this point on, she became known for having one of the finest voices in opera in her period. She traveled throughout Europe, the Middle East, and the Philippines and became one of the leading stars of the New York Metropolitan Opera, after singing in 1945 the Opera "Unballo Inmaschera" to an admiring audience.

Between 1948 and 1955, Miss Anderson was a delegate to the U.N. and showed talent as a diplomat as well as a singer for which Americans are indebted. Therefore, I concur with my colleagues on the resolution in honor of Miss Anderson because of their devotion to her field. She is truly an inspiration to all people of good will. Certainly a great American.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SYMMS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 398, nays 4, answered "present" 1, not voting 28, as follows:

Mr. VOLKMER changed his vote from "nay" to "yea."

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FAUNTROY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the joint resolution just passed.

The SPEAKER. Is there objection to the request of the gentleman from the District of Columbia?

There was no objection.

BUDGET RESCISSION BILL, FISCAL YEAR 1977

Mr. MAHON. Mr. Speaker, pursuant to the order of the House on Thursday last, I call up the bill (H.R. 3347) to rescind certain budget authority recommended in the message of the President of September 22, 1976 (H. Doc. 94–620), transmitted pursuant to the Impoundment Control Act of 1974.

The Clerk read the bill as follows:

H.R. 3347

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following rescission of budget authority contained in the message of the President of September 22, 1976 (H. Doc. 94–620), is made pursuant to the Impoundment Control Act of 1974; namely:

DEPARTMENT OF THE INTERIOR

BUREAU OF MINES

HELIUM FUND

Contract authority under this head provided by Public Law 87–122 for the fiscal year 1977 is rescinded in the amount of $47,500,000.

Mr. MAHON. Mr. Speaker, I move to strike the last word.

Mr. Speaker, the bill the Committee on Appropriations brings before the House today is a relatively simple and, I believe, noncontroversial proposition. It involves the rescission of $47,500,000 in contract authority for the helium fund which automatically becomes available each year under a provision in the Interior appropriation bill for 1962. Helium purchase contracts were terminated in 1973 and consequently there is no requirement for this $47 million of new authority this year.

We bring this bill to the House today simply because of the requirements of the Congressional Budget and Impoundment Control Act. That is the only reason. Until last year, matters of this nature would be handled administratively in a routine nature but now we are required to pass a law. It is of a bookkeeping nature.

Mr. Speaker, this matter was handled in the committee by the gentleman from Illinois (Mr. YATES) and the other members of the Interior Appropriations Subcommittee and I yield to the gentleman from Illinois for an explanation of the pending measure.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, the gentleman from Texas is eminently correct. At the present time, we have about 60 billion cubic feet of helium in underground storage near Amarillo. That is more than enough to take care of the Nation's needs, not only of the Government, but of domestic industry as well. The Government has a contract for the purchase of helium which is now the subject of a suit in the U.S. Court of Claims, but the Department of the Interior, which has the obligation under the contract of assessing our helium needs, decided some years ago, starting in 1973, that our supply of helium was greatly in excess of our needs. It, therefore, refused to accept deliveries under the contract.

It is for that reason, Mr. Speaker, that the rescission of the contract authority is sought in this instance.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Washington.

Mr. McCORMACK. Mr. Speaker, I thank the chairman, the gentleman from Texas (Mr. MAHON), for yielding.

Mr. Speaker, I do not intend to oppose this resolution, because I understand the program that it would fund is not in effect. However, I want to take this opportunity to express my very deep concern with the fact that this Nation is not storing the helium that is produced along with our natural gas, and which is now escaping into the atmosphere.

Mr. Speaker, I do not challenge the figures that the committee offers, that the consumption at today's rates would probably last us for many years at today's rates of consumption; but I would like to point out to all the Members of the House that helium is a rare gas, and when it escapes into the atmosphere, it is virtually impossible to recover. It will gradually escape from the Earth entirely. Its production, and thus its ultimate availability is a function of our natural gas production. As our natural gas supplies dwindle, so will our production of helium dwindle. This is a serious matter. We are now entering into a new phase of new energy technologies, including the potential for superconducting transmission of electricity across great distances. We may soon be undertaking programs to burn coal underground or at mine

mouth, because this may be the most economic and environmentally acceptable method of using coal, and then transmitting the electricity long distances across the country. Such transmission will almost certainly eventually be done by superconducting lines, and they will probably require helium.

The same thing applies to the storage of large quantities of electrical energy as such—a vitally important technology which we have not yet reached. It will also probably require helium.

Our high temperature gas-cooled reactors of the future and our fusion machines will require helium.

Therefore, I would like to point out to all of the Members of the House that, while our future consumption at today's rates might last us for a long time, the demand will almost certainly increase exponentially, and within 10 or 15 years we may find ourselves faced with a 10-year supply of a critically needed material; one which we have thrown away. Therefore, while I recognize that this resolution before the House at this time will not create a program which does not exist, I intend to pursue this matter, and in terms of reestablishing a program to conserve this Nation's helium resource.

Mr. SEBELIUS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I will not prolong the discussion. I would like to associate myself with the remarks of the gentleman from Washington (Mr. McCORMACK).

I think the Nixon administration was very unwise in canceling the contracts, because it will cost us 100 times more to take it from the air than to take it from the field which is now being depleted by the demands for gas in many other places.

Mr. Speaker, today's action to eliminate the annual budget authority for the $47.5 million helium fund provides the opportunity to again make my colleagues aware of an issue of great concern to me and many others throughout the United States.

Twice—and I expect to do so again in this session of Congress—I have introduced legislation which would authorize and direct the Secretary of Interior to store non-Federal helium. Unfortunately, I and those who share my concerns have been unable to convince sufficient numbers in previous administrations and Congresses that a comprehensive helium conservation program is necessary to insure that alternate sources of energy relying on helium will have an adequate and ready supply of this natural resource in the future. Although the Department of the Interior finally found their way clear to initiate several contracts for the storage of privately owned helium these contracts simply do not provide enough incentive to the private producer to conserve the supplies of helium needed after the year 2000. Thus, I and others are giving this situation another close look in our determination to find a program which will insure adequate supplies of helium to meet the technological needs of tomorrow.

Because it is so important that we as Members of Congress keep informed on all matters related to our Nation's energy needs, I am submitting an excellent article by Mr. Earl Anderson published in the Chemical and Engineering Magazine which discusses the past and future of helium conservation and storage:

WHO PAYS IS KEY TO HELIUM'S FUTURE

(By Earl V. Anderson)

Sometimes soon, Rep. Keith G. Sebelius (R.-Kan.) and his staff will sit down to decide whether or not he should reintroduce his helium storage act. The bill, which he has introduced twice before, directs the Department of Interior to store privately produced helium free of charge.

Rep. Sebelius has been concerned about helium ever since Interior stopped buying helium from private producers in 1973. He is not alone. Many people—producers, consumers, potential consumers, Congressmen, and environmentalists—are afraid that the U.S. is wasting a valuable and irretrievable national resource. Everyone agrees that a helium conservation program is needed. They want to see helium recovered now and stored until the time—probably well into the 21st century—when new energy technologies may require vast amounts of helium. If this isn't done, economically recoverable helium won't be around to be recovered just when it's needed most.

The irony is that there already exists plenty of helium capacity to support a conservation program. Enough hardware is now in place to produce six times as much helium as current demand.

The problem is that not everyone can agree on the shape that a national helium conservation program should take. Translated, this means disagreement over who should pay for it.

Helium exists in natural gas in various concentrations, but about 85% of the helium-rich natural gas (greater than 0.3% helium) reserves lie in specific gas fields of Texas, Oklahoma, and Kansas. Like most natural gas supplies, these supplies are dwindling and, unless the helium is extracted from it before the gas reaches the market, the helium is lost forever.

The Energy Research & Development Administration (ERDA), in a major helium study conducted last year estimates that the U.S. has about 280 billion cu ft of proved, recoverable helium reserves. By 1990, ERDA figures that about 15 billion cu ft will have been used beneficially and that perhaps 65 billion cu ft, including stored helium, will remain. That means that a hefty 200 billion cu ft will have been vented to the atmosphere and wasted.

Of course, helium exists in the atmosphere and extracting it from air would offer an inexhaustible supply. But, at an estimated $3000 to $6000 per thousand cu ft, the cost of getting helium out of the air is 150 to 300 times the present commercial cost of helium from natural gas.

Helium demand in conventional outlets, such as welding, purging and pressuring, and controlled atmospheres, has been growing slowly but steadily. This year, domestic consumption is expected to hit 620 million cu ft. The export market likely will add an additional 150 million cu ft to 1976 demand. By comparison, the two government-owned plants and 10 privately owned plants have an annual capacity of 4.6 billion cu ft. It's no surprise that not all of these plants are operating. Some of them that are still on steam are taking only liquefied petroleum gas out of their gas feed and venting the helium.

ERDA expects helium demand in conventional uses to grow slowly, reach about 1.4 billion cu ft per year by the year 2000, then level off. Sometime after 2000, three energy-related technologies may be screaming for vast amounts of helium. These three technologies are superconducting power transmission, superconducting magnetic energy storage, and fusion reactors.

Just how much helium these technologies will require depends upon many variables. What will be the country's energy growth rate? What forms of energy will be used? How fast will the technology itself be developed?

Obviously, estimating helium demand that far ahead is highly speculative. But, using two scenarios developed by the Federal Energy Administration for Project Independence, ERDA figures that energy-related demand for helium could increase from essentially zero in the year 2000 to anywhere from 1 billion to 5 billion cu ft by 2030.

Despite the uncertainty, the trend is clear. Meanwhile, as natural gas reserves dwindle, the volume of feed available for existing helium plants will decline so that, by 1990, supply no longer will exceed demand. Shortly after 2000, helium supply from natural gas could disappear altogether.

If such a scenario develops, the helium community will have some big decisions to make 25 to 30 years from now. The government could release helium from existing stockpiles to ease the supply situation. Helium from currently shut-in wells could be exploited. Meanwhile, gas fields throughout the world are expected to be developed as future helium sources. Imports from such sources could help supply domestic demand. But imports are not always the most secure source of supply. Besides, world demand for conventional helium uses is expected to grow at about the same rate as it is growing in the U.S. and this will drain away foreign helium from U.S. markets.

ERDA and many others believe there is a better way. And that better way is to use capacity already in place to produce helium and store what isn't used now for the future. That way, there probably will be enough helium available to allow new energy technologies to develop at least through the year 2025. Eventually, the country will have to extract helium from the atmosphere, but a conservation program will defer this expensive step as far in the future as possible.

The government already has tried this approach. In fact, most of the large, private helium plants were built in response to Interior's helium conservation program.

Until 1961, the country's helium supply came from five plants operated by the Bureau of Mines. As helium demand grew, especially in the space program, concern developed about the Bureau of Mines' ability to meet future helium requirements.

In 1960, the Helium Act Amendment authorized Interior to buy and store helium from private producers under long-term (up to 25 years), take-or-pay contracts. That's when private companies started building their plants.

The program was to be self-liquidating. Government agencies could buy only government-produced helium at a price ($35 per thousand cu ft) set by Interior. Private producers, selling to the private market, initially matched the government's price. By 1970, however, privately produced helium was selling competitively for $21 per thousand cu ft. And the private producers were chewing into Interior's sales to government agencies by selling directly to government contractors.

This two-tier price system, along with a general decline in helium demand, made the program anything but self-liquidating. Today, Interior has about 39 billion cu ft of helium stored in its Cliffside reservoir near Amarillo, Tex. It also owes the Treasury Department more than $400 million for private helium that it bought before it stopped the purchasing program. And some of the conservation contractors have yet to be paid for their helium because Interior has no borrowing authority.

When Interior stopped buying helium in

1973, the inevitable lawsuits followed. Some of these breach of contract suits still are in the courts. These suits are clouding the future course of a conservation program.

In addition, a series of legal battles that began in 1961 is still unresolved in the courts. These involve the question of how much the landowners who lease land to the gas companies are entitled to as payment for the helium contained in natural gas. In two separate decisions, courts have ruled that the value of helium ranges from 60 cents to $16.20 per thousand cu. ft. Because the government's purchasing contracts stipulate that the government will pay the landowners anything above $3.00 a lot of money is riding on the final court decision for both the companies and the federal government.

Money, in fact, is the root of the entire helium conservation question. There are no technical roadblocks; the capacity is in place. Since Interior stopped buying conservation helium, private producers can't afford to produce to capacity. It's not so much the storage costs that bother them. It's simply that they can't afford to shoulder production costs, then wait 25 to 50 years for a payout that may not come. There's also a big question as to how the Internal Revenue Service will treat all of the helium kept in storage.

Aside from its $400 million debt to Treasury, Interior thinks its aborted conservation program has been a spectacular success. Officials say it has developed a 39 billion cu. ft. reserve and has fostered a private helium industry.

Last year, in an attempt to encourage helium conservation, Interior drastically lowered its helium storage and handling charges. The old charges were 44 cents per thousand cu. ft. to accept the gas, 44 cents per year for storage, and 44 cents to return the gas to its owner. The new rates: 4 cents, 4 cents, and 22 cents, respectively.

Still, these lower storage rates seem to help those companies interested in short-term storage more than those concerned about long-term conservation. Basic producers still have to worry about poduction costs and their wait for a long-term payout.

The Sebelius bill would bring storage costs all the way down to zero. Support for this concept has dropped since Interior reduced its storage charges. And there are some Congressmen who look upon it as yet another government subsidy for industry.

But the inescapable conclusion is that the federal government is the only one capable of shouldering the economic burden of producing or buying now and storing helium for perhaps 50 years, when new energy technologies may require tremendous volumes.

Meanwhile, the helium conservation issue is another one of those problems that seem to generate endless studies. ERDA plans to update its one-year-old study. The Bureau of Mines will take another look at helium economics. Even the American Chemical Society is getting into the act. A helium task force has been formed, with past president Bernard S. Friedman as chairman, to come up with a set of recommendations. The task force hopes to have a report out sometime next spring.

Mr. MAHON. Mr. Speaker, I move the previous question on the bill.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

GENERAL LEAVE

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members of the House may have five legislative days in which to revise and extend their remarks on the bill H.R. 3347.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

THIRD CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1977

Mr. GIAIMO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the concurrent resolution (H. Con. Res. 110) revising the congressional budget for the U.S. Government for the fiscal year 1977.

The SPEAKER. The question is on the motion offered by the gentleman from Connecticut (Mr. GIAIMO).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the concurrent resolution House Concurrent Resolution 110, with Mr. NATCHER in the chair.

The Clerk read the title of the concurrent resolution.

The CHAIRMAN. When the Committee rose on Tuesday, February 22, 1977, all time for general debate on the concurrent resolution had expired.

Pursuant to clause 8 of rule XXIII, the concurrent resolution is considered as having been read for amendment and open to amendment at any point.

The concurrent resolution is as follows:

H. CON. RES. 110

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenue is $348,500,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $10,600,000,000;

(2) the appropriate level of total new budget authority is $482,306,000,000;

(3) the appropriate level of total budget outlays is $418,815,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $70,315,000,000; and

(5) the appropriate level of the public debt is $720,500,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 304 of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1976, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):

(A) New budget authority, $108,788,000,000.

(B) Outlays $100,077,000,000.

(2) International Affairs (150):

(A) New budget authority, $8,256,000,000.

(B) Outlays, $7,141,000,000.

(3) General Science, Space, and Technology (250):

(A) New budget authority, $4,468,000,000.

(B) Outlays, $4,406,000,000.

(4) Natural Resources, Environment, and Energy (300):

(A) New budget authority, $18,627,000,000.

(B) Outlays, $17,209,000,000.

(5) Agriculture (350):

(A) New budget authority, $2,355,000,000.

(B) Outlays, $3,044,000,000.

(6) Commerce and Transportation (400):

(A) New budget authority, $17,313,000,000.

(B) Outlays, $15,961,000,000.

(7) Community and Regional Development (450):

(A) New budget authority, $14,808,000,000.

(B) Outlays, $10,604,000,000.

(8) Education, Training, Employment, and Social Services (500):

(A) New budget authority, $30,355,000,000.

(B) Outlays, $22,620,000,000.

(9) Health (550):

(A) New budget authority, $40,651,000,000.

(B) Outlays, $39,283,000,000.

(10) Income Security (600):

(A) New budget authority, $180,093,000,000.

(B) Outlays, $142,450,000,000.

(11) Veterans Benefits and Services (700):

(A) New budget authority, $18,917,000,000.

(B) Outlays, $18,130,000,000.

(12) Law Enforcement and Justice (750):

(A) New budget authority, $3,524,000,000.

(B) Outlays, $3,657,000,000.

(13) General Government (800):

(A) New budget authority, $3,560,000,000.

(B) Outlays, $3,554,000,000.

(14) Revenue Sharing and General Purpose Fiscal Assistance (850):

(A) New budget authority, $7,578,000,000.

(B) Outlays, $7,696,000,000.

(15) Interest (900):

(A) New budget authority, $38,287,000,000.

(B) Outlays, $38,287,000,000.

(16) Allowances:

(A) New budget authority, $794,000,000.

(B) Outlays, $764,000,000.

(17) Undistributed Offsetting Receipts (950):

(A) New budget authority, —$16,068,000,000.

(B) Outlays, —$16,068,000,000.

The CHAIRMAN. Are there any amendments?

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mr. GIAIMO. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. GIAIMO: Strike all after the resolving clause and insert in lieu thereof the following:

That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenues is $348,800,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $10,300,000,000;

(2) the appropriate level of total new budget authority is $477,706,000,000;

(3) the appropriate level of total budget outlays is $418,915,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $70,115,000,000; and

(5) the appropriate level of the public debt is $718,700,000,000.

Sec. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 304 of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1976, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, $108,788,000,000.
(B) Outlays, $100,077,000,000.
(2) International Affairs (150):
(A) New budget authority, $7,956,000,000.
(B) Outlays, $6,841,000,000.
(3) General Science, Space, and Technology (250):
(A) New budget authority, $4,468,000,000.
(B) Outlays, $4,406,000,000.
(4) Natural Resources, Environment, and Energy (300):
(A) New budget authority, $18,627,000,000.
(B) Outlays, $17,209,000,000.
(5) Agriculture (350):
(A) New budget authority, $2,355,000,000.
(B) Outlays, $3,044,000,000.
(6) Commerce and Transportation (400):
(A) New budget authority, $17,313,000,000.
(B) Outlays, $15,961,000,000.
(7) Community and Regional Development (450):
(A) New budget authority, $14,808,000,000.
(B) Outlays, $10,604,000,000.
(8) Education, Training, Employment, and Social Services (500):
(A) New budget authority, $30,355,000,000.
(B) Outlays, $22,620,000,000.
(9) Health (550):
(A) New budget authority, $40,651,000,000.
(B) Outlays, $39,283,000,000.
(10) Income Security (600):
(A) New budget authority, $174,993,000,000.
(B) Outlays, $142,050,000,000.
(11) Veterans Benefits and Services (700):
(A) New budget authority, $18,917,000,000.
(B) Outlays, $18,130,000,000.
(12) Law Enforcement and Justice (750):
(A) New budget authority, $3,524,000,000.
(B) Outlays, $3,657,000,000.
(13) General Government (800):
(A) New budget authority, $3,560,000,000.
(B) Outlays, $3,554,000,000.
(14) Revenue Sharing and General Purposes Fiscal Assistance (850):
(A) New budget authority, $7,578,000,000.
(B) Outlays, $7,696,000,000.
(15) Interest (900):
(A) New budget authority, $38,287,000,000.
(B) Outlays, $38,287,000,000.
(16) Allowances:
(A) New budget authority, $794,000,000.
(B) Outlays, $764,000,000.
(17) Undistributed Offsetting Receipts (950):
(A) New budget authority, —$15,268,000,000.
(B) Outlays, —$15,268,000,000.

Mr. GIAIMO (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment in the nature of a substitute be dispensed with, and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. GIAIMO. Mr. Chairman, basically what the amendment in the nature of a substitute does is to change the figures in our original concurrent resolution setting forth budget authority, outlay, debt, and then the breakdown into the functional categories. There are some reasons why it was necessary to change those figures, and I would like to explain those to the Members at this point.

Mr. Chairman, I rise in support of the committee amendment to the resolution.

It is necessary for basically two reasons: First, to accommodate the recommendations of the new administration submitted to the Congress this week; and second, to take into account the approval last Friday by the Ways and Means Committee of the revenue portion of the Budget Committee's—and the President's—economic stimulus proposal.

The committee amendment would change the budget aggregates as follows:

Revenues would be increased by $300 million, from $348.5 billion to $348.8 billion.

Budget authority would be reduced by $4.6 billion from $482.3 billion to $477.7 billion.

Outlays would be increased by $100 million, from $418.8 billion to $418.9 billion.

The deficit would be reduced by $200 million, from $70.3 billion to $70.1 billion.

And the public debt amount would be reduced by $1.8 billion, from $720.5 billion to $718.7 billion.

There are several items involved in these changes, each of which I will explain briefly.

First, the revenue and revenue-related changes.

As Members know, the President proposed tax reductions of $13.8 billion, which the committee's resolution endorsed in general. Of this $13.8 billion, $10.6 billion is accounted for as a loss of revenues and $3.2 billion—the refunds in excess of liability and payments to SSI and railroad retirement recipients—is accounted for as outlays in the income security function.

The Ways and Means Committee bill provides a total tax stimulus of $12.7 billion—$9.9 billion in revenue loss and $2.8 billion in outlays. The reduction from the budget resolution is due to changes in the $50 rebates, the earlier effective date of the new standard deduction, and the new business tax credit.

In order to fully reflect the Ways and Means Committee action, the revenue floor in the resolution should be increased by $700 million and the outlay amount reduced by $400 million. The committee amendment does so, with one modification: it increases revenues by only $300 million, rather than $700 million, to accommodate expected legislation from the Ways and Means Committee to postpone the effective date of the sick pay provisions of the Tax Reform Act of 1976. The result of the amendment to increase revenues from $348.5 billion to $348.8 billion, and to reduce outlays in the income security function by $400 million.

Second, the committee amendment makes the following changes on the spending side.

First, it deletes $300 million in budget authority and outlays—in the international affairs function—for the U.S. share of a balance of payments loan to Portugal.

President Ford proposed such a loan in his January budget. However, the administration has informed us that additional time would be needed for negotiations among the various nations participating in this multilateral loan arrangement, and that the loans will not be made until fiscal year 1978. Consequently, these funds will not be needed in fiscal year 1977 and they would be deleted from the resolution.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, I am somewhat concerned about the delay of this loan to Portugal—and I might add that I am not one who favors foreign aid—but this is a loan of some $300 million. I wonder if the gentleman from Connecticut could enlighten us as to the thinking of the administration as to what this delay might do to the future of a free Portugal as opposed to a Communist Portugal?

Mr. GIAIMO. I certainly cannot give the gentleman any assurance as to the future political status of Portugal, but I received information that the administration certainly is in support of this loan which was originally proposed by President Ford. They are workng hard to implement it. As the gentleman knows, the loan includes not just the support of the United States but that of a group of nations, or a consortium of nations who will make the loan. The best that I understand the thinking of the people downtown today is that this will not impact on fiscal 1977 funds, and therefore will carry over beyond October 1, and that this will not jeopardize the political climate in Portugal.

Mr. LATTA. The gentleman is assured of that?

Mr. GIAIMO. Yes.

Mr. LATTA. I thank the gentleman.

Mr. GIAIMO. My amendment also deletes $4.7 billion in budget authority—in the income security function—for subsidized housing.

As I stated yesterday, at the time the committee marked up the resolution, our best information was that the administration would request a $20.3 billion supplemental for these programs. However, the budget submission states that only $15.6 billion is required to fulfill the administration's subsidized housing program in fiscal year 1977—these funds would bring the subsidized program level to 400,000 units this fiscal year. Consequently, the committee amendment reduces budget authority for these programs by $4.7 billion.

This $4.7 billion reduction is in addition to the $400 million reduction in budget authority and outlays attributable to the tax measure that I discussed earlier. The total reduction in the income security function made by the committee amendment is $5.1 billion in budget authority and $400 million in outlays.

Finally, the amendment reduces by $800 million our estimate of receipts in this fiscal year from sales of leases on the Outer Continental Shelf. In the undistributed offsetting receipts function, the resolution will read minus $15.3 billion in budget authority and outlays, rather than minus $16.1 billion. Since receipts in this area are treated as offsets to expenditures, the result is an increase in authority and outlays of $800 million.

The reason for this change is as follows: The estimate of receipts from OCS sales in the reported resolution is $2.8 billion. However, Secretary of the Interior Andrus recently announced that the next scheduled sale of leases has been canceled and may be rescheduled, perhaps affecting the timing of subsequent sales as well. The result may be to push one or more sales into fiscal year 1978. Due to the uncertainty of the timing of

sales during the balance of this fiscal year, the amendment would reduce our estimate of receipts from these sales by $800 million, down to $2 billion for fiscal year 1977.

This new estimate of OCS receipts does not take into account the possible effects of a recent court decision invalidating certain sales during the transition quarter. It is likely that that decision will be appealed and the matter not finally adjudicated for some time.

I would be happy to answer questions on the committee amendment.

AMENDMENT OFFERED BY MS. HOLTZMAN TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Ms. HOLTZMAN. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Ms. HOLTZMAN to the amendment in the nature of a substitute offered by Mr. GIAIMO: In the matter relating to the appropriate level of total new budget authority strike out "$477,706,000,000" and insert in lieu thereof "477,921,000,000";

In the matter relating to the appropriate level of total budget outlays strike out "$418,915,000,000" and insert in lieu thereof "$419,130,000,000";

In the matter relating to the amount of the deficit strike out "$70,115,000,000" and insert in lieu thereof "$70,330,000,000";

In the matter relating to the appropriate level of the public debt strike out "$718,-700,000,000" and insert in lieu thereof "$718,-915,000,000."

In the matter relating to Function 450 strike out "$14,808,000,000" and insert in lieu thereof "15,023,000,000"; and strike out "$10,604,000,000" and insert in lieu thereof "$10,819,000,000".

Ms. HOLTZMAN (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with, that it be printed in the RECORD, and I will then explain the amendment.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Mr. REUSS. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from Wisconsin.

Mr. REUSS. I thank the gentlewoman for yielding.

Mr. Chairman, as Members know, last week I announced my intention to offer an amendment to this budget resolution to increase revenues by $1.7 billion through the closing of tax loopholes by the Ways and Means Committee. The purpose of my amendment was to offset the increased spending for job-creating programs properly proposed by the Budget Committee. My reasons were stated in my "Dear Colleague" letter of February 15.

I am happy that later developments appear to make my amendment unnecessary. For that reason I shall not offer it. It would be accommodating in its monetary policy.

The tax package approved last week by the Ways and Means Committee reduces the Carter revenue reductions by $1.1 billion. Of this amount, $700 million is accounted for under revenue loss and $400 million as lower outlays for certain low-income people.

The amendment offered by the gentleman from Connecticut (Mr. GIAIMO) reflects this action by the Ways and Means Committee, with one modification: It reduces the revenue loss by only $300 million, rather than by $700 million, to accommodate expected legislation in the next several weeks by the Ways and Means Committee to postpone the effective date of the sick pay provisions of the 1976 Tax Reform Act. Altogether, the Giaimo amendment picks up $700 million in additional revenues—$300 million on the revenue side, $400 million on the outlay side.

President Carter has also increased the direct spending portion of his stimulus proposals, primarily by adding $300 million to the $600 million he had originally proposed for the countercyclical assistance program. Thus, the President's total tax package is being reduced to partially offset the adding spending proposed by the Congress.

To summarize, the total Budget Committee stimulus package is now $13.1 billion in revenue reductions and $3.5 billion in outlays—a total of $16.6 billion, compared to the original Carter proposal of $15.7 billion. The increases by the Congress are, I understand, fully supported by the administration.

Under these circumstances I believe that the Federal Reserve has no cause to tighten money or to increase interest rates.

I inquire of the chairman of the Committee on the Budget, the distinguished gentleman from Connecticut (Mr. GIAIMO), whether he shares my view.

Mr. GIAIMO. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I would be happy to yield to the gentleman from Connecticut.

Mr. GIAIMO. I thank the gentlewoman for yielding. I promise her I will try to get her some time.

As the gentleman knows, the administration has indicated that it will support this size tax reduction. As the gentleman further knows, as I indicated to him, I had spoken to the Secretary of the Treasury on this matter and on the question of whether or not the Federal Reserve and Mr. Arthur Burns would be of a mind to go along with this size tax cut. While no one can speak with certainty for Mr. Burns, the fact is that it seems reasonably certain that the Federal Reserve will not try to take counteractions to thwart what the Committee on Ways and Means will accomplish through the tax reduction.

Mr. REUSS. I thank the gentleman for his response and for his fashioning of a serviceable package.

I thank the gentlewoman from New York for this intrusion.

Ms. HOLTZMAN. Mr. Chairman, since my amendment, which I offer on behalf of the gentleman from California (Mr. MINETA) and the gentleman from Illinois (Mr. Simon), is so simple and so uncontroversial I will not need 5 minutes to explain it.

The amendment adds $215 million in budget authority and outlays to the countercyclical assistance program for helping States and local governments which have high rates of unemployment. The basic purpose of my amendment is to allow President Carter's proposal for increasing such countercyclical assistance to go into effect on April 1 rather than on July 1. The money is needed earlier to counter the adverse impact of the cold weather and the drought on State and local governments.

The CHAIRMAN. The time of the gentlewoman from New York has expired.

(By unanimous consent, Ms. HOLTZMAN was allowed to proceed for 2 additional minutes.)

Ms. HOLTZMAN. By allowing the new countercyclical formula of increased assistance to go into effect 3 months earlier my amendment is estimated to save or to produce approximately 60,000 jobs.

The administration supports my amendment.

The cold weather has had a serious impact on our Nation's economy. Unemployment may be above 9 percent for February and the Bureau of Labor Statistics estimates that 1.8 million people were out of work because of weather in the first week of February.

This winter's cold weather and drought will cause unexpected deficits for State and local governments, already one of the weakest sectors of our economy. Their revenues have dropped because of weather-related unemployment. Their expenditures for emergency services, fuel, welfare, and the like have increased. As a result, they will face budget gaps at the end of their fiscal year, generally June 30.

Because the increased countercyclical aid contained in the budget resolution becomes available on July 1, it comes too late to help many States and localities with their deficits year for fiscal 1977. They will have to cut back services and payrolls, laying off perhaps thousands of employees, in order to balance their books.

My amendment will provide desperately needed aid on April 1, so that it is available to help States and localities in the budget balancing quarter. These funds will save thousands of jobs and prevent severe reductions in police, fire, education, and other essential local services.

My amendment will raise the projected April 1 payment to States and localities from $312.5 million to $695 million. For New York City, it could mean an extra $29 million. For New York State and all its localities it could mean an extra $69.6 million. Our Nation's economy cannot recover from the prolonged recession until all sectors—including State and local governments—are in sound fiscal shape.

I urge adoption of my amendment.

Mr. JOHN L. BURTON. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I am taking this time to ask the chairman of the Budget Committee a question dealing with the subject matter, that is similar to one addressed in this amendment. I want to find out this information, and I think

this is a pretty good time to do it because I will not have to wait in line.

I have just come back from the area I represent, which is drought stricken. I mean a real disaster is going to take place once things get going pretty good, and an infusion of Federal funds is anticipated. I am wondering if in this budget there is enough leeway or there would be funds available or through what procedure maybe there would be a figure of $2 to $3 million, because we are talking about a big part of the country. Will that money be available to meet this problem?

Mr. GIAIMO. Mr. Chairman, is the gentleman referring to the amendment offered by the gentlewoman from New York in the countercyclical area or is the gentleman talking about in general taking cognizance of the fact that we have had cold weather in the East which may lead to floods and that we have had droughts in the West.

It is impossible to estimate at this time what our needs may be as a result of weather problems in the East and in the West. Therefore neither we nor the administration have taken account of that except to a very slight degree based on the figures of the last few weeks. The amendment offered by the gentlewoman is one example of the steps taken in response to the weather and the cold problems.

Mr. JOHN L. BURTON. Mr. Chairman, what would be the procedure between the passage and adoption of this budget resolution and the next one whereby funds that were not provided in this, but are definitely going to have to be available, and it is a question of amount, if it is not in this resolution, is there a procedure whereby urgent appropriations can be made?

Mr. GIAIMO. Mr. Chairman, if the gentleman will yield, I think we have to develop the statistics and information.

Mr. JOHN L. BURTON. If the gentleman will excuse me, Mr. Chairman, let us stipulate that I agree with the gentleman from Connecticut on that, we come with our statistics to a figure that is necessary. Is there a procedure beside this resolution that an emergency appropriation could be made, notwithstanding its impact on the budget?

Mr. GIAIMO. Mr. Chairman, if the gentleman will yield further, I would say that the procedure would be to present the problems to the proper committee and to get some input from the administration.

We certainly need some time, days or weeks, in which to formulate a judgment as to the magnitude and nature of the problem and then the machinery does exist in this House to address itself to those problems; but it is premature here, except in certain areas.

Mr. JOHN L. BURTON. Mr. Chairman, I am not arguing that. I am wondering, it may be well to argue it is premature and it is impossible to deal with it now; but there is a procedure when everybody agrees that the moneys can be appropriated and authorized to deal with this.

Mr. GIAIMO. Mr. Chairman, if the gentleman will yield further, it is impossible to deal with the question now, because we do not know how much money is involved.

Mr. JOHN L. BURTON. That problem comes up later.

Mr. GIAIMO. There is some problem, it is a very small amount.

Mr. JOHN L. BURTON. But to deal with it in a small magnitude, there is a procedure for that?

Mr. GIAIMO. Yes.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, of course, northern California has been blessed with rain the last 2 days, so part of the problem to which the gentleman speaks, I think, has been improved.

Mr. JOHN L. BURTON. I think our 5 minutes is up. We have been blessed with rain. If we get any more rain, most of the soil is going to go into the Pacific Ocean.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, I think we have good flood control projects going on in the State of California so I am sure overflooding will not be a problem. I know the gentleman (Mr. JOHN L. BURTON) will support the water projects which the President has said he will cut. It is my hope the gentleman will help us put the water projects back in place again.

Mr. JOHN L. BURTON. We are talking about the present and not the future.

Mr. MINETA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to add my voice in support of this amendment to provide sorely needed assistance to our hard-pressed States and localities.

From the perspective of a former mayor, I can assure this House that these funds are urgently needed. A recent survey conducted by the U.S. Conference of Mayors revealed that many cities were forced to take actions in calendar year 1976 that ran counter to Federal actions designed to stimulate the economy—of the 283 cities surveyed, 40 percent raised taxes, 61 percent cut back employment, 30 percent reduced services, and over 50 percent deferred necessary capital works projects to prevent further cutbacks.

Without the financial aid provided in this amendment, our cities will be forced to continue these actions which hamper our Federal efforts to reduce unemployment and stimulate economic recovery.

I am very pleased that President Carter supports this amendment and is convinced, as I am, that the increased funds under the countercyclical assistance program must be made available in April rather than July as originally planned.

I urge all Members to vote in favor of this amendment.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of this amendment. I wish to commend the gentlewoman from New York (Ms. HOLTZMAN) for offering this amendment, which I think is very much needed. The gentlewoman has worked long and hard to increase the amount of money for countercyclical assistance, which is the essence of this amendment.

What happened is that the administration originally came in with about $623 million in countercyclical assistance for the last quarter of this fiscal year. Our committee thought that was not sufficient. We increased it to $800 million. Since then the gentlewoman has been persistent in insisting that additional countercyclical moneys could be well used prior to the July 1 beginning of the fourth quarter. The administration has recognized this fact and has changed its position on this and is prepared to start a higher pay outright. The administration, President Carter, suggests a startup date earlier than the fourth quarter, hopefully in the third quarter which begins in April.

I think this money can be well spent, can be well utilized, and I believe this amendment should be overwhelmingly supported.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from New York (Ms. HOLTZMAN) to the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO).

The amendment to the amendment in the nature of a substitute was agreed to.

AMENDMENT OFFERED BY MR. ROUSSELOT AS A SUBSTITUTE FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mr. ROUSSELOT. Mr. Chairman, I offer an amendment as a substitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. ROUSSELOT as a substitute for the amendment in the nature of a substitute offered by Mr. GIAIMO: Strike out all after the resolving clause and insert:

(1) the recommended level of Federal revenues is $347,096,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $19,000,000,000;

(2) the appropriate level of total new budget authority is $440,662,000,000;

(3) the appropriate level of total budget outlays is $404,993,000,000.

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $57,897,000,000, and

(5) the appropriate level of the public debt is $708,000,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 304 of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1976, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):

(A) New budget authority, $109,337,000,000.

(B) Outlays, $100,043,000,000.

(2) International Affairs (150):

(A) New budget authority, $7,235,000,000.

(B) Outlays, $6,691,000,000.

(3) General Science, Space, and Technology (250):

(A) New budget authority, $4,468,000,000.

(B) Outlays, $4,406,000,000.

(4) Natural Resources, Environment, and Energy (300):

(A) New budget authority, $17,272,000,000.

(B) Outlays, $15,863,000,000.

(5) Agriculture (350):

(A) New budget authority, $2,328,000,000.

(B) Outlays, $3,019,000,000.

(6) Commerce and Transportation (400):

(A) New budget authority, $14,388,000,000.

(B) Outlays, $15,261,000,000.
(7) Community and Regional Development (450):
(A) New budget authority, $13,070,000,000.
(B) Outlays, $8,940,000,000.
(8) Education, Training, Employment and Social Services (500):
(A) New budget authority, $20,784,000,000.
(B) Outlays, $21,090,000,000.
(9) Health (550):
(A) New budget authority, $39,359,000,000.
(B) Outlays, $39,283,000,000.
(10) Income Security (600):
(A) New budget authority, $137,382,000,000.
(B) Outlays, $135,731,000,000.
(11) Veterans Benefits and Services (900):
(A) New budget authority, $18,879,000,000.
(B) Outlays, $18,092,000,000.
(12) Law Enforcement and Justice (750):
(A) New budget authority, $3,431,000,000.
(B) Outlays, $3,598,000,000.
(13) General Government (800):
(A) New budget authority, $3,257,000,000.
(B) Outlays, $3,417,000,000.
(14) Revenue Sharing and General Purpose Fiscal Assistance (850):
(A) New budget authority, $7,458,000,000.
(B) Outlays, $7,576,000,000.
(15) Interest (900):
(A) New budget authority, $37,287,000,000.
(B) Outlays, $37,287,000,000.
(16) Allowances:
(A) New budget authority, $794,000,000.
(B) Outlays, $764,000,000.
(17) Undistributed Offsetting Receipts (950):
(A) New budget authority, —$16,068,000,000.
(B) Outlays, —$16,068,000,000.

Mr. ROUSSELOT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment offered as a substitute for the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 5 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, today the minority is offering a concurrent resolution as a substitute amendment to House Concurrent Resolution 110, the third concurrent resolution on the budget for fiscal year 1977. In place of the increased deficit spending and unnecessary tax rebates called for in House Concurrent Resolution 110, the minority proposal is for a simple, across-the-board tax reduction for every American worker.

The purpose of a permanent tax rate reduction is to reduce the tax bias against work, saving, and investment; that is, to increase the reward to work, save, and invest and to make it more desirable for people to invest and to hire unemployed and produce more real long-term jobs. A good case has been made that a tax rate reduction—when rates are as high as they are today in the United States—will actually increase Government revenues by expanding the tax base. Lower tax rates on a larger tax base can generate more tax revenues than higher tax rates on a smaller tax base. This was proved during the time in the 1960's that the Kennedy tax cuts were put in place.

Some here in the House are of the opinion that through inefficient tax rebates and increased deficit spending America's economic problems can be solved. In response to this sort of approach, Prime Minister James Callaghan, the leader of the Labor Party Government in Great Britain, has stated:

> We used to think that you could spend your way out of a recession . . . I tell you, in all candor, that that option no longer exists, and that insofar as it ever did exist, it only worked by injecting bigger doses of inflation into the economy followed by higher levels of unemployment as the next step. That is the history of the past twenty years.

Ample historical precedents can be provided on behalf of the effectiveness of permanent tax rate reductions. The Kennedy tax cuts of 1962–65 were particularly effective. On behalf of the cuts—which amounted to reductions in the corporate and individual tax rates equivalent to $34 billion in today's economy—Ways and Means Committee Chairman Mills argued the following:

> There are two roads the government could follow toward a larger, more prosperous economy—the tax reduction road or the government expenditure road. The tax reduction road gets us . . . to a bigger, more prosperous, more efficient economy with a larger share of that enlarged economic activity initiating in the decision of the individuals to increase consumption and business concerns to increase their productive capacity.

Many were concerned that the large rate reductions which the Kennedy administration proposed would result in massive revenue losses. The U.S. Treasury, for example, argued that 6-year revenue losses would total $89 billion. In fact, there were gains of $54 billion realized over a 6-year period as the following chart illustrates:

[In billions]

	1963	1964	1965	1966	1967	1968	Total
U.S. Treasury estimated revenue losses	2.4	5.2	13.3	20	23.7	24.4	$89
Actual revenue gains	7	6	4	14	19	4	54
Difference in estimates							143

Clearly, then, it can be observed that reductions in the taxable income rates do not result in higher deficits, but rather they expand the tax base, increase revenues, boost GNP, increase employment, reduce unemployment, stimulate housing, and increase available construction money.

The third concurrent budget resolution from the committee proposes an economic policy of bigger deficits, bigger debt, bigger Government, unnecessary transfer payments, and greater lack of concern for the 88 million working American taxpayers. It converts the budget process from an instrument of control over wild and unnecessary spending and improper Federal revenue manipulation to an instrument of political mismanagement which will at the same time encourage a bloated Federal Government to become even bigger and trample increasingly on the economic free choice of 88 million working people. Many of us strenuously object to the passage of this Budget Committee resolution.

The amendment which the minority is proposing today, which will provide for a permanent tax rate reduction for the U.S. taxpayer, efficiently and equitably stimulates the economy while holding Government spending to a more appropriate level. It also constitutes a three-pronged attack on unemployment by first, increasing disposable income, thereby increasing buying; second, increasing the incentive to work because of increased take-home pay and profits; and third, providing new jobs by stimulating investment and capital formation.

I believe, as does Paul McCracken, one of America's most respected economists, that a reduction in tax rates will produce a more positive stimulus to the economy than the committee package. McCracken argues that permanent tax cuts would do far more to help the economy, both immediately and in the long run. As he put it:

> The higher level of economic activity produced by tax reduction is a far more effective job creation program than public spending. It is more effective because the employment opportunities are less apt to be dead-end jobs. We tried tax reduction in 1954 and it worked. We tried it in 1964 and it worked. We tried it in 1975, and the fact that 4.2 million more people are now employed (38 percent of them in the private sector) strongly suggests that it worked once again. Because history is so clear about this, one has to suspect that those who stubbornly try to maintain this distinction between tax reduction and job creation have as their major objective simply a further expansion of political empires where both the newly created bureaucracy and the holders of public service jobs will be more explicitly beholden to government.

The size of the tax cut the minority is proposing is $19 billion, which means approximately a 22-percent reduction in the tax liabilities of the 88 million working people in this country. This figure would allow Congress to give us across-the-board tax rate reduction to undo the damage that inflation has done in the last 3 years by pushing people into high brackets and by eroding the value of the personal exemption and the standard deduction. There is enough permanent tax rate reduction money here either to first, provide a five point reduction in each bracket; second, a 22-percent reduction in each bracket; or third, to adjust for the effect inflation has had since 1974 on raising everyone's income tax rates.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from New York (Mr. KEMP) who 4 years ago started the major legislative effort in this Congress to provide permanent tax reductions for the 88 million working taxpayers of this country. My

colleague is also the author of the Kemp-Rousselot Jobs Creation Act; 136 other Members of this House have cosponsored that Kemp Act.

Mr. KEMP. Mr. Chairman, I appreciate the gentleman's yielding.

The gentleman from California (Mr. ROUSSELOT) has made an outstanding case for a permanent tax cut or a permanent reduction in the tax rates. He mentioned the employment effects.

I think it is also important to point out that this is the fastest and the most efficient way not only to fight unemployment but to combat inflation as well. I want to compliment the gentleman on his presentation and also for the allusion that he made to the Kennedy round of tax cuts in 1962 and 1963. He mentioned President Kennedy's strategy for getting the economy moving again.

President Kennedy in 1963 said that the main block to full employment is an unrealistically heavy burden of taxation. He said, "The time has come to remove it."

They lowered the tax rates on all income right across the board, they reduced the corporate income tax, the economy created jobs, and pretty soon the country moved ahead without inflation. There was price stability in the early 1960's.

There is one other point that the gentleman has made, and that is that the parallel between then and now is almost eerie. It is an exact parallel, in many instances.

Mr. Chairman, the argument will be made that we do not need capital endeavor.

The CHAIRMAN. The time of the gentleman from California (Mr. ROUSSELOT) has expired.

(On request of Mr. KEMP and by unanimous consent, Mr. ROUSSELOT was allowed to proceed for 5 additional minutes.)

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I mentioned the parallel between the early 1960's and that of today in terms of economic conditions. The argument will be made that we do not need capital investment because we have unused plant capacity.

Mr. Chairman, as the gentleman said earlier, the total unused capacity of American plants and industry in 1960–61, according to the Federal Reserve, was 80.1 percent. The latest figures of the Federal Reserve say that the plant capacity today in America is 81 percent.

Mr. Chairman, we do need capital investment and more money in the hands of workers, investors, and savers; and we do need to create that type of economic condition in which the American people will have more money in their own hands.

Mr. Chairman, that is the intent of the gentleman's amendment, and I rise in strong support of it.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the remarks of my colleague, the gentleman from New York (Mr. KEMP). The gentleman has been an activist in the field of permanent tax cuts. He has not just talked about them for 4 long years; he has worked to present the concept to this House on many, many occasions. He has vigorously articulated what the rate reductions will ultimately produce for our citizens: More new housing, more new hospitals, and expanded consumer capacity. Why? Because the 88 million working people of this country would suddenly find in their pockets new revenues to spend to consume, to produce, to create new jobs; and that is where the emphasis belongs. In other words his advocacy (Mr. KEMP) of this permanent tax cut will be a message to all those working people that the Congress trusts them to spend more of their own earned income and not send so much to Washington, D.C.

Mrs. SMITH of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentlewoman from Nebraska, who I know is a new active member of the Committee on Appropriations.

Mrs. SMITH of Nebraska. Mr. Chairman, I rise in support of the amendment put forth by the gentleman from California (Mr. ROUSSELOT). The Federal Government has three major economic goals: low unemployment, low inflation, and high economic growth. It seeks to achieve those goals by influencing the level of demand in the economy. The current debate over the appropriate level of expenditure and taxation arises from the economic situation in recent years which has included high levels of unemployment, high rates of inflation, and declining economic growth. In addition, there is increasing concern over the expansion of Federal bureaucracy.

The third budget resolution as it now stands calls for heavy spending when we are already operating in the red. In fact, this budget resolution would increase the 1977 deficit from the currently projected $50.6 billion of the second concurrent resolution to the $70.3 billion of the third—an increase of 3 percent. This, in effect, means that Congress intends to spend now surpluses that it hopes will develop in the uncertain future. For the present, however, we must fund that deficit at the expense of the taxpayer. And so inflation presses workers into higher and higher tax brackets; diligent work, efficient production, and heavy investment are discouraged by the larger Government piece of every pie.

This amendment, however, stimulates economic growth in the best possible way: by cutting taxes and putting more money in the hands of the consumer to increase aggregate demand and thereby reduce unemployment. And at the same time, this amendment would hold down Government spending to curb inflation. It achieves each of the three economic goals I mentioned at the outset.

The Rousselot amendment would not increase budget outlays and authority, except for some slight increases to meet the needs of older Americans and some accelerated public works programs. This makes this congressional budget the kind of tool every American understands a budget to be, that is, a control on unnecessary spending, not a magic wand to finance wants beyond our present resources. When we passed the second budget resolution we could at least be proud that we had cut back on outlays of the Federal Government. Although there was a deficit then as well, we were moving in the direction of control. This resolution, on the other hand, reverses that trend and proposes more Government spending and larger deficits. This spending must be financed by taxpayers who are struggling with tax levels that constitute more than 42 percent of our national income and throttle incentive, investment, and individual freedom.

Now let us discuss for a moment the benefits of a permanent tax cut. Those who oppose needless spending programs have often been accused of being insensitive to the needs of the electorate.

In fact, the best way to reduce unemployment and inflation, while spurring economic growth is not to spend taxpayer money the way the Government thinks best, but to reduce taxes and let Americans decide for themselves how to spend it. Skeptics might claim that cutting the Government's intake will only sink us deeper in the red. The opposite has been proven true. Let us take for example the tax cut in 1975. That reduced initially the Government's revenues by $22.8 billion. Yet despite that cut, the actual net revenues grew!

Net Federal revenues

[In billions]

FROM INDIVIDUAL TAXES	
1974	$118.9
1975	122.4
1976	131.6
1977	[1] 153.1
FROM CORPORATE TAXES	
1974	$38.6
1975	40.6
1976	41.4
1977	[1] 56.6

[1] Estimate.

In other words, Government revenues, like muscles of the human body, are built up by tearing them down. This paradox occurs because the consumer takes his tax break and buys more of the commodities which his family needs. Production must be stepped up to meet this added demand, and workers are hired in the productive private sector to take advantage of the growing market. As unemployment goes down, these laborers begin to pay taxes and outlays through the food stamp and unemployment compensation programs decline. Ultimately the Government has surplus to devote to building a revived nation. But that surplus has not come by borrowing against some unknown future, but by developing and using America's private sector muscle.

Allow me to make one final summary comparison of the stimulus package incorporated in the resolution as it stands with this tax cut proposal:

A $50 per head rebate or income supplement is to be a one-time affair, acting for a short, temporary period. This is not comparable in effect, to a permanent cut, which would enlarge consumer spending regularly.

Larger deficits, added public works not actually related to productive capacity, and public sector jobs whose past record offers little hope for the future, continue a trend which shifts resources away

from private enterprise to Government control, thus swelling the Government and diminishing private vitality. In short, a policy aiming in the wrong direction.

Finally, the addition of 700,000 new workers to total employment since November, the rise in help-wanted advertising, the steady growth of labor jobs and the significant decline of unemployment prior to cold weather combine to suggest that private demand for new employees is growing and will continue. Furthermore, U.S. Department of Commerce figures show that real GNP rose each quarter in 1976:

Rates of increase in GNP, final sales—1972 dollars

1976:	Percent
1st quarter	3.7
2nd quarter	4.2
3rd quarter	4.3
4th quarter	4.8

A spending stimulus under these conditions is unwarranted; a tax cut stimulus is needed.

Less unemployment, less inflation, and more growth are our goals. They have been attained in the past by cutting taxes while holding down deficit spending. I stand strongly behind this concept allowing America to flex her muscles and grow.

Mr. ROUSSELOT. Mr. Chairman, I compliment my colleague, the gentlewoman from Nebraska (Mrs. SMITH) for her continued fight for the working taxpayers of this country.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to my colleague, the gentleman from Pennsylvania (Mr. SHUSTER), an active member of the Committee on Public Works and Transportation.

Mr. SHUSTER. Mr. Chairman, I thank the gentleman.

Is it fair to say that opposition to the amendment of the gentleman from California (Mr. ROUSSELOT) is opposition to a tax cut for the 88 million Americans who are working today?

Mr. ROUSSELOT. Absolutely correct.

Mr. SHUSTER. I thank the gentleman, Mr. Chairman.

Mr. ROUSSELOT. By the way, Mr. Chairman, I would say to the gentleman from Pennsylvania (Mr. SHUSTER), who I know is active in this House for the public works stimulus package that this resolution does no damage to any public works authorized, under way. It also includes the new $500 million of suggested appropriated outlays in the committee resolution which we have proposed to remain in place. It does not touch in any way the public works outlay of $500 million, in this resolution.

Therefore, Mr. Chairman, to those Members who may be told that this will rob them of some public works project or projects, I say no.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman for yielding.

I want to join wholeheartedly in support of this amendment.

I think that this is the right way in which to go. I think this approach would be supported by the great majority of American taxpayers who really want to get our economy back on the track.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the comments of the gentleman from California (Mr. LAGOMARSINO).

I might say, Mr. Chairman, that the following chart shows what type of cuts would occur in the various gross income levels from $6,100 a year to $61,000 a year, and the second column illustrates the taxable income which will be effected by the comparable gross income categories.

Mr. Chairman, what this substitute resolution and the jobs creation bill of the gentleman from New York (Mr. KEMP) would produce in across the board tax cuts is a 22-percent reduction off the top of every working taxpayer's present burden. We can see what the percentage figure of cuts would be for every income bracket in each congressional district where there are working people. This would effect an average, I want to remind the Members, of about 204,000 working people in each congressional district in this country.

Let me review the effect of these permanent tax rate reductions with my colleagues:

EFFECT OF PERMANENT TAX RATE REDUCTION

	Taxable income	Now (percent)	New tax rate: After 5-point cut (percent)	New tax rate: After 22-percent cut (percent)	Tax savings: 5-point cut	Tax savings: 22-percent rate cut
Family of 4 standard deductions or 16 percent itemized:						
$6,100	$1,000	14.0	9.0	10.9	$50	$31
$7,100	2,000	14.5	9.5	11.3	100	64
$9,100	4,000	15.5	10.5	12.1	200	136
$13,100	8,000	17.3	12.3	13.5	400	304
$17,857	12,000	18.8	13.8	14.7	600	498
$22,619	16,000	20.4	15.4	15.9	800	717
$27,381	20,000	21.9	16.9	17.1	1,000	964
$32,143	24,000	23.6	18.6	18.4	1,200	1,245
$36,905	28,000	25.4	20.4	19.8	1,400	1,562
$46,429	36,000	28.7	23.7	22.4	1,800	2,275
$61,905	52,000	34.7	29.7	27.1	2,600	3,973

They want to know what you are going to do to stimulate the economy and whether or not you will permit them—instead of the Federal Government—to make the decision as to where their money will be spent.

The CHAIRMAN. The time of the gentleman has again expired.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 2 additional minutes.)

Mr. ROUSSELOT. Mr. Chairman, I hope my colleagues will study the chart which I have provided for the whole House to review. It does not cover every single income tax bracket, but it gives each Member a good idea on the basis of gross income and taxable income what the cut will mean. It also will show what a tax rate reduction means to your constitutents, who are waiting to see if we mean what we said when we promised—those of us that did in the last election—that we are going to cut taxes.

Mr. TRIBLE. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Virginia.

Mr. TRIBLE. Mr. Chairman, for too long, this body has been associated with reckless spending and ever-rising taxes. Unfortunately, the American people have not gotten a fair return on the investment of their tax dollars.

The time has come to stop politics as usual. The substitute resolution of the gentleman from California gives us an opportunity to head in a new direction: Toward lower taxes, toward real jobs, toward less Federal spending, and toward an end to inflation and false promises.

Higher taxes and bigger budgets have not improved our standard of living. If the experience of the last 15 years of expanded Federal spending has taught us anything, it is that there is no free lunch.

Taxes at all levels constitute more than 42 percent of our national income. The present high rate of taxation holds down production and investment, reduces employment and the incentive to work, and makes people dependent on transfer payments by denying them work.

A 1-year $50 rebate will not change this pattern. Instead, we should be making permanent tax cuts for the hardworking wage earners of America.

A permanent tax reduction stimulates economic activity by increasing the after tax rewards to work and stimulates investment by making more money available for consumers to spend. Further, a permanent tax rate reduction would reduce unemployment in three ways. It increases the incentive to work. It provides new jobs by directly stimulating investment. It puts more money in the pockets of the people who will spend it.

In short, a vote for the substitute resolution is a vote for permanent tax cuts, a vote for real jobs for the unemployed, a vote for lower Government spending, and a vote for a balanced budget and a sound dollar in the near future.

I urge adoption of the substitute resolution.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the comments of our colleague, the gentleman from Virginia (Mr. TRIBLE). He has already made himself strongly heard on behalf of his constituents.

Mr. Chairman, I would like to remind my colleagues that if they vote for this substitute that the minority is offering that they will be reducing the Budget Committee add-on deficit by $14 billion. I do regret that I could not come to the Members with a balanced budget, but the problem is that we cannot balance the budget in 9 remaining months because the Federal Government is already well into fulfilling the process of the second budget resolution for 1977. Under my proposal, however, the Government will be able to recoup the initial budget cost in 1½ years. In addition, because of the expanded tax base, the economy could generate, in a year and a half time, 1,600,000 jobs according to the congressional budget estimates that were given to me by Dr. Rivlin of the Congressional Budget Office.

Mr. Chairman, I want to urge each of the Members to consider carefully what the minority amendment does and why we should adopt it. The argument that somehow this is going to deprive our "funds-starved" Federal Government of money is pure bunk.

The CHAIRMAN. The time of the gentleman has again expired.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. Mr. Chairman, again I urge my colleagues to support this fair and favorable resolution.

Mr. MATTOX. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Texas.

Mr. MATTOX. Mr. Chairman, the gentleman from California, is talking about the add-on deficit. I wonder how much actual deficit we are talking about, this increased actual deficit, how much?

Mr. ROUSSELOT. The add-on deficit, if my substitute is accepted, would be an add-on of roughly $6 billion to what has already been added on. But more important it is a reduction of $14 billion from the committee resolution. If the gentleman is the wondering why I would support this add-on deficit, it is because in a 9-month or lesser period you cannot achieve through newly generated revenues under the new expanded tax base as rapidly as we could in a year's time. It takes about a year to recoup the revenue losses from a permanent tax cut. This resolution only addresses itself to the balance of the time between now and October 1. In addition, I am not supporting an add-on deficit as much as a strong $14 billion reduction in the committee deficit which is a lot better than the majority proposal for an add-on deficit of $20 billion. So I could promise the gentleman from Texas, who is also a distinguished member of the Committee on the Budget, that when we get to the full resolution in April that I will be back with a balanced budget. There is no way the gentleman from Texas can imply that I support deficit financing.

Mr. MATTOX. What the gentleman from California really is saying is that he is actually increasing the deficit.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. LATTA, and by unanimous consent, Mr. ROUSSELOT was allowed to proceed for 1 additional minute.)

Mr. MOORHEAD of California. Mr. Chariman, would the gentleman yield?

Mr. ROUSSELOT. I yield to my colleague, the gentleman from California (Mr. MOORHEAD).

Mr. MOORHEAD of California. Mr. Chairman, I rise in strong support of the substitute amendment offered by the gentleman from California (Mr. ROUSSELOT), and commend the gentleman for offering it. I know of no way in which we can better stimulate the economy of the United States and still hold inflation in control than by this kind of amendment. It will put the people of America back to work and give them a sound dollar in their paychecks.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the comments of my colleague, the gentleman from California (Mr. MOORHEAD).

Mr. GRASSLEY. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Iowa.

Mr. GRASSLEY. Mr. Chairman, I want to ask the gentleman from California whether what we are talking about is the same thing that the Prime Minister of Great Britain was talking about when he was talking about the need to induce capital in heavy industry to create jobs? Is that not what the gentleman is particularly after?

Mr. ROUSSELOT. The reason I quoted Mr. Callaghan and explained the current history surrounding his statement is that the Socialist government in Britain has learned for the first time that you cannot spend your way out of a recession additionally, the Labor government has learned that you have got to provide an incentive—through a tax cut—to encourage the private sector to generate jobs. That is what this proposal does.

Mr. BOB WILSON. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the distinguished gentleman from California (Mr. BOB WILSON).

Mr. BOB WILSON. Mr. Chairman, I understand that it would not be in order to move to recommit House Concurrent Resolution 110, and that only amendments are in order.

I do not intend to offer an amendment to the resolution today; however, if the rules permitted, I would move to recommit it to the Budget Committee for several reasons.

The resolution before us assumes too much.

First, it assumes that the Appropriations Committees of both the House and Senate will fully approve the rescission actions recommended by President Ford. Those committees have not acted.

Second, it assumes that both the House and Senate will vote to approve the rescission bills which reflect President Ford's recommendations. I understand, as of yesterday, that no rescission bill has been introduced in the House.

As a result, the resolution is premature. It has been rushed to the floor without giving the Appropriations Committee or the House an opportunity to work their wills within the spirit of the Impoundment Control Act.

Mr. Chairman, two very important shipbuilding programs, vital to the future security of the United States, are within the rescissions which the resolution assumes to be already accomplished.

One of these items is an appropriation of $371 million, which the House voted on last year on three occasions, for the conversion of the U.S.S. *Long Beach* to a modern ship capable of defending itself and other less capable fleet units.

This program received the overwhelming support of Congress, as a congressional initiative, and has still been supported by every Navy witness appearing before the Seapower Subcommittee.

The second item, which the resolution assumes away, is $82 million of a $350 million appropriation for long-lead items for an additional nuclear powered aircraft carrier. Of the $350 million appropriated, $268 million has already been obligated. This program also is strongly supported by the Navy and the measure before us today leaves the future of this carrier in an indefinite status.

For these reasons, I intend to vote against the resolution today, and, because I believe the above programs are vital to the future defense of the United States, I will oppose any recission bill which might propose to curtail them.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Ohio.

Mr. LATTA. I thank the gentleman for yielding.

I ask this at this time, so that the gentleman might clarify a statement made earlier on a question on the other side about how much the deficit would be increased. I do not think it was clear to the person asking the question that under the gentleman's proposal and the one I am cosponsoring we would have a reduction in the deficit over what the majority has proposed.

Mr. ROUSSELOT. That is absolutely correct, by $14 billion less.

Mr. LATTA. That is correct. I think that is important to stress at this point.

Mr. ROUSSELOT. I urge my colleagues to support this substitute amendment.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SIMON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, there is much that is appealing in this amendment by my distinguished colleague on the Committee on the Budget, the gentleman from California (Mr. ROUSSELOT). But there is a gray area here. He builds on what is a weakness, frankly, in the current resolution, a $50 rebate, but he builds on the weakest part of that rebate. If I may, without violating the rules here, Mr. Chairman, go over to the other microphone so that I may use this chart, I would appreciate it.

I have done some rough calculating. Let us take this gentleman down here earning a $52,000 net income.

Mr. ROUSSELOT. If the gentleman would yield, that is basically what a Congressman now earns.

Mr. SIMON. All right. His tax would go from $18,444 down to $15,444. The theory behind this amendment is that that gentleman, and the others here, are going to spend enough money to generate all kinds of jobs so that we can move ahead. It is the old trickle-down economic theory.

My distinguished colleague, the gentleman from New York (Mr. KEMP) mentioned a group of statistics. There are two things that he did not mention in those statistics. One is the mood of the country. Let us face it: In 1961 and 1962 there was a byouancy and a hope that, frankly, we do not have today and that we have to help generate somehow.

The second thing that was not mentioned is that there are about 2 million more people unemployed today. We do have a long-range capital formation problem. That long-range capital formation problem is going to be solved, I think, by a much more thorough look at where we are on a lot of things—on dividends, corporation taxes, and a lot of other things. We are not going to solve it by a sudden amendment here on the floor right now. The best way right now to get General Motors going, to get the jobs in California, in Illinois, and elsewhere going, is to see to it that the people who really need the money, the people who are unemployed, get some income so they can buy cars and move this country ahead. We are not doing that with this amendment. What we are doing now is giving these people who see the economy in trouble some additional money, and every study shows that a great percentage of that money is going to go into banks where liquidity, it is shown, is already a fairly solid one.

Now I shall yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, first of all, I am sure the gentleman knows it did not go into the tax structure. Most of it went into investments. Some went into savings. Some went into other things and it clearly went across the board; but the gentleman is right. It puts money in the pockets of roughly 204,000 working people in the gentleman's district, the gentleman can bet, and why we continue talking to them as a Congress; I think the time has come for a tax cut.

Also, I appreciate picking up $57,500, which is what we are now being paid. While I did not vote for that, I appreciate the gentleman bringing it out—but the people of whom the gentleman is referring represent only 2 percent of the whole population. Where does the whole bulk come in? It comes on the gross income level of $7,100 to roughly $31,000 which is roughly the bulk of the people in the gentleman's district. They get the benefits. The point is to not take it out of the taxpayers' pockets, send it back here, take a big deduction and send it back to them through the bureaucracy as a "big benefit." Our amendment says right off to keep it, "We have faith in you that you know how to spend this money that we have given you.

It gets us started in the right direction.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

(At the request of Mr. ROUSSELOT, and by unanimous consent, Mr. SIMON was allowed to proceed for an additional 2 minutes.)

Mr. SIMON. Mr. Chairman, even if we assume everything the gentleman says is correct——

Mr. ROUSSELOT. I believe it is.

Mr. SIMON. I assume the gentleman believes it is. What the gentleman is doing here is calling for a permanent tax cut.

Mr. ROUSSELOT. The gentleman is certainly correct.

Mr. SIMON. That means bigger and bigger deficits in the future.

Mr. ROUSSELOT. Oh, no, it does not, not according to Dr. Rivlin, not so.

Mr. SIMON. Mr. Chairman, if I may say on my own time, it means, I think, unquestionably bigger and bigger deficits in the future and it means flexibility being taken away from Congress to be able to move on programs that this Nation really needs.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, it means $14 billion less on our deficit than the majority resolution.

Mr. SIMON. Mr. Chairman, I am not yielding at this point to my colleague, the gentleman from California; what it is is the old trickle-down theory again when, in fact, the people that need it the most are the people out of work. Those are the people we have to give some money to to get this program going.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to my colleague, the gentleman from New York.

Mr. KEMP. Mr. Chairman, I would like to make a couple of points in answer. The gentleman has disparaged our argument by saying it is the old trickle-down theory, when most economists today agree that there is money in the economy and that the biggest problem is lack of confidence and a lack of capital investment. I would say to my friend, investment and confidence will only come when we increase the aftertax reward that goes to people for investing, saving, working, and producing.

Tax rates discourage growth of supply, and with the rise in demand inflation will result at double-digit levels if all we do here today is pump up spending and consumption.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has again expired.

(At the request of Mr. KEMP, and by unanimous consent Mr. SIMON was allowed to proceed for an additional 2 minutes.)

Mr. KEMP. Mr. Chairman, if the gentleman will yield further, this is not a trickling-down of economic benefits. If this country and its people were to know that Congress was going to reduce the rates of taxation on the backs of American workers, savers, investors, and entrepreneurs, the benefits would not just trickle down, they would literally cascade down, or in other words, that is, President Kennedy, "a rising tide lifts up all ships." There is enough demand in the country today, we need to stimulate supply. We need to stimulate production. We need to reward people for investing. Employing new workers to produce the goods and services that will not only fight unemployment, but fight inflation as well. If all we needed to do was stimulate demand, we could double the rebate or fly planes out over the country and drop $50 bills in the hands of all Americans. That is not the answer. The answer is confidence and providing more after a tax reward to workers, savers and investors. That is what we must do. It is not a trickle-down. It should be called what it really is, a stimulus to production which is so much lacking in America today and Great Britain. Spending your way to jobs and prosperity does not work, if it did, Great Britain and New York would be the most prosperous economies in the world today. We must learn from experience.

Mr. SIMON. Mr. Chairman, if I may—and I might need 1 additional minute here—the only thing that is wrong with the statement that has just been made is that the statistics simply do not bear out that if we add a tax incentive we are going to increase that private investment. In the fourth quarter of 1973 the gross private investment was 11 percent higher than the gross private investment in the fourth quarter of 1976 and yet we had substantial additional tax incentives in the fourth quarter of 1976.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I think I have just about used up my time.

Mr. KEMP. I am just going to answer that particular point.

Mr. SIMON. I yield to the gentleman from New York.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. ROUSSELOT. Mr. Chairman, I ask unanimous consent that the gentleman have 2 additional minutes.

Mr. CHARLES WILSON of Texas. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. BURGENER. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I think we all ought to be most careful that we do not make a major mistake, every Member of this House and on both sides. We are talking about stimulating the economy in the fiscal year 1977. I would point out to my colleagues that the year ends on September 30 of this year. We have only 7 months left in which to stimulate. If we take a look down the road at the next year we will see we will have a combined deficit we are about to create this year and next, and we will have back-to-back deficits that totals $125 billion. That ought to be of real concern to every Member of this House because I think if we do not use this deficit in a more con-

structive manner than a quick fix rebate we are going to create unacceptable inflation.

Somebody said in the newspaper here a few weeks ago:

> There is nothing wrong with the Republican Party that 12-percent inflation would not cure.

I certainly do not want to see any problems my party might have cured in that manner and I think my colleagues on this side of the aisle do not either.

We maintain that permanent tax cuts are the only thing that would justify a large deficit at this time and we offer proof why this will work, and the proof is recent history. It was predicted when the Kennedy-Johnson tax cuts were enacted that revenues would fall. The opposite occurred. The revenues increased because the tax base was broadened and the private sector was stimulated in a lasting manner.

Let me add an additional bit of evidence to indicate this will work. The Department of Labor shows us that in the last 10 years the number of jobs in this country has increased twice as fast as the population. There has been a 21-percent increase in the number of jobs in this country in the last 10 years while the population was increasing only 10 percent. That occurred without massive Federal intervention. I think that is the key point. So we have proof that it works.

What is the bottom line on this, Mr. Chairman? Who knows best how to dispose of their hard-earned disposable income? It is the man or woman who earns the money in the first place, the wage earner.

There is a mentality around this town that says anything one gets to keep of his earnings is a loophole. That is the kind of mentality we have been dealing with around here for quite a time under all kinds of administrations. I think there is a knowledge and a wisdom in this country about what to do with disposable income that the managers and planners in this town do not have. The quick fix will not stimulate the economy. The permanent tax cuts will stimulate the economy and create lasting jobs.

I urge approval of the amendment.

Mr. ALLEN. Mr. Chairman, I have listened with great interest to this debate, and the difficulty that I find is that it is addressed to the wrong body. If we should adopt this amendment, this does not change the tax rate one penny. Any change in the tax rates, as my distinguished colleague from California well knows, must come through the Ways and Means Committee.

Now, if, when the Ways and Means Committee comes up with its tax proposal, my distinguished colleague wants then to propose a substitute, it would be in order at that time. But all we have now before us is the information that the Ways and Means Committee has, with certain modifications, agreed to the proposal of the Carter administration. That is all we have to deal with.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield at that point?

Mr. ALLEN. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate the gentleman yielding to me.

Neither is the $50 tax rebate in this resolution. It is called for as a suggestion to the Ways and Means Committee. This resolution has five aggregates, and is nothing more than a recommendation to our Ways and Means Committee to help us make a tax cut which, by the way, the President is also talking about. So, the gentleman is right. I am perfectly aware that the Ways and Means Committee writes the tax laws. I am totally aware of that. This is an overall aggregate figure as it relates to the overall budget resolution. I am sure the gentleman knows that.

Mr. ALLEN. Yes, I do know that. I know, furthermore, that the Ways and Means Committee has tentatively agreed to the Carter administration's proposal with certain modifications. That does not necessarily preclude the Ways and Means Committee from considering certain permanent tax revisions in the long run. Indeed, the President has promised that he would come forward with permanent revisions of our tax structure by the end of this year at latest. But in the meantime, we have to deal with the present emergency in this country.

Now, the majority side, I believe, is prepared to go along with President Carter and the administration on this proposal. Obviously, the Ways and Means Committee is, and I think that we are considering something that at this time is not before the proper body. I think that the proposal from my distinguished friend from California should be submitted at the time we undertake to write the tax proposals or tax revisions that may be forthcoming.

If, at that time, he wants to oppose the $50 rebate, I will understand that; but this proposal, even if it is adopted, would actually add another $6 billion, by his own estimate, to the national deficit. For that reason, I strongly urge that we vote against this proposed substitute amendment.

Mr. PICKLE. Mr. Chairman, will the gentleman yield?

Mr. ALLEN. I yield to the gentleman from Texas.

Mr. PICKLE. The gentleman from California offered his substitute amendment in a manner that probably was not subject to a point of order. It changes the totals, the outlays. He sort of invades the jurisdiction of the Ways and Means Committee, but he does not actually and specifically do it.

Had he said that we will raise this revenue specifically by category, then I think that would have been subject to a point of order. If any amendment such as that will be offered later, we will make a point of order against it. At this particular instant, I suppose the gentleman from California would be in order, although what he is trying to do probably should go before the Ways and Means Committee first.

Mr. ALLEN. If I may reclaim my time, I am not making a point of order on this matter at all. I am not saying that it is not properly before us. I am simply saying that this is a matter that should await the decision of the Ways and Means Committee. If, at that time, the gentleman from California is not satisfied with the tax proposal that comes forth from the Ways and Means Committee, then will be the time to offer his substitute amendment.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

(On request of Mr. ROUSSELOT and by unanimous consent Mr. ALLEN was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield further?

Mr. ALLEN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I want to comment on the remarks made by my colleague from Texas. As he knows, in the budget resolution processs, if my substitute amendment passes I will ask for a reconciliation resolution which will ask the Ways and Means Committee to do just this. I am entirely aware of the responsibility of the Ways and Means Committee, and assure my colleague that I do know that.

Mr. PICKLE. I say to the gentleman again that the orderly procedure would be that it go to the Ways and Means Committee first.

Mr. ALLEN. I quite agree with the gentleman from Texas on that. Furthermore, I feel that we should vote down this proposal at this time.

Mr. REGULA. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

I think it ought to be made very clear that the issue that we are voting on at this point is simply this: Do the Members believe that the American people, who earn the money, should keep it and have the right to spend it, or should we take it away from them and make that judgment as to how to spend it for them?

This is what we are talking about today.

This bill is an economic stimulus package. This should be billed as a people's stimulus package—stimulate the people to be productive.

What is the wealth of the Nation? It is the productivity of the people, the stimulus that they get to keep part of what they produce. If we are going to have permanent jobs, we are going to stimulate jobs that enable individuals to have confidence in their permanency. We have heard the word "confidence" many times here. What will give the people confidence? Knowing the Government will not take away the fruits of their labor.

Keep in mind that is the issue today. We are talking about two things. We are talking about a direct tax cut. Leave the money in the pockets of the people who earn it. But, also, equally important, we are talking about not levying that hidden tax called inflation.

If we pass this package as originally proposed, we will be levying the cruelest tax of all—a regressive tax—which falls most heavily upon the people least able to pay, those living on fixed incomes.

Keep in mind that we benefit them in two ways if we adopt the substitute as proposed. First, we leave the money in their pockets and, second, we avoid that cruel tax of inflation.

Also it would do far more to stimulate the kind of productivity that would give

individuals the permanent jobs that they seek, and it would give them pride and confidence in the leadership of this Nation.

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield to the gentlewoman from Maryland (Mrs. HOLT).

Mrs. HOLT. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the substitute to House Concurrent Resolution 110 offered by the gentleman from California. If we are really interested in promoting strong, durable economic growth and more jobs for the American people, we will enact permanent tax cuts to allow the American people to spend, save and invest more of their own earnings.

The gentleman proposes to allow significant reduction of the tax rate on each income bracket. This would: First, increase the spendable income of workers for the purchase of goods and services; second, stimulate production by improving the rewards for investment and work; and third, provide a dramatic increase in new jobs needed for production to satisfy consumer demand.

The classes of 1977 will soon add a new surge of job-seeking young people to the labor force, but at a time when the number of jobs is woefully inadequate for the existing labor force. Unemployment is our most serious social problem.

Unfortunately, the resolution reported to this House by the Budget Committee does not offer a remedy for the problem. Our struggling national economy cannot be effectively treated with a patch here and a dab of paste there, by large outlays of public funds to create jobs that would evaporate after the funds were exhausted.

Unemployment is not an isolated problem. It is a result of other economic conditions that developed over many years, and the remedy lies in correcting those conditions. The resolution reported by the Budget Committee does not deal with those conditions.

At the root of our troubles is the growth of Government, which is imposing such an enormous burden on the private sector that productive economic growth is restricted. Taxation and inflation have become an excessive drain on the earnings and savings of the people. Spendable income declines as Government grows, investment capital diminishes as Government grows, the rewards for work and investment are reduced as Government grows.

The late President John F. Kennedy made the point emphatically when he addressed the Economic Club of New York on December 14, 1962. He said:

> Our present tax system exerts too heavy a drag on growth. It siphons out of the private economy too large a share of personal and business purchasing power. It reduces the financial incentives for personal effort, investment, and risk-taking.

But the trend has not been reversed. Government has continued to grow faster than the rate of growth in the private sector, taking more and more of our national wealth, leaving less and less for real economic development.

Government at all levels now takes 38 percent of our gross national product and 42 percent of our national income. It is quite obvious that Government has sharply reduced the ability of our economy to expand rapidly enough to provide the productive jobs that our people need.

Federal spending to stimulate consumer spending does not make any sense if high tax rates continue to discourage production and the creation of productive jobs. And when Government spending increases the money supply without an increase in production of the goods and services that people buy, the sure result is inflation.

The real advantage of a permanent tax cut is that it would increase production and productive jobs without setting off another round of inflation.

The quick fix of more Government spending for handouts and temporary public jobs would not be effective. The same approach has been tried several times in recent years, and it has not produced the sustained economic growth and jobs that our people need. It has produced inflation and more unemployment.

We recognize that this budget resolution cannot be used to enact any program, but it does offer us an opportunity to make a broad policy decision, and the choice is clear.

One way leads inevitably to high inflation and fewer jobs. The other way—permanent tax reductions—would bring more production and more jobs for the American people.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to this substitute. I believe that each time the committee has labeled and brought forth a concurrent resolution on the budget, the gentleman from California (Mr. ROUSSELOT) has had a substitute to offer. All of them follow the same general pattern. The House never has adopted one of those substitutes. There are several things, obviously, wrong with this one. There are several good reasons why the House should reject it.

In the first place, it would mandate a ceiling on expenditures, not only below that requested by the President for stimulation of the economy, but below that which already has been authorized. If this kind of a substitute were to be adopted, we would have to go back and lodge points of order against programs that already have been authorized by the Congress; and, obviously, points of order would lie against any stimulative activity that we might want to bring on to get the economy moving. That would include the public works jobs bill which is scheduled for action on the floor tomorrow.

But if that were not enough to oppose this substitute, I want to ask the Members to examine whom it would benefit the most and whom it would benefit the least.

I have asked the professional staff to examine, on the basis of families of four, with standard deductions, and the average rate of applicable taxation, exactly how much money this would give back to an average family of four earning $10,000 a year and how much it would give back to a family of four earning $100,000 a year.

Based upon the average standard deductions and exemptions and the effective rates of taxation which actually apply in those two income brackets, the family earning $10,000 a year would get $101. That is all. The family earning $100,000 annually would get $3,959 back.

So when we apply a flat, across-the-board 15 percent reduction in tax, what we do, of course, is to benefit those at the very top of the economic pyramid.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. Yes, I yield to my friend, the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the gentleman's yielding, and I will be brief.

I want to correct the gentleman's figures. On the basis of either a 22-percent, off-the-top cut in income tax rate, which is proposed here, or the 5-point reduction in personal income tax brackets, the basic cut for a person in the $9,100 bracket against his taxable income would amount to this: He would have a savings of over $200 per year and $136, respectively. So the gentleman is not quite right. I think $200 is a lot of money.

Mr. WRIGHT. Mr. Chairman, I asked the professional staff to compute this on the basis of an average family of four earning $10,000 a year, and I assume their figures are accurate. Even if we were to assume they got twice that much back, they still would get less than half as much benefit as a percentage of their income as a family earning $100,000 would receive.

I notice that the gentleman from New York (Mr. KEMP) is seeking the opportunity to be recognized. I just want to say this to the gentleman from New York. I am really surprised that the gentleman supported this kind of an arrangement, because last year the gentleman from New York (Mr. KEMP) brought forth what I thought was a very innovative plan. It was a plan to create an employment rebate, a tax credit to employers for each new person they put on the payroll.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. In a moment. First, I want to talk about the gentleman's plan because I think it is excellent. The gentleman does acknowledge that was the plan he put forward last year, does he not?

Mr. KEMP. No, it is not.

Mr. WRIGHT. Then I take back all those kind things I just said about his foresight. I thought it was one of those things I could support. That, incidentally, is what the Ways and Means Committee now is proposing.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(By unanimous consent, Mr. WRIGHT was allowed to proceed for 1 additional minute.)

Mr. WRIGHT. Mr. Chairman, what I am suggesting to the Members is just this: It is really very simple. The Committee on Ways and Means has brought us a resolution, one that is addressed to stimulating employment, to assisting employers, and to encouraging additional employment. The committee resolution

accomplishes that and permits these things to go into effect.

This amendment, if it were adopted, would give four times the benefits as a percentage of income back to the family earning $100,000 as it would to the family earning $10,000. That surely is regressive, and it certainly is not what this House wants to do.

Mr. KEMP. Mr. Chairman, I rise in support of the substitute amendment.

Mr. Chairman, I do not want to take all my time in answering my friend, the majority leader, but I would like to address myself to his question because the gentleman has suggested that we can actually raise money by further raising the tax rates. I strongly disagree. High tax rates are now a drag on the economy, just as they were under Kennedy in the 1960's. If the high rates produce more revenue it necessarily follows then that if we raise the rates to 100 percent, we could raise more revenue and take all of their income.

I would remind my colleagues of a simple economic truth; that is there are two points at which we can raise no revenue for the Government, and those are, on one hand zero taxation and, on the other, 100 percent taxation. Both are counterproductive,. My premise is that we can actually raise more money from the wealthy by lowering the rates like President Kennedy did in 1964 when the rates were lowered from 90 percent to 70 percent. When he did that, people who are wealthy for instance spent less time looking for municipal tax-free bonds and other shelters and put their money into the productive sector of the economy which produced revenues for Government.

In other words as we raised the tax rates, we encourage people to seek avenues by which they can shelter their income, and if we keep raising the rate up and up, ultimately we get no revenue. That is what Britain is finding out, that is what Sweden is finding out, that is what every nation in the world finds out when it raises the tax rates unconsciously high and tries to soak the rich. As the New York Times pointed out in 1923 when Secretary of Treasury Andrew Mellon proposed a modest cut in the high surtax on incomes of individuals and business:

> Parts of Secretary Mellon's plan to cut taxes are accepted by everybody. No one can directly oppose easing the lot of people of moderate means. But there is much bother about lowering the rate of surtaxes. Senator Simmons of North Carolina declares that his party will yield to none in its desire to reduce the taxes of the middle classes, but that it will withstand to the last gasp the Mellon scheme which is intended to "relieve the rich."
>
> The great point of Secretary Mellon's main argument is that the rich have found ways to relieve themselves. They are progressively escaping the heavy taxes levied specially upon them. It was certain from the first that they would do so. The Treasury figures cited by Mr. Mellon prove that they have done it. He wants in reality to get more money out of them than they are now paying. But he proposes to do it by making their rate of taxation lower. This is in line with economy theory and with experience running over many years, though of course it seems a ridiculous proposition to those whose thoughts are all of aiming sharp arrows of taxation at wealth.
>
> Suppose the surtaxes on large incomes are not reduced—suppose that they are even increased; what will happen? The rich may or may not be relieved, but it is certain that the poor will be hit harder than ever. For a large proportion of the heavy taxation of rich corporations is inevitably passed on to the consumer. The tax is necessarily entered as an item in the total cost of production. The result is to make prices rise, to increase rents, to cause the poor man to feel that the necessities of life are less within his reach than ever. This sure course of economic events has been followed in all countries, and it has plainly been followed during the last few years in the United States. The lawmakers gleefully start out to lay oppressive taxes upon the rich, but really are all the while striking at the poor. The true way to help the latter is to make it possible for the former to put more money into enterprises and industry and less into tax-exempt securities.

We are proposing a 22-percent; across-the-board reduction in every taxpayer's rates, not only to make up Government-induced inflation of the last 4 or 5 years, but also to create incentives for people at work and to produce to save and invest. To further quote another Times editorial—

> This would lighten the demands upon millions of purses hard to fill. It would not only do away with oppressive taxes, it would lower the cost of living. It would release capital for productive industry and enterprise of all kinds. This would result in fuller employment of labor, multiplication of goods in common consumption, and probably bring about a period of great and legitimate expansion of industry and commerce never surpassed in the United States.

Therefore, Mr. Chairman, we propose the same thing that President Kennedy did in 1962 and in 1963 to get the economy moving and no charges were made that he was trying to give the wealthy a tax break when he lowered the rate from 90 percent to 70 percent.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. KEMP. I yield to the gentleman from Texas.

Mr. WRIGHT. Mr. Chairman, I appreciate the gentleman's yielding.

I think there are very substantial differences between this kind of arrangement now proposed and that which was adopted by Congress at the request of President Kennedy in 1962 and 1963.

In the first place, a substantial part of President Kennedy's program that the Congress adopted at that time was a 7-percent investment tax credit. It encouraged business to invest in new plant and equipment, and thus to create jobs.

The Committee on Ways and Means already has approved a proposal to put before this body very soon which would have that fundamental effect. However, it was not something like this proposal currently pending.

In any event, Mr. Chairman, for the record, I should like to agree with the gentleman that 100 percent taxation is not a very good idea. I suppose that everyone would agree with that. I am not aware that anyone has made any such suggestion.

Mr. KEMP. Mr. Chairman, I appreciate hearing from that side of the aisle that they do not plan to raise the rates any higher. That is progress. I guess.

I would say to my friends on both sides of the aisle that there is not anyone in this Chamber who does not want to create jobs and get the economy going again, producing the goods and services, which will help solve the twin problems of inflation and unemployment.

I would submit to the Members that this rate reduction is indeed exactly what President Kennedy did in 1964 and I am sure that people remember that in 1962 he instituted the investment tax credit and a more accelerated rate of depreciation for business investment. In 1964 the personal tax rates were reduced from 90 percent to 70 percent, and from 20 percent down to 14 percent and about 25 percent reductions in between those highs and lows.

The point is, Mr. Chairman, that as we lowered the rates, we increased the revenue. Revenues increased every year throughout the first 5 years of that tax rate reduction. That is an extremely important point because, as people received an added incentive to produce, to work, to save, and to invest, jobs were created and inflation was combatted. Capital spending increased significantly as people had more after tax income to keep, to spend, or to save and invest. The after tax reward was increased for work, for saving, and for investing.

I would suggest that the parallels between today and then, as was pointed out by the gentleman from California (Mr. ROUSSELOT), are far more relevant than the opposition cares to admit. Prof. Walter Heller testified that the Kennedy tax reductions paid for themselves inside of 1 year.

Beyond that, they worked on the supply side of the economy.

Mr. Chairman, the tax rebate is simply a transfer payment and simply stimulates demand. It does nothing to stimulate supply. I suggest that there is no evidence that we are lacking in demand. On the contrary, what we are lacking is in confidence and in capital spending, and in the incentives for people to work and produce new supplies. If inflation is too many dollars producing too few goods and services not only must we slow down the growth of Government money creation, we must increase our production of new goods.

Mr. Chairman, inflation must be stopped and it can be if we remove the incentive for Government to inflate. Governments inflate in order to raise tax revenues without having to vote on tax increases.

In the Kennedy tax proposals and debates we can learn much from the arguments used by the protagonists.

President Kennedy announced his plan for a tax cut to stimulate the economy early in his administration. In an address to the Nation on August 13, 1962, he said:

> The single most important fiscal weapon available to strengthen the national economy is the Federal tax policy. The right kind of tax cut at the right time is the most effective measure that this Government could take to spur our economy forward. For the facts of the matter are that our present tax system is a drag on economic recovery and eco-

nomic growth, biting heavily into the purchasing power of every taxpayer and every consumer.

Walter Heller was at that time the Chairman of the Council of Economic Advisers. Thus it fell to him to explain why taxes had risen to such a high level that they were choking off economic growth. He later elaborated his position in a book called "New Dimensions of Political Economy":

In a growth context, the great revenue-raising power of our Federal tax system produces a built-in average increase of $7 to $8 billion a year in Federal revenues (net of the automatic increase in transfer payments). Unless it is offset by such "fiscal dividends" as tax cuts or expansion of Federal programs, this automatic rise in revenues will become a "fiscal drag" siphoning too much of the economic substance out of the private economy and thereby choking expansion.

We do not hear much about "fiscal drag" any more. Apparently the liberal Keynesians, like Heller, who used to complain about it have decided it really is not such a bad thing after all for the Government to automatically pick up billions of dollars of new revenue each year without having to pass a tax increase. This way there is more money available for expensive new spending programs.

The truth is that increased spending does not adequately return to the economy this "fiscal dividend," which results because our tax rates are progressive, thus pushing people into higher brackets as the economy grows and they earn higher incomes. The problem is that incomes have been rising steadily not as a result of real economic growth, but because of inflation. This pushes people into higher tax brackets without increasing their real incomes and results in an actual decline in purchasing power. It also builds in a powerful disincentive to work harder, produce more, and invest in the future. This cannot be offset by increased Government spending, but only by a reduction in the tax rates.

By way of illustration, in the early 1960's only about 3 percent of all tax returns were subject to marginal tax rates over 30 percent. Today, nearly a third of all tax returns are in these higher brackets.

This is a phenomenon which is well documented. The Congressional Budget Office, for example, estimates that every 1-percent increase in the price level will bring about an automatic 1.2 percent increase in tax revenues—Background Paper No. 9, June 18, 1976, page 21. Thus the Office of Management and Budget estimates that given the projections for economic growth and inflation contained in the Federal budget for fiscal year 1978, median family income for a family of four would rise from $17,300 in 1976 to $28,460 in 1982. This would increase the percentage of Federal income taxes paid from 11.4 percent in 1976 to 15.8 percent in 1982, assuming no changes in present tax law.

The problem of inflation-induced increases in the tax rates is much more serious today than it was when President Kennedy announced his tax reduction plan. Consequently, the positive effects on employment, investment, and production which would result from an across-the-board cut in tax rates could be expected to be much greater today. President Kennedy, in fact, underestimated the benefits from his own program. He thought there would be an increase in the budget deficit from the cut in taxes but felt that this would be made up in the long run. As it turned out, the increase in productivity and economic growth caused an immediate increase in tax revenues after the tax cut which exceeded Treasury estimates for the next 6 years. The following table illustrates this:

[In billions]

Year	1963	1964	1965	1966	1967	1968	Total
Treasury-estimated revenue losses	—2.4	—5.2	—13.3	—20	—23.7	—24.4	—89
Actual revenue gains	+7.0	+6.0	+4.0	+14	+19.0	+4.0	+54

Note: Library of Congress study done at my request.

Of course, if one is to believe the public statements by President Carter and members of his administration, there is no reason why they should differ with these conclusions. Treasury Secretary Blumenthal, for example, has repeatedly spoken about the need for changing the tax system so that all income, including capital gains, would be taxed at a uniform, lower rate. He also believes that this would increase Government revenues:

The simple-minded notion underlying all this is that, if it works, I would hope that there would be a bigger pie, and higher levels of activity producing more revenue. You know, it's like the old joke in business—"we're losing money, but we'll make it up on volume." (Washington Post, January 23, 1977)

The New York Daily News recently analyzed President Carter's economic stimulus program and concluded that it is totally misdirected and, therefore, unlikely to produce any of the benefits it is designed to provide. The fundamental problem with President Carter's program is that it does not recognize the destructive effects that high tax rates have had on the economy. They are prohibiting the formation of capital, inhibiting new investment, and destroying the incentive to work and produce. It is no wonder that so many people are on unemployment when they cannot make enough aftertax income to be as well off as they are on transfer payments and unemployment compensation which, of course, are tax free.

A significant reduction in the tax rates across the board would not only create the capital that American industry needs to expand, but would reduce the cost of hiring new workers and create a greater incentive to work harder and get off unemployment. We need jobs, jobs that produce wealth and tax revenues not more Government jobs that consume tax revenues.

It is Professor McCracken's view that President Carter's program is essentially a "Rube Goldberg contrivance." He argues instead that permanent tax cuts would do far more to help the economy, both immediately and in the long run. As he put it:

The higher level of economic activity produced by tax reduction is a far more effective job creation program than public spending. It is more effective because it is faster and because the employment opportunities are less apt to be dead-end jobs. We tried tax reduction in 1954 and it worked. We tried it in 1964 and it worked. We tried it in 1975, and the fact that 4.2 million more people are now employed (88 percent of them in the private sector) strongly suggests that it worked once again. Because history is so clear about this, one has to suspect that those who stubbornly try to maintain this distinction between tax reduction and job creation have as their major objective simply a further expansion of political empires where both the newly created bureaucracy and the holders of public service jobs will be more explicitly beholden to government.

Mr. Chairman, one of the reasons most often cited as a justification for increased public works spending versus tax reductions to create jobs is that public works spending is supposed to work more quickly, because the jobs are created directly through Government spending rather than indirectly through the expansion of private industry.

I would argue, on the other hand, that the exact opposite is true. The effect of an across-the-board tax rate reduction would be immediate and substantial, while the evidence suggests that public works spending mostly just creates instant jobs for bureaucrats here in Washington. By way of illustration, an editorial from the Washington Star last Thursday reports that the total number of people hired as a result of the $2 billion public works bill passed 7 months ago is exactly 250 bureaucrats at the Department of Commerce to administer the program. The editorial further suggests that even when the money is finally distributed a large part of it will be going to areas that do not really have an unemployment problem.

Mr. Chairman, unemployment is intolerable and a better way to create jobs is to cut tax rates. If tax rates were reduced it would immediately lower the cost of hiring new workers by increasing take-home pay. This means that a company would be able to pay less to hire new workers without reducing their take-home pay. Furthermore, this would create billions of dollars of capital with which to expand productive capacity, which will not only create jobs but will increase the total supply of goods and services at the same time, which in turn will fight inflation.

By contrast, public works jobs are created very slowly, due to massive amounts of redtape, indeed, there are about $19 billion of projects right now in the paperwork process, and they must be supported by taxation on the productive element of society, or by borrowing which reduces the amount of private capital available for investment. Consequently, many people are now seriously question-

ing the assumption that public works programs are good ways to stimulate the economy.

Reducing tax rates would be the most immediate and effective boost to economic recovery of all the options open to us. It would stimulate output, the purchase of additional equipment, the construction of homes and factories, and the creation of more jobs at higher real wages. In short, reduced rates will combat both inflation and unemployment.

At lower tax rates, we would have a substantially larger private sector and an expanding tax base. The expanded tax base would more than offset the decline in tax rates, as it has done in the past, so that Government revenues would be higher, even as they fell as a percentage of gross national product. In fact, paradoxically, they would be higher because they were a lower percentage of GNP and therefore less of a drag on the growth of the productive sector.

The choice before us is so simple that it is hard to imagine anyone's not being able to see it. There are two ways to try to gain additional tax revenues: higher tax rates with less economic activity, on the one hand, or lower tax rates with greater economic activity on the other.

Higher tax rates stunt economic growth, and the amount of income available to be taxed, while lower tax rates increase economic growth and income. Congress should pass real tax reform by guaranteeing lower tax rates and thus assuring real growth, but it will not until the public demands it. Too many in Congress have opted for the "spend your way to prosperity" approach in the past because of their attitude that Congress knows how to spend the people's income better than the people themselves.

The CHAIRMAN. The time of the gentleman from New York (Mr. KEMP) has expired.

Mr. KEMP. Mr. Chairman, I ask unanimous consent to proceed for 1 additional minute.

Mr. HEFNER. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. LATTA. Mr. Chairman, I move to strike the requisite number of words.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I rise in support of the substitute amendment of the gentleman from California (Mr. ROUSSELOT).

Mr. Chairman, I do not believe that a $70.3 billion deficit is the proper stimulus for our economy. Obvious realities of recent practical experience have proven that our Government can not spend us back to prosperity with borrowed and printing press money. If this approach really worked, New York City and the United Kingdom should be two of the most prosperous places on Earth. These two dismal examples not withstanding, we are today being asked to approve an additional $70.3 billion in deficit financed spending on top of our outrageous public debt. Is this how President Carter plans to balance the budget by the end of his first term? Does a $70.3 billion deficit look like a step in the direction of a balanced budget?

In my opinion, the substitute is a better way to go about increasing the purchasing power and stimulating additional productive jobs in the private sector of the economy where the real wealth of this Nation is and always has been. Large deficits only stimulate more inflation, more bureaucratic interference in the marketplace and greater dependence on Federal handouts. Have so many of my colleagues already forgotten that our present recession was caused by previous inflationary deficit spending.

The stress of the Congress should be on a balanced budget, lower Federal tax rates for all taxpayers, reduced Federal spending, and a smaller less expensive Federal establishment. I feel the stubstitute proposal is more likely to stimulate economic confidence, capital investment, consumption, new job opportunties and an expansion of the tax base than a tax rebate. It has happened every time that there have been major tax reductions enacted by the Congress and it can happen again. So I support the substitute of the gentleman from California as a move in the right direction.

Mr. LATTA. Mr. Chairman, I rise in support of the amendment.

I have listened very intently to the arguments all this afternoon, and as I indicated yesterday, I think it is a matter of philosophy. The majority believes in one philosophy, and on our side we believe in another.

Mr. Chairman, we believe on this side that the way to create jobs is through the proposal put forth by the gentleman from California (Mr. ROUSSELOT) and others, including myself.

After the last handout that this Democrat-controlled Congress gave the American people, the question arose, How long will it last? What will it do?

We got the answer. It did not last, and here we are right back before this House today with a similar proposal, except that this time we are are also going to hand $50 around to certain individuals whether they work or whether they do not, and whether they earn income or whether they do not earn income.

I think there is a tremendous flaw in this particular proposal, calling for $8,200,000,000 in the per capita $50 rebate, $1,400,000,000 for rebates in excess of liability, meaning they do not pay any tax, and $50 payments to the SSI at a cost of $1,800,000,000.

After the last so-called rebate, even people on social security saw through it and said, "This is cruel, we shouldn't do it." Some people sent the money back.

If we are interested in creating jobs this is not the way to do it. We have had one experience and it was a costly experience. Almost $8 billion went down the drain and we did not get much for it. Some of the people went to the grocery store once or twice and then the money was gone. Now they will get $50 and they will go down to the grocery store once and then the $50 will be gone.

Does one think that we will create jobs of a permanent nature through such a proposal? Hogwash. If Members are interested in politics, this is not the way to go because next year is an election year and the American people are going to be asking at that time, "What were the effects of your proposal this year that took us down that road of increasing the national debt?"

The people are becoming more aware of the national debt every day and aware of how much it costs them just to service that debt. They know that when we get up to almost $40 billion, which is the fourth highest functional category in the entire budget, just to service the national debt, they are unhappy about that. The American people can understand the meaning of such an expense, especially on April 15 when they pay up on their tax bill. They will be asking why.

Sure, we might buy time today. But, comes next year the question will be how successful was this plan? How successful was this plan to create permanent jobs?

That is what the people are interested in.

I was amazed to hear someone in the well, one of the members of the committee, say, "Why we want to pass out these $50 checks so people can buy automobiles."

How many automobiles are going to be purchased with $50 checks?

I remember the other time when we had this proposal before us, a couple of years ago. Some of the union members from the General Motors plant in my district came down here lobbying against a permanent tax reduction, lobbying against President Ford's proposal, because they said it was giving too much money to people who pay taxes. Imagine that—people who paid taxes.

I said to them, "Just 1 minute. You fellows are out of work today. If we follow this proposal outlined by President Ford maybe some of these people will get back some of the money they paid in in taxes. And then they will go out and buy a new automobile and put you boys back to work. Is that what you are interested in?"

They said, "Yes."

I said, "How many people do you think who are going to get this little handout are going to go down and buy new automobiles and put you back to work?"

Let me say to the Members that there in my office they saw through that trick. I repeat, they saw through that trick and they will see through this one.

I know that on the majority side you have the votes. That was decided last November 2. You can put through this House any plan you want to. But, let me say that there will be a day of reckoning and, hopefully, that will be next year.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DICKS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I intend to vote for the budget resolution but I strongly disagree with the assumption made by the Budget Committee in reaching its spending ceiling that Congress will approve recession of the fiscal year 1977 funding for the U.S.S. *Long Beach* conversion.

I believe Congress may well reject that rescission. It certainly is premature conjecture for the Budget Committee to presume this action if it were not for the fact that this resolution has absolutely no legal or binding impact on the House,

I would offer the appropriate amendment to the third concurrent resolution.

The House Appropriations Committee has this matter under consideration. The Budget Committee would have been better advised to await the actions of the Appropriation Committee which has jurisdiction over rescissions.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the proposed substitute amendment.

Mr. Chairman, I have the greatest respect and admiration for my friend the gentleman from California (Mr. ROUSSELOT) the author of this amendment, but I think it is ill-advised and ill-conceived.

I would like to remind the gentleman from California that the $50 rebate is not something new that the present Committee on Ways and Means conceived. It was conceived by the Ford administration several years ago, and it did its work several years ago. It did stimulate the economy. It does work. It does not last because something else had to be done besides a quick tax rebate. This time around in this recession we have added something else, namely a jobs stimulus package.

So, Mr. Chairman, it is all well and good to bring in the name of our former great President, President Kennedy, in this debate, when we had a permanent tax cut, but the economic situation is not the same; it is not the same at all. Many factors were different. Many factors are different. Among other things, President Kennedy did not tie the tax reduction in with a reduction in spending.

The Rousselot amendment would do two things. It would reduce individual income taxes in 1977 by $19 billion or $38 billion at annual rates to provide a 22 percent reduction in tax rates. As a pretty healthy taxpayer in this country, I personally would not mind the 22 percent reduction in my tax rate. It would be very nice for me, and it would be substantial, but I do not think it would contribute to stimulating the economy, nor do I think it would help to get the unemployment rate down to 6.6 to 6.8 percent as we are trying to do in this bill.

The Rousselot amendment would do one other thing. It would reduce spending by almost $14 billion in fiscal year 1977, removing all of the economic stimulus, the economic stimulus approved by the Committee on the Budget and supported by the President. It is wrong at this time to enact a permanent tax cut when a new President, President Carter, at this very moment is developing a general reform proposal for the entire tax system. Let us not prejudge the President. Let us give him a chance. Let us give him a chance to really look at the entire Internal Revenue Code and come up with a good reform proposal. A permanent tax cut of this size at this time would foreclose many of Congress' options in considering a much needed overhaul of our tax system.

Second, permanent reductions of 22 percent for all individual taxpayers would reduce the progressive nature—the progressivity nature, if you will—of our existing tax system, and we have enough regressive taxes in this country. The only progressive tax system we have is the individual income tax, and let us not take away from the progressive nature of that tax system. Obviously, a 22 percent reduction for those in the top income brackets means a great deal more to those taxpayers than to those in our lower brackets who would receive only a 2.5 percent reduction.

Third, the Committee on the Budget stimulus package represents a balanced approach to stimulating the economy. It is not a magic ward as was said yesterday, but it is a modest, reasonable, balanced approach providing temporary tax rebates to spur economic activity, and following with direct job-creating programs to continue the recovery as the impact of the rebates fades. Our experience with the 1975 rebates proposed by then President Ford was that temporary tax reductions without the follow-on of direct spending activities simply were insufficient to maintain economic recovery.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. GIAIMO was allowed to proceed for 1 additional minute.)

Fourth, the substantial spending reductions which the amendment would make would virtually offset the tax reductions, providing very little positive stimulus to the economy. As a result, I believe the deficit would in fact be a great deal higher than the $58 billion deficit proposed by the amendment because there is very little time for the tax reductions to stimulate the economy in this fiscal year sufficiently to recoup the immediate revenue losses proposed in the amendment.

This amendment should be rejected by the House and I urge all Members to oppose the amendment.

Mr. RHODES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the majority has brought in a budget resolution along the lines of the recommendations made by the Carter administration for an economic package. I begin to wonder whether an economic package is necessary at all. In fact, I cannot understand why people do not look at the vital signs of the economy, as I do, and realize that unemployment is on the way down and all of the signs as far as business activity are concerned look good.

It seems to me the other side of the aisle is in the position of being like the man who took two pills and felt so good he decided to take the whole bottle. Of course sometimes that can be fatal.

I submit that right now our economy does not need this economic package. I further submit that if we do enact this legislation—and I think we will because the majority has the votes—it is not going to have any real effect on the economy as far as the jobs program is concerned until around the middle of this year or perhaps the first of next year.

All the signs continue to point upward, as I see them, then the impact of this program is going to hit about the time the economy is ready to take off like a big bird anyway.

The underlying problem in the economy, Mr. Chairman, is inflation. It is not recession, but inflation. And yet we are going to enact this resolution which will have the effect of causing another inflationary spiral in this country. It is the worst possible thing we can do.

If we are going to do something—and we obviously are—I plead with the Members to consider the amendment in the nature of a substitute offered by the gentleman from California. His proposal strikes the economy where it does have a weakness—that is in capital formation and in capital expenditure. The thing which a permanent cut will allow the people of this country to do within the free enterprise system is to move ahead, to increase the purchasing power over a long period of time, and to then plan to increase plant and production so that we can meet those demands which will be made on the economy. Goods will be sold, profits will be made, and jobs will be created, and we will be doing the things which I think the other side wants to do and which I share.

I am not saying I like high unemployment. It is currently too high. I would like to get it down as soon as we can. The best way to do it is through the tax cut. I do not know why the people on the other side cannot be convinced the situation is not dissimilar—it is not completely similar, but it is not dissimilar—to the situation when President Kennedy asked Congress to cut taxes and taxes were cut.

I think it has been amply demonstrated this is one of the most effective pieces of economic statesmanship which we have seen in this country in many a year. Why can we not do it again? Why not do the stimulating in this proven way by cutting taxes?

I think I could say these jobs which are going to be meted out will be meted out by the people who will be the administrators of the other party. I think I could point out there are 38 Democratic Governors around the country who will be looking very zealously toward handing out these jobs. I think I could yell "politics," but I will not. I am not going to do that. I think possibly there might be some such motivation but I will not say that.

But I will say the effect of this legislation will not only not be positive, but it will be completely negative. I think if this legislation passes the other side will look back and say:

> Gee, the economy did not look so bad and we are sorry we are in this inflationary binge—

Which we will then be in. And we will be back here again with some legislation to take care of that inflation. I hope we will not have to do it with wage and price controls, because I think that will be the worst possible way we can do it for this country.

Mr. REGULA. Mr. Chairman, will the gentleman yield

Mr. RHODES. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, I think it was Burt Lance who said:

> If it ain't broke, don't fix it.

That is what we are saying we will do here. We will fix what is not broken. I repeat:

> It ain't broke, so don't fix it.

tims of an energy disaster have the resources to meet their daily needs in a crisis period.

It gives the President authority to declare an energy disaster upon the petition of the Governor of the affected State, much like the present Federal Disaster Act.

This legislation allows the President to direct and allocate the use of all energy supplies, establish compulsory conservation programs, and set price ceilings for fuel supplies to protect consumers during an energy disaster.

The bill takes a critical step to aid individuals and families who are suffering from lack of fuel or who cannot afford to purchase it at rising prices. The bill creates an emergency energy loan program to provide people caught in an energy disaster financial assistance to acquire a basic level of fuel. It allows up to 75 percent of the loan amount to be canceled in cases of extreme hardship. In addition, to assist persons on low or fixed incomes who cannot obtain loans, the bill adopts the grant program from present disaster authority and allows for grants of up to $5,000 to meet energy expenses or other serious needs developing from an energy shortage.

Mr. Speaker, the Appropriations Committee yesterday heard testimony concerning the administration's economic stimulus package and the need for a $50 tax rebate to increase buying power. Yet in the same hearing we were informed that families need the $50 to help in meeting increased energy costs. The economic consequences of our present energy disaster are there to see for all who will take the time to observe. It is simply not enough to provide allocation authority for one energy resource. My office has been inundated with mail from senior citizens and people trying to make ends meet on low incomes or unemployment compensation—the realities are that they cannot pay increased gas, electricity or oil bills. Their livelihood, personal security, and even lives may be at stake unless we take action to provide a broad range of disaster aid.

PAY RAISE OBJECTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. EDWARDS) is recognized for 10 minutes.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I strongly protest the nearly $13,000 pay raise that has been proposed for Members of Congress, and which many Members, through their passivity on this issue, seem ready, if not eager, to let be enacted. The justification for the raise is that salaries of Members should be adjusted to compensate for the rise in the cost of living. What this argument overlooks is that Members of Congress are largely to blame for that inflation, which has inflicted so many hardships on so many people.

The fiscal mismanagement which best characterizes the spending programs of the majority of Congress is in large measure the cause of the most pressing problem facing the American people. It is hard to ask the public to consider or support long-range solutions to other problems when the costs of food, clothing, housing, health care, transportation, and education continue to go up each year, at a much faster pace than the incomes of millions of Americans.

This pay plan proposes to reward Congress for doing an unsatisfactory job and, in the process, worsen the economy by generating still higher inflation. In the real world, one does not get a pay raise for causing harm to his employer. Instead, one is fired, demoted, or handed a pay cut. In the real world, salaries are proportionate to one's level of production. Members of Congress have not met that criteria, either. Most importantly, this pay raise would go against the overwhelming sentiment of the American public, which is outraged that we might grant ourselves this massive increase without so much as recording a vote.

Objections to this proposal are adequately stated in a recent editorial that appeared in the Daily Oklahoman. I would like to have it restated here, because I believe it captures the mood of many people who feel their Congress is ready to put self interest before public interest:

ANOTHER RIPOFF COMING

While average American families and businesses are struggling to stay even against the onslaught of inflation, it appears that Congress is going to feather its nest again with one of the biggest ripoffs of the taxpayers in history.

The only thing that can stop it is for an outraged public to inundate Congress with an overwhelming expression of disgust and disapproval.

For unless they get the message that their seats are in jeopardy at the next election if they go along with this raid on the treasury, congressmen will quietly follow the path of least resistance and gratefully grab the higher salary checks.

Endorsed conditionally by former President Ford and also by President Carter, the proposed new pay schedule for congressmen, top-ranking bureaucrats and the federal judiciary amounts to raises of more than 20 per cent. Congressmen and senators would go up from $44,600 to $57,500, with corresponding hikes throughout the executive-judicial structure.

The higher pay proposals are the work of a presidential commission which submits a report on federal salaries every four years. It is a quaint mechanism created by Congress to give the appearance of having its compensation objectively established.

All Congress has to do is accept or reject the recommendations. Naturally, the commission has never suggested that any salaries be reduced.

Much nonsense is being peddled to the effect that upper-level federal salaries deserve adjustment because they have been raised only 5 percent since 1969, while the cost of living has risen nearly 50 per cent in that period.

That's true, so far as it goes, but it is a deceptive and incomplete argument. It does not tell you, for example, that Congress voted itself a 40 per cent pay increase in 1969.

It also doesn't tell you that since 1964 congressional salaries have gone up more than 150 per cent while prices rose only 87 per cent in that same 13-year period.

Nor does it even begin to tell you how the "fringe benefits" have been sweetened—more office and expense allowances, more trips home, more long-distance calls, more tax exemptions, and a vote last year permitting them to earn an extra $25,000 a year on the rubber chicken and cold peas circuit.

They would have you believe the government is hard-pressed to attract and keep quality personnel at the current salaries. That is pure hogwash. Turnover in the federal government is far below private industry and there are droves of applicants for every available spot.

If you really think congressmen, bureaucrats and judges deserve this fat pay boost, fine. Do nothing and they will take it. But if you don't think they should have it, you had better let them know.

IN COMMEMORATION OF GEN. THADDEUS KOSCIUSZKO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, Gen. Thaddeus Kosciuszko Day is February 12, and this date marks the birth of the Polish soldier and statesman who entered the American Continental Army as a volunteer. General Kosciuszko gave invaluable assistance to our Nation during its first years as an independent country, and because of his services during the Revolutionary War, Congress bestowed on him the rights and privileges of American citizenship and the rank of brigadier general.

It is an honor for me to join with Polish-Americans in this commemoration and I extend my greetings to the Polish-American residents of the 11th Congressional District of Illinois which I am privileged to represent, the city of Chicago and the Nation as they pay tribute to General Kosciuszko and his dedication to the cause of liberty.

Mr. Speaker, an article on the contributions of General Kosciuszko to our country has appeared in the Saturday Evening Post, and at this point in the CONGRESSIONAL RECORD I insert this article by Maj. Ernest L. Cuneo:

GEN. THADDEUS KOSCIUSZKO, MASTER MILITARY MIND OF THE AMERICAN REVOLUTION

(By Maj. Ernest L. Cuneo)

It is one of the ironies of history that had General Thaddeus Kosciuszko been born with a name as easily pronounced as General Robert E. Lee, Ulysses Simpson Grant or John J. Pershing, his name would resound throughout Western civilization as one of the foremost military geniuses of all time.

But a name which is difficult to pronounce is almost impossible to remember. Phonetically, the name is pronounced Kos-Choose-Ko.

He was of the towering stature of a Hannibal, or a Caesar. Most Americans are quite unaware of the fact that the military genius of this man is largely responsible for the victory which gave America its independence. There are thousands of memorials throughout these United States to General Lafayette, General Pulaski, and General von Steuben; but the military giant who towered over them all goes unnoticed. Though the military was his first profession, Thaddeus Kosciuszko was a Renaissance man. He was a painter, an architect, a composer, a scholar and a philosopher. He was accepted as an intellectual equal by Jefferson; he was also

Mr. FISH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not take the full time but I would like to address a question to the gentleman from California, who knows my support for the second round public works. My question is very simple.

In the committee report there is a line item for a spendout of half a billion dollars for the current fiscal year for anticipated public works. Is this in any way affected by the substitute amendment?

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield, it is not. The public works project stay in place under this substitute resolution. We did not contemplate in any way removing that add-on of $500 million for stimulus in the public works field that the majority recommended be added in committee.

Mr. FISH. Mr. Chairman, I thank the gentleman and I would like to compliment the gentleman from California (Mr. ROUSSELOT) on his remarks, and I am particularly pleased that his clarification of available funds for public works; namely, that the total available funding for accelerated public works is included in his substitute amendment.

I agree with the logic expressed on this floor today that permanent tax cuts are the only method by which actual growth, employment, and economic stability can occur.

Mr. Chairman, we all know, however, that the budget resolution as proposed will pass. Actually, it does not provide for a tax rebate but for a revenue loss. I would hope, therefore, that the arguments made here today will be considered carefully as the work product of our tax writing committees is dealt with.

Mr. PICKLE. Mr. Chairman, I took the floor in July 1972 to discuss our congressional budget nonprocess. With a dozen other Members I sounded out views on the effects the Executive impoundment of appropriated funds was having on our constitutional mandate to control the Federal purse strings. Out of that discussion and others a general feeling spread that the Congress must reassert its responsibility over Federal funds. In 1974 the Congress passed the Budget Reform and Impoundment Control Act.

The important theme which ran through discussions, debate, and the bill itself was that responsibility and control run hand in hand. If the Congress is not responsible it will lose control.

Last fall we passed a binding budget resolution setting ceilings on expenditures and floors on revenues. It was hailed as a great and responsible step.

Now we propose to pass over that resolution with another—and possibly with yet another. Mr. Chairman, an economist buried under stacks of charts and reams of computer projections may understand why this is needed—but the American people will not, and should not.

I am concerned. I am concerned we Democrats are so happy to have someone down the street who speaks our language that we are not looking far enough down the road; we are not looking down the road to the many times we will need a strong congressional budget process.

The economy took a downturn, and we are about $6 billion short of our revenue expectations—but that is not the same as the $20 billion addition to our debt we propose to add today.

The severe winter did increase our troubles—but these budget increases were in the mill before bad weather hit. And we still do not know if the ultimate impact of this winter will be large or small.

Next summer we can expect hard times and energy shortages because of the drought—and next fall soaring food prices for the same reason. But we cannot keep piling on deficits while we wait for better weather or some other miracle.

Mr. Chairman, I voted in the Ways and Means Committee to report out the tax cut package asked for by President Carter. I offered an alternative, but it was not adopted. On final passage. I did vote for the bill, but I am not going to vote for this resolution today. I realize that seems contradictory.

I realize the economy needs a boost. We all realize it is not easy to turn down tax cuts. We also realize there is a strong tendency not to cripple a new President with opposition from his own party in his early days. I am as inclined as the next to give a new President a chance to set his style.

But I also worry about this Congress and its budget process. If we abdicate now—if we make light of the congressional budget and turn it from a farsighted economic program into a quarterly economic update—I think we will regret it.

We should not jump and jerk with each new wrinkle in the economic indicators. That is what we used to do. Our budget process was conceived in order to give us the foresight and depth of vision to provide for emergencies while fashioning a responsible and responsive economic policy.

Last fall "the fate of our economic future" hung on the Ways and Means Committee raising $2 billion in revenue. Now that same fate rests on the Ways and Means Committee cutting back revenues $13.8 billion. That does not make sense to me. It has no depth of vision to it, and I think it must stop. And I think it will stop because the members of the Ways and Means Committee are going to get tired of starting every year with a tax cut and ending it with a tax hike.

Mr. Chairman, this is the third time in less than 3 years that we have used, essentially this same procedure to stimulate the economy. Today we are raising the deficit approximately $20 billion to pay for that stimulus. I recognize that some stimulus may be needed, but I think others ways are more desirable. I offered a substitute in the Ways and Means Committee that would have raised taxes in certain categories and which would have raised enough money to provide for the jobs program—public service and public works. That was not adopted.

So, here we are again with the third budget resolution. We are paying for the stimulus by merely raising the deficit. This procedure does damage to our Budget Control Act, and we are meekly submitting to it.

Mr. HORTON. Mr. Chairman, I rise, with some reluctance, in opposition to the Rousselot substitute to the Giaimo committee amendment. The substitute calls for a tax reduction of $19 billion and reductions in budget authority and outlays.

Many of us, on both sides of the aisle, feel that the $50 rebate will not accomplish the goal of stimulating our Nation's economy. To the contrary, it is nothing more than a costly drain on the Treasury. That is why I welcomed the Republican initiative calling for a permanent tax reduction. I support permanent tax reductions in preference to the $50 debate scheme.

The Rousselot substitute, however, also proposes massive cuts in budget authority and outlays which would more than offset any stimulative impact from the tax reduction. By my calculations, budget authority would be reduced by some $42 billion while outlays would be cut by $13.8 billion.

Undoubtedly, there is sufficient evidence and reason to conclude that reductions in authority and outlays are necessary. But the haste with which these cuts were drawn up casts serious doubts on the wisdom of the outlay and budget authority figures contained in the substitute. Accordingly, I had no other choice than to oppose the otherwise responsible Republican substitute.

Mr. AMBRO. Mr. Chairman, I find myself in a very difficult and painful situation this afternoon as we are confronted with this third concurrent resolution on the fiscal year 1977 budget. First of all, I deeply regret the very necessity for this resolution. It is the direct outgrowth of a much slower than anticipated economic recovery—despite the continued assurances of the last administration during the Presidential election campaign last fall—and of the most inclement winter weather since colonial times. Nevertheless, it calls into question the whole process of the first and second budget resolutions which we proudly passed with such loud fanfare in the last Congress.

What particularly disturbs me about this particular budget revision is the easy acceptance of an over $70 billion deficit—an amount similar to the fiscal year 1976 deficit. I recall, with some sense of irony, how much we all bragged, during our own campaigns last fall, about the sharp cut that we carved out of the deficit and about our grand plans for a balanced budget within 3 years. Now here we are, faced with the task of approving the same deficit as 1 year ago. Frankly, I do not know what our constituents will think of this situation. Perhaps, unfortunately, they will feel that we engaged in deceptive practices last year. That would be a particularly unhappy situation, compounding the already sorry reputation that this branch of Government suffers in the public perception.

Finally, I wish to say a word about one part of the stimulus package; namely, the $50-per-person income tax rebate. I do not profess to be an economist, but it seems to me, that common sense indicates that placing $50 in the hands of most American adults will cost billions of dollars and accomplish little in terms of actually stimulating our sadly lagging economy. That sum of money is miniscule to each individual, no matter what the

income level, and will not lead to the purchase of those so-called big ticket items which will get our industrial capacity rolling again, That sum will only be spent for incidental type items which, while important in some households, will not, I think, accomplish the purpose that we have in mind.

Mr. MICHEL. Mr. Chairman, the interesting thing about this third budget resolution is that once again the majority, in its penchant for freewheeling spending, has exceeded the President's budget—but this time it is your own President. Even though choosing to spend at a significantly higher rate than his predecessor, his party in Congress, not to be undone, simply ups the ante and does him one better?

Is there any reason to doubt, then, why the Democratic economic package does not include a permanent tax cut of any consequence. It is evident in the makeup of this budget resolution—that you need the money in order to carry out your philosophy of expanding the role of Government even more.

The purpose of this resolution is to provide for a program to deal with our unemployment problem, but for the most part it provides the wrong tools, in the wrong amounts, at the wrong times, and all at a tremendous cost to the taxpayers.

During the past 2 years we have finally been able to establish a steady economic course which has enabled us to substantially reduce the rate of inflation while at the same time pulling us out of the recession. What we need is an economic program that will continue this steady course by providing a gradual stimulus without reigniting the inflationary spiral. Instead what we have here is a hodgepodge of hopeful remedies that will produce sudden jolts and shocks to the economy and cannot help but result in a return to the wild economic swings of the past without significantly impacting on the unemployment problem.

Steady economic progress would be best served by a permanent tax cut resulting in long-term tax reductions and gradually expanding employment.

Mr. Chairman, I support the substitute amendment proposed by the gentleman from California (Mr. ROUSSELOT). The tax cuts of 1962 to 1965 proposed by President Kennedy are ample proof of the effectiveness of permanent tax rate reductions. The effect of these cuts in the marginal tax rates did not result in higher deficits, but rather, as the gentleman from California (Mr. ROUSSELOT) and the gentleman from New York (Mr. KEMP) have already demonstrated, boost the GNP and increase employment. Increased employment in turn expands the tax base and the result is a net increase in revenues. The result of these revenue gains from an expanded tax base show clearly that tax rate reductions provide a program for stimulating the economy that does not require deficit spending. The adoption of a permanent tax cut of this kind would produce a smaller deficit than President Carter's program and could provide over the long run sufficient revenue to pay off some of our huge national debt.

Instead, we get a one-shot tax rebate which will give our citizens only temporary relief and will only temporarily expand the economy. The Congressional Budget Office itself states that two-thirds of the jobs created by the rebate will fall by the wayside next year unless followup permanent tax cuts are also provided, and certainly the limited increase in the standard deduction does not measure up as effective permanent tax reduction.

Steady economic progress requires a level of spending that will not result in new inflationary pressures. Instead, what we have is a proposed $20 billion increase in the budget deficit, resulting in a record deficit of over $70 billion. Many economists are clearly worried over the impact a deficit of this size, coupled with a deficit of nearly equal size proposed by Mr. Carter for fiscal 1978, will have on interest rates and the availability of private capital needed for business expansion.

We are faced with a deficit of this size because the spending components of this package are excessive and do not represent the most cost effective means of putting people back to work.

The public works approach to job creation is a glaring example in this regard. The committee report itself admits that each new job will cost a whopping $25,000 and I am glad to see this report finally puts to rest some of the myths that have been spread about regarding the job creating potential of this approach. Proponents have been claiming that each $2 billion will create upward of 200,000 to 300,000 jobs. It might create this number of jobs if you count jobs of 3 days' duration, or a week's duration, or a month's duration, as is typical for jobs on a construction project. When these jobs are put on a man-year basis, however, we find that each $2 billion will only create an additional 80,000 man-year jobs. And this includes both direct and indirect jobs. In addition, many of these jobs are not likely to come on board until 18 months to 2 years from now when the needs may not be the same and the effect will be to further stimulate inflationary pressures.

Yet, instead of discontinuing this ineffective approach which discriminates in favor of construction workers, the Democrats in this body are asking to double even the President's request.

But this is not the extent of high cost jobs in this resolution. The recreation jobs provided for will cost $15,000 per man-year; railroad and highway construction, $25,000; and countercyclical assistance, $25,000.

When you add to this $269 million in excess of the Carter proposal for EPA construction reimbursement, which provides no jobs, and $300 million over the Carter recommendation for job training, with little concern evidenced over the job-related effectiveness of such training, it is easy to see why we are facing a $70 billion deficit.

Even when we view one of the few components in this package which are reasonably cost-effective—the public service jobs at $8,300 per man-year, we see that the committee's main concern is how quickly they can get the jobs funded and not how effectively the jobs can be established so that they fully meet the goals of the law.

We have seen what the program embodied in this resolution does; now, what does it not do? Most importantly, it does not address the unemployment problem on a long-range basis. It does not address the question as to whether our economy really has the capacity to provide jobs for everyone who wants to work without substantial inflation. It does not take into account the increased percentage of our work-eligible population who are seeking work, particularly secondary breadwinners. It does not address the question of more effectively tying job training to jobs available in order that these jobs can be filled. It does not deal with the problem whereby people choose to take unemployment or welfare benefits rather than take less than desirable or unsuitable jobs. It does not deal with the question of the 2 to 3 million jobs held by illegal aliens.

Mr. Chairman, this budget resolution ought to be sent back to committee with instructions to develop a more effective, long ranging, and responsible approach to our unemployment problem. The new resolution ought to provide for an employer tax credit on an experimental basis. It ought to limit funding for job training to experimental approaches designed to better tie training to actual jobs available. It ought to provide for a permanent tax cut rather than a tax rebate. It ought to call for the enactment of legislation making the employment of illegal aliens illegal, thus making this an integral component of a job creating program by opening up at least a million jobs to unemployed Americans. It ought to call for a comprehensive study, in close cooperation with the American business community, as to the long-range capacity of our private sector to provide jobs for everybody who wants one, and the steps that may be needed to accomplish this.

In conclusion, Mr. Chairman, I urge that we reject this resolution and then set about to draft a better one.

Mr. LEGGETT. Mr. Chairman, I take this time to strongly urge the Committee of the Whole House to support the shipbuilding recission of $452.6 million as recommended by the Committee on the Budget in the report on the third concurrent resolution for fiscal year 1977.

In essence, this reasonable course of action will rescind $371 million in proposed budget authority for long-lead funds—which have not yet been obligated by the way—to convert the U.S.S. *Long Beach* to an Aegis ship. In addition, $81.6 million out of a total $350 million in proposed budget authority which was programed for construction of the CVN–71 for nuclear-powered carrier is recommended for rescission. The remaining $268.4 million has already been obligated to procure nuclear propulsion components—including reactor vessels—which will now become a spare set for the three *Nimitz*-class carriers already authorized and funded.

Although we may have good reason to ultimately modernize the *Long Beach* and may very well need an additional large-deck, nuclear-powered aircraft carrier in subsequent years depending

upon future net assessments and clarification of primary Navy missions, now is not the time to charge full-speed ahead with such efforts. Indeed, two Presidents and two Secretaries of Defense from two different parties have agreed on the general direction of naval air power and priorities for Aegis deployment implied in these shipbuilding recissions.

Most importantly, however, a number of sound reasons presently militate against undertaking these two programs in fiscal year 1977, the least of which is a revised deficit of $70.3 billion. Related to this rather gargantuan deficit for fiscal year 1977 is the fact that we find we can no longer have everything at the same time. Even the Chief of Naval Operations has recognized this inescapable fact. In testimony before the Defense Subcommittee of the House Appropriations Committee last week, he stated that while he supported all three ships being proposed for the Aegis suit (the *Long Beach*, DDG–47 class, and the Strike Cruiser), he felt there were not enough dollars available to proceed simultaneously with all three programs. With respect to cancellation of the CVN–71 in this year's shipbuilding program and inclusion of two new design CVV's in the 5-year defense plan, such a course of action will permit us to keep our options open for the future without obligating substantial funds, and to insure that we possess adequate planning flexibility to respond to as yet evolving threats through exploration of new ship concepts and designs. Moreover, we have neither precluded the option to add this nuclear carrier to the fleet in subsequent years nor encouraged potential delays in delivery by our actions since the long-lead nuclear propulsion components are still on order—albeit as spares. Lastly, questions abound concerning difficulties with private yards and lack of inclination to undertake such construction projects as long as claims against the Navy remain unsettled.

I would now like to elaborate upon each ship-type recission separately before sharing some general concerns regarding the apparent lack of vision and specific, well-defined objectives in our overall naval shipbuilding program and current problems with private shipbuilding yards which may prevent us from realizing desired Navy general purpose force levels in the not too distant future.

Let us first turn to the *Long Beach* conversion rescission. The rationale behind this rescission revolves around some important considerations. As our first nuclear-powered surface combatant, the *Long Beach* is already a rather tired ship having been in commission since 1961. Indeed, it would be over 20 years old by the time the proposed *Aegis* conversion is completed in 1982. It is also a one-of-a-kind ship presenting singularly unique backfitting problems. In addition, it is generally felt that it is more risky and expensive to build Aegis into an existing ship than to design it into a new ship class. Moreover, Aegis will in all likelihood get to sea more quickly on the first DDG–47, and is expected to remain in service at least 5 years longer. Modernization and conversion of the *Long Beach* is designed to stretch service life an additional 25 years; the DDG–47 should have a normal life-cycle of 30 years. And in general, the estimated cost of the DDG–47 platform is less expensive for about the same defensive effectiveness. Once lead-ship development costs have been absorbed for the DDG–47, the nine follow-on ships will cost approximately $652 million each as opposed to an estimated $783 million plus for modernization and conversion of the *Long Beach* to an Aegis platform. Thus, on February 17, 1977, in the face of such overwhelming evidence. Admiral Holloway stated that in his judgment, development of the DDG–47 and a modern nuclear Aegis ship had a much higher priority than conversion of the *Long Beach*. I fully agree with his estimate of the situation. In any event, the *Long Beach* will not soon be lost from current inventories, since the administration plans to request a more modest total of $261 million for modernization in fiscal years 1979 and 1980.

Turning now to the second rescission which in effect cancels construction of a fourth *Nimitz*-class nuclear-powered aircraft carrier and includes a new carrier-type in the 5-year defense plan, I agree in principle with the Secretary of Defense that we need to explore new technologies in ship, missile, and aircraft systems which may offer prospects of fulfilling sea-based air requirements at the lowest possible cost through a combination of nuclear and nonnuclear capabilities. According to recent cost estimates, the CVN–71 was expected to cost about $2.3 billion as opposed to an estimated $1.2 billion for the first nonnuclear CVV and approximately $900 million for a follow-on ship—all estimates in 1979 dollars.

As you may already be aware of, the CVV is a new nonnuclear carrier-type, smaller in total tonnage, designed to provide a future V/STOL aircraft platform while retaining a respectable conventional aircraft launching capability in the near term. At 40,000 to 50,000 tons displacement, the new CVV will initially carry 50 to 60 fixed-wing aircraft. The CVN–71, on the other hand, is designed to displace about 90,000 tons and carry between 85 and 90 aircraft. Thus, for approximately the same costs, we can have either one CVN–71 with 85 to 90 aircraft or two CVV's with a total capacity ranging between 100 and 120 aircraft. Although I have some reservations about the efficacy and wisdom of continuing to construct large fossil-fueled surface combatants, the bottom line is that cancellation of the CVN–71 and inclusion of two CVV's in the 5-year defense plan means that we can have more—although possibly less versatile—ships with greater net firepower available over a broader expanse of the world's oceans and a greater residual force after a specified number of combat losses. Moreover, we are keeping our options open while simultaneously moving ahead in the planning stage toward development of new ship-types. In any event, we still have time next year—and the year after—to revise this decision if it is deemed that we in fact need a fourth nuclear-powered carrier since lengthy leadtime nuclear propulsion components will still be on order.

I would now like to share with you a misgiving I have with respect to the general thrust of our overall shipbuilding program. I am concerned that we in the Congress have seen four separate and distinct naval shipbuilding programs from the executive branch in the last 13 months. Moreover, recent hearings have pointed up the fact that even within the naval establishment itself, a lack of consensus exists as to the primary mission of Navy general purpose forces. More importantly, however, is the general lack of vision reflected in these four previous shipbuilding programs as to how present and proposed naval forces relate to their primary mission. Therefore, I feel that we must look more closely at where our shipbuilding program is taking us, and insist upon clearly defined objectives and justifications before embarking on a massive shipbuilding effort.

This leads to the last point I would like to make and that is after we have finally resolved the issues surrounding an optimal shipbuilding program, just where can we reasonably expect to build additional ship acquisitions in the future—particularly if they are nuclear. Central to the question of CVN–71 construction is where the ship will be built, and when it can be delivered to the Navy. Newport News is the only private shipyard that presently has the facilities, skilled manpower, and experience necessary to undertake the complex task of constructing a nuclear-powered aircraft carrier. However, I am concerned that in this very same yard, the *Eisenhower* (CVN–69) is currently 2 years behind schedule, and the *Vinson* (CVN–70) is only 17-percent complete at the present time thereby quite possibly placing in doubt its scheduled delivery to the fleet in 1980. Moreover, while the recent settlement of the Newport News claims on the CGN–36 and CGN–70 have been encouraging, the overall claims dispute between Newport News and the Navy is far from settled. Indeed, management has refused to take on additional nuclear surface ships until all of these claims are settled satisfactorily. This is particularly troubling since Newport News is presently the only yard—public or private—constructing nuclear surface ships in the United States today. Turning to the possibility of constructing large-deck carriers at public yards, only the Puget Sound Naval Shipyard's drydock No. 6 is large enough to accommodate such ships. Lack of sufficient lift capacity, efficient yard layout and steel handling capabilities, and a readily available labor supply in the Bremerton area argue against authorizing construction of a ship comparable to a *Nimitz*-class carrier at the Puget Sound Naval Shipyard anytime soon.

Regarding the construction of nuclear-powered submarines, only two yards presently build such vessels. Electric Boat builds the bulk of our nuclear submarines with Newport News providing a much smaller number. Here, too, delivery lags are very real and widespread. The SSN–688 program at the Electric Boat shipyard was running an average of 11

months behind schedule before the start of the 154-day strike last year involving 10,000 of its submarine workers.

In conclusion, Mr. Chairman, I strongly support the shipbuilding recissions as recommended by the Committee on the Budget since they provide us with both balance and flexibility, and permit us to keep our options open. I would also like to thank you for this opportunity to share my first genuine concerns about the overall thrust of our current shipbuilding program, and questions over our existing nuclear shipbuilding capacity.

Mr. MATTOX. Mr. Chairman, I rise in support of the third budget resolution. As a member of the House Budget Committee I also want to personally commend the chairman of our committee, Mr. GIAIMO, for his leadership and his hard work, and to thank him for that special quality which he has brought to the committee, which while providing direction, still allows each of us on the committee to express our own ideas and to work for our own points of view.

In regards to the third budget resolution, now before us, it will raise our expenditure ceilings and lower our revenue floor to accommodate measures necessary to stimulate our economy.

I do not think there is any question that stimulative action is necessary. Our committee heard testimony from leading economists of various persuasions, both liberal and conservative. The actions recommended, including tax incentives and direct job creation are necessary.

The facts are these: Over 8 million Americans are unemployed and millions more are underemployed or on part-time jobs. Our productive capacity is not being fully utilized. The latest estimate is that only 80.5 percent is operative. The growth rate in our economy for the last quarter was less than 4 percent which means there will be no reduction in unemployment.

Obviously, those of us responsible to the American people cannot allow this situation to persist. I do not believe that Federal spending solves all of our problems, but in this instance, some direct action is almost mandatory.

To begin to solve these problems, and that is all we can do, is to make a beginning—we do not offer a panacea—our resolution contains funds to create jobs. I particularly approve of that portion which works through the private sector because it operates as a compliment to the free enterprise system. Frankly, I have some problems about the creation of public service leaf-raking jobs, but these incentives for businessmen to hire new employees, particularly since they are directed at the small businessman in a fashion that assists without interference, offer the best approach.

I do want to make one point clear, however, and that is although I am against Federal spending in areas where I feel the private sector could do better, I do feel that there are certain human needs that must be considered. An unemployed person undergoes almost incalculable suffering, both psychologically and financially. To me 7.3 percent unemployment means that 8 million people are undergoing severe hardship—hardship that has been heightened by the severe winter weather. That is why I can support recommendations for accelerated public works, public service jobs and countercyclical assistance to the areas hardest hit by unemployment.

As a member of the Budget Committee, I view my task to curb excessive spending and to promote fiscal responsibility. I believe in what this third budget resolution will attempt to do for our economy and I believe that the direct and positive action provided for is necessary. I urge my colleagues to support the resolution.

Mr. AMMERMAN. Mr. Chairman, I rise in support of House Concurrent Resolution 110, the third budget resolution for fiscal year 1977.

It is clear to me that action to spur our lagging economic recovery is badly needed. And the effects on our economy of the severe winter weather and fuel shortages, which have crippled the Northeast in general and my home state of Pennsylvania in particular, make such action doubly necessary.

The economic recovery has proceeded at a considerably slower pace than was anticipated by the 94th Congress. The goal of the second budget resolution, adopted last fall, was a reduction in the Nation's unemployment rate to 7.1 percent at the end of 1976 and 6 percent at the end of 1977. With the unemployment rate hovering at 7.8 percent this past December, however, that objective is far from being realized.

Furthermore, the impact of this winter's weather can only be to compound the already serious problem posed by the slow economic recovery. There have been estimates that as many as 2 million people have been thrown out of work by fuel shortages, plant closings, and related dislocations. While it is too early to analyze with precision the ultimate economic effects of the winter of 1976–77, there are projections that it will cause a decline of $5 to $10 billion in real GNP and an increase of between 0.2 and 0.7 percent in the unemployment rate. And I would note that these economic effects are concentrated in Pennsylvania, New York, Ohio, and the other States most severely affected by the weather crisis.

The economic stimulus package reflected in House Concurrent Resolution 110 is closely modeled after, though slightly larger than, that proposed by President Carter. The committee version would provide a total of $17.3 billion of additional spending and revenue cuts. The $13.8 billion of tax cuts and rebates is the same as that proposed by the President. Direct spending on job creation would be $3.5 billion, some $1.3 billion more than recommended by Mr. Carter in his recent budget revisions. This relatively small spending increase may not be sufficient to compensate for the economic effects of our severe winter.

Mr. Chairman, I am most reluctant to endorse the addition of $17 billion more to the Federal deficit for fiscal year 1977. But I feel we have no real choice. For even with this infusion of spending power into the economy, unemployment is projected to be 6.8 percent at the end of 1977. And it would still be 6.1 percent at the end of 1978, which is above the level previously projected for the current year.

I believe we will only be able to get on the road toward fiscal responsibility and a balanced budget when we can bring unemployment down to more tolerable levels. We must keep uppermost in mind that, not only is unemployment very costly in direct budgetary terms—$15 to $20 billion of unemployment insurance, food stamps, and related costs for every 1 percent of unemployment—but it also costs us a great deal in terms of lost national product and tax revenue. I support House Concurrent Resolution 110 in large measure because it represents a step in the direction of reducing those costs to acceptable levels.

Some contend that this legislation does not go far enough in the way of job creation programs. Others say it goes too far in the direction of expanded Federal deficits.

My conclusion is that House Concurrent Resolution 110 represents a balanced, responsible course of action. In the fact of a demonstrably slower recovery, it was essential to act, but equally essential not to overreact. That is what our committee has done, and I urge my colleagues to support the product of their efforts.

Mr. McKAY. Mr. Chairman, as we debate the third concurrent budget resolution with its substantial job-creating programs, it occurs to me that we may be overlooking an opportunity to create jobs with military public works. Many of the proposals included in todays stimulus package, will not come on stream for over a year. The same delays would not occur in making funds available for carefully planned military construction projects.

There are a sufficient number of needed military construction projects in the advance planning stage, that $500 to $600 million worth of construction could be let by the end of this calendar year. A program of this magnitude would generate 35,000 to 45,000 direct construction jobs and at least an equal number of related jobs.

Such a program would not even have to wait for the end of this year. The Army estimates that it could enter into contracts for $30 million in construction by June 30, and additional $44 million by October 31, and an additional $88 million by December 31. The Navy could do a similar job: $30 million by June 30, an additional $70 million by October 31, and an additional $80 million by December 31. The Air Force could provide military construction projects totaling $136 million and family housing projects totaling $55 million this year.

It seems to me, Mr. Chairman, that Congress would do well to look to those programs already in place to supplement new public works programs included in the third budget resolution.

Mr. ASHBROOK. Mr. Chairman, I rise in strong opposition to House Concurrent Resolution 110, the third concurrent resolution on the budget. This resolution calls for more of the same reckless deficit spending that has created and sustained our problems of inflation and unemployment.

During the 1976 elections there was a lot of campaign rhetoric about the need to cut Federal spending and start balancing the budget. The message on the lips of most politicians was that the Federal Government had been spending too much for too long. The remedy was clear: Reduced spending and balanced budgets.

Despite all the campaign promises, it looks like it will be politics as usual when it comes to the budget. Our Nation is in store for more spending, larger deficits and bigger Government.

The third concurrent resolution calls for $482.3 billion in budget authority, and outlays in excess of $418 billion. This would leave a deficit of over $70 billion. The second resolution's projected deficit of $50 billion was bad enough without increasing it by another $20 billion.

A large part of the deficit is the result of new efforts to stimulate the economy. The resolution recommends $4 billion for accelerated public works projects. Another $7 billion would be added to CETA public service jobs. Billions more are slated for countercyclical assistance, tax rebates and other programs.

Such pump-priming is a serious mistake. Massive deficit spending is simply not the way to guarantee a healthy economy for the United States. Since the early 1960's we have run up increasingly large deficits. If the advocates of deficit spending were right these large economy-stimulating outlays should have long ago brought us prosperity. Can anyone seriously say this has happened?

Nevertheless, many of my colleagues still believe in the liberal economic myths of the past. They cry out for more spending, more public works projects, and more public service jobs. I am sick and tired of hearing a retread of the same economic views we have heard for 40 years. They were wrong then and they are still wrong today. They only bring increased inflation and higher unemployment.

The use of Federal spending to stimulate the economy has even been challenged by Prime Minister James Callaghan of the Labor Party government in Great Britain. According to Callaghan:

> We used to think that you could spend your way out of a recession . . . I tell you, in all candor, that that option on longer exists, and that insofar as it ever did exist, it only worked by injecting bigger doses of inflation into the economy followed by higher levels of unemployment as the next step. That is the history of the past twenty years.

Will the United States have to go the way of Great Britain before we learn this economic lesson? I certainly hope that this will not be the case. I would again remind my colleagues that the best way to build a strong economy is for Congress to slash Federal spending and work toward balancing the budget.

No, Mr. Chairman. The stimulus package offered in the third concurrent resolution is no solution to our economic difficulties. A better approach is that taken by the substitute concurrent resolution. This alternative proposal calls for an across-the-board reduction in individual income tax rates.

Permanent tax rate reductions will strengthen the private sector of our economy. They will create new and meaningful jobs by directly stimulating investment. This in turn will expand the tax base and provide more tax revenues, helping to offset any loss in tax dollars. Consequently, this approach will not have the inflationary impact of the third concurrent resolution.

I support the substitute concurrent resolution and I urge its adoption.

Mr. LEVITAS. Mr. Chairman, last year I voted in favor of the second—and what I thought would be the final—budget resolution for fiscal 1977, October 1, 1976, through September 30, 1977.

At that time, I had praise for the budget process itself which allowed Congress to regain at last the whip hand over the Federal budget, and praise for a resolution which at least had made a start in reducing the increase of outlays and the corresponding Federal deficit. Most importantly, the new budget process undertook to set limits in advance on spending and deficits. That is an essential starting point.

I still feel that the new budget process, and the limit it put on spending in the second budget resolution, is essential to get a grip on Federal spending, save the taxpayers' dollars, fight inflation, and move toward the fiscal responsibility of a balanced budget. This must be our goal. One way to achieve the goal of a balanced budget is a bill I introduced on January 19, House Joint Resolution 167, proposing an amendment to the Constitution of the United States requiring that the budget be balanced. Considering this country's recent history of deficit financing, it would appear that only by constitutional amendment will we get back on track and live within our means.

Instead, much to my dismay, we are now faced with a third budget resolution, ostensibly to give the economy a boost and to provide much-needed jobs. I am deeply concerned about the problems of unemployment and the plight of those who are unable to find work. This plight of unemployed persons must be solved in economic and human terms as well. But, I am also deeply concerned about the ravages of inflation that affect those, like the elderly, who must live on fixed incomes and who watch their already tiny pittances melt away into nothing as prices continue to rise. Excessive deficits contribute to that inflation.

What good is it to set budget limits—necessary, important, justifiable limits—if we are not willing to stand by those limits, as hard as it may be to do so?

While these limits are obviously not inflexible, I feel that only under extraordinary and unforeseen circumstances should they be lifted. By extraordinary circumstances I mean strikes, a deepening recession, foreign developments over which we have no control, or, as we have seen, the results of an unpredictable, devastatingly cold winter and a natural gas shortage that seriously affected the economy and resulted in closed businesses and industries, layoffs of workers, and a decrease in productivity. This cost us dearly. We must deal with this problem and I am willing to do so. We must. But we do not have to kill the patient to cure his flu. We do not have to wreck the budget limits to accommodate the needed increases to deal with this problem.

The President proposed an increase in the budget limits for economic stimulus and dealing with the distress caused by the winter. I might have considered that proposal as having some merit. Regrettably, however, the Budget Committee's bill exceeds even the President's request.

Nevertheless, we are being told that there has been an extraordinary overall slowdown of the economy during the past 6 months. Yet, the Bureau of Labor Statistics figures show a cost-of-living increase from October 1976 to January 1977 of only 1.1 percent and a drop in the unemployment rate from 7.9 percent in October 1976 to 7.3 percent in January 1977. Apart from the weather, the economy was coming around, and we had before us the opportunity in the 1978 budget to provide any needed additional economic stimulus that might be required.

Despite the ravages of the harsh winter, and large amounts of Federal disaster aid funds being utilized in the hardest hit areas, it would seem that the economy is not in such dire shape as to necessitate, in the current fiscal year, this overly stimulative raising of our previously set limits for the current fiscal year. Some upward adjustment may well be needed because of the unexpected winter, but I do not believe it require a wholesale sacking of the budget we pledged to observe.

What we do as we approach next year's budget for fiscal 1978 remains to be seen. I want to keep my mind and options open. We are working on that now, and I trust we will arrive at meaningful and effective goals and limits. Again, let me reemphasize "limits."

Therefore, I will stick by my guns and stick by the budget—as we passed it last year—except where changes are inescapable because of the gas shortage or for other reasons. I will support, at this time, only those limited budget adjustments which are to compensate for the problems resulting from the gas shortage, and the winter's toll.

It is easy to spend money.

It is hard to hold the line.

Nevertheless, we must hold the line.

Mr. STOKES. Mr. Chairman, with hesitancy I rise in support of the third concurrent budget resolution for fiscal year 1977. The extent to which we as a nation have lost perspective on economic issues is revealed by three rather dramatic facts:

First, there is very strong agreement that, given the enormous slack in the U.S. economy, even a substantially larger stimulus package than that proposed by President Carter would not be likely to generate serious inflationary pressure—yet this is lost sight of in the vast majority of public discussions of the issue;

Second, moreover, in an economy which will approach $1.85 trillion, the relative scale of the stimulus package being proposed is small when compared even with the recommendations of conservative economists—and extremely modest when compared with what was

not considered exceptional during the Kennedy-Johnson period;

Third, finally, while a rather tepid debate on whether a few billion more should or should not be added to a $15 billion per year package in an economy experiencing 7.9 percent unemployment, we seem to have forgotten completely that it was thought appropriate to use almost three times this relative weight of effort in the Kennedy-Johnson period when employment was only 5.2 percent.

A broader view of our economic problems and possibilities would begin with a more historically grounded sense of proportions. It would include a positive attack on inflation related issues, rather than a passive quiescence in structural and other sources of price rigidity. It might also aim simultaneously to meet unfilled social needs and begin to deal with such deeper issues as conservation and local citizen participation.

In an economy which is experiencing 7.9 percent unemployment by official statistics—and probably 10 percent if all those who would like to work full time but cannot find full-time jobs are included—and at a time when we are running at very low levels of capacity utilization in most industries, it is absurd to argue that serious efforts to provide decent jobs over the next 2 years are likely to be the primary cause of significant inflation. Inflation can be a problem—but it is not the overriding problem now, nor is it the dominant issue facing us in 1977.

Nor for that matter, if we adopt appropriate approaches both to job creation and inflation reduction, need it be a major concern as we move toward higher levels of full employment. Charles Schultze, the new Chairman of the Council of Economic Advisers, recently pointed out that most current inflation is the result of past "momentum" and has little to do with job stimulation efforts; he has repeatedly stated his view that a 5½ percent unemployment rate is achievable without unbearable inflation. President Carter has stated that his goal is 4 percent unemployment; and a very significant part of the Congress urged a 3 percent adult target in the first version of the Humphrey-Hawkins legislation, a goal also stated in the Democratic platform. Many European nations and Japan have maintained 2 percent unemployment levels for sustained periods without significant inflation.

SOURCES OF INFLATION

Most expert observers understand that the major source of recent unusually high levels of inflation has not been the pressure of stimulation or pressure on employment, but rather special circumstances related to severe increases in food and energy prices over the last 4 years. Food prices increased 48 percent in the period 1972–76; energy prices went up 64 percent for gasoline and motor oil, 119 percent for fuel oil and coal in the period January 1973–November 1976. Both these extraordinary shifts were caused virtually entirely by unusual world political and weather conditions. Although there may be some energy and food price increases in the coming years, in neither case is there likely to be anything like the staggering jolts experienced over the last 4 years. Thus, the two major causes of unusual inflation are likely to be substantially moderated over the coming period.

Moreover, as the research of Secretary of Labor Marshall and others has repeatedly demonstrated carefully designed and sharply focused job creation measures can reduce unemployment in the so-called secondary labor markets without significantly increasing pressure against wages in other markets. Especially given the enormous slack in the economy, and in the secondary labor markets, job creation efforts, targeted at specific populations and specific groups are not likely to intensify wage inflation unless we reach extremely high levels of full employment—a situation, unfortunately, that is not likely to occur over the next 2 to 3 years.

SCALE OF STIMULUS PACKAGE

Some observers have argued that a stimulus package much larger than the proposed $15 billion per year for 2 years would be inherently inflationary. They have criticized a $30 billion 1 year package proposed by the AFL–CIO and the congressional Black Caucus. Though issues of implementation do need to be clarified, criticism related to so-called inherent inflationary impact has little basis in reality; it is often simply an oversimplified, knee-jerk reaction to obsolete rhetoric about excessive spending. It also represents political fears that the business community might lose confidence in the Carter administration. Even Paul McCracken, President Nixon's conservative Council of Economic Advisers' Chairman, has proposed a $24 billion stimulus package. That proposal is $7 billion more than the third concurrent budget resolution that was passed in the Budget Committee.

The fact is that even a 1 year $30 billion effort, as measured against an economy which it is estimated will be over $1.85 trillion in 1977, would be a far smaller percentage effort than the stimulation created in the Kennedy-Johnson effort of 1964 and 1965.

The 1964 tax cut of $8.3 billion amounted to 1.31 percent of a $635 billion GNP. The $15.2 billion 1965 cut amounted to fully 2.21 percent of a $688 billion GNP. The newly proposed $15 billion package measured against a projected GNP of roughly $1.85 trillion amounts to a relative impact of a mere 0.81 percent only a bit over a third the impact of the 1965 stimulus. Even if the proposed $15 billion package for 2 years were doubled to $30 billion for 2 successive years, the first $30 billion would be less, relatively, than the 1965 stimulus—and the second $30 billion would be measured against a still larger GNP, and would accordingly amount to a still smaller relative economic "kick." In fact, it would require roughly $37 to $40 billion in stimulus to equal the 1965 ratios in today's economy, and more still in 1978. For that reason it is difficult for me to support a $17.2 billion stimulus program, $13.8 of which is a tax package and only $3.4 billion allocated for direct job creation. The difference between the calculated $37 billion and the Budget Committee's $17 billion stimulus accounts for a difference of 2.5 million annual jobs in this country.

To be sure these are rough estimates, and issues of business confidence as distinct from purely economic factors are also involved. Yet, these are often exaggerated, and it is important to remember that the levels of unemployment of the Kennedy-Johnson period—5.2 percent in 1964, and 4.5 percent in 1965—are extremely low as compared with our current 7.9 percent; this too suggests the potential for increasing jobs without excessive inflation. Moreover, serious stimulation of the economy will generate tax revenues to offset both excessive purchasing power and fiscal costs.

Thus, even a 2-year absolute figure of $30 billion would be relatively modest both when compared with the history of the Kennedy-Johnson stimulation efforts—and with the GNP. Rhetorical criticisms of more substantial expenditures as inherently excessive simply has little grounding in reality. From this perspective, finally, the current Carter administration position that it is wise to start small and maintain flexibility—though superfically plausible as a generality—serves in an economy experiencing 7.9 percent unemployment, mainly to mask the extremely conservative nature of the "starting point," at the same time it reveals indifference to human suffering entailed by the prolonged levels of high unemployment it will permit.

It is accordingly clear that a much larger stimulus package is both possible and necessary. In this connection, of course, inflation is a problem which can occur as we move toward serious levels of full employment, but it should in no way be viewed as an immediate obstacle to serious jobs programs. Moreover, the answer to inflation should not be immoral efforts which slow down the growth of the entire economy and keep millions of people in misery. Nor should it be vague political rhetoric about fiscal responsibility in general. Rather it should be a multifaceted, and sharply targeted attempt to get at the several specific sources of inflation—and to move steadily toward the reduction of inflation in specific areas even as we move toward full employment.

To this end, over the coming 1½ years—and simultaneously as we move toward serious levels of employment through job stimulation efforts—it would be appropriate to undertake:

A major effort to end collusion, administered prices, oligopoly pricing, and monopoly practices;

A major effort to end excessive middleman costs and wastes in such industries as agriculture and food production distribution;

A major effort to move seriously toward reducing waste and excessive costs in health construction, administration, and pricing practices;

A serious effort to alter the excessive interest, land inflation, and other nonlabor as well as labor costs of housing.

Additionally, specific job targeting should be done in such a way as to sta-

bilize jobs in central cities and other areas experiencing high unemployment. This can help undercut a further source of pressure on the family budget which is experienced in much the same way as inflation: excessive property taxes caused both by poor economic conditions in specific cities and by high social costs due to unemployment. Job creation efforts focused in specific communities which reduce social costs and raise the tax base can permit a slowing or even reduction in local taxes.

Finally, and more generally, over the coming period the new administration should launch an effort to substantially stabilize the prices of the specific items which constitute the four basic necessities of life for most American families—housing, food, basic energy, and medical care. It is here that generalized inflation hits home. These four items alone amount to 70 to 75 percent of most family consumption expenditures. In each of the four basic areas job creation measures have little relationship to specific inflation issues, nor are labor costs the primary source of inflation.

In housing—land, interest, utility and tax costs are the basic factors raising monthly mortgage or rental costs. Average monthly new housing costs rose roughly 300 percent over the period 1955–75. Mortgage payments went up over 330 percent; real estate taxes more than 340 percent. Although labor costs also rose, in recent years they have actually fallen as a percentage of initial construction costs; labor in fact now comprises only 15 percent of new construction costs. As a percentage of monthly costs, given the rapid rise in mortgage, tax, and utility cost, labor's share has fallen still further. From this broad perspective, therefore, although many possible stimulus packages can be designed, the most obvious failing of the Carter budget mix concerns housing. A primary immediate focus of a series effort both to deal with inflation and jobs should be the acceleration of programs to increase the supply of housing at decent prices for low- and middle-income groups; such programs can provide immediate jobs at relatively low public cost and reduce inflation in an item which constitutes 20 to 25 percent of most family budgets. Properly designed, moreover, they could also help conserve energy through insulation, heat recycling, and careful location planning done by institutions of local citizen and neighborhood participation.

In food—and, most obviously, energy—labor is not the overriding factor. Only in medical care—a small percentage of the family budget—is labor a significant factor, and even here the elimination of administrative and other wasteful practices can sharply reduce costs.

There is no need, in short, to be passive about inflation, nor to accept it as if it were a natural law of economics. An aggressive Presidential initiative aimed at substantially stabilizing the costs of the basic necessities could be politically popular and economically effective. It could also deal equitably with some of the most fundamental issues facing the Nation, and do so in ways which help us break out of outworn political categories.

Numerous specific programs in each of the four basic areas have been advanced over recent years to provide services at decent prices and help stabilize the cost paid by the individual family. A careful phasing and integration of various efforts to steadily increase supply and reduce wastes, and to substantially stabilize prices for different income groups, could be the basis of a serious 4-year anti-inflation program which would deal with the fundamental expenditures of the vast majority of Americans. At very high levels of full employment wage-price guidelines and social contracts might possibly have to be considered, but there is a great deal that should be done first in connection with each of the above before such approaches, which now dominate public discussions, should be resorted to.

Mr. WEISS. Mr. Chairman, although I will be voting in favor of the third concurrent resolution on the budget, I am not entirely satisfied with its provisions. I will be voting in favor of the resolution regardless of my reservations, because the resolution embodies a plan which provides some immediate solutions to unemployment and some of our other economic problems.

I believe that the resolution tolerates an excessive level of unemployment. The resolution does not reflect the Government's greatest potential to bring unemployment down to a reasonable level. It places too much reliance on tax policies which would not necessarily be effective. In this regard, I am especially concerned over the efficacy of a tax rebate.

The resolution would be more acceptable to me if it placed greater emphasis on job creation programs such as those that are embodied in the Comprehensive Employment and Training Act and the public works legislation. This resolution would also be more acceptable to me if it shifted away from its emphasis on tax measures and diverted this attention to the jobs area. As the resolution stands, it desperately requires greater sums to be invested in jobs programs.

We are suffering from the consequences of the neglect which the young, the elderly, the black, the unemployed, the poor, and the women of this Nation have experienced at the hand of an unsympathetic and uncaring Government. Their grossly high unemployment rates are concealed in the already high national average. Funneling more moneys into the creation of jobs is an expenditure that is never wasteful if allocated properly and directed toward both the private and public sector.

Last year's Congress optimistically projected that the unemployment rate would be near 6.2 percent by the end of 1977, yet the Congressional Budget Office now projects a 6.8-percent figure even with the stimulus provided in this resolution. And, of course, those are not just statistics but 7 million people without jobs.

I am hopeful that the shift from an ineffective tax policy to a creative jobs policy can be accomplished in spite of the inadequacy of this resolution. I believe that the appropriation-authorization process will continue to provide the opportunity for that purpose and I will continue to work toward that end.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ROUSSELOT) as a substitute for the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. GIAIMO), as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ROUSSELOT. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 148, noes 258, not voting 25, as follows:

[Roll No. 25]

NOT VOTING—25

Bolling	Hawkins	Oakar
Brown, Calif.	Howard	Pettis
Brown, Ohio	Jones, N.C.	Railsback
Broyhill	Koch	Skubitz
Carter	McClory	Stanton
Dent	McKay	Teague
Diggs	Metcalfe	Thornton
Eckhardt	Michel	
Gonzalez	Myers, Ind.	

The clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Dent against.

Mr. Michel for, with Mr. Hawkins against.

Mr. McClory for, with Ms. Oakar against.

Mr. Skubitz for, with Mr. Brown of California against.

Ms. Pettis for, with Mr. Koch against.

Mr. Broyhill for, with Mr. Howard against.

Mr. Myers of Indiana for, with Mr. Diggs against.

Mr. Carter for, with Mr. Jones of North Carolina against.

Mr. Brown of Ohio for, with Mr. Metcalfe against.

Mr. Stanton for, with Mr. Thornton against.

Mr. BURLISON of Missouri changed his vote from "present" to "no."

So the amendment offered as a substitute for the amendment in the nature of a substitute, as amended, was rejected.

The result of the vote was announced as above recorded.

Mr. BENNETT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to speak briefly on the subject of shipbuilding rescission, which is discussed in the report of this measure. That issue is being debated in the Appropriations Committee at the present time, as the law requires. At issue there are funds for the next nuclear carrier and for the Aegis system reconstitution of the *Long Beach,* in order to get that system to the fleet at the earliest possible moment.

Although the measure before us today estimates that those rescissions will take place, and although the issue could be raised by amendment to the measure before us today, I have decided not to raise the matter here but to debate it and settle it instead in the rescission process itself, which is the more appropriate way to handle the matter.

If the measure before us today passes, the issue of the rescissions cannot be settled here anyway and it is more appropriate to have the Committee on Appropriations complete its recommendations as by law it is required to do. The Subcommittee on Seapower of the House Armed Services Committee has been holding hearings on this subject during the past few days; and so far we have yet to have any witness come before us recommending that the rescissions take place, at least not on the basis of the personal and professional judgment of the witnesses, all of whom have been sent to the committee on behalf of the administration. It is clear to me that the shipbuilding rescissions should not take place.

The CHAIRMAN. The question is on the amendment in the nature of a substitute, as amended, offered by the gentleman from Connecticut (Mr. GIAIMO).

The amendment in the nature of a substitute, as amended, was agreed to.

Mr. GIAIMO. Mr. Chairman, I move that the Committee do now rise and report the concurrent resolution back to the House with an amendment, with the recommendation that the amendment be agreed to and that the concurrent resolution, as amended, be agreed to.

The CHAIRMAN. The question is on the motion offered by the gentleman from Connecticut (Mr. GIAIMO).

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the concurrent resolution (H. Con. Res. 110) revising the congressional budget for the U.S. Government for the fiscal year 1977, had directed him to report the concurrent resolution back to the House with an amendment, with the recommendation that the amendment be agreed to and that the concurrent resolution, as amended, be agreed to.

The SPEAKER. Under the statute, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the concurrent resolution.

Mr. LATTA. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 239, nays 169, not voting 23, as follows:

[Roll No. 26]

NOT VOTING—23

Brown, Calif.	Howard	Pettis
Brown, Ohio	Jones, N.C.	Railsback
Broyhill	Koch	Stanton
Carter	McClory	Steed
Dent	Metcalfe	Stockman
Eckhardt	Michel	Teague
Gonzalez	Myers, Ind.	Thornton
Hawkins	Oakar	

The Clerk announced the following pairs:

On this vote:

Mr. Dent for, with Mr. Teague against.

Mr. Hawkins for, with Mr. Jones of North Carolina against.

Ms. Oakar for, with Mr. Michel against.

Mr. Brown of California for, with Mr. Carter against.

Mr. Koch for, with Mr. Myers of Indiana against.

Mr. Howard for, with Mr. McClory against.

Mr. Metcalfe for, with Mr. Brown of Ohio against.

Mr. Thornton for, with Mr. Stanton against.

Mr. Steed for, with Mr. Stockman against.

Mr. Gonzalez for, with Mrs. Pettis against.

So the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

Mr. GIAIMO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 10) revising the congressional budget for the U.S. Government for the fiscal year 1977, and I ask for its immediate consideration in the House.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 10

Resolved by the Senate (the House of Representatives concurring), That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenues is $346,800,000,000 and the amount by which the aggregate level of Federal revenues should be decreased is $9,700,000,000;

(2) the appropriate level of total new budget authority is $467,000,000,000;

(3) the appropriate level of total budget outlays is $415,000,0000,000;

(4) the amount of the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors is $68,200,000,000; and

(5) the appropriate level of the public debt is $718,300,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1976, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):

(A) New budget authority, $109,200,000,000.

(B) Outlays, $100,100,000,000.

(2) International Affairs (150):

(A) New budget authority, $7,900,000,000.

(B) Outlays, $6,800,000,000.

(3) General Science, Space, and Technology (250):

(A) New budget authority, $4,500,000,000.

(B) Outlays, $4,400,000,000.

(4) Natural Resources, Environment, and Energy (300):

(A) New budget authority, $18,800,000,000.

(B) Outlays, $17,200,000,000.

(5) Agriculture (350):

(A) New Budget authority, $1,600,000,000.

(B) Outlays, $3,000,000,000.

(6) Commerce and Transportation (400):

(A) New Budget authority, $17,300,000,000.

(B) Outlays, $16,000,000,000.

(7) Community and Regional Development (450):

(A) New budget authority, $14,300,000,000.

(B) Outlays, $10,000,000,000.

(8) Education, Training, Employment, and Social Services (500):

(A) New budget authority, $30,400,000,000.

(B) Outlays, $23,200,000,000.

(9) Health (550):

(A) New budget authority, $40,600,000,000.

(B) Outlays, $39,500,000,000.

(10) Income Security (600):

(A) New budget authority, $166,300,000,000.

(B) Outlays, $139,300,000,000.

(11) Veterans Benefits and Services (700):

(A) New budget authority, $18,900,000,000.

(B) Outlays, $18,100,000,000.

(12) Law Enforcement and Justice (750):

(A) New budget authority, $3,500,000,000.

(B) Outlays, $3,600,000,000.

(13) General Government (800):

(A) New budget authority, $3,500,000,000.

(B) Outlays, $3,500,000,000.

(14) Revenue Sharing and General Purpose Fiscal Assistance (850):

(A) New budget authority, $7,600,000,000.

(B) Outlays, $7,700,000,000.

(15) Interest (900):

(A) New budget authority, $37,900,000,000.

(B) Outlays, $37,900,000,000.

(16) Allowances:

(A) New budget authority, $800,000,000.

(B) Outlays, $800,000,000.

(17) Undistributed Offsetting Receipts (950):

(A) New budget authority, —$16,100,000,000.

(B) Outlays, —$16,100,000,000.

MOTION OFFERED BY MR. GIAIMO

Mr. GIAIMO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GIAIMO moves to strike out all after the enacting clause of Senate Concurrent Resolution 10 and insert in lieu thereof the provisions of House Concurrent Resolution 110 as passed by the House, as follows:

That the Congress hereby determines and declares, pursuant to section 304 of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1976—

(1) the recommended level of Federal revenues is $348,800,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $10,300,000,000;

(2) the appropriate level of total new budget authority is $477,927,000,000;

(3) the appropriate level of total budget outlays is $419,130,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $70,330,000,000; and

(5) the appropriate level of the public debt is $718,915,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 304 of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1976, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):

(A) New budget authority, $108,788,000,000.

(B) Outlays, $100,077,000,000.

(2) International Affairs (150):

(A) New budget authority, $7,956,000,000.

(B) Outlays, $6,841,000,000.

(3) General Science, Space, and Technology (250):

(A) New budget authority, $4,468,000,000.

(B) Outlays, $4,406,000,000.

(4) Natural Resources, Environment, and Energy (300):

(A) New budget authority, $18,627,000,000.

(B) Outlays, $17,209,000,000.

(5) Agriculture (350):

(A) New budget authority, $2,355,000,000.

(B) Outlays, $3,044,000,000.

(6) Commerce and Transportation (400):

(A) New budget authority, $17,313,000,000.

(B) Outlays, $15,961,000,000.

(7) Community and Regional Development (450):

(A) New budget authority, $15,023,000,000.

(B) Outlays, $10,819,000,000.

(8) Education, Training, Employment, and Social Services (500):

(A) New budget authority, $30,355,000,000.

(B) Outlays, $22,620,000,000.

(9) Health (550):

(A) New budget authority, $40,651,000,000.

(B) Outlays, $39,283,000,000.

(10) Income Security (600):

(A) New budget authority, $174,993,000,000.

(B) Outlays, $142,050,000,000.

(11) Veterans benefits and services (700):

(A) New budget authority, $18,917,000,000.

(B) Outlays, $18,130,000,000.

(12) Law enforcement and justice (750):
(A) New budget authority, $3,524,000,000.
(B) Outlays, $3,657,000,000.
(13) General Government (800):
(A) New budget authority, $3,560,000,000.
(B) Outlays, $3,554,000,000.
(14) Revenue sharing and general purpose fiscal assistance (850):
(A) New budget authority, $7,578,000,000.
(B) Outlays, $7,696,000,000.
(15) Interest (900):
(A) New budget authority, $38,287,000,000.
(B) Outlays, $38,287,000,000.
(16) Allowances:
(A) New budget authority, $794,000,000.
(B) Outlays, $764,000,000.
(17) Undistributed offsetting receipts (950):
(A) New budget authority, —$15,268,000,000.
(B) Outlays, —$15,268,000,000.

The motion was agreed to.

The Senate concurrent resolution was concurred in.

A similar House concurrent resolution (H. Con. Res. 110) was laid on the table.

Mr. GIAIMO. Mr. Speaker, I ask unanimous consent that the House insist on its amendment to the Senate concurrent resolution (S. Con. Res. 10) revising the congressional budget for the U.S. Government for the fiscal year 1977, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut? The Chair hears none, and appoints the following conferees: Messrs. GIAIMO, WRIGHT, ASHLEY, MITCHELL of Maryland, BURLESON of Texas, Ms. HOLTZMAN, Messrs. DERRICK, FRASER, SIMON, LATTA, CONABLE, ROUSSELOT, and REGULA.

APPOINTMENT OF CONFEREES ON H.R. 2647, AMENDING SMALL BUSINESS ACT

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2647) to amend the Small Business Act and the Small Business Investment Act of 1958 to increase loan limitations and to increase surety bond authorizations, with Senate amendents thereto, disagreed to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Iowa? The Chair hears none, and appoints the following conferees: Messrs. SMITH of Iowa, ADDABBO, LAFALCE, ST GERMAIN, STEED, BADILLO, DINGELL, CONTE, MCDADE, and STANTON.

REQUEST FOR PERMISSION FOR COMMITTEE ON RULES TO FILE CERTAIN PRIVILEGED REPORTS

Mr. BOLLING. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight, Friday, February 25, to file certain privileged reports.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I wonder if the gentleman from Missouri would tell us what reports this request will cover?

Mr. BOLLING. Mr. Speaker, if the gentleman will yield, the Committee on Rules is going to hear tomorrow morning a matter out of the Committee on Banking, Currency and Housing, dealing with regulation Q, I understand, and we are also in the process of considering, as the gentleman knows, the so-called Hamilton-Obey matter. We would hope by that time we would have an opportunity to file a rule on that subject.

Mr. BAUMAN. Mr. Speaker, further reserving the right to object, this gentleman does not want to stand in the way of reform or for the updating of ethics of the House; but the gentleman knows as a result of the hearings he sat through today, aside from being weary, I think many points were raised about the present content of the legislation which is before the Committee on Rules. I would hope that perhaps the gentleman would defer his request as to the resolution concerning this matter. The gentleman can make his request tomorrow after it has been agreed to in a form that the Members will know what it contains. I do not think we should vote blindly on this and if there is permission to file by Friday, midnight, it could be brought up Monday or Tuesday. We would like to know if and when it will come and in what form it will come to the House for consideration.

Mr. BOLLING. Mr. Speaker, I withdraw my request.

COMMUNICATION FROM THE CLERK OF THE HOUSE—SUBPENA IN THE MATTER OF EDWARD A. GARMATZ

The SPEAKER. Pursuant to House Resolution 10, the subpena and the accompanying papers will be printed at this point in the RECORD.

The Clerk read as follows:

WASHINGTON, D.C.,
February 23, 1977.

MR. JONATHAN L. GOLDSTEIN,
U.S. Attorney, District of New Jersey,
Newark, N.J.

DEAR MR. GOLDSTEIN: This is in response to the subpoena duces tecum, and the accompanying order of the United States District Court for the District of New Jersey, issued to the Clerk of the United States House of Representatives directing me to appear as a witness before the Grand Jury and to bring with me the documents named therein which were submitted to the Clerk by Edward A. Garmatz for the years 1970 through 1972, inclusive.

Pursuant to the above subpoena and order and in accordance with the provisions of House Resolution 10, a review of the files maintained by the Office of the Clerk and in possession and under control of the House has been conducted.

Accordingly, I am enclosing copies of the described reports filed for the period 1970 through and including 1972 and identified as (a) and (b) in the subpoena.

With respect to (c), attendance records and expense accounts relating to travel, attendance at House sessions is indicated by response to quorum calls or votes and is thereby a matter of public record and no other attendance record is maintained as such and travel expenses for the period in question were received in a lump sum, in lieu of reimbursement on a per trip basis, pursuant to regulations in effect during that time.

In respectful answer to the subpoena duces tecum and the accompanying order, I hereby transmit copies of the above documents together with the appropriate certification.

With kind regards, I am

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, U.S. House of Representatives.

WASHINGTON, D.C.

I, Edmund L. Henshaw, Jr., Clerk of the United States House of Representatives, as certifying officer for the House of Representatives, do hereby certify that the attached are true and correct copies of reports submitted to the Clerk by Edward A. Garmatz in connection with political campaigns conducted by him for the years 1970 through and including 1972.

In witness whereof, I hereunto affix my name and the Seal of the House of Representatives, in the City of Washington, District of Columbia, this Twenty-third day of February, Anno Domini one thousand nine hundred and seventy-seven.

EDMUND L. HENSHAW, Jr.,
Clerk, U.S. House of Representatives.

SUBPENA TO TESTIFY BEFORE GRAND JURY

[In the U.S. District Court for the District of New Jersey]

To Clerk, United States House of Representatives, Washington, D.C.

You are hereby commanded to appear in the United States District Court for the District of New Jersey at U.S. Post Office & Courthouse Bldg., Room 486, in the city of Newark, N.J. on the 15th day of February 1977 at 10 o'clock A.M. to testify before the Grand Jury and bring with you:

(a) any and all filings, reports and/or submissions with attached or supporting material submitted by Edward A. Garmatz, in connection with political campaigns conducted by him for the years 1970 through to and including 1972.

(b) any and all filings, reports and/or submissions with attached or supporting materials submitted by or on behalf of any campaign committee for Edward A. Garmatz or any other entity raising funds for Edward A. Garmatz for the years 1970 through to and including 1972.

(c) any and all attendance records and expense account reports for Edward A. Garmatz and Robert McElroy for the period September 9, 1971 to and including January 3, 1973.

[In the U.S. District Court, District of New Jersey]

In the Matter of the Grand Jury Empaneled July 27, 1976

Miscellaneous No. —

ORDER

This matter having been opened to the Court on the *ex parte* petition of Jonathan L. Goldstein, United States Attorney for the District of New Jersey, by Frank C. Razzano, Assistant United States Attorney, for an Order declaring that documents subpenaed from the Clerk and the Sergeant-at-Arms of the United States House of Representatives by the Grand Jury empaneled on July 27, 1977, are necessary, relevant and material to a pending investigation by the aforementioned United States Grand Jury, and for good cause shown;

It is on this 28th day of January, 1977.

ORDERED that the documents subpoenaed from the Clerk and the Sergeant-at-Arms, of the United States House of Representatives by the Grand Jury empaneled on July 27, 1976, are necessary, relevant and material to a pending investigation by the aforementioned United States Grand July, and it is

Further ordered that the documents sub-

poenaed from the Clerk and the Sergeant-at-Arms of the United States House of Representatives may be released to a representative of the United States Marshal's Service, Washington, D.C. as agent for this Court, and it is

Further ordered that the representative of the United States Marshal's Service should thereafter transfer said documents to the United States Attorney's Office for the District of New Jersey as agent for said Grand Jury.

LAWRENCE A. WHIPPLE,
U.S. District Judge.

CONGRESSIONAL ETHICS LEGISLATION

(Mr. ROSTENKOWSKI asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ROSTENKOWSKI. Mr. Speaker, on Wednesday, February 16, I took some time on the House floor in order to discuss my reasons for cosponsoring House Resolution 287—the so-called congressional ethics legislation.

I continue to be troubled by some of the provisions dealing with outside income limitations, as well as other sections of the resolution. The lead editorial in Friday's Wall Street Journal does an excellent job in articulating some of my basic objections. I commend it to my colleagues:

PUBLIC PROTECTION

Last week the House of Representatives' Commission on Administrative Review announced a set of new rules it hopes the House will establish to clean up the financial ethics of its members. These recommendations are not only going to be acted on by the Rules Committee and then the full House, but will probably have a heavy influence on the Senate Special Committee on Official Conduct, which is now preparing its own report on these matters.

Half of the House Commission's proposed rules are aimed at limiting the personal gain that a member can get out of his congressional office. New restrictions would be placed on how members can use their franking privilege. The Congressmen would no longer be permitted to convert leftover political funds to personal use. The honorable members would no longer be allowed to accept congressional reimbursement for travel expenses that have also been paid for by other people.

The other half of the new rules aims to make it harder for the Congressmen to make money for themselves from anyone but the general taxpaying public. Any chunk of income over a hundred dollars would have to be reported along with its source. Gifts of over a hundred dollars a year from those directly interested in legislation would be forbidden. No member could make more than 15 percent of his income from outside sources, and that outside income could include no more than $750 for any speech or article.

Now we sympathize with the horrible shock that our Representatives must have felt upon learning that the U.S. taxpayers had contracted for the skilled labor of Ms. Elizabeth Ray, and we find some of what Congress is now doing in atonement wholly unobjectionable. No one wants to see Congressmen getting repaid twice the cost of their out-of-town hotel rooms or building personal slush funds.

There's little doubt that we can legitimately require our legislators to disclose the sources of their income. And by restricting the use of the franking privilege, the reformers have hacked a small chunk away from that huge mass of public funds that the incumbents now spend to insure their reelection.

In fact, by limiting the amount of money that the Congressmen can make from speaking, the reformers may even have found a way to keep the legislators off the streets and away from some of those interested audiences that they would otherwise spend their time stirring up. That revolutionary possibility alone may be worth the price of admission.

On the other hand, it's hard to take a very enthusiastic view of what putting a general lid on congressional income will do for the quality of our public policy or the tone of our public life. It seems only reasonable to think that the more you limit congressional income in a way that makes a career in Congress unattractive to people who'd like a comfortable living, the more exclusively Congress will come to be inhabited by people who want other things instead—fame, for instance, or power.

And when you set out to reduce the power of moneyed interests, you shouldn't kid yourself into ignoring the fact that you're redistributing that power to interests with other kinds of skills—to the press, or the lobbying groups that know how to deal with it. In reform as in everything else, there's no such thing as a free lunch. And in this particular case, it's by no means clear that the trade-off we're being asked to make will give us a net improvement in the qualities of our legislators.

Even where the current proposals pose no particular problems, though, they reveal that curious assumption that has always attended the practice of moralism in our politics—that personal rectitude is going to have significant effects on the performance of our political institutions. The evidence, to say the least, is to the contrary.

If Congress wants to do something to improve the governnance of this country, it can start trying to counteract that system of incentives that makes legislators think they have to do as much lawmaking and declaiming as they possibly can. And if Congress does not or cannot do so, the financial cleanliness of its members is not going to be of much help to the rest of us.

THE TRANS-ALASKA GAS LINE: IN THE NATION'S INTEREST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alaska (Mr. YOUNG) is recognized for 20 minutes.

Mr. YOUNG of Alaska. Mr. Speaker, recently a Federal Power Commission administrative law judge rendered a preliminary decision in favor of the proposed Arctic Gas pipeline which will cross Canada; he also discounted the El Paso trans-Alaska proposal. I have scrutinized Judge Litt's preliminary ruling and find that he has based his decision upon a number of conceptions and assumptions which are incorrect. In essence, he purports that Arctic's trans-Canada route will make more gas available sooner to U.S. consumers, that the environmental impact of the route is less than that of competitive projects, and that this trans-Canada route has more favorable economics. Examination of the competing proposals and the preliminary decision clearly shows that the judge's conclusions are erroneous. Objective scrutiny reveals that the El Paso trans-Alaska proposal is superior in all three respects.

ARCTIC GAS DELAY PROBLEMS

Contending that gas can be made available sooner via the Arctic Gas proposal requires that one ignore the difficulties which will crop up during winter construction, as proposed by Arctic, and overlook the many regulatory and legal pitfalls which will affect Canadian approval and regulation of the project. Although it is impossible to precisely estimate the additional time these items will add to completion of the Arctic line, at least a 2-year penalty should be imposed by construction troubles and up to 10 years will be needed to iron out a plethora of problems in Canada.

Construction difficulties which the Arctic project will encounter include their plans for winter construction and the use of snow roads, their anticipated rate of pipeline laying and logistical troubles connected with the weather. Estimates of construction delays associated with this proposal are based on actual experience gained through construction of the Alyeska oil line. Overall, the cumulative effect of these problems is likely to increase Arctic's construction time almost 100 percent.

Arctic purports that winter construction will permit them to overcome the time delays associated with summer construction in the far north. Their plans call for the building of a network of snow roads and bridges to support this winter effort. Analysis, however, of snow availability, appropriate weather conditions, and actual experience with snow roads shows that Arctic's 2-year construction schedule is more likely to become 4 years. Alaskan witnesses presented weather data that clearly illustrated that deviations of snowfall on a monthly and yearly basis are often significant and there is a 25-percent probability that insufficient snowfall will occur in any 1 year. Weather must also be appropriate to build and maintain snow roads and Arctic concedes that an early winter start is necessary to meet its 2-year schedule; any delay in the onset of winter or delay in the freezing of the tundra will preclude the construction of snow roads and restrict vehicle travel essential to preconstruction planning. Last, the Alyeska experience with snow roads demonstrates that Arctic's 2-year construction schedule is not realistic. Alyeska has built three such roads: First, in 1975–76, a 60-mile snow road was built—it took 5 months to complete; second, a second half-mile road required 3 weeks; third, a third road-building effort was commenced in 1975, but it was a failure when high winds dispersed the snow. Given this actual on-the-ground experience with snow roads, it is difficult if not impossible to perceive how Arctic justifies its 2-year winter schedule of construction for hundreds of miles of snow roads and associated pipeline.

Judge Litt acknowledges the lack of real experience with snow roads and the evidence presented regarding their success in Alaska. Nonetheless, he has apparently suppressed his own concerns and rejected field work evidence on the basis of Arctic Gas assurances and one field test.

In addition to snow road problems, Arctic's 2-year schedule is based on a highly exaggerated estimate of how much pipe can be welded and laid each

working day. Very simply, Arctic contends that it can weld and lay 0.71 mile of pipe per working day. Evidence based on Alyeska's experience and the laying of 36-inch pipe in Canada indicated that a rate of 0.36 mile per day is more likely to be achieved. Assuming that actual experience in the field is more indicative than test results, Arctic will only be able to put down pipe at a rate 50 percent slower than it anticipates. Once again though, the preliminary decision accepts Arctic's assurances and discounts fact.

Finally, Arctic's 2-year construction plan is based on perfect timing in its preconstruction logistics. The FPC hearings indicated, however, that disruptions in this stage could cause the loss of an entire construction season. Problems which may be encountered in this area include: First, the inability to procure properly designed boats for use along the MacKenzie River; second, prolonged ice conditions in the Bering and Beaufort Seas (as occurred in 1975); and third, the lack of adequate roads to facilitate movement of necessary materials by truck if water transport is hampered. Any of these events by themselves could seriously impair Arctic's building schedule.

In contrast to these many potential problems, Judge Litt recognizes that "no serious questions have been raised concerning a number of aspects of El Paso's construction logistics." Moreover, he noted that El Paso's use of the corridor established by the Alyeska project will facilitate construction. On balance, therefore, I am persuaded that Arctic can only be considered superior if, and only if, its construction program proceeds without a hitch. Any difficulties which occur in its winter building scheme will impose a severe time penalty and delay the delivery of gas to fuel short American consumers.

Construction troubles are not the only source of delays which will plague the Arctic trans-Canada scheme. Securing approval from the appropriate governmental bodies in Canada will take considerable time and these approvals themselves are likely to be predicated on the resolution of other difficult issues. These delays will not arise from malice or lack of cooperation with Canada but will emanate from the legal requirements of Canadian procedures and Canadian pursuit of legitimate Canadian interests.

The hydrocarbon pipeline treaty recently signed by our countries is not the final word on cooperative pipeline efforts. That treaty, if ratified, will merely codify the working relationship which has been established and maintained over the past many years. The treaty does not, however, solve the specific problems associated with a particular pipeline proposal. For example, should Canada and the United States agree to approve a trans-Canada pipeline, issues including financing, ownership, operations, capacity sharing, cost allocation, et cetera, would all need to be resolved. Obviously, when dealing with trillions of cubic feet of precious natural gas and multibillion dollar investments, negotiations between the two countries are likely to be complicated and lengthy.

The absence of a native land claims settlement in Canada's Northwest Territories is another potential source of significant delay. Over 5 years of intensive effort were required to settle Native claims in Alaska and it is probable that a simlar period will be necessary to settle similar claims in Canada. Although Arctic Gas proponents have contended that a settlement is not a necessary precondition to pipeline approval and construction, it may prove exceedingly difficult, if not impossible, to secure financing for a project that will surely be confronted by native sponsored litigation and court challenges if land claims are not settled.

A third source of delay involving Canada are its decisions regarding resource development. It is clear that Canada must establish priorities regarding which major energy projects it wants to pursue; simply, Canada has insufficient financial resources to embark simultaneously on a number of expensive energy propositions. Accordingly, it is probable the Canadian Government will carefully weigh the pros and cons of different projects, including Polar Gas, the James Bay power project, "Maple Leaf," and Tenneco LNG. Canada may be expected to support that project which will generate the greatest benefits for it. Obviously, should the United States choose the trans-Canada route, there is no guarantee that Canada will approve this U.S. choice. Consequently, we may approve such a project only to wait a year or more for the requisite Canadian decision.

El Paso tried to make this point at the hearings—that Canada will follow its own interests possibly to the detriment of U.S. interests. Apparently this issue was not taken into consideration in a serious manner as indicated by the following quotation from the decision:

> The El Paso Canadian Reply Brief is as well drafted a chamber of horrors as this writer has ever seen and would do justice to the standards set by the Marquis de Sade if he had been interested in economics and politics.

To summarize briefly, approval of a trans-Canada line will commit the United States to protracted negotiations regarding the precise details of pipeline financing and operation, the lack of a natives claims settlement is a potential source of serious delay, and Canada's self-interest may dictate additional delay, if a MacKenzie Valley route is selected, while it considers its options. Of course, these delays which affect approval of a project will be compounded if Arctic Gas, with its construction schedule troubles is chosen.

ENVIRONMENTAL CONCERNS

The preliminary decision also claimed that the Arctic Gas proposal is environmentally superior to the El Paso LNG project. This flies so much in the face of commonsense that it is hard to believe that such an extensive analysis could reach such a conclusion and a brief review of the facts flatly contradicts this finding. First, environmental organizations are strongly opposed to the Arctic Gas proposal. Not only are these organizations fighting Arctic Gas' planned incursion into the Arctic Wildlife Refuge, they also recognize the impacts of establishing a new development corridor through thousands of miles of undeveloped area.

Second, the Arctic scheme calls for over 4,000 miles of new pipeline construction. In contrast, El Paso's project follows the existing corridor created by the Alyeska line and utilizes inplace pipelines for gas distribution in the lower 48. Plain thinking will reveal that using existing corridors and existing pipelines will cause far less adverse environmental effects than 4,000 miles of new construction.

ARCTIC'S ECONOMIC TROUBLES

The third factor which supposedly favors the Arctic Gas trans-Canada line is its economic benefits. The finding for Arctic on the basis of superior economics requires, however, that one ignore the costs of prospective delays and the difficulties inherent in financing an international undertaking.

Staff studies done by the Federal Power Commission indicated that Arctic Gas will generate net national economic benefits of $9.4 billion while El Paso's project will return $9.1 billion in benefits. The $9.4 billion figure for Arctic Gas, however, was predicated on no delays in approving or building the line; delays from construction difficulties alone, as outlined earlier, are expected to add at least $2 billion in costs and reduce the benefits to the $7 billion range—$2 billion less than El Paso. Additional delays emanating from Canada would further increase El Paso's benefits margin.

Judge Litt also contends that the unit costs for Arctic's Mackenzie Valley line will be less than El Paso's. But again this is dependent on no delays—schedule problems will destroy Arctic's supposed economic efficiency. Moreover, the recommendation acknowledges that lower volumes of Canadian gas in the system now projected in light of diminished Canadian gas reserve estimates will raise unit costs for the United States. Conversely, higher percentages of Canadian gas will lower costs in the United States but simultaneously reduce the quantities of delivered gas. This strikes me as a "no win" proposition for American consumers.

Lastly, the Arctic Gas proposal faces severe financing obstacles apparently overlooked in the preliminary recommendation. Foremost is the fact that Arctic will have to raise nearly $5 billion in Canadian financial markets. Although its submissions to the FPC indicate a total project cost of $8 billion and Canadian financing of $2 billion, these are 1975 figures which observers expect to double by project completion. Accordingly, if Canada chooses to back this scheme, its financial markets will be stretched to their limits and capital availability for other energy efforts in Canada is likely to be severely constrained. Before rushing into an approval of the Arctic line, Americans should be aware that we could approve this proposal and find the Canadians most unwilling for monetary reasons.

Arctic representatives also stated be-

fore the FPC that their project would require some form of Government financial support or guarantees. In sharp contrast, financing for the El Paso trans-Alaskan line is not dependent on Federal intervention and taxpayers' dollars. The Treasury Department is also very wary of Federal financial support and stated that anyone promoting Federal assistance as the least difficult solution is basically uninformed.

El Paso, as compared to its competition, enjoys clear economic and financial advantages. These advantages are cited in the preliminary recommendation but apparently have been discarded in the finding for the Arctic Gas scheme. First, the recommendation states that El Paso will generate substantial national economic benefits and is superior in providing employment for American workers as noted below:

El Paso is clearly justified in its emphasis on the superior degree (vis-a-vis the other projects) to which it will provide jobs for American labor and utilize American-made products. Not only will more Americans work on the El Paso project than on either of the trans-Canadian projects, but because of the nature of the El Paso project, it will draw upon a greater variety of labor than the others. The advantage which it enjoys in this respect is even more important to El Paso when the multiplier effect is considered. The multiplier effect is the additional impact caused by the further expenditure of the same dollar. One example of a multiplier effect involves a large shipyard going into production in a large unemployment area. Dollars paid out as new or additional wages serve to enhance the spending power of the workers and their families. As the community grows, more service-related jobs are created. The overall result is that the economy of the entire area is boosted. Moreover, El Paso does not confront the financing obstacles facing Arctic. This was also acknowledged by Judge Litt when he noted that "El Paso, as an all-U.S. project using only traditional U.S. money markets to raise its funds, will be able to do so easier and more cheaply that either Arctic Gas or Alcan. It also has the distinct advantage that incurs to it from building U.S. ships under U.S. loan guarantee incentives. *Arctic Gas has optimistically evaluated its supply markets, has optimistically assessed how it views its worth to the financial community, and has injected several innovative proposals, only partially tested, to spread its choices and not overburden the credibility of its suggested scheme. This does not, of course, make its financing impossible, but since uncertainty is the nemesis of easy financeability, it makes it susceptible to higher costs because of unknown and unquantified risk. Arctic Gas' financial plan, therefore, cannot be found to be as easily financeable as El Paso's (emphasis added).*"

SUMMARY

On balance, my examination of the preliminary recommendation did not turn up the evidence to support the findings for the Arctic Gas plan. Indeed, the text is replete with statements, information, and citations that lead to a conclusion that the El Paso project is superior and warrants FPC as well as national support. The case against Arctic can be summed up quickly: First, the prospects of delay in the construction and/or approval stages are great and are likely to result in imposition of severe time penalties on the availability of Alaskan gas to U.S. consumers; second, the Arctic Gas venture with its 4,000 miles of new pipeline construction will have a greater adverse environmental impact than El Paso which will use existing corridors and existing pipelines; and third, Arctic Gas' spurious economic superiority will be destroyed by any delay and if it could be approved and built on schedule, it cannot provide the American employment benefits which the El Paso Alaskan project will. The national interest will best be served by timely approval and construction of the all-American trans-Alaskan route.

STRATEGIC ARMS LIMITATION: WHERE WE STAND NOW AND SOME RECOMMENDATIONS FOR THE FUTURE

The SPEAKER per tempore. Under a previous order of the House, the gentleman from New York, (Mr. KEMP) is recognized for 30 minutes.

Mr. KEMP. Mr. Speaker, the limitation of strategic arms has been the focus of American diplomatic efforts with the Soviet Union since 1969, indeed it is the linchpin of détente. A longer perspective on the subject of strategic arms limitation is needed than most policymakers usually have available to assess the consequences of the intense day-to-day activities of the relevent components of the national security apparatus that have produced the landmark 1972 accords and appear well on the way to producing a second round of agreements.

I have taken a personal interest in the subject of strategic arms limitation because of the centrality of the outcome for our long-term national security posture. The significance of the issue has become immersed in the minutia of weapon systems, strategic doctrine, and other technical properties of modern nuclear weapon systems, and for that reason has become somewhat forbidding in the demands it places on those who wish to become better informed on the subject.

The coming to power of a new administration is a convenient point at which to reflect on what has come before in this realm, and to consider what changes, if any, should be made in our policies. In most cases, important policy positions will be filled by individuals without the two-edged sword of years of direct experience with strategic arms limitation policymaking. The absence of senior officials with direct experience with the 7-plus years of negotiation efforts in the strategic arms limitation talks—SALT—will make it possible for the new administration to investigate new perspectives on arms limitation without the encumbrance of defending every feature of prior policy that would almost certainly accompany anyone connected with our SALT effort in the past. Thus, we have come to an interregnum in this vital element of our national security policy formulation, and I would therefore like to offer my perspective on the future of American strategic arms limitation policy.

To do so, we must first review the evolution of the military forces that are the subject of these negotiations with respect to both the qualitative and quantitative characteristics of these forces, and to project the likely outcome of weapon development and deployment programs over the next 5 years. From such a review, we will be able to identify priorities for a second round of strategic arms limitation agreements that must be addressed if the agreement is to have the credibility and support any important international agreement we undertake should have.

SOVIET-AMERICAN STRATEGIC WEAPON DEVELOPMENTS THROUGH 1972

The United States has developed its strategic forces in two major surges of effort; the first in the mid-1950's, and the second in the early 1960's. The Congress was debating the fiscal year 1950 U.S. defense budget in the weeks before the Korean war broke out. U.S. strategic forces consisted of approximately 100 B–36 bombers; the B–52, designed in 1948, and long-range ballistic missiles could not be financed on the $16 billion defense budget. Within 2 weeks, however, the Congress appropriated $49 billion. While a major share of this increase was required to support the costs of the Korean war, concern about the intentions of the Soviet Union diverted a substantial fraction of U.S. expenditures into the development and deployment of strategic forces. Now the B–52, the B–47, the Atlas and Titan ICBM's, and the Polaris programs became feasible paving the way for two decades of U.S. strategic nuclear superiority.

The second surge of U.S. strategic force development came in the early 1960's when the strategic nuclear forces took on their current configuration; 1,000 Minuteman missiles were deployed, and 41 Polaris-class ballistic missile launching submarines were commissioned. The final modifications to the B–52-series aircraft were completed. The basic contours of the U.S. strategic nuclear offensive force were frozen at their 1967 level, and only qualitative changes were made since then.

The decision of the United States to terminate its strategic nuclear forces at the 1967 level was made because of the belief commonly held by officials at the time that the Soviet Union had abandoned any notion, if indeed they ever entertained one of overtaking the United States in strategic nuclear arms. Former Secretary of Defense Robert S. McNamara, the most vigorous exponent of this view was convinced that the Soviets would accept a protracted, if not permanent, term of strategic nuclear inferiority. In April 1965, Mr. McNamara stated:

The Soviets have decided that they have lost the quantitative race, and they are not seeking to engage us in a contest. . . . there is no indication that the Soviets are seeking to develop a strategic force as large as ours.

With the demise of the Khrushchev regime, in 1964, the more traditional-minded regime of Brezhnev sought to regain the momentum lost to the Soviet strategic nuclear program when Khrushchev slowed the pace of development by his pursuit of what Soviet military tactician's have subsequently described as "hare-brained" schemes that focused Soviet efforts on "wars of national liberation" to the exclusion of Soviet strategic nuclear forces. Less than a decade after Secretary McNamara declared that the Soviets would not seek to develop a strategic force larger than our own, the Soviets exceeded our own strategic force by every measurable strategic aggregate except for the number of deployed warheads. This figure was certainly a waning advantage as the Soviets acquired the technology to design and build missiles with multiple warhead payloads as subsequent events have demonstrated.

The watershed of the Soviet-American arms competition has been the Strategic Arms Limitation Talks and the accords reached in 1972. It is instructive to examine the contrast between Secretary McNamara's confident assertion of 1965 and the reality of Soviet efforts only 7 years later. Starting with less than 200 ICBM's and 50 submarine-launched ballistic missiles—SLBM's—in 1965, the Soviet Union developed and deployed a force for the conduct of intercontinental nuclear warfare on a scale that underscores the single-minded obsession of the Soviet leadership with military power.

CHARACTERISTICS OF SALT I MISSILE FORCES

1. ICBM'S

Type	SS-7, SS-8	SS-11	SS-13	SS-9	Total
A. U.S.S.R.:					
Aggregate warheads/missile (number)	1	1	1	1	
Yield/warhead (megatons)	5	1	1	18-25	
Throw-weight/missile (pounds)	8,000	2,000	2,000	10,000	
Deployment (number)	209	1,012	60	313	1,600
Aggregate throw-weight (pounds)	1,600,000	2,000,000	100,000	3,000,000	6,000,000
Warheads (number)	209	1,012	60	288-313	1,600

Type	Titan II	Minuteman II	Minuteman III	Total
B. United States:				
Warheads/missile	1	1	3	
Yield/warhead	5-10	1-2	.170	
Throw-weight/missile (pounds)	8,000	2,500	2,500	
Deployment (number)	54	450	550	1,054
Aggregate throw-weight (pounds)	400,000	1,000,000	1,400,000	3,000,000
Aggregate warheads	54	450	1,650	2,154

2. SLBM'S

Type	SS-N-4	SS-N-5	SS-N-6	SS-N-8	Total
A. U.S.S.R.:					
Range (nautical miles)	300	659	1,500	4,200	
Warheads/missile (number)	1	1	1	1	
Yield/warhead (megatons)	1+	1+	1+	1+	
Deployment (number)	27	54	544	220	[1] 845
Aggregate (number)	27	54	544	220	[1] 845

Type	Polaris A-3	Poseidon C-3	Total
United States:			
Range (nautical miles)	2,500	2,500	
Warheads/missile (number)	3	10	
Yield/warhead (megatons)	.200	.050	
Deployment (number)	160	496	656
Aggregate warheads (number)	480	4,960	5,440

[1] Estimated.

Source: This table is drawn from a study by Francis P. Hoeber, "Strategic Forces" to be published in a forthcoming book entitled, "Arms, Men, and Military Budgets: Issues for fiscal year 1978" (New York: Crane, Russak).

There are a number of ways in which the capability of a strategic nuclear force can be measured, and no single measure has universal validity for each measure can serve a particular analytic purpose. Measurement of a force by comparing the aggregate number of warheads deployed is a useful measure of the number of targets which can be brought under attack, and is therefore particularly useful for current war planning purposes.

However, over the longer term, the number of warheads which can be deployed is a function of another important aggregate, the payload capacity or "throw weight" of a ballistic missile. This measure is directly correlated with aggregate megatonnage, the figure which expresses the explosive yield of the deployed warheads in terms of equivalent energy released by TNT explosives. There are a number of other measures which are more technical in character which describe the more esoteric properties of a force such as the accuracy with which the warhead can be delivered, and many others that are important at the operational level, but are normally not significant for public policy purposes.

The table shown above emphasizes the scope of the Soviet buildup between 1964 and 1972. Five ICBM and four SLBM types were deployed in quantity between 1964 and 1972. The number of ICBM's exceeded those deployed by the United States by a ratio of 3 to 2, but the throw-weight exceeded that of the United States by a ratio of 2 to 1.

Although the United States had a significant lead in the number of warheads deployed in 1972, this lead could not be sustained if the Soviets were able to develop multiple warhead technology, the source of the U.S. advantage in deployed warheads. The most important contributor to the U.S. advantage in deployed warheads was not the ICBM force, but the SLBM force where the new Poseidon missile could carry as many as 14 warheads—although such a payload required that the submarine venture close to the Soviet coast where antisubmarine defenses are most effective—although 10 warheads is a more representative deployment. This advantage in deployed warheads was the most important measure of strategic nuclear forces to senior officials in 1972 when the first-round SALT accords were signed for it expressed an unambiguous American that was to have lasted for at least 5 years, after which, it was expected that the Soviet Union, having achieved parity at last would be able to come to the bargaining table without an inferiority complex.

THE SOVIET-AMERICAN ARMS COMPETITION SINCE SALT I

The first-round SALT accords, designed as a "freeze" on strategic weapon deployments hardly achieved its desired results. Soviet expenditures for national security purposes increased significantly, both in absolute terms and as a fraction of GNP. If the United States were expending its resources on defense at the same fraction of its GNP as the Soviet Union, it would be spending more than $225 billion in fiscal year 1977. U.S. strategic force expenditure, expressed in todays dollars, is less than half of what it was in 1960 even though two new programs, the Trident SLBM and the B–1 bomber nearing the end of their development cycle, were imposing higher costs on the U.S. strategic forces budget.

The post-SALT program of the Soviet Union has given even the most optimistic observers of Soviet behavior cause for concern. Rather than be the cause of significant reductions in Soviet effort as such distinguished scholars of Soviet affairs as Prof. Marshall Schulman of Columbia University had predicted, the Soviets began a massive upgrading of their strategic forces in their entirety. Every Soviet strategic weapon deployed in 1972 is being replaced by a larger and more capable replacement. In the short space of less than 5 years, at least 5 new Soviet ICBM's have been observed, and 11 will be tested before 1983. The Soviet Union has surged ahead of the United States in the field of long-range multiple warhead SLBM's the cause for so much complacency at top levels of the American Government as recently as 1972.

The Soviets have tested a 5,600 nautical-mile range multiple-warhead SLBM to be launched from a new class of submarine, the DELTA–II. The United States will not have an equivalent program ready for deployment until the mid 1980's when the Trident II missile and submarine system are constructed, if indeed, they ever win congressional approval in the endless battle with congressional complacency and unmoveable optimism about Soviet military forces.

The Soviet research and development effort is now so far advanced, that it is possible to engage in speculation about the probable evolution of Soviet forces without resort to appeals to faith. Assuming only that Soviet forces which are now being deployed, and assuming further that none of the advanced R. & D. systems are deployed before 1983, the following table suggests the likely outcome:

SOVIET MISSILE FORCES, 1980–83

1. ICBM'S

Type	SS–16	SS–17	SS–19	SS–18	Total
Warheads/missile (number)	1	4	6	8	
Yield/warhead (megatons)	1	.2	.34–.4	2	
Throw-weight/missile (thousands of pounds)	2	5	7	15	
Deployment (number)	0–60	100–500	600–1,000	308–313	1,400
Aggregate throw-weight (millions of pounds)	0–.12	.5–2.5	4.2–7.0	4.6–4.7	11.0–12.0
Aggregate warheads (number)	0–60	400–2,000	3,600–6,000	2,400–2,500	6,500–8,500

2. SLBM'S

Type	SS–N–6	SS–N–8	Total
Range	1,500	4,200	
Warheads	1	1	
Yield (megatons)	1+	1+	
Deployment	544	406	950
Aggregate warheads	544	406	950

This table reflects the best case optimism about Soviet deployments because it assumes that the Soviets will not take full advantage of the capabilities their R. & D. system and deploy the most advanced systems and instead will rely the most thoroughly tested systems first observed in the 1972–73 time period. Two features of the post-SALT Soviet buildup stand out.

First, Soviet throw-weight will double under these circumstances to 11 to 12 million pounds. However, because no new U.S. ICBM will be deployed by that time, the U.S. advantage in land-based deployed warheads will vanish. The United States will continue to maintain an advantage in the number of deployed warheads on submarines, but they are not sufficiently accurate to threaten U.S. land-based forces. Soviet ICBM's, do possess sufficient potential to destroy U.S. silo-based U.S. ballistic missiles with no more than two warheads allocated per silo.

Without resort to worst case polemics, the transformation of Soviet strategic forces, inevitable without an unprecedented renunciation the regime's reliance on military power, has produced a profoundly dangerous situation for the United States in the early years of the next decade.

Stated simply, it is possible to predict that the rapid pace of Soviet strategic force development since 1972 will mature in the early 1980's with the full deployment of a series of new systems discussed previously. The United States, on the other hand, has unilaterally restrained the development of sufficient forces to offset the military significance of the Soviet buildup. Even if expeditious congressional action is forthcoming in the next fiscal year, forces sufficient to offset the Soviet buildup could not be in place until the middle part of the next decade without a crash program. Thus, American diplomacy will, for the first time in the nuclear era, be exposed to the power of an adversary with a significant advantage in every important measure of strategic nuclear power. The consequences for the United States if it should become engaged in an intense crisis with the Soviet Union with such a dangerously exposed military position is beyond measure. This nightmarish, yet plausible evolution of developments, never intended by anyone in a responsible position in government is almost upon us in terms of the speed with which we must make important policy decisions.

The threat posed by these developments can be diminished or exacerbated by our arms control policy, and it is for this reason that the subject be given the most urgent consideration. Arms control, in this case, SALT I, has unwittingly, become an instrument that has diminished our security to the point where we may face genuine peril in the early years of the next decade if changes are not made swiftly.

STRATEGIC ARMS LIMITATION POLICY

The 1972 SALT accords were designed as an interim measure to permit the negotiation of a permanent agreement allowing for eventual reductions in the size of the strategic arsenals of the SALT participants. To this end, SALT I was to have been a freeze on new deployments, but a permanent agreement, according to congressional mandate in the ratification process, was to provide for parity. The legislative history strongly suggested parity in throw-weight.

In 1974, a set of guidelines known as the Vladivostok guidelines were reached that embodied the most dangerous elements of the SALT I accords without any redeeming reductions in the most threatening Soviet systems. The Vladivostok guidelines perpetuated and in effect, endorsed the post-1972 Soviet throw-weight buildup. Thus the most direct threat to U.S. land-based forces was permitted to be retained by the Soviets, and because of the weakness in the construction of the terms of agreement negotiated, the growth potential for Soviet forces was vast—compared to their 1972 deployed

forces—with room for only modest offsetting improvements for the United States.

Moreover, the United States has offered terms for settling the dispute over how to count cruise missiles and the Soviet Tu–26 Backfire within the Vladivostok that is highly prejudicial to American interests, out of misplaced zeal to conclude an early agreement.

President Carter has reiterated an offer to the Soviet Union that may give us the worst of both worlds. I cannot believe this would be his intent. But he is reported to have offered to sign an agreement dealing with ICBM's and SLBM's within the Vladivostok guidelines, thereby making permanent what was to have been a "temporary" assignment of a numerical advantage to the Soviet Union to facilitate the negotiation of a permanent agreement.

However, the Carter proposal would leave to further negotiation the question of the status of cruise missiles and the Backfire bomber, thereby aborting further development of our own proposed cruise missile deployments pending the outcome of the proposed negotiations. Similar inhibitions are directed against our own B–1 bomber program because its status within the Vladivostok guidelines would become ambiguous at best.

The difficulty with our emerging SALT policy under the new administration has recently been compounded by the proposal advanced by the President that the United States would abandon its program to reduce the vulnerability of our land-based ballistic missile force if the Soviet Union would abandon the deployment of an intermediate-range ballistic missile capable of mobile deployment. Thus, the U.S. land-based forces would continue to be directly threatened by the heavy throw-weight Soviet ICBM's, particularly the SS–18 and SS–19, diminishing their enthusiasm for negotiating any reductions in these most threatening systems.

Rather than being a source of stability and security for the United States, our arms control posture is increasingly becoming the most important engine for sustaining the Soviet threat in the strategic nuclear realm.

RECOMMENDATIONS FOR THE FUTURE

This brief, but grim rendition of our current arms control posture is not advanced out of partisan criticism, but rather out of a genuine interest encouraging a change in our arms control policy to permit it to become an instrument for negotiating a reduction in the most threatening elements of the Soviet strategic nuclear force.

What then, should the United States do?

First, we should come to grips with the uncomfortable, but necessary notion that in order to negotiate successfully, we must make it clear to the Soviets that the alternative to negotiating a favorable strategic arms agreement would result in a situation parallel to the one they faced after they launched the Korean war; namely two decades of nuclear inferiority.

Second, we must act on this recognition by rapidly beginning the development and accelerated deployment of American strategic systems which directly threaten the most dangerous Soviet systems. By this I mean we must deploy highly accurate ballistic missile warheads with a single-shot kill probability to destroy all existing Soviet silo-based missiles.

Third, we must act to reduce the vulnerability of American land and sea-based systems. Land-based systems vulnerability can be most effectively reduced by deploying a mobile ICBM in place of the existing silo-based Minuteman missiles. A simultaneous reduction of the vulnerability of U.S. systems and an increase in the vulnerability of Soviet systems will provide an incentive for serious Soviet negotiation that no set of unilateral restraints now in vogue in the arms control community could ever provide.

Fourth, we should narrow the scope of our strategic arms control efforts to include only systems where high-quality verification of compliance is feasible. This would exclude efforts such as deployment limitations on strategic bombers, qualitative controls on cruise missiles such as range, payload, deployment modes, et cetera.

Fifth, the limitation of strategic arms should not be made to bear the burden of all of our efforts to reduce the risk of nuclear war. As I have suggested by my remarks, the arms limitation approach is too laden with risks to justify excessive confidence. Instead, greater attention should be paid in bilateral negotiations to other issues relating to the handling of crises which lead to the risk of war and related measures that stoke the mutual suspicion that is the ultimate source of the existing arms competition.

SOCIAL SECURITY EARNINGS LIMIT IS UNJUST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. EDWARDS) is recognized for 10 minutes.

Mr. EDWARDS of Oklahoma. Mr. Speaker, under the current rules of the Social Security Administration, senior citizens are forced to choose between leaving the workforce or giving up social security benefits they have earned.

I feel strongly that this practice is wrong, because it denies the American workforce the valuable contributions that senior citizens would make to the economy, if they were only given some encouragement, and is unjust, because it denies senior citizens who choose to continue their careers the full benefits they have worked so hard to obtain.

To correct these wrongs I am introducing legislation to abolish the earnings limitation on social security recipients. The existing limitation has the effect of taxing senior citizens, who have additional incomes, at a rate of 50 percent. Each dollar earned over the $3,000 annual limitation results in a 50-cent reduction in the social security payment.

When we should be encouraging senior citizens to remain in the workforce where their experience and knowledge can be used, we are discouraging them from working and forcing them into retirement and a life often filled with hopelessness, frustration, and depression. We have lost sight of the intent of the Social Security Act, which was to insure a minimum income to older Americans, and instead we confiscate income that is above the minimum level.

It is absolutely critical that Congress halt this practice now, because of the hardships inflation is working on senior citizens in my district and throughout the Nation. Benefits have not come close to keeping pace with inflation, and people who can earn extra money to supplement those benefits have the right to do so, without sacrificing what they have earned through years of labor and contribution to the social security system. For that reason I today have introduced this bill, which I hope will again bring the wisdom of our senior citizens into the American workforce.

LEGISLATION TO AMEND INTERNAL REVENUE CODE ALLOWING DEDUCTION FOR SEWER CHARGES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. CORNELL) is recognized for 5 minutes.

Mr. CORNELL. Mr. Speaker, today I am introducing a bill to amend the Internal Revenue Code to allow a deduction for sewer charges in the same manner as the deduction allowed for real property taxes. I do so because in parts of my district as well as in other sections of the country sewer charges are no longer included in the property tax, but billed separately as a service charge.

These separate billings, resulting from substantial outlays for the construction and operation of new sewerage treatment systems, are an additional burden to the propery owner. Since they were formerly included in the property tax which is deductible, it seems logical to treat such charges in the same manner as real estate taxes.

I believe that it is essential for the Federal Government to take whatever action is possible to relieve the heavy burden of taxation on the individual property owner. Legislation such as I propose today is a simple but helpful step in that direction.

LEGISLATION TO AMEND FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. AUCOIN) is recognized for 5 minutes.

Mr. AuCOIN. Mr. Speaker, I simply want to announce that I am today reintroducing with 37 cosponsors my bill to amend the Fishery Conservation and Management Act of 1976, establishing a 200-mile fishery conservation zone.

I am delighted that so many of our colleagues have joined in this effort to make certain the 200-mile law does what Congress and the American people intended it to do. The cosponsors of the bill are: Mr. STUDDS, Mr. AKAKA, Mr. BAUCUS, Mr. BAUMAN, Mr. BEARD of Rhode Island, Mr. BURKE of Massachusetts, Mr. CARNEY, Mr. DON H. CLAUSEN, Mr. COHEN, Mr. EDGAR, Mr. EILBERG, Mr. EMERY, Mr. FLOOD, Mr. GINN, Mr. HARRINGTON, Mr. HAWKINS, Mr. HOWARD, Mr. HUGHES, Mr. JEFFORDS, Mr. JENRETTE, Mr. LENT, Ms. MIKULSKI, Mr. MILLER, Mr. MOAKLEY, Mr. MOORHEAD of California, Mr. PANETTA, Mr. RINALDO, Mr. ROSE, Mrs. SPELLMAN, Mr. STARK, Mr. TREEN, Mr. WEAVER, Mr. WHITEHURST, Mr. WHITLEY, Mr. WILSON, Mr. YOUNG, and Mr. ZEFERETTI.

For the convenience of Members of the House who are not familiar with this legislation, I would like to request unanimous consent that the text of the bill be printed in the RECORD at this point.

The bill is as follows:

H.R. —

A bill to amend the Fishery Conservation and Management Act of 1976 in order to clarify the definition therein of vessels of the United States and to require the Secretary of Commerce to prepare an annual report regarding foreign investment in the United States fishing industry

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Fishery Conservation and Management Act of 1976 (Public Law 94-265) is amended by striking paragraph (25) and inserting in lieu thereof the following:

"(25) The term 'vessel of the United States' means any vessel which—

"(A) is documented under the laws of the United States or registered under the laws of any State; and

"(B) is either owned by a citizen of the United States, or has been continuously owned by the same person who owned it prior to January 27, 1977.

"(26) The term 'citizen of the United States' means—

"(A) an individual who is a citizen or national of the United States;

"(B) the Federal Government, any State or local government within the United States, or any entity of such a government; and

"(C) a corporation, partnership, association, or other entity, organized or existing under the laws of the United States or of any State, of which at least 75 per centum of the interest therein is owned by a citizen or citizens of the United States: *Provided,* That a corporation is not a citizen of the United States—

"(i) unless its president or other chief executive officer and the chairman of its board of directors are citizens of the United States and no more of its directors than a minority of the number necessary to constitute a quorum are noncitizens, or

"(ii) if seventy-five per centum of the interest in such corporation is not deemed to be owned by citizens of the United States under the provisions of section 2(c) of the Shipping Act of 1916, as amended (46 U.S.C. 802(c))."

SEC. 2. Section 204(b)(1) of such Act of 1976 is amended by adding at the end thereof the following: "(For purposes of this Act, any foreign nation may treat, as a vessel under the flag of such nation, any vessel which is documented under the laws of the United States or registered under the laws of any State, if more than 25 percent of the vessel is beneficially owned by an individual who is a citizen of such nation or by a legal entity which is organized or existing under the laws of such nation.)".

SEC. 3. (a) The Fishery Conservation and Management Act of 1976 (Public Law 94-265) is further amended by adding at the end thereof the following new section:

"SEC. 407. ANNUAL REPORT REGARDING FOREIGN INVESTMENT IN THE UNITED STATES FISHING INDUSTRY.

"(a) CONTENTS OF REPORT.—(1) Before March 1 of each year, the Secretary shall submit to Congress a report on foreign investment in the United States fishing industry during the immediately preceding calendar year. Such report shall include, but not be limited to, information regarding—

"(A) the nature and degree of such foreign investment;

"(B) the disposition of the fish processed by United States fishing enterprises in which there is foreign investment, including information regarding the type of products into which such fish were processed and where such fish and the products derived therefrom were marketed;

"(C) the effect of such foreign investment on the employment of citizens and nationals of the United States in the United States fishing industry, including but not limited to the degree to which U.S. citizens exercise management control over companies in which there is foreign investment; and

"(D) the effect on the United States balance of payments.

"(2) The Secretary shall include in each report required under paragraph (1)—

"(A) a current evaluation of the overall impact which foreign investment has had on the United States fishing industry;

"(B) an estimate of the future trends in such investment by industry and by geographic region; and

"(C) an opinion by the Secretary with respect to whether or not current or future foreign investment in the United States fishing industry is adversely affecting, or may adversely affect—

"(i) the carrying out of the purposes and policies of this Act;

"(ii) the financial condition of the United States fishing industry and related industries, including but not limited to fishing vessel construction and repair, marine supply, fish processing and fish processing equipment manufacture;

"(iii) the availability of domestic financing for industries identified in (ii);

"(iv) the competitive position of United States exports of fish and fish products in world markets; or

"(v) any other aspect of the national interest which the Secretary deems appropriate.

If the Secretary is of the opinion that there is, or may be, adverse impact as a result of foreign investment in the United States fishing industry, the Secretary shall include with the report his recommendations (including suggested legislation) for ameliorating such impact.

"(b) REGULATIONS.—(1) The Secretary shall prescribe such regulations as may be necessary and appropriate to carry out this section, including, but not limited to, regulations requiring any appropriate person who is subject to the jurisdiction of the United States to furnish any information which is determined by the Secretary to be necessary to carry out this section.

"(2) The Secretary of the Treasury shall provide to the Secretary such assistance (including such pertinent information as may be at the disposal of the Secretary of the Treasury) as the Secretary may request for purposes of carrying out this section.

"(3) Any information submitted to the Secretary by any person in compliance with any requirement under this subsection shall be confidential and shall not be disclosed except when required under court order. The Secretary shall, by regulation, prescribe such procedures as may be necessary to preserve such confidentiality, except that the Secretary may include in any report required to be made under this section any such information in any aggregate or summary form which does not directly or indirectly disclose the identity or business of any person who submits such statistics.

"(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.'

(b) Section 406 of such Act of 1976 is amended by inserting "other than section 407," immediately after "Act,".

THE EMERGENCE OF SOLAR ENERGY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 60 minutes.

Mr. DRINAN. Mr. Speaker, I am delighted to be able to announce to my colleagues that a major package of solar energy and energy conservation legislation will be introduced today by a large coalition of Congressmen and Senators. In the House, a total of nine legislative measures will be filed to promote and accelerate solar energy, renewable energy source and energy conservation technology and utilization. The bills will be similarly introduced in the Senate.

In all, 15 Members of Congress and 7 Senators have assisted in drafting and assembling this impressive energy package. However, in the days ahead I trust that many more Congressmen and Senators will be joining us in pushing for this very much needed campaign for—energy conservation and alternative energy sources.

It greatly pleases me to note, Mr. Speaker, that this solar and conservation package is not solely a product of the Congress. A unique coalition of consumer, business, environmental, and labor organizations worked to put the package together, and their assistance has proved to be invaluable. In the coming months, we in the Congress will continue to work with these groups in order to bring about the best possible solar power and energy conservation legislation. And I am hopeful that many others in the Congress and elsewhere will join us in this major effort.

Mr. Speaker, I would now like to take this opportunity to list those Members of Congress and Senators who have worked to put this energy package together:

MEMBERS OF CONGRESS

Jerome A. Ambro (New York).
Max Baucus (Montana).
Berkley Bedell (Iowa).
George E. Brown, Jr. (California).
Robert F. Drinan (Massachusetts).
Michael Harrington (Massachusetts).
James M. Jeffords (Vermont).
Joe Moakley (Massachusetts).

Ronald M. Mottl (Ohio).
Richard M. Ottinger (New York).
J. J. Pickle (Texas).
Frederick W. Richmond (New York).
Clarence D. Long (Maryland).
James L. Oberstar (Minnesota).
Stewart B. McKinney (Connecticut).

SENATORS

James Abourezk (South Dakota).
Edward W. Brooke (Massachusetts).
Clifford P. Case (New Jersey).
Gary Hart (Colorado).
Hubert H. Humphrey (Minnesota).
John H. Heinz, III (Pennsylvania).
Thomas J. McIntyre (New Hampshire).
Patrick J. Leahy (Vermont).

The numerous organizations which have worked on and endorsed the efforts of this coalition have been ably lead by Consumer Action Now, which has done much organizational work in moving this energy package forward. The organizations in the coalition include: American Association of Small Research Companies; American Institute of Architects; Environmental Action; The Environmental Policy Center; Environmentalists for Full Employment; Friends of the Earth; New Directions; Natural Resources Defense Council; Rural America; Sheet Metal Workers; Sierra Club; Urban Environment Conference; and United Auto Workers.

Mr. Speaker, we have banded together in his coalition because we believe that the 95th Congress is determined to beat the problem of our growing dependence on foreign oil. In order to accomplish our goal, an all-out commitment to energy conservation and the rapid adoption of renewable energy systems is vital. Although this solar and energy conservation package will not provide relief to this winter's problem, it can serve to insure that the future shortages such as those experienced in the last few months do not continue to reoccur.

The legislation which we will be introducing today will create incentives for the widespread use of conservation and renewable energy resources in homes, farms, industry and commerecial firms. It will not only impact on the private sector, but additionally, require that Federal buildings employ conservation and solar technologies to set an example for the Nation.

Mr. Speaker, while the Members who actually worked on the following legislative proposals will expand on their legislation in much greater depth, I would like to briefly list the contents in our solar power, renewable source and energy conservation package. The legislation introduced today includes:

A bill promoting the use of already developed solar energy and energy conservation technologies in Federal buildings;

A bill to promote the use of solar energy and energy conservation methods in farming practices, equipment and structures through USDA research, Farmers Home loans, Extension Service instruction and new national system of demonstration farms;

A bill to provide a tax rebate in the form of a credit for consumers, farmers, businesses, and industries to pay part of the cost of installing solar, geothermal, and wind energy systems and energy conservation measures;

A bill to provide direct grants and loans to homeowners, neighborhood and community groups, nonprofit organizations, and small businesses for the purchase and installation of solar power, renewable energy source and energy conservation equipment and measures;

A bill establishing an accelerated program of cooperation with less developed countries in data gathering, development, and commercialization of decentralized rural-oriented solar technologies, greatly expanding the role of American private industry;

A bill to encourage greater emphasis on the production and conservation of energy in developing countries;

A bill to give small business greater access to Federal research and demonstration funding for renewable energy by simplifying application procedures, and to provide funds for small businesses to begin manufacturing and marketing solar and energy conservation systems;

A bill to promote the installation of solar power and photovoltaic electric systems in Federal buildings; and

A resolution to bring about a feasibility study of using solar energy in connection with the heating, cooling and hot water systems or subsystems in the office buildings of the House of Representatives.

I would like to say at this time, Mr. Speaker, that this is an economic recovery package as well as an energy package. Energy conservation and renewable energy sources are very labor intensive. They will create a viable new industry and hundreds of thousands of new jobs for installers, plumbers, carpenters, and other construction workers as well as engineers, architects, and other professionals. The package will help existing small firms to grow, and it will give rise to many new businesses.

Just to indicate the magnitude of the possible affect on the economy which this package could have, I would like to cite the following figures. The solar energy industry envisioned here would have a proposed annual sales of $950 million by 1982. In addition, the Solar Industries Association estimates that if tax incentives and Government building programs are enacted, sales in the solar field could reach $24.5 billion by 1992. Therefore, we are not just proposing solutions to the energy problem but a significant stimulus to the economy as well.

PROVIDING INCENTIVES FOR THE INSTALLATION OF SOLAR POWER AND ENERGY CONSERVATION EQUIPMENT

Before turning over the floor to my colleagues I would like to discuss the legislation which I have prepared as part of the energy package discussed above. My bill, The Solar and Energy Conservation Commercialization Act, will provide major new incentives for the installation of solar, energy conservation, and other renewable source equipment and measures. It is being introduced in the Senate by Senator THOMAS J. MCINTYRE, who has aided me in the preparation of this legislation

I am hopeful that bills such as this will bring about a long awaited emergence of solar and other renewable sources on a widespread basis. For too long we have talked only of the potential of these new alternative sources, but it is now time to make them a reality. We have the technology, we have the need for energy, and we have the willingness of the public to look to solar and wind power as a major new energy provider. Therefore, let us begin.

The Solar and Energy Conservation Commercialization Act focuses in not just on solar and renewable sources but on energy conservation as well. The solution to our energy problems must include an accelerated effort in energy savings, because even with expanded energy supplies little progress will be made unless we can substantially cut down on consumption. For this reason the incentives which are included within my bill extend to both sides of the energy equation—both to new supplies and conservation.

Mr. Speaker, the need for quick action is upon us. The United States is presently importing approximately 42 percent of its oil supplies, expending over $32 billion on these petroleum imports. Without cutting down on our consumption and expanding our own sources of fuel, the United States risks grave foreign policy implications. With this kind of foreign dependence, the United States is all too vulnerable to the actions of the Arab States and others. There is little question then that from all these perspectives, solar power, renewable energy sources, and energy conservation add up to an important component of our national energy program.

SOLAR POWER

Mr. Speaker, in talking to my constituents about the potential for solar energy I am struck by the unanimity of feeling that the United States ought to push forward in this area just as quickly as possible. Energy from the sun is virtually inexhaustable and can be used without depleting our very limited energy resources. The Sun's rays cannot be embargoed, and it has never raised its prices. Increasingly, solar technology is available for commercial use, and the obstacles which stood in the way of fully implementing solar power are gradually falling by the wayside.

The most immediate application of solar power comes in the heating and cooling of buildings and homes. Solar energy is also ideally suited to heating water for residential and commercial use. Using systems which are already in existence, homes, offices, stores, and other buildings can derive anywhere from 30 to 90 percent of their energy needs from solar power. Much depends on the particular climate where the residence is located, but it should not be assumed that it is unusable in northern, colder climates. Indeed, even in the rainy Northwest and the cold Northeast solar power can often cut energy bills in half.

According to conservative estimates, Mr. Speaker, of the 60 million buildings to be constructed in the United States in the next 25 years, more than 40 million are viable, cost-effective candidates for solar systems. These estimates are

based on current technology, which means that in the future this 60-percent figure could rise substantially. Nevertheless, even with present technology a 60-percent installation rate would result in an annual savings of 720 million barrels of oil in 25 years. If all of these new buildings were "solarized" in that same time frame, the annual savings would be about 1.2 million barrels of oil.

While there can be little question of solar power's desirability, one of the biggest stumbling blocks has been its cost. Low technology solar installations have long been cost efficient, and now more advanced systems are becoming economical. Indeed, a recent study conducted by the Energy Research and Development Administration found solar heating to be as economical as electric heat already and predicted that it would be competitive with oil and gas within 5 years. The ERDA study went on to state that a solar system installed in a new home now would pay for itself through lower fuel costs within 15 years.

Mr. Speaker, the promise of solar energy is all too evident. We must now do all that we can to encourage the purchase and installation of commercially available solar systems. We are a long way from the time when 60 percent of all our dwellings will be installed with solar heating and cooling devices, in spite of the benefits which could accrue to homeowners, building owners, and the country's energy situation. For this reason, the Solar and Energy Conservation and Commercialization Act is necessary at this time.

ENERGY CONSERVATION

Mr. Speaker, 25 percent of our total energy consumption goes into heating, cooling, and hot water heating in the residential and commercial sector. In view of the energy inefficiency of most homes and buildings, this represents an area where an enormous potential exists for energy savings at a very low capital cost.

It is not surprising that we waste so much energy on heating and cooling. When fuel supplies were inexpensive, we erected buildings with oversized heating and cooling capacities, inefficient temperature regulations, and inadequate insulation. All of us have experienced at least once or twice the situation whereby an air conditioner is used to cool off an overheated building, and unufortunately, this type of occurrence is not rare.

Let me first key into the buildings of the commercial section, Mr. Speaker, to indicate the kind of energy conservation that could be brought about. It has been estimated that a 14-percent energy reduction could be attained almost immediately in the commercial sector just through good housekeeping practices. Then, if the management of the building were willing to modify the structure to incorporate good insulation and other energy conserving devices, another 30 percent in added efficiency is possible. Speaking from the standpoint of new buildings, 50- to 80-percent improvements in energy efficiency are feasible.

These approximations have been reinforced by actual conservation projects which have been undertaken in the United States. In a recent program which has been instituted at Ohio State University, 36- and 61-percent-consumption decreases were registered for electricity and natural gas use respectively. The University's retrofit program, which is simply an assessment and restructuring of an existing physical plant, paid for itself in less than 8 months. This is typical of the type of careful and deliberate energy conservation strategies which must be encouraged in the commercial sector as a whole if we are to bring about large scale energy savings throughout the country.

Mr. Speaker, the residential sector provides another opportunity for significant energy conservation advances. It has been estimated that fully 40 million American homes are inadequately insulated. Each day more are added to this number as Americans still have not fully been convinced of the need for good and sound home insulation. This certainly runs counter to our knowledge in this area, as better thermal insulation of buildings and residences can often cut heating and cooling requirements by as much as 40 to 50 percent.

Many members of the public are now beginning to insulate their residences and add those energy conserving devices which will save the United States a great amount of energy in the coming years. Those Americans have come to realize that ceiling insulation in a typical home costs only about $300 installed. More elaborate installations may cost more, but it is not uncommon for this type of investment to pay for itself in a matter of 2 to 3 years at current fuel costs. It is therefore my feeling that incentives on the part of the Federal Government to encourage homeowners and businessmen to insulate and add other energy saving devices to their homes and structures will be a very worthwhile investment for this country over the long term.

Mr. Speaker, I would now like to discuss the specific provisions of the legislation which I am introducing today. I believe that my bill could do a great deal to bring about the solutions which I have been discussing today.

THE SOLAR AND ENERGY CONSERVATION COMMERCIALIZATION ACT

Since the technology now exists to make solar power, renewable energy sources and energy conservation a practical alternative in many homes and businesses, I believe that the Federal Government should now provide incentives for the insulation of these energy systems. For this reason, Senator McINTYRE and myself have introduced the Solar and Energy Conservation Commercialization Act.

The bill encourages the purchase and installation of solar, renewable energy source and energy conservation equipment and measures by offering low-interest loans and grants to homeowners, neighborhood and community groups, nonprofit organizations, and small businesses. Although the energy equipment must be deemed qualified by the Federal Energy Administration in order to approved for the purposes of this act, there are many commercially available technologies to which grants and loans could easily be applied.

Just to illustrate the diversity of equipment which would be covered under my bill, Mr. Speaker, I would like to mention a few of the specifically included equipment. In the solar area, solar heating and cooling systems could be installed in residences and commercial buildings. Solar hot water systems, which are very economical in today's markets, could also be added. Under renewable source equipment, certain geothermal energy systems and wind energy devices could be approved by the FEA for utilization. In addition, many energy conservation measures and equipment would be eligible for funding under the terms of the act. Insulation, heat pumps, and devices or improvements to increase furnace efficiency would be among the many items which could be included in structures all across America.

Mr. Speaker, to better describe all of the differing grants and loans which are available under the Solar and Energy Conservation Commercialization Act, I have prepared the following outline of its provisions. Briefly, however, the bill offers low interest loans to homeowners, the loans covering 75 percent of the cost of purchase and installation of the equipment up to $4,000 for energy conservation and $10,000 for solar and renewable sources.

PROVISIONS OF THE SOLAR AND ENERGY CONSERVATION COMMERCIALIZATION ACT

[Introduced by Congressman Robert F. Drinan]

Recipient	Amounts available	Percentage of cost provided	Conditions
Grants:			
Homeowners	Solar, up to $1,500, conservation, up to $400	25 percent solar; 20 percent conservation	Income must be less than $30,000.
Neighborhood, community, and nonprofit groups.	solar, up to $6,000; conservation, up to $1,600	25 percent solar; 20 percent conservation	Where individual homeowners benefit in neighborhood groups, average income of participants must be $30,000 or less.
Loans:			
Homeowners	Solar, up to $10,000; conservation, up to $4,000	Covers up to 75 percent of cost	None.
Neighborhood, community and nonprofit groups.	Solar, up to $40,000; conservation, up to $16,000	Covers up to 85 percent of cost	Do.
Small business	Solar, up to $50,000; conservation, up to $25,000	Can cover full cost	Do.

Note: Department of Housing and Urban Development administers grants and loans for homeowners, neighborhood, community and nonprofit groups. Small Business Administration administers small business loans.

Grants are available to those whose incomes are less than $30,000 to cover 20-percent grants of up to $400 for conservation, and 25-percent grants for up to $1,500 for solar and renewable energy source installations.

The bill also makes financial incentives available in the form of loans and grants to neighborhood, community, and nonprofit groups. The terms are similar for homeowners, although greater amounts are available for larger projects.

For example, 25-percent grants of up to $6,000 are available for solar, while 20-percent grants of up to $1,600 for conservation may be given to grant recipients. For small business concerns, low-interest loans can cover the full cost of qualified energy insulations. These loans may be approved for up to $25,000 for energy conservation and up to $50,000 for solar and renewable energy sources.

The grants and loans under this bill will be administered for the most part by the Department of Housing and Urban Development. The Small Business Administration will administer low-interest loans for small businesses. Both of these agencies will cooperate with the Federal Energy Administration in insuring that the solar and energy conservation program fits into other existing Federal efforts. All three of these agencies will then report at year's end after the legislation has been enacted in terms of the status of the implementation of the act.

Mr. Speaker, I am delighted by the significant cooperation which has gone into the preparation of all of the various solar and energy conservation bills which will be part of our overall package. If our success in assembling this package is any indication, I am sure that many of these worthy bills will be passed in the 95th Congress. I would now like to defer to other Members of Congress with regard to their legislation and statements in this important area.

For the benefit of my colleagues, I am inserting the text of my Solar and Energy Conservation Commercialization Act. The text follows:

H.R. 3981

A bill to provide for incentives for the commercial application of solar energy, energy conservation, and renewable resource equipment and devices in homes, neighborhood and community structures, small businesses, and facilities owned or occupied by nonprofit organizations.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Solar and Energy Conservation Commercialization Act".

FINDINGS, POLICY, AND PURPOSE

SEC. 2. (a) FINDINGS.—The Congress hereby finds and declares that—

(1) new alternative energy sources and rigorous energy conservation steps are necessary to stem America's increasing dependence on foreign energy supplies;

(2) solar and other renewable energy sources may provide substantial amounts of heating, cooling, and other energy needs when implemented in the residential, commercial and industrial sectors;

(3) accelerated energy conservation efforts in homes, stores and buildings will bring about fast, cost-efficient and environmentally sound methods of energy savings in the near future in the United States; and

(4) rapid development of renewable energy sources and energy conservation practices can be facilitated by federal financial assistance in the form of grant programs and low interest loans.

(b) POLICY AND PURPOSE.—It is the policy and purpose of this Act—

(1) to foster and promote the commercialization and implementation of solar, energy conservation and other renewable energy sources;

(2) to provide federal financial assistance and commercialization incentives in the form of grant programs and low interest loans; and

(3) to speed the installation of new energy technology so as to reduce America's energy supply problems.

QUALIFIED SOLAR, RENEWABLE SOURCE AND ENERGY CONSERVATION MEASURES AND EQUIPMENT

SEC. 3. (a) The last unnumbered paragraph of section 2(a) of the National Housing Act is amended by inserting before the period at the end of clause (3) a comma and the following: "and such term includes any renewable resource energy measure which the Administrator of the Federal Energy Administration has approved pursuant to section 365 (e) of the Energy Policy and Conservation Act".

(b) Qualified measures and equipment under (a) of this section includes but are not limited to the following items:

1. Solar Equipment.
(A) solar heating and cooling systems.
(B) solar hot water systems.
(2) Renewable Source Equipment.
(A) geothermal energy systems.
(B) wind energy systems.
(3) Energy Conservation Measures and Equipment.
(A) insulation.
(B) heat pumps.
(C) devices or improvements to increase furnace efficiency.
(D) clock thermostats.

FINANCIAL ASSISTANCE FOR HOMEOWNERS

SEC. 4. (a) In order to carry out the purposes of this Act, the Secretary of Housing and Urban Development (hereinafter referred to as the "Secretary") is authorized to make grants and loans to individuals and families to assist them in purchasing and installing qualified solar, renewable source equipment in residential structures.

(b) Section 2 of the National Housing Act is amended by adding at the end thereof the following:

"(1) The Secretary is authorized, with respect to any commercial loan which is made to any individual whose gross income (when combined with that of such individual's spouse) does not exceed $30,000 per annum, to make grants for the purpose of encouraging the purchase and installation of qualified energy measures and equipment, in an amount not to exceed the lesser of $400 or 20 percent of the amount thereof, except that in the case of solar or renewable system loans, the maximum amount of the grant shall be the lesser of $1,500 or 25 percent of the amount of the loan. Such a grant shall be made to the borrower or to the commercial lender who shall, in accordance with such regulations as the Secretary may prescribe, apply the amount of the grant to reduce monthly payments required to amortize the loan."

(c) Section 2 (b) of such Act is amended by adding at the end thereof the following: "A loan made available by the Federal Government to finance the installation of a qualified energy system for a homeowner shall—

"(A) involve such amount not exceeding $4,000 as may be necessary to cover 75 percase of solar or renewable system loans, the stallation of such system, except that in the cent of the costs of the purchase and inamount shall not exceed $10,000; and

"(B) have a maturity not exceeding 20 years.".

(d) Where grants are made available to individual and family homeowners under (b) of this section, Federal loans as provided for in (c) of this section are not available to those same individual and family homeowners, except where special circumstances exist as certified by the Secretary.

FINANCIAL ASSISTANCE FOR NEIGHBORHOOD, COMMUNITY, AND NONPROFIT PROJECTS

SEC. 5. (a) The Secretary is authorized to make grants and loans to neighborhood, community, and nonprofit groups to assist them in purchasing and installing qualified solar, renewable source and energy conservation measures, and equipment in residential or community structures. Where such neighborhood, community, or nonprofit installations may significantly improve the overall cost efficiency or energy efficiency of solar, renewable or energy conservation equipment and measures, proposals for multi-structure units shall be given preference over single structure proposals.

(b) Section 2 of the National Housing Act is amended by adding at the end thereof the following:

"(j) The Secretary is authorized, with respect to any commercial loan which is made to neighborhood, community and nonprofit groups, to make grants for the purpose of encouraging the purchase and installation of qualified energy measures and equipment, in an amount not to exceed the lesser of $1,600 or 20 percent of the amount thereof, except that in the case of solar or renewable system loans, the maximum amount of the grant shall be the lesser of $6,000 or 25 percent of the amount of the loan. Such a grant shall be made to the borrower or to the commercial lender who shall, in accordance with such regulations as the Secretary may prescribe, apply the amount of the grant to reduce monthly payments required to amortize the loan. However, grants may only be made to neighborhood groups (where individual homeowners will benefit) when the average gross income for each individual and his spouse participating in the project does not exceed $30,000 per annum."

(c) Section 2 (b) of such Act is amended by adding at the end thereof the following:

"A loan made available by the Federal Government to finance the installation of a qualified energy system for a neighborhood, community or nonprofit group shall—

"(A) involve such amount not exceeding $16,000 as may be necessary to cover 85 percent of the costs of the purchase and installation of such system, except that in the case of solar or renewable systems loans, the amount shall not exceed $40,000; and

"(B) have a maturity not exceeding 30 years.".

(d) Where grants are made available to neighborhood, community or nonprofit groups under (b) of this section, Federal loans as provided for in (c) of this section are not available to those same groups, except where special circumstances exist as certified by the Secretary.

(e) For the purpose of this section—

(1) a neighborhood group is defined as a number of individual or family homeowners assembler together for the purpose of purchasing and installing qualified energy systems which may jointly benefit the homes or structures of each; and

(2) a community group is defined as a number of individuals assembled together for the purpose of purchasing and installing qualified energy systems in structures belonging to a municipality, community association, or similar public organization.

FINANCIAL ASSISTANCE FOR SMALL BUSINESS

SEC. 6. (a) The Administrator of the Small Business Administration is authorized to make loans to small businesses to assist them

in purchasing and installing qualified solar, renewable source and energy conservation measures and equipment in structures owned or operated by small businesses.

(b) Section 7(a) of the Small Business Act is amended by inserting after the first sentence thereof the following new sentence: "Loans under this subsection may include loans to finance the purchase and installation of solar and renewable energy systems and energy conserving improvements, as such terms are defined in Section 2 of the National Housing Act, except that the maximum amount of a loan to finance the acquisition of energy conservation measures may not exceed $25,000, and the maximum amount of the loan for solar and renewable energy systems may not exceed $50,000.".

INTEREST ON LOANS

SEC. 7. Loans made under this Act shall bear interest at a rate equal to the average market yield (computed as of the end of the calendar month preceding the month in which the loan is made) on all marketable interest-bearing obligations of the United States then forming a part of the public debt (with such average yield, if not a multiple of one-eighth of 1 percent, being adjusted to the nearest such multiple), plus one-half of 1 percent for administrative costs.

INTERAGENCY COOPERATION AND APPLICATION OF THE ACT

SEC. 8. (a) In carrying out their functions under this Act, the Secretary of Housing and Urban Development and the Administrator of the Small Business Administration shall cooperate and regularly consult with the Administrator of the Federal Energy Administration. Wherever possible, the purposes and provisions of this Act shall be coordinated with other ongoing federal energy programs.

(b) The Secretary of Housing and Urban Development, the Administrator of the Small Business Administration and the Administrator of the Federal Energy Administration shall consult with the Commission on Federal Paperwork in order to insure that administrative requirements and costs imposed on the Federal Government and on the beneficiaries of the programs carried out under this Act are minimized. Special care shall be exercised to reduce administrative delays and difficulties in applying for grants and loans made available under this Act.

ANNUAL REPORT

SEC. 9. Not later than March 1 of each year, the Secretary of Housing and Urban Development, the Administrator of the Small Business Administration and the Administrator of the Federal Energy Administration shall jointly transmit to the President and the Congress a report on the activities carried out under this Act during the preceding fiscal year. Such report shall include—

(1) a summary of the actions taken to implement the provisions of this Act;

(2) a summary of existing or anticipated problems with respect to further implementation of the provisions of this Act;

(3) recommendations for additional legislation, if any, which is deemed necessary; and

(4) any other matters which the Secretary and the Administrators deem appropriate.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 10. There are authorized to be appropriated not to exceed $100,000,000 for the fiscal year ending September 30, 1978, and $200,000,000 for each fiscal year thereafter prior to the fiscal year ending September 30, 1981, except that not less than $35,000,000 of any amount so appropriated shall be available only for loans under the second sentence of section 7 of the Small Business Act.

SOLAR ENERGY FOR HOUSE OFFICE BUILDINGS

Mr. PICKLE. Mr. Speaker, I am very pleased to offer again a House resolution to study the feasibility of using solar energy in the office buildings occupied by the Members and staff of the U.S. House of Representatives.

When I first presented this idea in the last Congress it was supported by over 100 Members. Since that time, we have been able to look into the matter further and have discussed and I think worked out with the Architect of the Capitol and the chief engineer a program which we hope will enable us to begin using solar energy in at least one building here on Capitol Hill in the near future.

The message of this effort, and if its enthusiastic response is this: solar energy is here today and here to stay. While some forms of solar energy will not be ready for common use for years, the use of solar energy to provide hot water and heating and cooling of buildings can begin now.

This is not a demonstration project. If it proves feasible to use solar energy in any of the House office buildings, it will be because it is practical and, over the life of the building, cost effective to do so.

I hope through this effort to save the taxpayer money over the long run. And I hope, by actively engaging in this effort in our own back yard, to encourage others to take a new and hopeful look at solar energy.

The bill, introduced earlier this year as House Resolution 81, has been substantialy rewritten and is being reintroduced today. Congressmen OTTINGER, ROSE, and MCCORMACK have joined me in this effort as well as the other members of this very diverse solar group. I am grateful for their support. I hope that many of my colleagues will want to join me in this effort.

The text of the resolution follows:

H. RES. 322

Whereas, the House of Representatives finds that in the construction or renovation of buildings, the cost of energy consumed over the life of such buildings must be considered as well as the initial cost of such construction or renovation; and

Whereas, the House of Representatives finds that the use of current solar energy technology can assist the nation in meeting its needs for energy for hot water, heating, and cooling systems; and

Whereas, the House of Representatives deems it of benefit to the nation to promote the use of solar energy; and

Whereas, the House of Representatives has a responsibility to promote such use in the national interest; and

Whereas, the House of Representatives finds that using solar energy in buildings occupied by its Members or staff may further these objectives: Now, therefore, be it

Resolved, That (a) not later than one year after the date of the adoption of this resolution, the Architect of the Capitol (hereinafter in this resolution referred to as the "Architect") shall—

(1) conduct a feasibility study of using solar energy in connection with the heating, cooling and hot water systems or subsystems of—

(A) the House Office Building Annex No. 2;

(B) the Cannon, Longworth, and Rayburn House Office Buildings and related structures; and

(C) other house office building annexes and related structures; and

(2) prepare and transmit a report to the House of Representatives.

(b) In conducting the study required by subsection (a)(1), the Architect shall consider and make findings with respect to—

(1) the costs, structural requirements, and time requirements of installing solar energy equipment;

(2) the costs of operation, including the cost of energy consumed over the life of each such building or structure, after such equipment is installed; and

(3) any other factors the Architect considers relevant to such installation or operation.

Such findings shall be made by the Architect for each separate system or subsystem described in subsection (a)(1) within each separate House office building and for each combination of such systems or subsystems within each such building or combination of such buildings.

(c) The reports required by subsection (a)(2) shall include the findings made by the Architect under subsection (b) and his conclusions and recommendations concerning the practicability and desirability of implementing, separately or in combination, any of the utilizations studied by the Architect under this resolution.

SEC. 2. The Architect may enter into contracts to carry out the study required by this resolution.

SEC. 3. There is hereby authorized to be appropriated for this study funds not to exceed $50,000 under the appropriation heading "Capitol Power Plant", to be expended by the Architect of the Capitol under the direction of the House Office Building Commission.

SOLAR GROUP

The belief that it is time to move solar energy from the science fair to the industrial sector has brought together today an unprecedented group of Representatives and Senators. We hold a wide range of political views and have often as not opposed each other on many issues. But we have found that we all feel solar energy is good for the Nation and solar energy is ready to move.

I helped sponsor the original Solar Energy Research, Development and Demonstration Act in the 93d Congress. It was a needed and timely bill. And it was a successful bill. It is the success of that effort, headed by our colleague the Honorable MIKE MCCORMACK, which has brought us together to take some forms of solar energy down another step of the road.

Another important focal point of much of the legislation being introduced today is energy conservation. We are all realizing that our days of energy overabundance are now over. To minimize personal suffering and painful economic dislocation in the years ahead we are going to have to make better use of the energy we have—no matter what form it comes in.

I am proud to join with all the other Members introducing energy legislation today. Needless to say, there are some areas of disagreement, and there will be more as consideration of these measures proceeds. We all recognize there will be budgetary problems. We face other pressing national needs besides energy which we must budget for, and we may not be able to move as quickly as we would like while our deficits are soaring.

Another factor which we must keep in mind is that solar and other renewable energy sources are not the only forms of energy we must consider. Even with an all-out effort it will take a while for new energy forms like solar to become predominant. Solar energy in its present forms is not even a viable alter-

native for all parts of the country. North, East, South, and West will be basically dependent on petroleum for years to come and will have to continue current efforts—and begin new ones—to resupply our basic fossil fuels. Nuclear energy, too, will have a role to fill in the next decades.

Because the predominant solar payoff is not immediate, however, is no reason not to do all we can as quickly as prudence allows.

We should keep in mind, moreover, that by encouraging a solar energy market and industry we will be directly confronting one of our most critical national problems—unemployment. A solar energy industry not only provides new jobs, it provides meaningful jobs with a definite future in this country. That is a bargain that is well worth taking a long look at.

Each Member has spent a great deal of time and effort in working out legislation to further solar energy in almost every walk of American life. Our staffs have met together for long hours, so that each of us has benefited from the insights of the others. I have not sponsored or cosponsored all the bills being presented today because I have reservations about some of the costs and some of the provisions. But I say without reservation that each bill being offered today deserves a full hearing from this body. This effort is vital if we are to begin to turn the corner of our energy supply shortage.

FEDERAL BUILDINGS BILL

While aiding the use of solar energy in the private sector, the Federal Government should conform as quickly as possible to energy efficiency standards and technologies in its own realm. President Carter has turned down the thermostat in the Oval Office, and in every Federal building around the country we should follow suit, and we should follow through. We should make every Federal building as energy efficient as possible, and we should try to do so in a reasonable time frame.

The responsibility we have to move ahead ourselves is why I introduced my bill to examine buildings here on Capitol Hill to see if they could use solar energy. And that is why I am pleased to join with Congressmen DICK OTTINGER and MIKE MCCORMACK in their bill to promote energy conservation and use on renewable energy sources in Federal buildings all across the country.

Mr. Speaker, with pleasure I yield to Congressman OTTINGER to explain the act to promote the use of energy conservation, solar energy, and total energy systems in Federal buildings.

Mr. OTTINGER. Thank you, Mr. PICKLE.

The introduction today before the 95th Congress of this bill to promote the use of conservation measures and solar energy in Federal buildings is especially important to me. It is well time to take solar energy out of the research posture and get existing technology into use. The Federal Government can and should lead the way with application in its own thousands of buildings—and in the process create a mass market for solar equipment that can dramatically lower costs.

Not only is the aim of this bill, the promotion of conservation and solar energy, a goal that has consumed a great deal of my energy during the 94th Congress, but this particular Federal buildings bill we have today is the culmination and contribution of ideas brought forth in past proposals, mine and Congressman MIKE MCCORMACK'S, as well as work done within several Federal agencies.

It is time for the Federal Government to lead the country forward by showing how to conserve and use energy in the buildings under its own housekeeping responsibilities. Various Federal agencies have sponsored studies to suggest how this can be done, bills have been introduced and testimony presented to show that parts of the process are in place, but there is no overall mandate or direction. Now with this bill we introduce today we have the mechanism to put into practice what so many of us have urged in the past and support today.

A brief background of the ramifications of this Federal buildings bill shows the potential impact on the country as a whole.

The Federal Government now owns or leases approximately 486,000 buildings or approximately 2.7 billion square feet. Of this, the Department of Defense owns 81 percent and the GSA and the Veterans' Administration control the major part of the rest. The U.S. Postal Service has 33,000 facilities representing 185 million square feet.

Just a preliminary analysis by DOD has determined that of the 2.1 billion square feet, approximately 30 percent has an immediately recognizable potential for refitting with solar equipment. Approximately 85 percent of the buildings GAS is responsible for will be in operation in the year 2000 and are therefore likely candidates for refitting for conservation and solar energy technology. This then is just a beginning overview of the potential within the Federal purview.

The Federal buildings bill we introduce today calls for an energy audit of all Federal buildings so that we can determine which buildings are the most energy demanding and which would be the most advantageous candidates for initial solar technology applications and significant conservation measures.

The energy consumed throughout the whole country for heating and cooling of buildings accounts for 25 percent of our national energy use and more than 30 percent of our use of petroleum. All our buildings require an evaluation of their specific energy demands and this energy audit of Federal buildings will present a technique that can be replicated in the private sector.

A second ramification of our bill will be the estalishment of an economic evaluation of solar and conservation measures over the life of the building. Refitting an existing building adds immediate first cost demands and new building budgets must accept higher first costs for energy equipment and design; these costs must be balanced against cost savings achievable through installation of solar equipment and conservation practices.

In July 1976, the GAO presented a report calling for the refinement of life-cycle costing analysis and its application for Federal construction projects. Indeed, many agencies of the Government are now involved in some form of life-cycle cost evaluations. But there is little coordination.

Both GSA and DOD have used life-cycle costs in one form or another. DOD, according to the GAO report has used elements of life-cycle cost techniques in the procurement of buildings. The Naval Facilities Engineering Command has prepared test computer simulation programs for life-cycle costing. And GSA's handbook, "Criteria for a Federal Office Building," contains requirements that architect/engineer submit life-cycle costs for the design of heating, refrigeration, and electrical facilities. However, according to GAO, these requirements have not generally been implemented due to the lack of a nationally understood methodology.

The National Bureau of Standards has been working on the development of a rational and scientific approach to life-cycle costs. And finally, OMB in its Federal Procurement Office is working on regulations and formulas directed toward the revisions of Federal procurement regulations to require agencies to consider the architect/engineer's ability to produce life-cycle cost estimates and analysis.

Although life-cycle cost procedures are in general rather straightforward in the aim to evaluate higher first cost against eventual payoff from reduced or zero fuel costs, there are several factors to be considered in a truly sophisticated formula.

These factors can include consideration of discount rates, rates of inflation and tax rates, as well as the life expectancy of equipment for both capital and maintenance costs. Also, hard to quantify components are the benefits accrued to the country by the saving of natural resources through conservation and the development of the widespread use of solar energy.

The Federal buildings bill specifies that the Administrator of FEA will, in consultation with OMB, NBS, ERDA and HUD, establish a practical and effective method of estimating and comparing life-cycle capital and operating costs for residential, commercial, and industrial buildings, including life-cycle fuel and energy requirements for such buildings. The bill also requires that after the life-cycle cost criteria have been developed that agencies use these estimates as the criterion for making awards in their design and construction proposals. The line iteming of energy costs in the agency budget will allow Congress to exercise oversight of this process.

To have the Federal Government take the lead in coordinating a life-cycle cost methodology is another evidence of how this Federal housekeeping can be effective for the country as a whole.

A third ramification of the bill, other than establishing energy audits, life-cycle

costing formulas, will be a significant strengthening of the developing solar energy industry. Right now there are many manufacturers of solar equipment but their further development and market assurance is tentative as with any new industry. If, as stated in the bill, GSA could add solar equipment to the Federal Supply Service, there would be a form of guaranteed market for solar technology which could result in the reduction of prices for the country as a whole as mass production develops.

Further national benefits resulting from this bill apply to all aspects of the use and development of conservation and solar energy measures, most importantly in increased jobs, the saving of nonrenewable energy supplies and the reduction of money spent on energy supplies.

Energy conservation and the use of solar energy can have a significant impact on unemployment. A study done for the Sheet Metal Workers' International by the Stanford Research Institute estimated that one-fourth of every dollar invested in solar heating and cooling will go to the labor costs of installations. In addition, there will be many jobs created fabricating the collectors, storage equipment, ducting, and allied equipment for solar installations. A Federal program to promote energy conservation and solar energy use will help put many Americans back to work.

During hearings on a previous bill, GSA representatives stated that if 50 percent of all GSA operated buildings could be converted to solar heating it would save approximately 8 million barrels of oil annually. And, according to an FEA report, the stimulation of solar energy commercialization by Federal Government programs could result in the savings of the equivalent of 233,000 barrels of oil a day by the year 1985.

In terms of money saved, we have a statement by Nicholas Panuzio, Commissioner of Public Building Service of GSA, in the February issue of Government Executive magazine, that a retrofit with solar energy of half of the most energy intensive space in GSA buildings to be operative by the year 2000 would cost $140 million, but the savings would be $20 million a year. As Roger Sant, the former Administrator of Conservation in FEA, has so often stated, it costs about half as much to save a barrel of oil as it does to produce it.

Thus we can, as I am sure you all recognize, only gain from the provisions of this bill. By leading the country in energy conservation and solar energy use, the Federal Government takes on a mantle that has been long awaited.

I am tremendously enthusiastic about the whole package of legislation we are introducing today. I am proud of the support of the labor unions, environmental groups, and public interest organizations. And I am proud of my colleagues who have joined together not only today but during the past months as these bills have evolved. I think the administration and the country will recognize and support these positive efforts of the 95th Congress as we step boldly with the sun lighting our path.

The text of the Federal buildings bill follows:

H.R. 3982

A bill to promote the use of energy conservation, solar energy, and total energy systems in Federal buildings

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS

SECTION 1. The Congress finds that—

(1) there is an urgent need to promote the design, construction, and operation of buildings to conserve and make more efficient use of fuels and energy;

(2) a shift from dependence on non-renewable to renewable energy sources would have a beneficial effect on the Nation's overall energy supply;

(3) programs for energy conservation in buildings, along with the use of renewable energy sources, would stimulate industries and create new job opportunities for supplying and servicing new or improved energy-conserving and energy-supplying systems and equipment;

(4) in the construction or renovation of buildings, the cost of energy consumed over the life of such buildings must be considered as well as the initial cost of such construction or renovation; and

(5) the Federal Government, being the largest energy consumer in the United States, should be in the forefront in implementing energy conservation measures along with the use of renewable energy sources.

POLICY

SEC. 2. It is the policy of the United States that the Federal Government has the opportunity and responsibility, with the participation of industry, to further develop, demonstrate, and promote the use of energy conservation, solar heating and cooling, and total energy systems in Federal buildings.

PURPOSE

SEC. 3. It is therefore the purpose of this Act to promote the use of commonly accepted methods to establish and compare the life cycle costs of operating residential, commercial, and industrial buildings, and the life cycle fuel and energy requirements of such buildings, with and without special features for energy conservation, the use of solar heating and cooling, and the use of total energy systems.

DEFINITIONS

SEC. 4. For purposes of this Act—

(1) the term "Administrator" means the Administrator of the Federal Energy Administration;

(2) the term "life cycle cost" means the total costs of owning, operating, and maintaining a building over its economic life, determined on the basis of a systematic evaluation and comparison of alternative building systems and including considerations of projected inflation and discount rates; and a building is "life cycle cost effective" if it embodies the alternative building design or system (or both) which minimizes the building's total life cycle cost;

(3) the term "energy audit" means a determination of the per square foot energy demand, either actual or calculated, of existing buildings, and of the physical characteristics of such buildings including but not limited to their age, use, construction, and retrofit potential;

(4) the term "Federal building" means any building, structure, or facility, or part thereof, which is constructed, renovated, or leased specifically for use by the United States or by an agency or agencies thereof; and

(5) the term "existing Federal building" means any Federal building for the construction, renovation, or leasing of which funds have been appropriated or otherwise actually made available prior to the date of the enactment of this Act, and the term "new Federal building" means any other Federal building; except that a building shall be considered a "new Federal building" even though funds for its construction, renovation, or leasing have been made available prior to that date if (A) its construction, renovation, or leasing has not been completed prior to that date, and (B) the Administrator determines that the plans for such construction, renovation, or leasing can still feasibly be modified to take into account the provisions of this Act relating to new Federal buildings.

ESTABLISHMENT AND USE OF LIFE CYCLE COST METHODS

SEC. 5. (a) The Administrator, in consultation with the Director of the Office of Management and Budget, the National Bureau of Standards, the Administrator of the Energy Research and Development Administration, and the Secretary of Housing and Urban Development, shall establish a practical and effective method for estimating and comparing life cycle capital and operating costs for residential, commercial, and industrial buildings, including the life cycle fuel and energy requirements for such buildings.

(b) All new Federal buildings shall be life cycle cost effective as determined in accordance with the methods established under subsection (a). In the procurement of new Federal buildings awards shall be made on the basis of life cycle cost rather than first cost and the bidder shall demonstrate that he has considered the use of solar heating and cooling.

(c) In addition, the Administrator shall take such actions as may be necessary or appropriate to promote to the maximum extent possible the use and acceptance of such methods in the construction and renovation of non-Federal public buildings and in the construction and renovation of other buildings, structures, and facilities in all segments of the economy.

ENERGY PERFORMANCE TARGETS FOR EXISTING BUILDINGS

SEC. 6. In addition to establishing methods for estimating and comparing life cycle costs under section 5, the Administrator, in consultation with the Administrator of the Energy Research and Development Administration, the Secretary of Housing and Urban Development, and the Director of the Office of Management and Budget, shall establish energy performance targets for existing buildings, structures, and facilities, and shall take such actions as may be necessary or appropriate to promote to the maximum extent feasible compliance with such targets by all existing Federal buildings within the United States. The performance targets established under the preceding sentence shall be compatible with any new building performance standards adopted or developed by the Secretary of Housing and Urban Development.

ENERGY AUDITS AND RETROFITTING OF EXISTING FEDERAL BUILDINGS

SEC. 7. (a) As soon as possible after the date of the enactment of this Act, each Federal agency shall conduct an energy audit of all existing Federal buildings under its jurisdiction, occupancy, or control which contain 30,000 or more square feet, and shall furnish the results of such audit to the Administrator. The Administrator shall submit to the Congress a preliminary report of the energy audits conducted under the preceding sentence within 6 months after the date of the enactment of this Act, and a final report on such audits within 2 years after such date.

(b) (1) Each Federal agency shall, in accordance with this subsection, select from the energy audit of existing Federal buildings under its jurisdiction, occupancy, or

control appropriate buildings for retrofit measures to improve their energy efficiency in general and their life cycle cost effectiveness in particular. Such measures shall include, without being limited to, energy conservation measures and measures involving solar technology.

(2) At least 1 percent of the total gross square footage contained in all existing Federal buildings under the jurisdiction, occupancy, or control of any Federal agency shall be retrofitted by such agency under paragraph (1) during the first year after the date of the enactment of this Act; at least an additional 2 percent of such total gross square footage shall be so retrofitted during the second year after such date; and an additional percentage of such total gross square footage equal to at least 1 percentage point higher than the percentage applicable under this paragraph in the preceding year shall be so retrofitted during each year after the second such year, with a view to achieving full compliance with paragraph (3) by the time specified therein.

(3) By no later than January 1, 1990, all existing Federal buildings which are under the jurisdiction, occupancy, or control of any Federal agency shall have been the subject of such retrofit measures under paragraph (1) as will assure their maximum possible life cycle cost effectiveness.

ENERGY PREFERENCE FOR LEASED BUILDINGS

SEC. 8. Each Federal agency, in leasing buildings for its own use or the use of any other Federal agency, shall give an appropriate preference to buildings having a high degree of life cycle cost effectiveness.

BUDGET TREATMENT OF ENERGY ITEMS BY FEDERAL AGENCIES

SEC. 9. Each Federal agency, in the preparation and submission of its budget requests for any fiscal year, shall specifically set forth (and identify in a separate line item or items) the funds being requested for retrofit measures to be undertaken in accordance with section 7(b), and the portion of any other funds being requested which represents the initial costs of construction or renovation attributable to capital equipment for energy conservation or for the utilization of solar energy.

FEDERAL SUPPLY SERVICE

SEC. 10. In order to facilitate the purchase by other Federal agencies of equipment for energy conservation and for the utilization of solar energy and total energy systems, the Administrator of the General Services Administration shall at all times include such equipment in the Federal Supply Service.

REPORTS

SEC. 11. Each Federal agency shall periodically furnish the Administrator with full and complete information on its activities under this Act, and the Administrator shall annually submit to the Congress a comprehensive report on all activities under this Act and on the progress being made toward achievement of the objectives of this Act.

TRANSFER OF FUNCTIONS

SEC. 12. Within sixty days after the effective date of any law creating a Federal Department of Energy or its equivalent (or within sixty days after the enactment of this Act if the effective date of such law occurs prior to the enactment of this Act), the functions vested in the Administrator of the Federal Energy Administration under this Act and any funds which may have been appropriated pursuant to section 13 of this Act, to the extent necessary or appropriate, may, in accordance with regulations prescribed by the Office of Management and Budget, be transferred to and vested in such Department.

AUTHORIZATION OF APPROPRIATIONS

SEC. 13. There are authorized to be appropriated to the Administrator such sums, not exceeding $_____ in the aggregate, as may be necessary to enable him to perform the functions vested in him under this Act; and there are also authorized to be appropriated any amounts otherwise required to carry out this Act.

Mr. JEFFORDS. Mr. Speaker, the two bills I am introducing today, with Congressmen BINGHAM, HARRINGTON, and BEDELL from International Relations, and GEORGE BROWN from Science and Technology, which were also worked on by the staffs of Senators CASE and BUMPERS, provide a way to develop mass markets for simple nonconventional energy technologies throughout the rural developing world. The international section of this package establishes a form of synergy which is rare in our foreign policy today. It will allow the United States to show true friendship with the developing nations by providing technologies which can greatly improve their quality of life.

Also this cooperative program will be a boon for American industry, which needs assured mass markets in order to make investment decisions and automate production lines. This will inevitably sink costs to a fraction of present solar technologies. The range of applications in the less developed world is nearly unlimited. There is no other area where cooperative programs can improve our national image in the developing countries as in the transfer of these appropriate energy technologies. North-South discussions have been heading on an unproductive vituperative track recently. As exporters of energy technologies and in close cooperation with those areas of the world which will adapt our technologies to local needs, we can move the North-South relationship into more positive dimensions.

The effect of this transfer of technologies can be dramatic. For example, very small wind machines now being developed by American manufacturers can change the face of much of the Sahel region of Africa by pumping the water up from shallow water tables and irrigating the desert.

Also, with the development of mass-produced photovoltaic cells, we can bring about dramatic changes in educational methods in the LDC's. Educational techniques whereby solar-powered schools with a TV linkup to communications satellites can bring the local version of Sesame Street to villagers across the tropics at relatively little cost.

Further, the cooperative programs we are mandating would go a long way toward helping ease the financial burdens of the LDC's who are so dependent on high-priced imported oil giving us an important initiative in foreign policy.

The bills provide $15 million to AID and ERDA in fiscal year 1978 to embark on such a program.

Herewith is the text of the two bills:

H.R. 3980

A bill to amend the Federal Nonnuclear Energy Research and Development Act of 1974 to provide for cooperative programs with less developed countries for the development of unconventional energy technologies.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal Nonnuclear Energy Research and Development Act of 1974 is amended by adding at the end thereof the following new section:

"COOPERATION WITH LESS DEVELOPED COUNTRIES IN DEVELOPING UNCONVENTIONAL ENERGY TECHNOLOGIES

"SEC. 19. (a) The purposes of this section are to further the objectives of this Act by—

"(1) strengthen the analytical and energy planning capabilities of developing countries and broadening their energy information base;

"(2) encourage the development of technologies for tapping indigenous, especially renewable, energy resources in the less developed countries that will also have application in the United States;

"(3) promote consideration of renewable resource, decentralized energy technologies for rural and community use in developing countries and the United States as an alternative to central power systems using nuclear or fossil fuel;

"(4) stimulate commercialization of small-scale power systems by United States private industry, to the mutual benefit of the United States and the developing countries;

"(5) develop manufacturing capabilities in less developed countries in alternative power systems;

"(6) reduce the dependence of the United States on importation of crude oil and the refined product thereof from countries which embargoed the United States from these commodities in 1973; and

"(7) improve end-use efficiency of existing energy technologies in order to enhance conservation.

"(b)(1) In furtherance of the purposes of this section and as part of the comprehensive program in research, development, and demonstration required by this Act, the Administrator shall cooperate with less developed countries in the development and utilization of unconventional, nonnuclear energy technologies. Emphasis shall be placed on the earliest practicable development and utilization of energy technologies which are environmentally acceptable, require minimal capital investment, are appropriate for decentralized and rural applications, are transferable from one region of the world to another, are most acceptable to the sociocultural groups which will utilize them, are simple and inexpensive to utilize, and are most susceptible to the development of a mass market and to the early development of American and foreign manufacturing industries.

"(2) Projects supported under this subsection shall include, but not be limited to, irrigation projects, photovoltaic applications, wind applications from one to three hundred kilowatts, biomass projects, solar-thermal applications, and simple total energy systems. Selected projects shall be earmarked for early design and demonstration throughout the less developed world as the results of the studies conducted under subsection (c) become available, except that any projects which are determined to have a reasonable chance of success shall be initiated as soon as possible, regardless of the state of progress of the studies.

"(3) Cooperative programs conducted under this subsection shall involve analysis of energy needs; identification of research and development priorities; market research; collaborative research and development; field testing, demonstration, and adaptation; pilot

projects; commercialization; acquisition and dissemination of information; and development of appropriate institutional networks.

"(4) In order to facilitate transfers of unconventional nonnuclear energy technology to less developed countries, programs conducted under this subsection shall include exchanges, arranged in cooperation with the Agency for International Development, of scientists and other technical personnel. Such exchanges shall include regular consultative visits by employees or contractors of the Energy Research and Development Administration to missions operated by the Agency for International Development. In addition, workshops on the application of energy technology and on the design of pilot plants shall be conducted on the local level in developing countries.

"(c)(1) In furtherance of the purposes of this section, the Administrator is authorized to carry out studies, in cooperation with the Agency for International Development, to identify the energy needs, uses, and resources which exist in various countries and regions of the world. The goals of such studies shall be to identify ways to increase productivity, increase the standard of living, substitute unconventional energy sources for fossil and nuclear fuel, alleviate migration to urban areas and encourage migration to rural areas, and otherwise further the purposes of this section.

"(2) The immediate objective of the studies conducted under this subsection is the establishment of an information system which permits ready transfer among similar regions of the world of information relating to the rural, decentralized applications of unconventional, nonnuclear energy technologies, with particular emphasis on transfers of information applicable to the most impoverished areas. Accordingly, the studies should be designed and conducted so that the information obtained has applicability to all major climatic and resource regions of the world.

"(3) Studies carried out under this subsection shall evaluate the energy resources available to meet energy needs in various countries and regions, including such resources as insulation, wind data, and biomass waste materials. In addition, such studies shall identify any cultural factors which would favor the use of some energy systems over others by various local population groups, and shall recommend which energy technologies seem most appropriate for the various physical, cultural, and human environments of the world.

"(4) Survey teams involved in studies conducted under this subsection should include United States and foreign representatives from both the public and private sector. Representatives of industry should be included on such teams in order to facilitate early utilization of the resulting information and recommendations by industry for the research, demonstration, and commercialization phases of projects involving unconventional, nonnuclear energy technologies.

"(5) The results of the studies conducted under this subsection shall be reported to the Congress by July 1, 1978. Such report shall identify the most promising energy systems and technologies available for cooperative projects and shall recommend modifications in the overall United States energy plan in order to incorporate the findings of the studies conducted under this subsection into our national planning processes. The comprehensive plan for energy research, development, and demonstration developed under section 6(a) shall be revised accordingly.".

SEC. 2. For purposes of carrying out section 19 of the Federal Nonnuclear Energy Research and Development Act of 1974, as added by the first section of this Act, there is authorized to be appropriated to the Administrator of Energy Research and Development for the fiscal year ending September 30, 1978, $5,000,000.

H.R. 3979

A bill to amend the Foreign Assistance Act of 1961 to encourage greater emphasis on the production and conservation of energy in developing countries through the development and utilization of unconventional energy technologies

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 1 of part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC 117. Unconventional Energy Technologies.—(a) The purposes of this section are to—

"(1) strengthen the analytical and energy planning capabilities of developing countries and broadening their energy information base;

"(2) encourage the development of technologies for tapping indigenous, especially renewable, energy resources in the less developed countries that will also have application in the United States;

"(3) promote consideration of renewable resource, decentralized energy technologies for rural and community use in developing countries and the United States as an alternative to central power systems using nuclear or fossil fuel;

"(4) stimulate commercialization of small-scale power systems by United States private industry, to the mutual benefit of the United States and the developing countries;

"(5) develop manufacturing capabilities in less developed countries in alternative power systems;

"(6) reduce the dependence of the United States on importation of crude oil and the refined product thereof from countries which embargoed the United States from these commodities in 1973; and

"(7) improve end-use efficiency of existing energy technologies in order to enhance conservation.

"(b)(1) In order to alleviate energy problems through the development and utilization of unconventional energy technologies and to otherwise carry out the purposes of this section, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for cooperative programs with developing countries in energy production and conservation. The emphasis of these programs shall be on the earliest practicable development and utilization of energy technologies which are environmentally acceptable, require minimal capital investment, are appropriate for decentralized and rural applications, are transferable from one region of the world to another, are most acceptable to the sociocultural groups which will utilize them, are simple and inexpensive to utilize, and are most susceptible to the development of a mass market and to the early development of American and foreign manufacturing industries.

"(2) Projects supported under this subsection shall include, but not be limited to, irrigation projects, photovoltaic applications, wind applications from one to three hundred kilowatts, biomass projects, solar-thermal applications, and simple total energy systems. Selected projects shall be earmarked for early design and demonstration throughout the less developed world as the results of the studies conducted under subsection (c) become available, except that any projects which are determined to have a reasonable chance of success shall be initiated as soon as possible, regardless of the state of progress of the studies.

"(3) Cooperative programs conducted under this subsection shall involve analysis of energy needs; identification of research and development priorities; market research; collaborative research and development; field testing, demonstration, and adaptation; pilot projects; commercialization; acquisition and dissemination of information; and development of appropriate institutional networks.

"(4) In order to facilitate transfers of unconventional energy technology to less developed countries, programs conducted under this subsection shall include exchanges, arranged in cooperation with the Energy Research and Development Administration, of scientists and other technical personnel. Such exchanges shall include regular consultative visits by employees or contractors of the Energy Research and Development Administration to missions operated by the agency primarily responsible for administering this part. In addition, workshops on the application of energy technology and on the design of pilot plants shall be conducted on the local level in developing countries.

"(5) In carrying out this subsection, the President may cooperate with those international agencies which are engaged in compatible programs.

"(6) Programs under this subsection shall be carried out to the maximum extent feasible in conjunction with activities authorized by secton 107.

"(c)(1) In furtherance of the purposes of this section, the President is authorized to carry out studies, in cooperation with the Administrator of Energy Research and Development, to identify the energy needs, uses, and resources which exist in various countries and regions of the world. The goals of such studies shall be to identify ways to increase productivity, increase the standard of living, substitute unconventional energy sources for fossil and nuclear fuel, alleviate migration to urban areas and encourage migration to rural areas, and otherwise further the purposes of this section.

"(2) The immediate obective of the studies conducted under this subsection is the establishment of an information system which permits ready transfer among similar regions of the world of information relating to the rural, decentralized applications of unconventional energy technologies, with particular emphasis on transfers of information applicable to the most impoverished areas. Accordingly, the studies should be designed and conducted so that the information obtained has applicability to all major climatic and resource regions of the world.

"(3) Studies carried out under this subsection shall evaluate the energy resources available to meet energy needs in various countries and regions, including such resources as insolation, wind data, and biomass waste materials. In addition, such studies shall identify any cultural factors which would favor the use of some energy systems over others by various local population groups, and shall recommend which energy technologies seem most appropriate for the various physical, cultural, and human environments of the world.

"(4) Survey teams involved in studies conducted under this subsection should include United States and foreign representatives from both the public and private sector. Representatives of industry should be included on such teams in order to facilitate early utilization of the resulting information and recommendations by industry for the research, demonstration, and commercialization phases of projects involving unconventional energy technologies.

"(5) The results of the studies conducted under this subsection shall be reported to the Congress by July 1, 1978. Such report shall identify the most promising energy systems and technologies available for coopera-

tive projects and shall recommend modifications in the overall United States energy plan in order to incorporate the findings of the studies conducted under this subsection into our national planning processes.

"(d) Of the funds made available to carry out this chapter for the fiscal year 1978, at least $10,000,000 may only be used to carry out this section.".

SOLAR ENEGRY USES IN AGRICULTURE

Mr. BROWN of California. Mr. Speaker, this Congress is faced with crises on many fronts which have reached dramatic proportions. Most States are experiencing the dreadful effects of extremely low temperatures and drought conditions. The drain on our oil and natural gas supplies due to these climate fluctuations has driven home the need to present temporary and long-term solutions to our energy demands.

I am introducing a bill today which is part of a package of seven bills attempting to tackle the problem by stimulating the development and application of solar energy and energy conservation methods. The legislation which I am sponsoring amends various Department of Agriculture programs to include an emphasis on solar energy, and it establishes a new demonstration farm program within each State for the purpose of displaying farming techniques and technology that are fueled by solar and other renewable sources of energy, and new or improved methods of energy conservation.

In particular, the bill authorizes:

First, $25 million for Department of Agriculture research and development of solar technology to be used on farms;

Second, the Farmer's Home Administration to grant loans for solar farming equipment and for solar heating and cooling systems in farming structures, including homes;

Third, the USDA Extension Service to instruct and demonstrate renewable energy, farming technology;

Fourth, the Secretary of Agriculture to establish an information system which compiles a list of all solar research projects in Federal, State, private and nonprofit institutions; and

Fifth, the establishment of a national network of demonstration farms within each State, primarily implemented by the State Departments of Agriculture, which will display the benefits of solar energy farming equipment and energy conservation methods by using the technology within the scope of normal farming practices. Each State will choose the renewable energy technology that is best suited to its climate conditions and other appropriate factors and needs through a system of annual meetings between the USDA and the regional representatives of the State Departments of Agriculture.

After the annual meeting to determine which solar technology will be demonstrated in each region and State, every State department of agriculture will establish one model farm which demonstrates their chosen solar technology and energy conservation methods. In addition, no less than 10 farms within each State will demonstrate one new method or technique.

Reports on energy conserved, farmer and local interest, and other appropriate features of the demonstration system will be sent to Congress.

The legislation authorizes $20 million for the demonstration section.

It is time to encourage the use of renewable sources of energy on all fronts. Our farmers need alternatives to their present dependence on natural gas and oil to fuel irrigation pumps, dry grain, heat livestock structures, water, and their homes, and power their other farm equipment. The Department of Agriculture has the facilities to encourage this transfer and Congress need only issue the initial directive. I urge my fellow colleagues to join me in this effort.

The text of the Agricultural Solar Energy Research, Development, and Demonstration Act of 1977 follows:

H.R. 3978

A bill to authorize the inclusion of solar energy research development, and demonstration programs in certain agricultural programs

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Solar Energy Research, Development, and Demonstration Act of 1977".

TITLE I—EXISTING PROGRAMS

AGRICULTURAL RESEARCH

SEC. 2. The Act entitled "An Act to provide for research into basic laws and principles relating to agriculture and to provide for the further development of cooperative agricultural extension work and the more complete endowment and support of land-grant colleges", approved June 29, 1935 (popularly known as the Bankhead-Jones Act), is amended—

(1) by inserting after "electricity and other forms of power;" in the third sentence of section 1 (7 U.S.C. 427) the following: "research and development relating to uses of solar energy with respect to farm buildings, farm homes, and farm machinery (including equipment used to dry crops and provide irrigation);";

(2) by adding at the end of section 1 the following new sentence: "For purposes of this title, the term 'solar energy' means energy (other than energy derived from the fossilization process) obtained from solar radiation."; and

(3) by adding at the end of section 10 (7 U.S.C. 427i) the following new subsection:

"(f) Of the sums authorized to be appropriated for any fiscal year under subsection (a) of this section, $25,000,000 is authorized to be appropriated to carry out research and development relating to uses of solar energy with respect to farm buildings, farm homes, and farm machinery (including equipment used to dry crops and provide irrigation)."

AGRICULTURAL EXTENSION

SEC. 3. The Act entitled "An Act to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an Act of Congress approved July second, eighteen hundred and sixty-two, and of Acts supplementary thereto, and the United States Department of Agriculture", approved May 8, 1914, is amended—

(1) by inserting after "subjects relating to agriculture" in the first section (7 U.S.C. 341) the following: ", uses of solar energy with respect to agriculture,";

(2) by adding at the end of the first section the following new sentence: "For purposes of this Act, the term 'solar energy' means energy (other than energy derived from the fossilization process) obtained from solar radiation.";

(3) by inserting after "demonstrations in agriculture" in section 2 (7 U.S.C. 342) the following: ", uses of solar energy with respect to agriculture,"; and

(4) by adding at the end of section 3(a) (7 U.S.C. 343(a)) the following new sentence: "Five percent of the sums so authorized to be appropriated for each fiscal year shall be used to carry out cooperative agricultural extension work with respect to uses of solar energy."

RURAL DEVELOPMENT

SEC. 4. (a) Section 303 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1923) is amended by inserting "(a)" immediately before the first sentence and by adding the following new subsections at the end of such section:

"(b) For purposes of this subtitle—

"(1) the term 'improving farms' includes the acquisition and installation of any qualified solar energy thermal conversion system in any residential structure located on a family farm; and

"(2) the term 'qualified solar energy thermal conversion system' means solar heating and cooling equipment (within the meaning of the Solar Heating and Cooling Demonstration Act of 1974) which meets the Intermediate Minimum Property Standards prescribed by the Secretary of Housing and Urban Development or such later or revised appropriate and available standards as may be prescribed by the Secretary.

"(c) Five years after the enactment of this subsection, no loan may be made or insured under this subtitle for the purpose of financing the acquisition and installation of any such system in any residential structure located on a family farm."

(b) Section 312(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1942(a)) is amended—

(1) by inserting after "poultry, and farm equipment" in clause (2) the following: "(including equipment which utilizes solar energy)"; and

(2) by adding at the end of such section the following new sentence: "For purposes of this section, the term 'solar energy' means energy (other than energy derived from the fossilization process) obtained from solar radiation."

TITLE II—SOLAR DEMONSTRATION FARMS

SOLAR RESEARCH INFORMATION SYSTEM

SEC. 5. The Secretary of Agriculture (hereinafter in this title referred to as the "Secretary") shall, through the Cooperative State Research Service and other agencies within the Department of Agriculture which the Secretary considers appropriate, in consultation with the Energy Research and Development Administration, the Agricultural Institute of the National Academy of Sciences, and private and nonprofit institutions involved in solar energy research projects, compile and list solar energy research projects which are being conducted by Federal, State, private, and nonprofit institutions. Such projects include heating and cooling methods for farm structures and dwellings (such as greenhouses and livestock shelters), storage of power, operation of farm equipment (including irrigation, pumps, crop dryers, and anaerobic digesters), and development of new technology to be used on farms which are powered by solar energy.

SOLAR DEMONSTRATION FARMS

SEC. 6. There is established within the Department of Agriculture an advisory committee to be known as the Research and Demonstration Planning Committee (hereinafter in this Act referred to as the "Committee").

SEC. 7. (a) The Committee shall be composed of 9 members, including a Chairman, appointed by the Secretary. In making ap-

pointments to the Committee, the Secretary shall appoint the following members:

(1) one member from each of the following agencies within the Department of Agriculture: the Agricultural Research Service, the Extension Service, and the Cooperative State Research Service;

(2) one member who will be able to represent the interests of land-grant colleges and universities as a result of his or her having been employed by such a college or university;

(3) one member who will be able to represent the interests of State agricultural experiment stations as a result of his or her having conducted or supervised research at such an experiment station;

(4) one member who will be able to represent the interests of nonprofit research institutions as a result of his or her having been employed by such an institution;

(5) one member who will be able to represent the interests of private research institutions as a result of his or her having been employed by such an institution; and

(6) two members who will be able to offer expert advice concerning the utilization and conservation of energy resources as a result of his or her having extensive and distinguished experience in the study of the utilization and conservation of energy.

(b)(1) Except as provided in paragraphs (2) and (3), members shall be appointed for terms of four years.

(2) The Secretary shall appoint the first members of the Committee within 90 days after the date on which this title takes effect. Of such first members—

(A) three shall be appointed for terms of one year,

(B) three shall be appointed for terms of two years, and

(C) three shall be appointed for terms of three years,

as designated by the Secretary at the time of appointment.

(3) Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term. A member may serve after the expiration of his term until his successor has taken office.

(c) A vacancy on the Committee shall be filled within sixty days after the vacancy occurs and in the manner in which the original appointment was made.

SEC. 8. (a) The Committee shall—

(1) be responsible for compiling and listing solar energy research projects under section 5;

(2) meet annually with four regional representatives of the State departments of agriculture to determine which solar energy research projects listed under section 5 will be useful and beneficial to States which are in each of the 4 regions into which the States are divided by the State departments of agriculture;

(3) reevaluate and reformulate the selection of solar energy research projects for demonstration each year;

(4) annually review and evaluate the progress, the degree of local interest, and the effectiveness of the demonstration farms within each State; and

(5) prepare and submit an annual report to the Secretary and both Houses of the Congress containing an evaluation of the demonstration farms within each State (including comparisons of the usage of energy, water, and organic matter before and after the demonstrations on such farms) and of the degree of farmer and local interest.

(b) In determining which projects will be useful and beneficial to States under subsection (a)(2), the Committee and regional representatives shall—

(1) consider the energy and agricultural needs and resources of the States within each region described in subsection (a)(2);

(2) determine, taking into consideration the particular problems of the State and region concerned, which projects are likely to result in the farmers of such State conserving energy, lowering operating costs, and producing agricultural commodities more efficiently;

(3) consider the needs of small farmers; and

(4) consider all factors which directly affect the use of various solar energy systems, including such factors as climate, number of livestock farms, wind velocity, and farm sizes.

SEC. 9. (a) Except as provided in subsection (b), members of the Committee shall each be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS–12 of the General Schedule for each day (including travel time) during which they are engaged in the actual performance of duties vested in the Committee.

(b) Members of the Committee who are full-time officers or employees of the United States or Members of Congress shall receive no additional pay on account of their service on the Committee.

(c) While away from their homes or regular places of business in the performance of services for the Committee, members shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b) of title 5 of the United States Code.

SEC. 10. (a) The Committee shall have a Director of Staff Personnel who shall be appointed by the Committee and who shall be paid at a rate established by the Committee.

(b) Subject to rules which may be adopted by the Committee, the Director of Staff Personnel may appoint and fix the pay of such staff personnel as he or she deems desirable.

(c) The Director of Staff Personnel and the staff of the Committee may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(d) The Committee may procure temporary and intermittent services of experts and consultants to the same extent as is authorized by section 3109(b) of title 5 of the United States Code.

(e) Upon request of the Committee, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Committee to assist it in carrying out its duties under this Act.

SEC. 11. The Committee shall continue in existence until terminated by Congress.

SEC. 12. (a) In order to promote the establishment and operation of solar energy demonstration farms within each State and territory of the United States, 80 percent of the funds authorized to be appropriated to carry out this title shall be utilized by the State departments of agriculture, with the assistance of the Extension Service of the Department of Agriculture, the State agricultural experiment stations, the land-grant colleges and universities, and local nonprofit research groups, to carry out the activities described in subsections (b) and (c).

(b) Each State department of agriculture shall—

(1) after the annual meeting of regional representatives and the Committee under section 8(a)(2), meet with its regional representative to determine which solar energy research projects will be demonstrated in that State under section 8(a)(2);

(2) establish (working with the Extension Service of the Department of Agriculture, the State agricultural experiment station, land-grant colleges and universities, and local nonprofit research groups) one large model farm—

(A) which demonstrates all the solar energy research projects determined to be useful and beneficial to that State under section 8(a)(2);

(B) which is located in that State on land owned by that State; and

(C) which includes other farming practices, such as raising livestock and crops, in order to provide a model of a farm using solar energy as a means of heating, cooling, drying crops, and providing other farming needs; and

(3) sell the crops produced on the model farm established under paragraph (2) and deposit any funds received from such sales into the miscellaneous receipts of the Treasury of the United States;

(4) provide tours of such model farm to farmers and other interested groups and individuals;

(5) determine the costs of energy, the income, and the total costs of such model farm; and

(6) annually compile a report concerning energy usage, income, costs, operating difficulties, and farmer interest with respect to the model farm and individual farm demonstrations established under this section and shall submit the report, along with any recommendations concerning project changes and specific needs of such farm or demonstrations, to its regional representative who shall submit the report at the annual meeting of such representative with the other regional representatives and the Committee under section 8(a)(2).

(c) Within 1 year after the date on which a model farm is established in a State under subsection (b)(2), the State department of agriculture shall establish not less than 10 demonstrations of solar energy research projects which such department determines to be the most efficient or practicable research projects demonstrated on such model farm. Such demonstrations shall be carried out on farms which are already operating in such State and which the State department of agriculture selects. An owner of a selected farm who is willing to carry out such a demonstration shall enter into an agreement with the State department of agriculture. Such agreement shall include the following provisions among others:

(1) solar energy equipment may be installed on such farm by the State department of agriculture;

(2) such owner will operate and maintain the equipment for a period of 5 years;

(3) during such period—

(A) the Extension Service of the Department of Agriculture will provide such owner with technical assistance concerning the operation and maintenance of the equipment;

(B) such owner will record all changes in energy usage and energy costs on such farm before and after the installation of the equipment;

(C) such owner will report such changes, along with any other appropriate findings concerning such equipment, to the State department of agriculture; and

(D) such owner will give tours to farmers and other interested groups and individuals and provide them with a summary of the costs and operation of the equipment; and

(4) at the end of such period, such owner will have all rights and title to the equipment.

DEFINITIONS

SEC. 13. For purposes of this title, the term "solar energy" means energy (other than energy derived from the fossilization process) obtained from solar radiation.

AUTHORIZATION OF APPROPRIATION

SEC. 14. There is authorized to be appropriated $20,000,000 for this title.

Mr. BEDELL. Mr. Speaker, individual enterprise, as Thomas Jefferson noted, was the foundation for the pillars of

American prosperity two centuries ago. This fact is no less true today. Most of the historians of the American economic system agree that since the beginning of our Republic, small business has been the very heart of the American free enterprise system.

Perhaps one of the most important contributions of small business to the marketplace is those new, and sometimes revolutionary ideas, which originate not in laboratories and workshops of large businesses, but outside in the realm of small business. Penicillin, the jet engine, the zipper, the ball-point pen, and cellophane are just a few of the important contributions of independent inventors and small businesses. Studies of patent records show that the majority of major inventions originate with the individual or the small firm.

Today, I am proposing to bring this American inventiveness to work on the energy crisis. The basic technology and the economic conditions exist for the full-scale application of solar energy to the American lifestyle. We need Government encouragement and economic incentives to remove present barriers and stimulate the market for small businesses and to the benefit of the American consumer. Small business involvement provides that most necessary ingredient—competition—to the marketplace.

Unfortunately, present Government policies have generally lacked the concern, flexibility, and determination necessary to encourage small business participation in the solar industry. It is time for our Government to stop dragging its feet and begin full-fledged support for solar energy.

Neither economic, not technological excuses for not developing solar energy remain acceptable as Dr. Robert Hirsch, Assistant Administrator for Solar at ERDA, noted when he testified before the Government Operations Committee on February 1, "There is no question of technological feasibility in the major solar technologies, that is, they all work."

Moreover, a recent study of 13 cities across the Nation found solar hot water and space heating to be economically comparable to conventional systems using oil, natural gas, electric resistance heating, and electric heat pumps. This study was conducted before the natural gas crisis of this past month which drove prices even higher.

However, that valuable contribution small business and individual inventors could be making to solving remaining roadblocks to commercial and residential solar energy use cannot be truly realized without Government initiatives. The legislation I am introducing today seeks to open the necessary avenues which can allow giant steps forward in solar energy research, production, and marketing by small business.

My proposal seeks to both develop commercialization and research support for small businesses seeking to enter the solar energy field. Title I proposes $75 million for loans on a direct, guaranteed, or immediate participation basis for small business concerns involved commercially in solar energy or conservation technologies. This program would be administerd by the Small Business Administration.

A major stumbling block for solar commercialization development with small business is the lack of good technical information on installation, design, and servicing solar energy systems. Small businesses are the natural sector for providing these services. Therefore, a part of SBA's job would be to establish a grant program to assist nonprofit institutions and organizations in holding training seminars for independent contractors and small businesses concerning practical and easily implemented techniques for the installation, design, and servicing of solar energy systems. The SBA would also research, prepare, and publish necessary technical manuals available at 50 percent of cost.

Title II is a mandate for ERDA to more aggressively pursue small business involvement and participation in their present programs and developing new programs for additional opportunities. Small business and individual inventors would be required to receive a minimum of at least 20 percent of funds available through ERDA's solar energy programs. ERDA would also be required to utilize SBA's definition of small business to prevent duplication, overlapping, and the possibility of a subsidy of a large corporation receiving funds under the pretext of small business.

ERDA would also be required to establish an Office of Invention and Innovation to coordinate the National Bureau of Standards evaluation program and provide "small grants"—up to $50,000—to small business concerns and individuals for the research, development, and demonstration of promising energy related inventions. Up to $5 million would be available per year under the small grants program.

An additional $45 million would be available for larger grants, loans, and loan guarantees, but this program would require the approval of the Assistant Administrator responsible for the area of energy technology which the invention involves. It is also important to note that both of these programs are aimed at that largely ignored area of unsolicited proposals that ERDA has not taken the time to properly identify or develop.

And finally this legislation provides for an annual report to Congress on ERDA's implementation of this directive.

As part of the comprehensive solar and conservation legislation package being introduced today this proposal seeks to harness the resources of American enterprise, ingenuity, and inventiveness in our national effort to solve our energy problems. I am convinced that solar energy is a good investment now for homeowners and businessmen and with applied technology and Government encouragement it can be a reality tomorrow.

The text of the small business development bill follows:

H.R. 3984

A bill to amend the Small Business Act and the Federal Nonnuclear Energy Research and Development Act of 1974 to provide certain assistance to individuals and small business concerns in the areas of solar energy equipment and energy-related inventions

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—SMALL BUSINESS ACT AMENDMENTS

SECTION 101. (a) Section 7 of the Small Business Act (15 U.S.C. 636) is amended by adding at the end thereof the following new subsection:

"(1) The Administration may make loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis) as the Administration may determine to be necessary or appropriate to assist any small business concern in financing—

"(1) plant construction, conversion, or expansion (including acquisition of land for such plant) and

"(2) the acquisition of equipment, facilities, machinery, supplies, or materials

to enable such concern to design, produce, distribute, install, or maintain solar energy or other equipment the primary purpose of which is the conservation of energy."

(b) Subsection (c) of section 4 of the Small Business Act (15 U.S.C. 633(c)) is amended—

(1) in paragraph (1) by inserting "7(1)," after "7(i),"; and

(2) in paragraph (2) by inserting "7(1)," after "7(i),".

(c) There is authorized to be appropriated to the business loan and investment fund established under section 4(c) of the Small Business Act $75,000,000 to carry out section 7(1) of such Act.

SEC. 102. Subsection (d) of section 7 of the Small Business Act (15 U.S.C. 636(d)) is amended by inserting "(1)" after "(d)" and by adding at the end of such subsection the following new paragraph:

"(2) The Administration may make grants to any nonprofit organization for the purpose of enabling such organization to provide training seminars for small business concerns concerning practical and easily implemented methods for the design, installation, and maintenance of solar energy equipment.

SEC. 103. Subsection (b) of section 8 of the Small Business Act (15 U.S.C. 637(b)) is amended by striking out "and" at the end of paragraph (14), by striking out the period at the end of paragraph (15) and inserting in lieu thereof "; and", and by adding after paragraph (15) the following new paragraph:

"(16) to provide, at not more than 50 percent of the cost to the Administration, to any small business concern technical manuals on the design, installation, and maintenance of solar energy equipment."

TITLE II—FEDERAL NONNUCLEAR ENERGY RESEARCH AND DEVELOPMENT ACT OF 1974 AMENDMENTS

SEC. 201. The Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5901 et seq.) is amended by adding at the end thereof the following new sections:

"OFFICE OF INVENTION AND INNOVATION

"SEC. 19. (a) There is hereby established in the Energy Research and Development Administration the Office of Invention and Innovation. Through such Office, the Administrator may (subject to subsection (b))—

"(1) accept and evaluate, in coordination with the National Bureau of Standards, proposals by any individual or small business concern for the development of any energy-related intervention;

"(2) provide grants, not to exceed $50,000 for any proposal, to any individual or small business concern for research, development, and demonstration of any such invention; and

"(3) provide grants, loans, or loan guarantees in excess of $50,000 for research, development, and demonstration of any such invention if such grants, loans, or loan guarantees are approved by the Assistant Administrator of the Energy Research and Development Administration with authority over the

energy technology area to which such invention relates.

"(b)(1) Not more than $5,000,000 may be used in any fiscal year to carry out subsection (a)(2).

"(2) Not more than $50,000,000 may be used in any fiscal year to carry out subsection (a)(3).

"EXPENDITURE OF FUNDS UNDER SOLAR ENERGY PROGRAMS

"SEC. 20. Not less than 20 percent of the amount of funds appropriated to the Energy Research and Development Administration to carry out any solar energy program (exclusive of administrative costs) shall be expended for the benefit of small business concerns and individual inventors.

"DEFINITION OF SMALL BUSINESS CONCERN

"SEC. 21. For purposes of this Act, the term "small business concern" shall be defined by the Administrator in consultation with the Administrator of the Small Business Administration."

SEC. 202. Section 4 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5903) is amended by striking out "and" at the end of paragraph (d), by striking out the period at the end of paragraph (e) and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(f) vigorously encourage the participation of individuals and small business concerns in—

"(1) the research and development (including demonstration of commercial feasibility and practical applications) of the extraction, conversion, storage, transmission, and utilization phases related to the development and use of energy from fossil, nuclear, solar, geothermal, and other energy sources; and

"(2) the advancement of energy conservation technologies, as described in section 6(b)(3)(A)."

SEC. 203. Paragragh (1) of section 15(a) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5914 (a)) is amended by inserting before the semicolon at the end thereof ", with specific reference to the activities carried out pursuant to section 4(f)".

Mr. MOTTL. Mr. Speaker, I wish to join with my colleagues in expressing my support for the solar legislative package which we are today introducing. It is time for the Federal Government to get serious about solar energy. This legislative package could push the commercialization of solar energy ahead by 5 to 15 years, by putting the Government firmly behind the solar option.

The basis for the previous administration's energy policy was spelled out to the Congress in ERDA's "A National Plan for Energy Research, Development, and Demonstration: Creating Energy Choices for the Future." Their report presents six estimates of the possible contribution of solar energy to the country. Their highest estimate is included under a "limited nuclear power" scenario, and results in a solar contribuiton of 0.6 percent of our total energy needs by 1985 and 7 percent by 2000.

Other estimates show ERDA's "prediction" to be amazingly conservative. For example, the Mitre Corp. report prepared for the National Science Foundation predicts it could supply up to 30 percent of our total energy requirements by 2000. The report of the project independence interagency task force projects a solar contribution of 21.6 percent by 2000 under an "accelerated implementation plan."

The problem with ERDA's study is that it often serves as more than a projection of energy possibilities. It sets the guidelines for the Federal energy effort, which puts the Government on record as looking at solar energy as a "futuristic" concept.

Solar energy is not a futuristic concept, it is here today. Solar energy is being applied in commercial, residential, and agricultural applications. From hotels to homes, solar space and water heating is providing needed energy at economical prices.

Solar energy is increasingly available on the commercial market. What path, what approach, the Goverment takes toward its development can make it a reality in a few years, or a few decades. I submit that our approach to date can only result in the latter.

The solar legislative package introduced today takes the former approach. We want to see the tremendous potential of solar energy realized now.

The report of subpanel IX to the AEC Chairman concluded that an accelerated solar program costing over $1 billion would pay for itself in fossil fuel savings through one subprogram alone—solar heating and cooling—within 7 years. Their prediction involves oil at $3 per barrel. Given today's cost of fossil fuels, such a program could pay for itself in a matter of years.

I wish to address my remarks to the small business section of this legislative package, which was prepared in cooperation with my colleagues from Iowa (Mr. BEDELL) and Vermont (Mr. JEFFORDS) and the distinguished Senator from New Hampshire (Mr. MCINTYRE). This proposal breaks down into two basic areas: commerical development and Government research.

This proposal will provide needed capital for small firms engaged in the production of solar and conservation technologies, starting on a limited basis of $75 million. It could be determined, in the future, whether additional funds are needed through SBA.

A small firm in the solar energy industry is facing a twofold problem with capital. Venture capital for solar energy commercialization is limited by the infant nature of the industry. The small firm is further burdened by the reluctance of investors to deal with small business. As we can see by recent capital studies—NFIB, January 1977, "Quarterly Economic Report for Small Business," the capital market for small firms is still tight. In the venture fields, this makes commercial expansion doubly difficult, if not impossible. Yet, these small firms are many of the pioneers of the solar field, and the most vigorous segment of this infant industry.

The development of a commercial solar market greatly depends upon the contractor. He is the bridge between the ultimate consumer and the engineers and manufacturers. If the commercialization of solar energy is going to make any progress, the heating and air-conditioning contractor will make a vital contribution.

Where will a consumer turn for information on solar heating and cooling—to his heating contractor, most likely. The consumer can be encouraged or discouraged to go to solar heating if the person he contacts is knowledgeable.

Essential for solar commercialization, then, is the training of these contractors in the installation, design, and servicing of solar equipment. This would be accomplished through a grant program administered by the Small Business Administration for technical schools, vocational schools, and other nonprofit entities who wish to hold training seminars for independent contractors and small business. The SBA would also prepare and distribute the necessary "technical manuals." Such technical data is necessary for the contractor, and it is important that it is in a format which he is familiar with and can use. The precedent for such manuals is found repeatedly in the industry, such as the ASHRAE guide and data book, HUD manual J, and others.

Government research is the second area which this proposal addresses. The Federal Government has established a program for the evaluation of promising energy ideas through ERDA and the NBS. Yet, there are no funds provided for the "promising ideas" which are found technically feasible. Nor are any funds earmarked in ERDA's budget for such unsolicited proposals. Some proposals are being sent back because they do not fit into ERDA's timetable for a number of years. For many inventors and small firms, their proposals only involve small sums of money. The availability of these funds can make the difference between developing a new technology now, or 10 years from now.

Innovation cannot be mapped out, or planned. It has been fairly well established that the individual inventor and the small firm are the chief source of innovation. This proposal establishes a small grants program through an Office of Invention and Innovation in ERDA responsible for the evaluation of promising energy ideas in cooperation with the National Bureau of Standards. Grants of up to $50,000—up to an annual total of $5 million—would be authorized directly through this office. Larger grants, loans, and loan guarantees would also be available for unsolicited proposals—up to an annual total of $45 million—with the approval of the Assistant Administrator responsible for the area which the technology involves.

This proposal also directs ERDA to "vigorously encourage" participation by small firms and individual inventors in its programs, and requires ERDA to report to Congress each year on its implementation of this directive. At least 20 percent of ERDA's solar funding would be earmarked for small firms, and ERDA would be required to utilize SBA's definition of a small business.

It is time for small R. & D. firms to receive a greater portion of the "pie." For years they have received only a

small fraction of Federal funds, due greatly to institutional barriers which have no relation to their ability to perform. I wish to appendix this statement with a comparison of small and large firm R. & D. which dispells the myth of large firm superiority.

It is the small firm which often performs the job better, if given the chance. It is definitely the small firm which has the greatest stake in seeing the new technology succeed commercially, and the greatest propensity for innovation.

I include the following:

A COMPARISON BETWEEN "SMALL" AND "LARGE" R&D COMPANIES

(By Peter R. Payne)

I've just been reading a report put out by the Senate Select Committee on Small Business (December 1975, Vol. 1, No. 5). It contains some views on why small businesses are important to our country. Some of them seem to be a little strained. "Humanizing corporations"; "worker satisfaction"; "more responsive to environmental, social and economic changes." Doubtless these things are all very nice, but are they the most important reasons? And can they be applied to all companies? What's good for the neighborhood grocery store may be bad for the local farmer who supplies it. In assessing the importance of small businesses, one ought first to divide them up into meaningful categories, and analyze each category by itself.

A very broad classification of small businesses might be as follows:

Farming.

Production of Raw Materials.

Manufacturing.

Services (including "paper study" organizations).

Research & Development (including invention and innovation).

Entertainment.

Thanks to the invention of machinery, we generally find that a small manufacturing or mining company cannot compete with a big one. Developing and forming raw materials is big business. Except for certain very specialized and minor exceptions, it is capital-intensive and the small businessman cannot compete. This is what the industrial revolution was all about. The development of capital at the end of the Middle Ages led in turn to the development of machines and factories which were able to far outproduce individual cottage workers; and generally speaking, the larger the manufacturing operation, the greater the economies of scale. The dice were further loaded against the small manufacturer by the invention of conscious mass production just prior to the Civil War, by the refinements introduced by pioneers such as Henry Ford, and most recently, by the techniques of automation which may eliminate the human element altogether.

Most historians would agree with that analysis more or less. The writer's favorite reference is Henri Pirenne, "A History of Europe" Volumes I and II, written in exile during World War I. Now available from Doubleday Anchor Books (1958). But it clearly has no relevance at all to "small" versus "large" organizations in, say, musical entertainment. A successful jazz band does not require much capital, nor does a large band produce cheaper music!

It must be obvious that research and development is also as different from manufacturing as chalk is from cheese. Observations based on manufacturing companies have no relevance at all to the comparison between small and large research and development companies. We recognize this historically, because most important innovations have come from small companies or individuals, and it is the large companies that cannot compete.[2] But, in recognizing this, we have not gone far enough. We have to realize that in R & D we are dealing with the output of people's minds, not of machines, and that is why the rules are completely different. Presumably there's something about a large organization which inhibits innovative thinking or doing.[4]

Many eminent engineers have known that "small is better" for a long time. From Shapero, for example.[1]

"John McLean of the Sidewinder program once proposed a development system in which two groups would be funded to do a given development, but one team funded at 10 percent of the dollars of the other team. He wrote that he would prefer to always be on the 10-percent team—personally so would I."

Even a company as large as Lockheed seems to recognize this. When they have to build something really challenging, and do it right first time, they often give it to the "Skunk Works", run for so many years by Kelley Johnson.

So it's my contention that as well as being more innovative, small teams and small companies are far more efficient than large ones. We can perhaps test this contention by comparing situations in which small R & D teams have been in competition with larger ones, performing similar tasks, and seeing how they fared relative to one another. We shall find, that as a general rule, a small team can complete a given project in less time; typically half the time, and sometimes as little as one-tenth the time. We shall find that the small company's costs are typically much less, and sometimes as little as one-tenth those of the large company. This is not just an interesting observation. It's a vital fact for the future of our country. Simplistically, if it were true across the board, it would mean that our defense budget need only be $11 billion instead of $110 billion; or perhaps more realistically, we could have ten times our present defensive capability for the present budget. Of course, that is stretching the case much too far. Some of our important weapon systems can only be built by large companies, and in any case, most of the defense budget is spent, not in the R & D sector, but on paying bureaucrats and troops, active and retired. But if only "a few" billion could be saved, and the response time and quality of the product improved, surely this would be worth doing? I'm not talking about spending money to save money; I'm talking about simply saving money by contracting with small R & D teams instead of large ones.

In the Appendix you will find a few case histories to back up the contention that "small" can be better. Of course, this is not a statistically designed study and it contains mainly "glaring examples" which are intended to "prove the point". A big company could probably produce a similar study to "prove" that small companies often go broke in the middle of a contract, causing great inconvenience to the procuring agency; or that they do a poor job because of the lack of capital. And this does happen, I have to admit. But in most of the cases that I know about, the failure was not related to technical or managerial competence but to money problems. And the money problems were mostly caused by unrealistic government procurement policies and/or communication problems with the bank.

When money problems are under control, it's my contention that small R & D companies usually perform much more effectively—and remember that I'm not talking about "paper study houses". Why should this be so? Like most political and organizational problems in life, there is no single, simple answer; and, as in economics, it's possible for different "experts" to hold divergent views. But there are some basic reasons which many observers would unite to agree upon:

1. Project engineers in government tend to give contracts to the larger companies because they will not be criticized as severely if a large company delivers an unsatisfactory product or report; they can be severely criticized if a small company falls down on the job. As a result, it is not critically necessary to have really competent people in large companies, whereas a small company would be quickly out of business if it had mediocre professionals.

2. Communication within a small team is quick and easy. A problem can be thrashed out in ten minutes which might take as many weeks in a large organization.

3. As pointed out by Shapero,[3] the bureaucratic disease of "Biobocracy" has been endemic to large organizations since the end of World War II. Some of the more amusing manifestations are the "abominable no men" identified by Professor Parkinson, and the elegant theory of the "Peter Principle." Percentagewise, there are far too many useless mouths in a large organization. They stifle the people who are trying to work. For example, Boileau[5] notes that when Boeing was in trouble, they laid off 90% of the people in their corporate headquarters, without sacrificing efficiency.

4. A small team is highly motivated to work hard and do an excellent job because its members clearly see very adverse financial consequences ahead of them if they do not; consequences which typically include bankruptcy for the principals. A twelve-hour work day is typical. Working on holidays and weekends is not unusual. But in many large teams, the employees may work less than two hours a day, even though they are on the premises for eight.

5. When a large company gets a small research contract—less than $250,000 say—top management is not involved. Even if the men doing the work are quite incompetent technically, it's probable that no one in the company will know it. "Smith delivered that report he was doing within budget and schedule" is likely to be the accolade. Smith's report may be garbage, but few know and no one cares.

In contrast, a contract of that size is a big deal to a small company, and the whole team is concerned to see that a first class job is done, in the interests of honor, solvency and future work.

6. Many outstanding scientists and engineers cannot tolerate the bureaucracy and leisurely pace of large companies and seek out small teams where they can feel they are making positive achievements.

If I'm right about this, we ought to be able to save a little money and make better progress at the same time. For talking purposes let's postulate a modest saving of only $2 billion out of our annual R & D budget. But to achieve this, we have to find a way to motivate project engineers in the government to select small teams when they appear competent. Perhaps some ideas on how to do this will come out of this meeting.

[These examples are drawn from only four companies. The AASRC membership was twice asked to supply their own, but nothing came in. During personal contacts, some fine examples surfaced, but the Presidents concerned "didn't want to rock the boat". I don't blame them. I don't really know why I'm sticking my neck out like this!]

Case History No. 1, A Software System: In the late 1960's and early 1970's, the U.S. Navy paid a large aerospace corporation more than $250,000 to develop and implement a large computer software system for ship arrangements. The product was delivered and installed. However, it was found to be impractical from the standpoint of user acceptance, slow, and very costly to run. In 1974, Cadcom, Inc. (a small company located in Annapolis, Maryland) suggested that such a system could be designed for an inexpensive minicomputer-based system. It received a contract for $27,000 to do this. The result was a successful, fast, and economical system which has gained wide acceptance among Navy users.

Case History No. 2, Airborne Antennas: Airborne television antennas, produced by a large company at a cost of $30,000 each proved unsatisfactory when put into service. (Specifically, they caught fire after an hour or so of carrying power.) Payne, Inc. (a small company) developed replacement antennas in seven days, at a cost of $4,500 each. These replacement antennas were used successfully for the life of the program.

Case History No. 3, Data Transmission System: In 1974, a large company was paid $50,000 to prepare a specification for a Navy data transmission system. Although the terms of the contract were met, the Navy determined that the specification was written in such a manner that it could not be used for hardware procurement. The contractor refused to correct the spec and submitted a proposal for another $50,000 to make the necessary adjustments. Cadcom was asked to take on the job. It was completed in four weeks for $8,000.

Case History No. 4, Airborne Antenna Winch: Payne, Inc. was asked to design and build an airborne antenna winch capable of carrying and deploying five miles of antenna wire during flight. The state-of-the-art at that time was exemplified by the "Company X" winch installed in the Air Force's command and control aircraft. The Payne winch had to be about one third the weight, even though it had to carry twice as much weight of wire, and have superior electrical characteristics. All this was achieved in a program which cost the Government $140,000. The cost of developing the "X" winch is not known, but is estimated to be about $2 million. The Payne, Inc. production winches cost $40,000 each. The production "X" winches cost approximately $170,000, it is believed. They could not have met the performance requirements for the program, and in any case, at that time for their operation was unreliable, in that they snapped their antenna wire after a few deployments. The Payne winches met all their performance requirements and are still in service after seven years of satisfactory operation.

Case History No. 5, Design of a Motorized Bridge: In 1975, the U.S. Navy paid a large architectural firm more than $50,000 for the design of a complex bridge which was to travel, under power, on rails.

The contractor submitted a design which was totally unacceptable to the Navy; however, the contract was written in such a way that the contractor had to be paid and the deliverable accepted. Subsequently, Cadcom received a fixed-price contract to design the bridge without the use of the previous contractor's results. The work was performed in six weeks, cost the Navy $10,000, and the bridge is presently under construction.

Case History No. 6, a Breakthrough in Hydrodynamics: On its own resources, Payne, Inc. worked out some simple ways of dramatically reducing the resistance of underwater bodies (such as torpedos and submarines) by changing the shape rather than introducing complex additional equipment. When a need arose to apply this to a torpedo-like vehicle, the government decided to test the applicability of the Payne, Inc. technology. To save time, the contract was let through a large company. Payne, Inc. was to get $70,000 to develop the technology, build and test the prototype.

When the prototype was completed, it appeared that Payne, Inc. might overrun as much as $9,000 before the testing was completed. The large company convinced the Government to let them do the testing instead and from there on, it was their program. Payne, Inc. came back in very briefly at its own expense, because the first tests were a failure, due to the large company's lack of knowledge in this area of technology. From there on, the program was a success, and the large company has since been funded to the extent of approximately $25 million and are continuing to be funded at a very substantial level still using the concepts produced by Payne, Inc. in 1968. Payne, Inc., on the other hand, has a number of new approaches that it would like to try, but has been unsuccessful in getting any support at all from the Government during that seven year period. It has the impression of being excluded because the large company poses as "the experts".

Case History No. 7, NASA Letters to a Small Company: "We would like to take this opportunity to express our appreciation for the manner in which your firm has thus far fulfilled its commitments under contract NASW-1638. The hardware and its associated test equipment which was delivered to NASA Ames on August 2, 1967 appears to more than meet the technical requirements of our Primate Simulator Specification #883-11-14. We recognize that such a successful development effort would have been impossible without the willingness on the part of your Mr. Carl Beckman to maintain close coordination on all technical details with NASA Ames. We also found quite refreshing the low inertia to 'last minute' changes which a company such as yours appears to possess.

If your firm can continue to perform small development tasks in this technically competent and timely manner and within reasonable cost limits, General Technical Services could well fill a conspicuous void in the industrial community upon whom NASA draws for the performance of such tasks." Charles A. Wilson, Biosatellite Project Manager.

Extract from a Second NASA Letter, From Orr E. Reynolds: "As I emphasized at the beginning, this particular development was looming up as a major hurdle in our 30-day primate flight in the Biosatellite. Without timely availability of the simulator, we might well have encountered delays in the program costing several millions of dollars.

I feel most fortunate in being acquainted with someone who was willing as well as able to mount a successful effort in accomplishing this task."

[However, the small company which received these plaudits, General Technical Services, Upper Darby, Pennsylvania, did not get any more business from NASA!]

Case History No. 8, Another Software System: A government agency required, on a rather urgent basis, a special purpose software system to perform a specific set of tasks. They contracted with a major computer manufacturer to assemble such a system for $285,000. When delivered, the system met only a small fraction of the requirements, and was therefore unusable. The computer company requested a much larger follow-on contract in order to make the system usable, but the agency was unable to find the necessary money.

To demonstrate their capabilities to the agency, Versar, Inc. (of Springfield, Virginia) volunteered the services of one of their senior staff. This man was able to adapt the system, reprogram the computer, and utilize existing peripherals, so that the intended capability was achieved or exceeded. The agency was then able to use the system as originally intended.

The agency continued to ask for "free" technical assistance from Versar, Inc., but never came through with a contract, despite the very substantial sum of money Versar had already saved for them. Since such a situation is one of eighty-four proven ways of going bankrupt, Versar eventually terminated the relationship.

Mr. MOAKLEY. Mr. Speaker, we are rapidly approaching an impending shortage in our traditional fuel sources. Already this winter we have experienced an unprecedented natural gas shortage and are faced with the possibility of widespread electricity brownouts coupled with water shortages for the summer. Obviously, it is becoming clearer by the day that we, as a nation, must begin looking for alternative sources of power before it is too late. Solar energy certainly offers one of the most viable alternative sources worthy of exploration.

For the past 2 months my office has been working closely with nearly 20 other Senate and House offices in putting together a legislative package geared to the development and promotion of solar energy as a means of conserving energy. If we are to have a domestic and international energy policy that is productive, efficient, and understandable, then I believe this legislative package represents a giant step in that direction.

This legislative package sweeps across many jurisdictions, includes new and restructured programs and mandates, promoting the use of renewable energy equipment in the area of small business, agriculture, international applications, Federal buildings and assistance to individuals. Briefly, the legislative package includes:

A bill promoting the use of already developed solar energy and energy conservation technologies in Federal buildings;

A bill to provide demonstration funds for solar energy and energy conservation measures for agricultural use;

A tax rebate in the form of a credit for consumers, farmers, businesses, and industries to pay part of the cost of installing solar, geothermal, or wind energy systems;

A bill establishing an accelerated program of cooperation with less developed countries in data-gathering, development, and commercialization of decentralized rural-oriented solar technologies, greatly expanding the role of American private industry; and

A bill to give small business greater access to Federal research and demonstration funding for renewable energy by simplifying application procedures, and to provide funds for businesses to begin manufacturing and marketing of solar and energy conservation systems.

We are introducing these bills as a

group because the seriousness of the energy situation we find ourselves in warrants group action. In Massachusetts, as in the rest of the country, legislative action with respect to the development of solar energy and other renewable energy conserving devices is needed to aid in bridging the ever-widening gap between supply and consumer demand. My Massachusetts constituents are faced with incredible heating bills this winter, with increases, in some cases approaching 100 percent over last winter's bills. This is typical, I am sure, of the situation across the entire country. It is high time that we here in the 95th Congress do something constructive to attempt to lay the groundwork for a rational energy policy, one which will attempt to solve the dire energy predicament we now find ourselves in. Lack of constructive action on this question will be disastrous.

Mr. HARRINGTON. Mr. Speaker, I was pleased to join with my colleagues today in introducing a package of legislation to encourage energy conservation and solar energy usage in this country. I have been talking about solar energy since 1972, when I introduced the first bill to provide Federal long-term, low-cost loans to homeowners and businesses which install solar heating equipment. That concept, along with others, is included in the package introduced today. My only hope is that I will not have to be standing here another 5 years hence, still talking about an idea rather than an ongoing program.

The Nation has reached a critical turning point as far as energy usage is concerned. The events of the past winter show how precarious our situation is—precarious because we have allowed mild winters and the absence of any leadership in this field to lull us into complacency. Our energy situation today is not only as bad as it was during the Arab oil boycott; it is worse.

The answers to our problems have been around for some time: Conservation and alternative energy sources.

The technology already exists to save enormous amounts of energy in home heating, perhaps cutting our home heating usage in half. Case studies done by power companies in Michigan prove that energy-saving devices such as flue dampeners, electronic thermostats and pilot lights, small fuel input nozzles and insulation can produce fuel savings of up to 40 percent. Assuming a 10 percent annual increase in fuel prices, those conservation devices would pay for themselves within 5 years through decreased fuel bills.

Technology also already exists to bring alternate energy sources such as solar heating and water heating to homes, businesses and Government buildings. Energy-hungry regions of the Northeast could benefit from available systems as auxiliaries to oil and gas-fed furnaces.

A recent study performed by the Mitre Corp. for ERDA indicates that solar equipment is now cost-competitive with electricity throughout the country for space and water heating. As mass production brings down the cost even further, solar heating is expected to be competitive with all other forms of heating in most of the country by 1980.

What we are attempting to do with this package of bills today, Mr. Speaker, is make conservation and solar energy more cost competitive sooner by making it available to homeowners and businesses which might not have the initial capital to make the switch.

We are providing, first, loans, grants, and tax breaks to homeowners, businesses and community projects which install conservation and solar energy devices. These are designed to make initial investments easier, attractive, and making conservation and solar devices available to low- and middle-income homeowners. We are providing incentives and assistance to new businesses which want to begin manufacturing and installation of conservation and solar equipment. Even a 3 percent transfer from traditional to solar energy in the Northeast will result in 100,000 new jobs, according to a study by Massachusetts energy officials. The jobs would come in the crucial areas of the building trades which now are suffering the highest unemployment as a result of energy-related economic downturn.

We are also providing an example at the Federal level by opting for conservation and solar devices in old and new Federal buildings whenever possible. The key is to make sure that the cost projections made for these new devices take into account both the high initial cost of the equipment, and the lower fuel bills over the life of the building. Too often, solar or conservation equipment is dubbed "too expensive" by Federal building designers because they only look at the initial cost side of that equation, or because they ignore fuel savings to be gained during the entire life of the building.

Finally, our package would bring proper perspective to efforts at international development of energy sources. If we can be just as effective in selling solar energy and conservation to developing countries as we have been in selling nuclear energy, I think we will have made a significant contribution toward the proper development of economies in these countries.

By all this, I am not suggesting that conservation and solar technology is the panacea for our energy woes. But coming from a State where the combined cost of hot water and space heating in the average home is $800 for gas and oil users and $1,550 for electric users, I am encouraged by any prospect of lower energy costs.

Nor do I think today's package is the only answer. Our national energy policy has to address questions of prices and price controls, allocations and entitlements, both for oil and natural gas. And we have to promote both a better structure for electric rates and under use of the total energy concept for construction of electric generating plants which now waste up to 60 percent of their energy in unused heat.

But this package is a start, a good one, a comprehensive step. I hope that we can get these bills up for hearings as soon as possible, work with the administration to have the ideas included in its anticipated energy package, and provide some moneys for the programs in the fiscal year 1978 budget.

It is past time to stop talking about solar energy and start doing something about it.

Mr. BAUCUS. Mr. Speaker, 2 weeks ago, I introduced the Solar Energy for Homes Acts. The purpose of the bills was to remove discrimination against solar energy which results from provisions of HUD, VA, and FmHA housing loan programs.

In my statement of February 8, 1977, I indicated that removing discrimination was only the first step toward a comprehensive program for the extended use of solar power. Today, I am pleased to join several of my colleagues in cosponsoring a package of bills which represents a substantial second step toward increased development and use of solar heating and energy conservation technologies.

The bills which we are introducing cover six areas: small business, tax incentives, loans, agricultural applications, Federal buildings, and international assistance. The whole package is much greater than the sum of its parts. The bills are internally coordinated to a much greater degree than the overlapping and uncoordinated set of bills which we would have introduced if we had not been working together. Our package enjoys the support and cosponsorship of influential members of the committees which will have jurisdiction over the individual bills in it. The package represents the program for solar development with the best potential for being enacted into law by this Congress.

I am particularly pleased with sections of the small business and the agricultural applications bills. As to the former, it is high time that individual inventors and small developers are given direct and easy access to solar research and development funds. Many such individuals and small concerns in Montana have expressed their frustration to me about the way they are currently "crowded out" by the big labs, corporations, and universities.

As for the agricultural bill, I have long advocated the use of solar energy systems in rural areas, especially in the remote areas of Montana which are far from power sources but have more than adequate access to the sun. The proposed demonstration program will provide encouragement to those areas of the West which will suffer from hydroelectric power shortages later this year.

The progress made through cooperation by our group has been very encouraging. But we must keep in mind that introduction of this package of bills is only the first step. We have a long way to go before this package of bills becomes a reality. I pledge to do all that I can to see the rapid realization of that reality.

GENERAL LEAVE

Mr. FLIPPO. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks and to include therein extraneous material on the subject of the special order today

by the gentleman from Massachusetts (Mr. DRINAN).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

THE SICK PAY EXCLUSION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Maryland (Ms. MIKULSKI) is recognized for 5 minutes.

Ms. MIKULSKI. Mr. Speaker, I have today introduced a bill to reinstitute the exclusion of sick pay from the Federal income tax.

This bill would return to the Internal Revenue Code the same formula for excluding sick pay that was in force prior to the passage of the 1976 Tax Reform Act. It is not a measure to simply postpone the effective date of the changes mandated by the Tax Reform Act. Rather, it would permanently delete the provisons of sections 505 (a), (c) and (d) by which the sick pay exclusion was removed from our tax laws.

Mr. Speaker, the impact of ending the sick pay exclusion upon the average American citizen has been devastating. At the maximum rate provided, $100 weekly was excluded from gross income. To the hard-pressed wage earner struggling to make ends meet during a period of illness, this very limited exclusion offered some measure of much-needed relief.

To the wage earner, the easing of the tax burden afforded by this provision might well have made the difference between food on the family table and none, between making the monthly rent or mortgage payment and begging for relief from one's landlord or lender, between self-respect and the degradation of being unable to provide for one's own.

In comparison, the gain to the Treasury provided by the change in the law is meager. The Joint Committee on Taxation has reported that the increase in tax receipts obtained by ending the sick pay exclusion will amount to only $380 million in fiscal year 1977, $357 million in fiscal year 1978, and rise to only $450 million in fiscal year 1981.

My colleagues and I are daily confronted by legislative proposals which would result in multibillion dollar revenue losses with resulting benefits in no way as important as to accord tax relief to those suffering from illness so debilitating that it has caused their removal from the work force.

I know that in its deliberations over the Tax Reform Act, a most important piece of legislation with which I am generally in accord, the Congress was concerned about the complexity of the formula by which the sick pay exclusion was calculated. I submit, Mr. Speaker, that a more appropriate response to such concerns would have been to modify the formula. However, the total end of the exclusion was unjustified.

Mr. Speaker, I understand that Chairman ULLMAN intends that hearings on this matter be held in the near future by the Committee on Ways and Means. I am hopeful that when this subject is taken up in that committee, consideration will be given to a total deletion of the changes in the sick pay exclusion made by the Tax Reform Act.

A mere postponement of the effective date is not enough.

REVENUE SHARING AMENDMENT GRANTING A BONUS TO STATE AND LOCAL UNITS FUNDING EDUCATION FROM NONPROPERTY TAX SOURCES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CARR) is recognized for 5 minutes.

Mr. CARR. Mr. Speaker, today I introduce legislation amending the State and Local Assistance Act of 1972 to increase the revenue-sharing allotment to State or local jurisdictions which do not finance public education with property taxes. Under my proposal, each qualifying governmental unit will receive a 10-percent bonus above their scheduled share.

Most critics—educators, legislators, and taxpayers, alike—agree that financing education from property taxes is a poor idea. We need property tax reform not just to improve and equalize education but to relieve inequitable taxation as well. Experts feel that property taxes are regressive, that they take a proportionally higher share of income from the poor—the young, the old, the disenfanchised, the unemployed—than from the rich. Another sort of inequity occurs when property owners in one locality pay higher taxes than in another because assessments on similar property differ among jurisdictions. A third inequity is created by increases in property taxation that do not reflect increases in ability to pay: property valuations rise steadily year to year even though personal income may stay the same or even decline.

Property taxes also affect business, industry, and the urban and rural environments in which we work and play. New, well constructed, quality apartments are taxed more heavily than slums. A better, energy efficient machine might bring higher taxation than an old, inefficient, energy guzzling machine. One of the costs, for example, of revitalizing a stricken manufacturer in my own district is higher property taxes. Our property tax system creates a roadblock to renewing our towns, our industries, and our decaying inner cities. Exactly how much property taxes discourage capital improvements and investments is uncertain, but it is certain that property taxes do not encourage them.

Property taxes are unfair and socially disadvantageous. The way property taxes are used creates other problems. Unlike sewers, water, and police and fire protection, education has no direct link to property. Though every community has a general interest in the education of its rect benefits of schooling are not the citizens, the people who receive the dipeople who pay for the lion's share of it. Financing education by property taxes, moreover, leads to governmental fragmentation and districting inequities. Once an area sets a pattern of lower property taxes in one community and higher taxes in a neighboring community, those tax differences are likely to continue and compound. Business and industry will locate in the less-taxed community. New and expensive homes will seek the lightest tax burden.

In a similar way, property taxes will affect the way local government develops its community. Costly housing and clean industry are in a community's interest; dirty industry, small homes, and big families are not. In this economic climate, community zoning and planning become a hodgepodge of different intentions and directions. Instead of factories located in thoughtfully zoned industrial parks, homes located for peacefulness, clean air, and beauty and businesses set in accessible and accommodating facilities, each community, each neighborhood in a large city pulls against the other for the same benefits. The results pull, ultimately, against us all: districts with high property values maintain first-rate schools at artificially low taxes while nearby poorer communities face an increasing tax burden to pay for declining quality.

When State government observes uneven per pupil funding among its school districts it is charged by law to correct those imbalances. In 1971, the Supreme Court, in Serrano against Priest, held that "a child's education may not be a function of wealth other than the wealth of the State as a whole." Since State governments must bear the administrative expense of redistributing wealth to equalize education, property tax injustices, ironically, force another level of bureaucracy and cost into education to solve them. Our problems demand solutions which create additional problems in redtape and expense. None of it makes much sense.

Why have States and local communities not been able to settle these matters themselves? The fact is that they have tried. State constitutional referendums to separate property taxation from education or to provide new, alternate sources of revenue are constantly up for consideration. And constantly going down. One explanation is that State constitutional amendments dealing with finance generally fail much more often than they succeed. The complexity of proposals has frequently led to voter confusion, and citizens are typically reluctant to replace an old tax with a new one, a known evil for an unknown evil. Furthermore, groups which oppose specific details in a proposal for divergent and even conflicting reasons, also coalesce to defeat it. The result is that while almost all taxpayers support abolishing property taxes for education in principle, most have opposed it in its details.

My bill will help State and local governments to do exactly what they wanted to do all along: Find means to support public education other than through property taxes. The encouragement is a

10-percent bonus on a State's portion of Federal revenue sharing. This 10 percent is not meant to supplant property taxes as revenue for education. But it is an incentive.

My proposal is not interference with State and local sovereignty on the part of the Federal Government. Rather, it is in the long tradition of cooperation between the national government and State and local jurisdictions. The Federal Government aids State transportation by providing matching grants for roads; the Federal Government boosts employment in county and local government with its Comprehensive Employment and Training Act funds and the Federal Government provides money, through title XX of the Social Security Act, to State departments of social services to finance their support of such needs as foster care and chore service for the disabled. The Federal Government has long helped fulfill the goals of its State and local counterparts.

My revenue-sharing amendment makes sense. It makes sense because it creates a productive collaboration between State and local authority. It makes sense because it brings national resources to bear on local problems without the bludgeon of Federal regulations and restrictions. It makes sense because it facilitates an overwhelmingly supported action without forcing, dictating to, or coercing State and local governments. My amendment makes sense because it is the meeting ground between Federal encouragement and local autonomy.

CONGRESS SHOULD SUPPORT PRESIDENT CARTER'S ANTI-INFLATION MOVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. ANDREWS) is recognized for 5 minutes.

Mr. ANDREWS of North Carolina. Mr. Speaker, it is my understanding that President Carter, in an effort to combat what seems to be a great threat of increasing inflation, has among other things proposed a single capsule containing two items: One is that under present circumstances neither he nor the Congress seeks to impose in the foreseeable future wage or price controls. With that I strongly concur.

Second, he has asked that labor and business agree to give prenotification of any intent on the part of either to materially or substantially raise wages or prices. I understand that some very influential people within our country have indicated that they will not support, but instead will oppose, this second point.

I have today introduced a joint resolution whereby I seek that the Congress should declare itself in support of the President in both of these particulars in spite of any contrary opinions that might be expressed.

I feel that it is entirely reasonable that both labor and business sit down with the President and enter into an agreement whereby either or both will indicate any such intent, not to the end that any governmental restraint be placed upon them, other than an opportunity to negotiate and possibly reconsider these matters of such great importance to the parties directly involved and to our total economy and all of our people.

I hope the Congress will concur that labor and business should agree with the President.

NOT A TIME FOR DIPLOMATIC RELATIONS WITH VIETNAM OR FOR THE ADMISSION OF VIETNAM TO THE UNITED NATIONS

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter).

Mr. SIKES. Mr. Speaker, agitation continues among certain groups in the United States for diplomatic recognition of the Communist Government of Vietnam and for the admission of Vietnam to the United Nations. Apparently, the bitter 10-year struggle by our country to preserve the freedom of the Vietnamese people from Communist rule at terrible cost of life and treasure has quickly been forgotten. Perhaps there are some, even in our country, who were and are blinded by sympathy for the Communist cause in Southeast Asia. This is no justification for recognition of the Communists in Vietnam. They have consistently refused to accept the conventional rules of warfare; they have given only a partial and limited accounting of prisoners of war and MIA's, and this continues to be a matter of urgency and a source of grief to many people in our country. They were even callous enough to offer, in effect, to sell our country additional information on our POW's and MIA's.

The Communists in Vietnam have repeatedly called for reparations or aid from the United States. These demands have properly been rejected, but it is well to remind ourselves that we are a contributor to the U.N. and the U.N. is providing substantial aid to Vietnam. In the past 2 years the Communist Government of Vietnam has received commitments for more than $6 billion in economic aid. Much of this is through various international organizations which receive a disproportionately large amount of their funding from the United States. No other country has received pledges of so much economic aid within such a short period of time. The World Bank and the International Monetary Fund are also embarking on assistance programs for Vietnam. We provide substantial monetary support to both. I see no justification for U.S. aid to Vietnam in any form. Those who profess to feel that we owe a debt or reparations should look instead at the fact that we have nothing in common with the Communist leadership there. Our friends in Vietnam have been driven out of power. Many of them fled the country. Others are oppressed or they are in "institutions for reeducation" which is a Communist name for jails. A nation which follows these policies should have no place in the U.N. community of nations.

Now let me paraphrase some of the major arguments and proposals used over the last 10 years by Americans who opposed U.S. support for South Vietnam in its struggle to remain independent and non-Communist. These arguments have a familiar ring. Here is what we have been told.

The National Liberation Front is an entity independent of North Vietnam; therefore we should recognize it and deal with it.

Leaders of the Provisional Revolutionary Government have pledged a democratic system in South Vietnam with extensive individual liberties and no recriminations; therefore, the United States should bring about a coalition government to include the PRG and cease support for the repressive Thieu government.

The leaders of North Vietnam have indicated that they expect reunification to be a gradual, revolutionary process, taking perhaps five to ten years; therefore, the United States should accommodate itself to a communist-dominated government in South Vietnam and be willing to deal with it.

Such arguments and proposals often were heard within the halls of Congress; and, in hindsight, one can conclude that they did influence attitudes and policies in both the executive branch and Congress. We did negotiate with the NLF and PRG, thus undermining the legitimacy of the government of South Vietnam. We rarely cast a critical eye at PRG promises of freedom and democracy and concentrated solely on the Saigon Government's restrictions of individual liberties. And finally, we withdrew our troops and consented to a permanent North Vietnamese troop presence in South Vietnam. Secretary of State Kissinger, by most accounts, expected a "breathing space" of perhaps 5 years or more before Hanoi would attempt a takeover by force.

Mr. Speaker, we now know that these arguments were blatantly false and that the proposals supported by them served only to aid North Vietnam in its policy of absorbing and communizing the South. The NLF and PRG have ceased to exist. Hanoi formally reunified Vietnam 1 year after its military conquest. With the possible exceptions of Cambodia and North Korea, Vietnam is today the most repressive and totalitarian state in all of Asia. By most estimates, 200,000 to 300,000 political prisoners are incarcerated in the so-called reeducation camps. Elections are totally controlled by the Communist party, and the only right of emigration—a right this Congress holds dear when applied to the Soviet Union—is restricted to the successful escape attempts made by perhaps 5,000 to 10,000 people since the takeover. Even major segments of the U.S. antiwar movements have protested the denial of human rights in Vietnam, for example; James H. Forest, chairman of the Catholic Peace Fellowship, who was imprisoned in 1968 for burning draft records.

Mr. Speaker, I remind my colleagues of the false promise and the bitter reality

of these proposals and arguments, because some of the same people now are making proposals for the establishment of full diplomatic relations with Communist Vietnam and admission of that country into the United Nations. There are indications the new administration may be giving serious consideration to them. These proposals are supported by several arguments that ought to be critically examined.

There appear to be two major arguments which are used in support of U.S. diplomatic relations with Vietnam. I would term the first the "moral rationale." Briefly stated, it holds that we owe the Vietnamese people a debt because of our "immoral" involvement in the Vietnam War. We could debate the morality or immorality of our involvement all day. I would just say that, in my view, the real moral question in Vietnam today is the systematic repression of the Vietnamese people by the regime in Hanoi. One, I think, must stretch a point to argue that unconditional recognition of Vietnam and U.N. membership would affect the internal political policies of the regime.

The "moral rationale" also links diplomatic relation with U.S. reconstruction aid. Proponents of this argument view aid as the chief method by which the United States should pay its "debt" to the Vietnamese. By no stretch of the imagination do we owe a debt, the shoe is on the other foot. Aid, however, is not necessarily tied to diplomatic relations. For example, the huge U.S. food aid program in Russia after World War I was implemented despite the absence of U.S. diplomatic relations with the Soviet Government. It is not necessary to remind ourselves that aid can also be channeled through international lending agencies and in fact, this is taking place now. We are a contributor to the U.N. and the U.N. is providing substantial aid to Vietnam. As I stated previously, in the past 2 years, the Communist government of Vietnam has received commitments for more than $6 billion dollars in economic aid. This is through various international organizations which receive a disproportionately large amount of their funding from the United States. All of this for an outlaw nation.

Another argument used by the proponents of recognition may be described as the "Titoist rationale." It states that by extending diplomatic relations, aid, and trade, the United States can influence Vietnam to occupy a position with the Communist world and within Southeast Asia similar to the position of Yugoslavia in the European context.

For the "Titoist rationale" to be valid, Vietnam would have to adopt certain courses of action. First, it would have to act independently of and not in alliance or association with Soviet policies in Southeast Asia. Second, it would not attempt to subvert its non-Communist neighbors. Third, it would have to liberalize its internal political system in a manner similar to Yugoslavia. Certainly, one cannot say categorically that Vietnam will or will not move in these directions.

These factors work against the adoption of a Yugoslav type stance by the Vietnamese. Contrary to the Yugoslav Communist Party's self-reliant struggle against the German's World War II, Vietnam became completely dependent on sophisticated Soviet weapons, equipment, and training during the last 5 years of the Vietnam war. Vietnam's current policy of maintaining a large, well equipped armed forces make likely a continued dependency which will perpetuate the strong links between the Soviet and Vietnamese military establishments.

The Russian arrangement also provides Vietnam with considerable power support against China. In 1948, Yugoslavia saw the Soviet Union as an immediate threat to its independence. Today, Vietnam views China as the threat. They compete to an extreme with China in promoting Communist movements throughout non-Communist Southeast Asia. The Soviet Union has signalled that it plans to step up subversion in the region and increase its efforts to woo Southeast Asian Communist parties away from their orientation toward China. The Far Eastern Economic Review has documented this Soviet role in its December 31, 1976, feature article on the "KBG in Asia." With the assistance of Vietnam and Laos, Soviet arms and money have begun to reach the Thai insurgents and there are increasing signs that Vietnam and the Soviet Union are pushing hard to reorient the Thai Communist Party away from China and toward themselves.

The arrangement with the Soviet Union provides Vietnam with support for major policy objectives that the United States cannot offer. We are not going to give Vietnam sophisticated arms and military equipment. U.S. policy does not seek to contain China, especially in association with Vietnam and the Soviet Union. U.S. policy will not support Vietnam in subverting its neighbors. Diplomatic relations will not alter these fundamental factors and linkages in Vietnamese policy. The Yugoslav analogy just does not apply.

It also does not apply with regard to internal political policy. Since the 1948 break, Yugoslavia gradually has liberalized its political controls so that today there is a measure of freedom and diversity within the country. On the other hand, Vietnam remains as repressive as the North Vietnam state was after 1954. The Soviet-Stalinist type institutional structure remains in place, and the draconian imposition of that structure on the South gives one little hope that the Government will liberalize.

Those who seek to use the Titoist rationale grossly overemphasize the ability of the United States to influence Vietnam to move in the direction followed by Yugoslavia after 1948. A U.S. Embassy in Hanoi will have no more influence on the Vietnamese government than Lyndon Johnson's policy of gradual escalation had on Hanoi's resolve to carry on the war. After all, Yugoslavia relied on U.S. military power in Europe, rather than the U.S. Embassy in Belgrade, to help maintain a degree of independence of the Soviet Union after 1948. The fact is that neither the U.S. Government nor the American people are willing to project American power into Southeast Asia sufficiently to influence the course of events in a similar fashion.

I believe that U.S. policy on the questions of diplomatic relations and admitting Vietnam to the United Nations should not be based on vague concepts of "moral debt" or dubious expectations that diplomatic niceties will alter fundamental Vietnamese policy objectives. Rather, the United States should view them as acts subject to negotiation with Vietnam that will require specific action on Vietnam's part. First, we should insist on a full accounting of American MIA's and outside verification of Hanoi's information. Second, we should insist that Vietnamese refugees enter or be allowed to leave Vietnam if they so wish. Finally, assuming the Carter administration is sincere in its stated concern for human rights, we should insist that Vietnam give outside observers complete access to the so-called reeducation camps in the South. This refers to possible recognition and membership in the U.N., not to aid. There should be no aid to Vietnam from the United States.

I trust the administration will follow a realistic policy on the issues of diplomatic relations and U.N. membership for Vietnam.

HILLEL BUTMAN

(Mr. EILBERG asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. EILBERG. Mr. Speaker, last year, I organized a congressional vigil for Soviet Jewry, during which individual Members described the plight of the persons and families who have been denied the basic human right of emigration. Since that vigil ended in September, several of the "Orphans of the Exodus" have been allowed to emigrate to freedom in Israel and other Western countries.

There are, however, thousands this day who are awaiting an exit visa so that they can start life anew in a nation willing to accept them. Having stated that they have a desire to leave the Soviet Union, these Jews have been labeled by their fellow countryman as traitors and as such have been jailed, ostracized, fired from their jobs, or exiled to Siberia. One such refusenik is Hillel Butman.

Mr. Butman is presently serving in the most severe and horrible prison in the Soviet Union. He has completed 5 years of a 10-year sentence.

Butman was accused of taking part in the preparation of a plan by a group of people to flee from Leningrad to Israel illegally by airplane. At the time that the crime was planned and committed, Butman was vacationing with his young daughter away from Leningrad. Hillel Butman is absolutely and completely innocent of the crime of which he was accused and of which the Soviet judicial system deemed him guilty.

Butman is a prisoner in Vladimir Pris-

on. His diet is nonappetizing, nonnutritious, and is eaten because the only alternative is starvation. This diet, combined with forced labor for long hours every day, has left Butman physically emaciated and if this treatment continues, then there is little chance that Hillel Butman will live to see the end of his sentence.

Butman is 43 years of age, married, and the father of two. His family is presently in Israel. According to Soviet law, every prisoner is entitled to meetings with his wife and children. Hillel Butman has been denied this right as he has been permitted to see his wife only twice in the past 5 years, while he has been forbidden from seeing his children even once.

Miraculously, Hillel Butman has not lost hope. In the following letter to the chief of the Perm Administration of Corrective Labor Establishments, Butman describes his plight as a prisoner in a Soviet jail.

Hillel Butman must not be abandoned. As long as the American people and their Government continue to support the desire of all Soviet Jews and others who want to emigrate, they will have hope.

At this time, I enter into the RECORD Hillel Butman's letter:

STATEMENT BY PRISONER H. I. BUTMAN

CITIZEN GENERAL: During this year I have sent you two short statements dealing with the arbitrary actions of the Administration in the zone I am kept. However, you, Citizen General, are probably a very busy person, and I strongly suspect had simply no time to look at them. I have therefore decided to write a third statement, not in the ordinary, dry official style but in a somewhat artistic form. Let the tiring hours of your work be interrupted, even if not for long, by what, I hope, will turn out to be interesting reading.

Since my statement is to be artistic, I am entitled to use a literary approach. I shall use a single one, everything else will fully coincide with the facts, will be the truth and nothing but the truth. And now about the artistic method. At first I thought of writing about myself in the first person, of others in the third, and to address you, naturally, in the second. Then I decided that this would be too boring for you. And I decided to have us temporarily change places (this, in fact, is the approach) for the sake of better illustration. Thus, I sit in the armchair that was formerly yours, yawning, and glance at boring complaints (including the present one). And you, what are you doing in the meantime? You have undergone a horrible metamorphosis. You have become not just another prisoner (this can happen to anybody, and truly it is said "exclude not prison and the beggar's bowl"). You have become a Zionist!

Don't worry, not a Zionist of the kind you have read about in the Soviet press, there are none like that in reality. You have neither horns nor hoofs, and in the bath no one would be able to distinguish you from a normal Soviet citizen. You are simply a Jew (please excuse the expression) for whom Soviet citizenship has become a burden greater than Earth is to Atlas, who did not want all his life to think one thing, say a second and do a third, who wanted to move his body to where his soul has long since been abiding—from the Baltic Coast to the Mediterranean. For this you were given ten years of strict regime.

(To illustrate this better let me mention in passing that the last Reichskanzler of Nazi Germany, Admiral Doenitz, too was given ten years at the Nuremberg trial). And now you are in the prison camp. A wonderful place in the forests on the approaches to the Urals. You are very lucky. You have already grown accustomed to the climate in the Urals and you will not freeze through the long winter as will Bagrat Shakhverdyan and Razmik Zograbyan, your new friends from Roumania; thank God, you will not suffer from daily migraines from the constant changes at atmospheric pressure, as will Ivan Svetlichny and Vasil Zakharchenko, the Ukrainian writers.

You are very lucky indeed and need have no fear of thieves. The Administration has thoughtfully enclosed your area with fences, wooden ones and such made of wire; it has enlisted athletic-looking young men from sun-scorched Central Asia and vigilant northern police-dogs to guard your peace. And even thieves who can run as quick as a greyhound and jump like Brumer, the legendary Soviet sportsman, will not be able to reach you.

You have been very lucky, for the Administration guards you like the apple of its eye. As soon as you wake up the Administration counts you for the first time—at the morning roll call. When you go to work it counts you a second time, at noon you are counted again, at work. You return from work for the fourth count and at the evening roll call you are counted for the fifth time. And at midnight, when possibly you are asleep and even unable to acknowledge it with a grateful look, your sleeping bodies are counted for the last time, the sixth.

Can the prisoners of the Chilean junta expect such a considerate treatment? Of course, not. True, you were a little put out when you read in "Beyond our Borders" how Corvalan, dressed in a white shirt and light blue trousers, calmly discussed things in the yard, eye to eye, with an Italian progressive lawyer (heavens, how could they be bugged, after all, they talked not in the room for meetings, but in the yard). You sadly glance at your grey bag-like suit, the only one you have and which you wear when at work and when not at work. You saw your white shirt and light blue trousers for the last time on the day you were arrested—on June 15th, 1970—six years ago. But do not get discouraged. For you have something that he does not have.

He has a white shirt and light blue trousers, but you have a beautiful tag on your jacket, on the chest, and on your padded jackets as well. It gives your name, initials, and the number of your team. It's almost as though you were a milch cow with a record yield. True, you were a little put out when you heard that President Allende's former personal physician, now a prisoner, continues to practice as physician also in the camp, and does everything to alleviate the sufferings of his fellow prisoners, while the only physician in your area, the Kiev psychiatrist Slava Gluzman, was not even allowed to work as medical attendant (no prisoner is authorized to practice as physician) for having taken the Hypocratic Oath too literally. But do not grieve.

After all, comrade Corvalan sometimes does not feel too well, but you are healthy. Like every healthy Soviet prisoner you have a sick heart, a sick stomach and sick teeth: neurosis, gastritis and paradentosis. And a few more things it would be better to keep quiet about—after all, the many hunger-strikes leave their mark as well. How lucky you are that you are healthy. For you know only too well what it means to be ill in camp. True, you were a bit put out when you were informed by "Journalist" that the Chilean political prisoners have a wonderful amateur dramatic troupe, that they sing, dance, carve on wood and metal. And then you find that this is not surprising for in the camps of the fascists junta labour is voluntary: if I feel like it, I work, if I don't want to, I don't, like in a fairy tale. At first you didn't even believe, but then you looked at the names of the authors of that article in "Journalist". Two reporters from German Democratic Republic. They are respectable people, such are not likely to deceive you.

Moreover, they took a film in the camp, for those who believe and those who refuse to. But do not grieve they haven't learned yet that work is a source of longevity. And if you are placed in the punishment cell for having left your place of work, no-one wishes you grief. The administration wishes you many years of life. If you dream to see in your plate a piece of meat, it is a sign that the devil inside you does not yet slumber. You quite forgot, meat would shorten the additional span of life you managed to obtain by doing daily coercive labour at the factory. Perhaps, you would have been a little put out if you had seen that comrade Corvalan has preserved not only his white shirt and light blue trousers, but also his hair. And then remember how they handcuffed and shaved the head of Orlovich, who out of religious convictions insisted that it be left unshaved, how they shaved the head of Tolya Altman, your friend and fellow citizen of Israel, whom they first handcuffed as well, and how they handcuffed and shaved off the moustaches of your Ukrainian friends. But abandon these evil thoughts.

Everybody knows today how good ultraviolet rays are for your health, and that it would be difficult for them to penetrate in the morning through your hair, and through your moustache. The instruction on being cleanly shaved took your health into consideration, the health you are so lightheartedly willing to squander.

Sometimes, perhaps, the suspicion enters your mind that all this: the bag-like clothes, and the shaved heads, shaved by order, and the roll calls everywhere—to work, from work, to the dining room and from the dining room, and the siren that wakes you, and that lulls you to sleep, that perhaps all this has the purpose of killing your individuality, of killing in you the ability to think and act as an individual, of your own will, not by order, that perhaps it has the purpose of changing you into a robot who starts to salivate at the sound of the siren calling for lunch.

Into a robot like the former policemen around you, who jump up when they see a Soviet officer, as they jumped when they saw Hitlerite officers, who hurriedly remove their caps and in a trained voice shout: "Good morning, Citizen Chief!", as they once shouted: "Good morning, Herr Obersturmbanfuehrer!", at the time when they were executing my relatives in the ditches of Tonar and Babiy Yar. Rather, your relatives, sorry, I forgot for a moment that we had changed places. Maybe its their obsequiousness, their habit for self-debasement with respect to those who are above them, and their unharnessed sadism with respect to those who are below? No, this is a requirement of Order Number 2020 of the Ministry of the Interior. Self-debasement is obligatory. By order.

And now please remember the first of the two short statements you wrote me following your return from the Vladimir prison. Do you remember its content? You were sitting in the reading room and writing a letter to your wife in Israel, when Captain Polyakov, the Assistant Chief for Regime, walked in. He knew that you wouldn't do what is easy and simple only for trained slaves. There was laughter in his eyes. Without greeting you (millennia-old standards of politeness are but an atavism) he towered above you:

Well, Butman, are you going to greet me,

or not? You had only one choice: self-humiliation or to humiliate him. You did not get up, did not take off, did not say. The result—seven days in the punishment cell. Were you ever confined in a punishment sell? I was, often. I can explain it in easily understandable language (sorry, once again I have forgotten who is who). The punishment cell re-educates with cold and hunger. Hot food is served every other day, if what is served can be termed "hot food" at all. The bed is folded against the wall, and let down only at night. If it were warm, one could use one's shoes for a pillow (no bedding is issued) and try to fall asleep. But it is warm in the cell only if you are lucky, and your hungry body, as if to spite you, does not generate heat. The only way out is to tremble as rapidly as possible, as the camp wits maintain. For a person who is not perpetually hungry it is easy enough to go hungry for a while. For a person leaving a warm room it is easy to bear the cold. But for a hungry person to be kept in the cold is too effective, a re-education for the refusal to dance at one's own funeral.

On the other hand, you have much time in the punishment cell (if you are not taken to work), time to think and to remember things. For example Article 1 of the Corrective Labour Code of the RSFSR. What a nice humane article: Punishment in the USSR does not have the aim of causing suffering, either physical or moral. You are so naive that when you leave the punishment cell you write a complaint about Polyakov to me, the Chief of the Perm Administration of Corrective Labour Establishments. This is your first statement of the two short ones which preceded this one, the artistic one.

And a month later I, a general, one of the few, received again a statement from you, one of the many. I made a wry face, for I was beginning to get fed up with you. Very well, let's see what you are dissatisfied with this time. It appears you are dissatisfied that you have been deprived of the privilege of buying five roubles' worth of goods once a month and of receiving once a year a parcel weighing five kilograms. You have been deprived of these two privileges simultaneously. You had been lying during the day in your spare time in bed, true, undressed and covered with a blanket, still . . . And at the "Educational Commission" you did not admit having committed a crime, did not wish to discuss the matter, well, pride rides for a fall. You were overdoing it, citizen Zionist. But then you have two certificates of higher education, and your case made a lot of noise, and on top of it there is that silly détente—I guess, I better send someone to check, just to make sure. He, the controller, knows what is wanted of him: of course he'll never reach your camp, and he will not have you called, although he will have arrived in connection with your case from the regional centre. He will deliver to me the report that I expect of him: it appears that not he, but you are the one that persecutes, that you persecute poor Polyakov.

And here, at last, we see Zionism on the rampage, it began with the innocent lying under a blanket during the day (true, undressed and during leisure hours, yet . . .) and now has reached its apogee. Only a month has passed . . . and here you go again. And the further, the worse it gets. You were taking from the storeroom two albums with postcards to your section, and senior lieutenant Kuznetsov prohibited it . . . so as not to dirty your section (true, it seemed to him that these were books, and the senior lieutenant hates books fiercely and ferociously and the expression of Colonel Skalozub—"if only one could collect all books and burn them"—laconically expresses the senior lieutenant's cherished dream, which, by the way, does not stop him from being the ideal pretender for the position of Assistant Chief of the colony on political matters).

You replied to him saying that this was strictly your business. The report will state that you had been using insulating language. It does not matter that you are entitled to, that you are allowed to have with you your personal letters and postcards, and without any limitations. It is also of no importance that you are even allowed to have with you five books (just in case, if you had really been carrying books). It is not important that punishment does not set itself the aim of degrading your dignity. It is quite sufficient that Senior Lieutenant Kuznetsov and Captain Polyakov have set themselves this aim.

This month—a punishment, next month—a punishment, next month—a punishment again. What for? You have been a prisoner for six years already and understand what they are after. You are being prepared for Vladimir Prison. You left it only five months ago when you returned here. You don't even have to be confined to the isolator. All that is required is to attach a few papers to your file, and the flow has already started: refused to greet an officer, was lying during the day in bed, tried to dirty the section.

And now it is up to the court, and the court knows its business: in just a few minutes the court will deprive you of three years of life in the present, and it is difficult to say of how many in the future. It does not matter that your family is waiting for you in Israel, that your youngest daughter watches with tear-filled eyes how other fathers come to the creche to fetch their daughters, it does not matter that your eldest grows as an orphan even though his father is alive, it does not matter that your wife begs you in every letter to save what health you have left. She does not know that almost every day you face the alternative: what health to preserve—your physical or moral health.

Jump to your feet when your executioner enters the room, assume the "attention" position, and remove your cap and shout "Good morning, Citizen Chief!", then wait, perhaps he will even condescend to answer you, and everything will be well. You will not be sent to the punishment cell, you will preserve your physical health, and there will not be yet another paper in your file.

You were called to the "Educational Commission", the fact that you were lying in bed during the day was being discussed. You stood in the middle of the room, no one offered you a chair, while a dozen or so vivacious "educators", who because of the constant meetings never had had the time to read the section of the rules dealing with your rights (they had read only the one describing your duties) sat there and looked you over unceremoniously, and every one of them sought to outdo all the others in humiliating you, for the commission was headed by your executioner and this was more important than truth. If you had tried to justify your behaviour, asked for indulgence, humiliated yourself together with them, maybe this would have helped you and no new paper would have been added to your file. But you knew that lying in your spare time in bed has never been prohibited.

Indeed, one is not allowed to lie in one's clothes, but you were undressed and next to you other prisoners were doing the same. Senior Lieutenant Kuznetsov chose you. It would be surprising if in addition to all his other merits he were not an anti-Semite as well. A swarm of memories passes through your head. A motley mosaic of mockeries and humiliations the official name of which is the Corrective Labour System unrolls before your mental vision.

Everything that happened since the last time when you were putting your four-year-old daughter to sleep, whilst they were already waiting. "Are these your friends Papa, will you return soon?", the little one asked trustingly. "Yes, yes", you lied to your daughter, not for the first time. Now she is almost ten (once, on the last page of the "New Time" journal, in the "Believe It or Not" section you read a sarcastic remark saying that the South African authorities are afraid of a little girl and do not permit her and her mother to leave so that they could meet their father—a political prisoner. You discovered that that little girl and your daughter are of the same age. And your daughter and your wife are also year-in-year-out vainly trying to obtain entry visas to see you.

Both one and the other is taking place after the Helsinki Conference. The difference is purely geographical. There it is South Africa, here the Soviet Union. However, we have strayed from the subject. You have not forgotten that you stand in the middle of the room like a naughty schoolboy, and they "educate" you. You who dared to sleep in bed during the day. They educate you while you remember. You see how your relatives who have arrived to see you are forced to undress until there is not a stitch left on them, you see how your wife and your sister, who have traveled for thousands of kilometers from Leningrad to see you for two hours, are unceremoniously kicked out and sent back because you, allegedly, wear your hair one centimeter longer than provided for by the rules.

And you remember other things, many other things. And it is only from time to time that the voices of the members of the commission penetrate to you, as if from a dense fog: "refuses to be re-educated, does not realise, deliberately lies in bed". And among those voices, their voices, which you will now recognise always and remember forever, to the end of your life, there are those belonging to Lieutenant Kuznetsov and Captain Polyakov. You will remember their names. Someday when they will be sitting on the bench of the accused you will remember their names.

And again you are faced with a dilemma: to debase yourself together with them or . . . you choose the or. You tell the commission what you think about the methods of their education and leave. Naturally, you speak loudly, excitedly, you are as yet not a robot and human feelings are not dead in you.

Yet, although in your little monologue you did not use a single impolite word, yet another paper is added to your file, yet another paper bringing you closer to Vladimir. To Vladimir, the Capital on Klyzma River. You left it only five months ago and about forty of your friends are probably still languishing in those very same cells. Ahead of you are transfers, from one place to the other, and jails. You have passed through dozens. You know long since what every Soviet prisoner knows: even if someone, on whom something depends, should understand that the present "educational" system is not only barbarian but also completely senseless, for all it can do is breed hatred, even if concealed, and even if it is changed the result will still be the same until there exist the transfers as they are today. The theatre begins with the cloak-room, the camp with the transfer. Anyone who went through one of these Soviet transfers only once will remember it forever.

And if he should live to a ripe old age he will still sometimes cry out in his sleep because he dreamed of being on a "transfer". This is something I still have ahead of me, as probably do you, now sitting in your general's chair. My fate, who cares about it, as is sung in a little song (forgive me, I have forgotten again that we have changed places,

somehow I can't get used to your place, as probably you cannot get used to mine). Vladimir is a town on the Klyazma River.

The tall walls of that prison could tell many a tale. Fedoseyev, the young Lenin's teacher was confined there at the end of the past century. You probably recently read in what conditions he found himself. He sent nineteen letters a month to his relatives and friends. When you arrive in Vladimir you will write only one letter in two months. Fedoseyev complained that dozens of prisoners were all the time loitering in the yard and corridors, that political quarrels and meetings were flaring up all the time, that they stopped him from working (i.e., from writing articles).

Luckily, you are spared all this. You'll see the same faces for years on end. And the people would have to be angels not to begin to hate one another during that time. Even good people are only human, after all. One likes music, the other quiet. One would switch on the radio, the other switch it off. One enjoys tobacco smoke, the other hates it. One snores at night, the other suffers from insomnia.

And all this against the background of semi-starvation (the first month following arrival is officially a hungry month, by order of the Ministry of the Interior), punishment cells, slow asphyxiation. Yes, yes, I have made no mistake. The five leaders of the December mutiny in Petersburg were hanged and died of asphyxiation immediately. In the case of two the hangman's rope broke. They were immediately taken to the gallows again, and were not left to gasp for air for long.

In the Vladimir prison of today, however, the cruel Tzarist days, when prisoner Frunze breathed deeply in his cell, have long since been consigned to oblivion. Frunze would not recognize his cell today. The cell that formerly housed three people, now houses six. Where the air formerly passed through a single iron bar, it now has to pass two. And today in front of the window there are blinds, so dense that one can barely see through them. They stop your glance, hungry for the sky, which is barely visible (the blinds are so adjusted that you will never see the earth).

When a person who is hanged suffocates, he suffocates quickly, and turns blue. When a prisoner of Vladimir suffocates, he suffocates slowly and turns white. In Vladimir prison there are many little pleasant things, but I shall not write about them, for my statement has become too long already, and it probably is time for you to go home.

You are probably an ideal family man—a loving wife and obedient children are expecting you. This time I have addressed you as you, and not in error, the artistic approach has come to an end. I do not know whether you have understood anything, having been in my place, but I can stand your chair no longer. Apart from everything else, I want to change back for purely practical reasons.

I firmly believe that the time will come when the Polyakovs and Kuznetsovs will have to face an honest and impartial court for having refused us prisoners even the few sparse rights granted us by Soviet laws. I am afraid that by remaining in your place I shall have to bear my share of responsibility for what was going on in the Administration under my command. I should not be even able to say that I did not know what had been happening, for your statements, dug out from the archives, would shout: "I knew, I knew, knew".

PAUL WARNKE—CLARIFYING THE ARMS CONTROL DEBATE

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, the lead editorial in today's Washington Post points out that the battle over the nomination of Paul Warnke as Director of the Arms Control and Disarmament Agency and chief negotiator for the Strategic Arms Limitation Talks, by bringing about a full public debate on the issue of arms control, is a blessing in disguise. As the editorial points out, the hearings have allowed Mr. Warnke to present, in his usual lucid and dignified manner, the reasons for believing that prudent arms control measures can enhance national security.

This view has been too little emphasized in the debates of recent years. Too often, those who have supported such arms control measures as an alternative to the ever escalating and ever more threatening strategic arms race have been denounced in simplistic terms as though they were ignoring the very real threat of continuing Russian military buildup. Obviously, in the absence of mutual, verifiable arms limitations and reductions, our country has little practical alternative to a continued buildup of our own as a means of maintaining a strategic balance. Yet, it should be equally obvious that maintenance of the strategic balance at levels that do not threaten the very existence of the human race and that do not devour every year enormous chunks of the world's scarce resources is an objective that must be pursued unremittingly.

The negotiation of strategic arms limitation agreements is a process that offers hope that such an objective is feasible. President Carter has made this objective a major goal of his administration. An absolute majority of the Members of the House have signed a resolution stating their support for his goal.

In Paul Warnke, the President has found a person with appropriate knowledge and experience who is likewise dedicated to achieving that goal and who is a negotiator of incomparable skill and lucidity of thought. Mr. Speaker, I have known Paul Warnke for over 30 years, ever since I was a student at Columbia Law School, where he was editor of the Columbia Law Review and, I might add, was universally admired by faculty and students alike. Everything I know about him confirms that he is a patriot, a thinker, and a public servant of the highest order.

It remains to be seen how the Russians will respond to the President's initiatives. The only way to find out is to try. The only way to make sure that we have overlooked no reasonable avenue toward putting a cap on the nuclear arms race is to give the President a team that is as dedicated to his goal and is as competent as can be found. Besides clarifying the issues, the Warnke hearings have clearly established that Paul Warnke is the appropriate person to head that team. He and President Carter deserve our full support in this momentous task.

I insert in the RECORD today's Washington Post editorial in full following these remarks:

A MANDATE FOR ARMS CONTROL

The battle over the Paul Warnke nomination is a blessing in disguise. To judge by the topheavy vote for his confirmation by the Senate Foreign Relations Committee yesterday, President Carter is virtually certain to get the man of his choice as director of the Arms Control and Disarmament Agency and chief of the SALT negotiating team. But thanks to the full public debate, inside and outside the Senate, Mr. Carter is also getting a broad and informed mandate for conducting the strategic arms negotiations with Moscow, which he has marked down as an administration priority. The hearings before Foreign Relations provided the first forum for this educational exercise. But the real credit must go to Armed Services, whose hearings (continuing today) have allowed Mr. Warnke to meet some of his severest critics and to demonstrate—if not to all of them, then to a great many other observers—that prudent arms control measures can enhance national security just as prudent arms-building measures can.

The first line of attack upon Mr. Warnke, and in effect upon the whole concept of arms control, has been that he favors "unilateral disarmament" or "unilateral abandonment" of American weapons programs. The charge is a canard. What Mr. Warnke has favored—in slack periods when formal negotiations are at a standstill—are selective and carefully monitored probing efforts to see whether a brief pause in a particular American weapons program would help break the impasse by eliciting a matching Soviet pause; if not, the deal is off. This is to "unilateral disarmament" as writing a cancellable check is to opening the vault. In fact, as Mr. Warnke made clear in his response to Sen. Jackson, those programs he has "opposed" he opposed on grounds of poor cost-effectiveness and/or military inefficiency. Arms control, like arms building, requires judgment. The matter is as simple, and as complicated, as that.

Mr. Jackson, not alone, further suggested in so many words that the nominee had trimmed his past views to win confirmation. The question permitted Mr. Warnke to point out that proposals made in one context, say, when Moscow has no MIRV's, may not suit another context, say, when Moscow does have MIRV's. In such a situation, consistency of detail could be deadly, as Mr. Jackson surely knows. To a similar charge of inconsistency from Sen. Bartlett, Mr. Warnke was able to point out that the positions he was accused of failing to reconcile (on the Vladivostok accord) were 1) not inconsistent and 2) shared by Sen. Jackson.

A third line of attack was that the Kremlin's awareness of Mr. Warnke's acknowledged and well publicized "dovish" views could undermine his effectiveness as a SALT negotiator. He might, for instance, be called upon to argue for certain American weapons programs that, as a private citizen, he had argued against. The question is fair. It seemed to us that Mr. Warnke answered it squarely. He said that he would not be embarrassed by any previous personal positions he had taken, that he would be representing the position of the American government, and that the Russians would know from his performance at the table whether he was a serious negotiator.

Mr. Warnke's lucid and dignified performance as a witness has to be regarded as a personal tour de force, and as a thoroughgoing vindication of the President's judgment in nominating him. Beyond that, he has performed an estimable service in explaining the special and inadequately understood

purpose of arms control, namely, to provide an alternative and complement to the production and deployment of more arms in enhancing national security. We hope that the Senate will confirm him with a vote reflecting the nation's urgent need for a safer world.

WASHINGTON POST ARTICLES CONTRIBUTE TO A BETTER INFORMED NUCLEAR ARMS DEBATE

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, on Sunday, February 20, the Washington Post commenced a series of indepth articles on the nuclear arms race and the debate surrounding it. This kind of balanced presentation of the various points of view has been long overdue. We are accustomed to having one-sided presentations by the Pentagon, but we hardly ever receive any equally detailed and objective presentations of both sides of this issue. Considering that the stakes are the very existence of our Nation and, indeed, of mankind itself, it is crucial that the public and the Congress begin to get a more sophisticated understanding of the issues and the alternatives.

The Washington Post series appear under the overall caption, "Is Anybody Winning." The Post does not attempt to answer this question leaving it to the reader to form his own answer. But it seems obvious that, whether one side or the other may seem to be "ahead," the only way anyone is going to "win" this grim race will be if it is ended by the eventual elimination of all nuclear weapons, and eventually other weapons of mass destruction.

President Carter has made the reduction and elimination of nuclear weapons, through negotiation and agreement, his goal as President. His commitment requires steady work toward that goal, while maintaining a sufficient balance that no nation will be tempted to take advantage of its nuclear arsenal.

Last year, the MCPL Education Fund held a series of afternoon discussion-seminars in which numerous experts, such as Zbigniew Brzezinski, James R. Schlesinger, Thomas Halsted, Herbert Scoville, and others, presented various points of view on the strategic arms race. I offered summaries of each of those presentations for printing in the CONGRESSIONAL RECORD at that time. Reprints of those summaries are still available through my office.

I am sure that every Member desires, indeed, is obligated, to be objectively informed on this issue. Accordingly, I am offering the first of the series of Post articles for printing in the RECORD following these remarks. The first article is by William Greider and is entitled, "U.S.-Russian Arms Debate at Crossroads." This article sets forth the basic arguments of the various proponents in the strategic arms debate:

U.S.-RUSSIAN ARMS DEBATE AT CROSSROADS

(By William Greider)

If Washington could be set to music, what we would hear right now is a lot of heavy drums. Ominous rumblings from academic tympanies. Martial tatoos by the Pentagon snaredrummers. Scary messages from a network of media tom-toms.

What are the drums saying? The Russians are coming. The Russians are getting stronger. The Russians are thinking the unthinkable. Nuclear war? Yes.

What shall we do? We must prepare, the drums tell us. We must become stronger still. We must build new and more powerful weapons to scare away the Russians.

Now the din of these drums has been building steadily in this town for two years, but recently their thunder has been interrupted by a different theme—a winsome flute playing sweet music. Don't panic, says the flute, the world can be beautiful, a world without nuclear weapons, a place without all those damn drums.

The flute part, of course, belongs to President Carter, who entered office last month directly challenging all those grim predictions about Soviet strategic military superiority. The drums belong to a broad array of hard-line global thinkers, from generals and ex-generals to academic theorists to skeptical politicians, all asserting that once again America must tool up to counter the buildup of Soviet weapons.

A flute against drums. The music metaphor roughly describes the political gamble with which President Carter has launched his new administration. Carter is challenging the political dynamics that have guided the arms race for a generation and forced the hand of every modern President since General Eisenhower, the last one who successfully resisted these periodic alarums of the nuclear age.

President Carter first offered the vision of disarmament in his inaugural address: "We pledge perseverance and wisdom in our efforts to limit the world's armaments to those necessary for each nation's own domestic safety. And we will move this year a step toward our ultimate goal—the elimination of all nuclear weapons from this earth."

Since then, Carter has sketched out bold ambitions for additional arms treaties with the Soviets. He speaks optimistically of a quick accord to confirm the broad agreement that President Ford reached at Vladivostok in 1974. Beyond that, he foresees a comprehensive ban to halt all nuclear testing, a move that would foreclose the development of new and more exotic weapons.

"If we and the Soviet Union can demonstrate an ability to stop the present growth," Carter said, "and then to have substantial reductions, I believe then we can go to the French, British, the Chinese and others and say: 'Would you join us in stopping testing and in moving in clearly monitorable ways to reduce dependence on atomic weapons?'"

Carter's image of American-Soviet cooperation, the two nuclear rivals leading the world to disarmament, is a provocative theme which puts the new President in direct confrontation with the message from the drummers, not only his predecessor Gerald R. Ford and the Republicans, but a substantial portion of the opinion leaders in the Democratic Party. They cannot both be right.

The alarms over ominous Soviet military growth have been sounded by defense politicians (Sen. Henry M. Jackson and James R. Schlesinger Jr., the former Defense Secretary who is now Carter's energy adviser) and foreign-policy sages (Dean Rusk and Eu * * * son years) and retired Gens. Daniel Graham and George J. Keegan Jr.) and neoconservative intellectuals (Norman Podhoretz, editor of Commentary, and Seymour Martin Lipset of Stanford).

The other side—the political leaders and strategic theorists who believe with Carter that the Soviets are prepared to cooperate in arms redunction—have been slower to mobilize, but they are now rolling out their big guns to make the counterarguments—elder statesmen like Averill Harriman and George Kennan, former Central Intelligence Agency deputy director Herbert Scoville Jr., even the new Defense Secretary, Harold Brown.

The Committee on the Present Danger, 141 leading citizens from Achilles to Zumwalt, organized in November to sound the alarm (most of its members were unaware that the same name had been used in 1950 to arouse citizens about the "present danger" of that day). The Committee on U.S.-Soviet Relations, 101 leading citizens from Apter to Ziffren, countered with its own bulletin, warning against "the stale slogans and reflexes of the Cold War."

The American Security Council issues educational bulletins on the need for greater defense budgets to head off the Soviets. The Coalition for a New Foreign and Military Policy holds high-level "teach-ins" for Capitol Hill staff aides, selling the opposite proposition.

Some of the heavy skirmishing is done by newspaper columnists. Evans and Novak drop "smart" bombs on the arms control prophets. Joseph Kraft delivers a devastating second-strike against the hard-liners. James Reston pours elderly wisdom on the troubled battlefield of Washington politics.

The first flash point in this contest is Carter's nomination of Washington lawyer Paul Warnke to run the arms limitation negotiations, but this debate is much broader and it will influence the outcome of many issues in the next year or so—the ratification of any new accords that the Carter administration makes with the Soviets, the deployment of the B-1 bomber and Trident missile submarine and beefed-up armor for the NATO troops in Europe, the possibility of a new generation of arms technology that would leave the Soviets trailing again—mobile land missiles hidden in long tunnels in the western desert, subsonic but deadly accurate cruise missiles, laser beams which can disable enemy missiles, warheads with their own mechanical brains to maneuver them to targets.

More tanks, more ships, more missiles, more warheads. If the Russians and Americans do not agree on a new strategic arms limitation treaty, if President Carter retreats before the political pressure and accepts the pessimistic prognosis of Soviet intentions, the U.S. defense budget could creep up another $40 billion or so in the next few years.

But, as both sides agree, this new debate over the strategic balance of power is much more fundamental than mere dollars; the outcome could get us all killed. The arms control lobby insists that another generation of nuclear weaponry takes both nations another step closer to disaster. The nuclear hard-liners insist that, without new weaponry, America faces a bleak future in which the Soviet Union can box us around at will in global politics or devastate us piecemeal in limited nuclear wars.

". . . We could find ourselves isolated in a hostile world, facing the unremitting pressures of Soviet policy backed by an overwhelming preponderance of power," the Committee on the Present Danger warns, "Our national survival itself would be in peril and we should face, one after another, bitter choices between war and acquiescence under pressure."

The other side, with varying degrees of emphasis, says this is nonsense. The Soviet military has always been behind; now that it is catching up and achieving rough equality, the time has arrived for genuine progress on mutual reductions.

"We live in a world of mutual deterrence," says Thomas A. Halstead, executive director

of the Arms Control Association. Both sides have so many nuclear weapons that if one side were to use them, that would insure its own destruction. This deterrence works at many levels and it would work at much lower levels of nuclear arms than both sides have today."

There are no cases in history of absolutely insane arms races ending peacefully by simply laying down arms," warns Harvard scientist George B. Kistiakowsky. Arms races usually end up in wars."

If that is so, and modern history certainly supports Kistiakowsky's grim observation, the United States is at a fundamental crossroads with its Soviet rival: will they continue on matching and besting one another in various forms of armaments, increasing the probabilities, or can they break the established patterns of history and find ways to compete peacefully, with less devastating consequences for mankind?

Meanwhile, for those citizens whose sleep is troubled by the drums, there is some reassuring news that the alarm messages do not mention—the United States still outnumbers the Soviets in intercontinental nuclear warheads by more than 2-to-1. Indeed, during the last five years when political leaders signed arms control agreements with the Russians and preached restraint, the United States has more than doubled its ready-to-fire arsenal of nuclear warheads.

America now has about 8,500 warheads ready to dump on Russian cities, military bases, whatever seems worthy of destruction. The Soviets have 4,000 warheads ready to fire at us—but they are building more and the general assumption is that they will catch up, perhaps even exceed the United States someday.

To put the matter more crudely, the atomic bomb dropped on Hiroshima represented, by various estimates, 13,000 to 20,000 tons of explosive. Right now, according to a Brookings Institution estimate, the United States has warheads aimed at the Soviet Union equivalent to 4,200,000,000 tons. A substantial portion of these are on submarines and are invulnerable to Russian attack. Thus, if Russia fired first tonight and wiped out all of America's land-based missiles. President Carter could still retaliate by wiping out all but the smallest towns—killing 20 million, or 40 million, or 100 million Russians, depending on how he chose the targets.

Yet, for the same reasons, the Soviet Union has essentially the same insurance policy. Its nuclear warheads, fewer in number, but heavier in size, could strike back at America with comparable destructive force. It is this now-familiar state of affairs which the global thinkers call "mutually assured destruction," the doctrine which has kept both sides from shooting first, MAD, for short.

The current debate begins with the assertion from some hard-line military experts and strategic scholars that the Soviets don't really believe in MAD and are now moving beyond it—building bigger rockets, adding more multiple warheads, stocking so much more megatonnage, that some day the Soviet planners can actually think about making nuclear war, or at least threatening us with war during diplomatic struggles.

How could they possibly dare? Here the hard-line theories get fuzzier; the explanations are more suggestive than definitive. Some have argued that the Soviets are seeking a "war-winning capability" by evacuation schemes to disperse citizens and industries, by digging civil defense shelters to reduce casualties, by building a monstrous advantage in destructive power, which would intimidate any American President.

Donald H. Rumsfeld, the outgoing Defense Secretary and one of the leading exponents of that view, argued in his final report:

"The Soviets, by their activities, indicate that they are not interested in mutually assured destruction. Accordingly, they must be accepted for what they are, not for what we want them to be. Their actions indicate that they take nuclear war seriously; the United States must do no less."

Scoville, former CIA deputy director for science and technology and a leading advocate for arms reduction, said he would regard this newly discovered "civil defense gap" as "laughable if so many people weren't willing to take it seriously."

"The very concept that Soviet leaders would consciously launch a nuclear attack, knowing that it would mean the destruction of their cities, their industries, I find incredible," Scoville said. "What would they gain by destroying the United States if they virtually wipe out their own civilization in order to do it?"

The hard-liners do not all agree on the same answer to Scoville's question. Some claim the Soviets are prepared to make a blitzkrieg across Western Europe. Some have worked out elaborate "war-fighting" scenarios in which the Russians might lose only 10 million or so citizens, a victory of sorts compared to much greater American losses. But others argue more cautiously that the psychological weight of superior Soviet megatonnage is what counts, not the possibility to actual nuclear war.

Paul Nitze, a SALT negotiator under President Nixon and now one of the foremost proponents of a nuclear buildup, protested this point in an interview:

"Nowhere am I saying that the Soviet Union wants a war or will make a war. All I'm saying is that we can have a situation where their superiority is clear. We know it and they know it. That kind of situation carries its own message before it."

These "superiority" and "war-winning" scenarios usually imply two assumptions which are rarely expressed on the record by the hardliners. One is the premise that the Marxist-Leninist ideology of Soviet leaders renders them insanely insensitive to the mass annihilation of human life. The other is an unspoken doubt about the courage of American presidents—a fear that, while the enemy might willingly destroy millions of their own people, any moral American leader would shrink from doing the same thing.

(Carter, it should be noted, has said that he would not shrink, that he could and would push the nuclear button if he deemed it necessary.)

But the arms control advocates argue that "superiority" no longer has any meaningful application in an age when both adversaries can destroy one another. The hawks insist otherwise, citing the 1962 Cuban missile crisis when President Kennedy stared down the Soviets with U.S. superiority. The rebuttal to that: in 1962 the United States possessed an advantage—perhaps 7,000 warheads to a mere 300 held by the Russians—that can never be duplicated again. (Moreover, the Soviet navy was physically incapable of challenging the U.S. "quarantine" of Cuba.)

From there, this debate proceeds into an esoteric thicket that ordinary citizens can barely comprehend—the theology of nuclear strategy, the euphemistic definitions of mass killing, well-oiled arguments over trendlines, trick statistics, Kremlin rhetoric, satellite photos.

"Overkill" becomes "redundancy" and "redundancy" becomes "high-quality deterrence."

The arguments also get nasty, even within the brotherhood of men who served in government together. Nitze went before the Senate confirmation hearings and announced that his former Pentagon deputy, Warnke, was incompetent on the subject of arms negotiations. Warnke's supporters whispered that Nitze was a disappointed suitor for the same job.

Harvard historian Richard Pipes, who chaired a controversial "Team B" intelligence committee, analyzing Soviet intentions from a more skeptical perspective, pleaded for decency in the debate. " 'Hard-liners' and 'appearsers' should freely question each other's judgment, but not motives," Pipes urged.

But Averell Harriman, a man with a sharp tongue, thinks that hard-liner motives are very much part of the debate. "There are certain people," Harriman told an interviewer, "who I think are psychopaths."

The tantalizing question about the debate is: why now? For the last decade, politicians of both parties have been ushering in an era of supposed cooperation with the Soviets. Now they are arguing over whether to reopen the Cold War or whether it really ever ended.

For one thing, the Soviets are indeed building up their forces, gaining numerical advantages or rough equality in weapons categories where they have traditionally been far behind. According to the CIA, the Soviet growth has been steady over the last 10 years, about 3 per cent a year. This can be traumatic if you are a military planner reading satellite photos.

"For the last 5 or 10 years," said Halstead of the Arms Control Association, "the Soviets have been working hard to catch up and they have pretty much caught up and it's a difficult psychological thing for the public to live with parity."

Other events have also aroused the old fears, especially the Mideast War in 1973 when he Soviets gave us no direct warning that their client states, the Arab nations, were about to attack ours, Israel. Soviet-backed forces in Angola seemed to confirm that, despite detente, the Russians are willing to pursue their political objectives through military support of "friendly" factions.

The political climate, according to participants on both sides, has shifted quite dramatically in favor of increased defense spending, especially compared to the congressional fights of five or six years ago. The new Secretary of Defense talks about budget cuts for the Pentagon, but "Harold Brown is shouting into a hurricane," said Rep. Les Aspin (D-Wis.). "The other side has got the high ground."

According to Aspin and others, the fate of Israel figures in the changed climate. Many liberal Democrats who used to line up to vote for defense cuts are now mindful that Israel's armaments depend solely upon the Pentagon's ability to re-supply. Some Jewish intellectuals who were highly critical of the military in South Vietnam have shifted ground in the face of the threat to Israel and anti-Semitic repression in the Soviet Union.

Last year's presidential campaign further weakened the arms control advocates—some of whom still hold a wistful suspicion that if Ford had not backed away from the second-round SALT agreement that Henry A. Kissinger almost negotiated in Moscow, Ford might still be President. As a candidate, however, he got flailed from both sides, by his Republican opponent and by Jimmy Carter, blamed for being too soft with the Russians and for failing to advance arms control.

Some factors have nothing to do with strategic defense—the high unemployment rate, for example, means congressional votes for the B-1 bomber and other weapons projects. The old rationale—cutting defense budgets to free money for domestic programs—seems less compelling today, given the general disillusionment with the federal government.

Over the last generation, the hardliners have usually won the arguments over new weapons. Once the question of Soviet intentions is reduced to a simple numbers

game, it is impossible to refute projections of future fears with present proof.

In the late 1950s, it was the bomber gap, followed closely by the missile gap, then the megatonnage gap, then the anti-missile missile gap. Each time, a Soviet advantage was forecast from current hardware trends; each time, it developed that America was the actual leader, both in new technology and in deployment. Despite that record of crying "bear," the Pentagon has rarely been turned down on a major new weapons system by Congress.

Some arms control strategists, viewing the tricky political terrain, think President Carter may be wise to yield on some conventional items in the hope of advancing his larger goals on nuclear weapons.

"If you go with the B-1 bomber," said one despairing arms control official, "you're buying some years of relative peace with the Air Force. Maybe they'll come off some other things which are much worse like the mobile M missile."

But a President can change public opinion, rather dramatically sometimes, and even Paul Nitze concedes that the Carter administration could dissipate much of the political pressure for new arms.

"The American public has changed its mind and opted for a stronger defense," Nitze said "It's concerned . . . Obviously, if the President says there's no problem, and the Secretary of State says there's no problem, and the Joint Chiefs of Staff say there's no problem, then the people may not feel there is one," he said.

For the nonparticipating citizen, this debate over strategic arms has a troubling point of confluence—from their different premises, both sides talk about the probability of nuclear war in the future, if we don't do this or that. Perhaps, one day, the prophecies will be fulfilled. And the arms debate will be over.

THE NUCLEAR ARMS RACE: A SOVIET VIEW

(Mr. SEIBERLING asked and was given permission, to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, I have previously offered for the RECORD the first in a series of Washington Post articles that commenced Sunday, February 20 dealing with the nuclear arms debate. It outlined the basic issues. I now offer the second of the series of articles, this one by Robert G. Kaiser. It sets forth in striking terms how the strategic balance may look from the Soviet viewpoint.

The article states that one need not accept Soviet "innocence" to realize that the arms race that we see threatening the United States has a "mirror image" in Moscow. The article provides insight into Soviet suspicions and fears and the reasons why the Soviets may, like the Americans, have incentives to pursue the paradoxical goals of arms buildup and arms limitation.

The text of the Post article follows these remarks:

THE NUCLEAR ARMS RACE: A SOVIET VIEW

(By Robert G. Kaiser)

For the country's military planners and political leaders, the signals are ominous:

In the past five years, the enemy has added more than 3,000 nuclear warheads to its inter-continental missile force. It has added alarming new technology to its major weapons systems, so they are now vastly more accurate, more lethal and easier to defend than they were just a few years ago.

The enemy is building a new missile-bearing submarine force that may be impossible to detect at the bottoms of the world's oceans. They are considering construction—at a cost of billions—of a new system of mobile, concealed, land-based missiles. They have developed technology enabling them to deploy an entirely new kind of intercontinental weapon—one virtually immune to existing defenses or detection.

The enemy is giving its conventional forces impressive new weaponry, some of it still beyond this country's ability to duplicate. Moreover, the enemy's allies are modernizing their forces in potentially crucial areas. The other side now has deployed 2,000 new tanks in Central Europe that are demonstrably better than any others in the world.

Another Pentagon alarum? No. This exercise is a hypothetical press release from the Defense Ministry in Moscow—a description of U.S. and allied military forces as they might be seen through Soviet eyes. The Americans are coming!

The Soviet view of the balance of terror seldom enters into the American debate on defense preparedness. Americans make an easy presumption of innocence. Donald H. Rumsfeld, the last Secretary of Defense in the Ford administration, stated that presumption in his farewell "posture statement:"

"There are only two major powers—the United States, which is the primary champion of freedom, self-determination and international pluralism, and the Soviet Union, which has an imperial domain already sprawled over two continents and is the primary advocate of a command economy, centralized control and the subjugation of the individual to the state."

The Soviet Union sees it otherwise. In the Soviet view, the United States and its allies are not proponents of "international pluralism," but are imperialists—advanced capitalist states determined to protect their markets and sources of natural resources, and demonstrably hostile to the Soviet Union and its interests. The American imperialists are also demonstrably willing to undertake military adventures in remote areas, from the Dominican Republic to Lebanon, Korea and Vietnam.

The purpose here is not to paint the Russians as the innocent victims of the Cold War. But one need not accept Soviet innocence to realize that the arms race we see does have an alarming mirror image in Moscow.

Not only does the United States have an enormous, varied and technologically superior armed force, with bases that ring the Soviet Union and a history of foreign military adventures. Perhaps more significant, the Soviet Union must worry about other—and nearer—potential enemies:

Eight hundred and fifty million Chinese, for example, whose government claims a large part of Soviet territory; the well-equipped Iranians, who now have some of America's best new weapons; the unpredictable and well-equipped Turks; the nuclear-armed French and British; and the West German Bundeswehr, arguably the best single army in the world.

A Senate aide who studies the East-West confrontation observed recently that Americans might well contemplate the prospect that, say, Canada and Mexico were both powerful and well-armed enemies of the United States—a situation roughly comparable to the Soviets'. "How would Americans react to that situation?" he asked rhetorically.

The Americans who express loudest alarm about the current East-West balance openly acknowledge that their fears at the moment are based on "worst case" assumptions, and on their projections of the balance 5, 10 or 15 years from now. They say it is only prudent to think in such terms.

If we presume that Soviet defense planners have been exercising a comparable prudence over the past 30 years, it may be easier to understand the steady buildup of the Soviet Union's military forces.

It seems fair to start from the proposition that the Soviet Union has had superpower ambitions for many years. Since World War II, the standards against which the Soviets could judge those ambitions have been set by the World's leading superpower, the United States.

At his first press conference, President Carter reiterated the longstanding American position: "At the present time, my judgment is that we have superior nuclear capability."

The Soviets have only lately had any cause at all for confidence in what the experts call the "essential equivalence" of the nuclear balance. From the dawn of the atomic age in 1945 until the last year or two, American superiority has been beyond question.

The present generation of Soviet political and military leaders, in other words, grew up looking into the uncomfortable end of the nuclear barrel. For many years, the American advantage was virtually absolute. When the Soviets began to deploy intercontinental, land-based missiles and, later, intercontinental submarine-based missiles, the absolute advantage disappeared, but the Americans' relative edge remained imposing.

The buildup of Soviet strategic arms that now alarms some American specialists began in the mid-1960s. Many western specialists on Soviet affairs believe that the humiliation of the 1962 Cuban missile crisis—when the Soviets had to back down in the face of a threatened American naval "quarantine" of Cuba—was a principal cause of the buildup. The buildup has proceeded steadily since.

The most recent deployments of new Soviet rocket systems are what have alarmed many observers in this country, but they are the product of development and production decisions that the Soviets made at least five years ago. (Our Pentagon reckons that it takes about 10 years to take a new weapons system from conception to development.) If the decisions which led to these new deployments were indeed taken in the late 1960s in the Kremlin, then they were taken at a time when American superiority was still beyond doubt.

Despite years of Herculean effort and indisputable Soviet success in many fields of strategic development, the new American President still claims "superiority." It is not difficult to imagine how the Pentagon would react if it had presided over a similar history, and now faced a comparable claim from Leonid I. Brezhnev, the Soviet leader. The Soviet Defense Ministry, presumably, remains less than satisfied with the current balance of terror—whether their goal is superiority or parity in their own eyes.

Soviet statements and writings demonstrate that the Russians' assessment of the East-West balance goes far beyond simple counting of weapons and warheads, however. The Soviets have a Marxist view of power—one which calculates economic technological and social factors along with military hardware. They also have a Russian view of the world—suspicious, insecure and cautious.

A Marxist analysis of the East-West balance is not comforting in Moscow. The Russians boast often that the "correlation of forces" in the world has shifted in their favor, but this is largely a military argument. The Soviet economy is lagging, and is far behind America's. Weighed together, the economies of the western nations and Japan produce several times the amount of goods

and services that the Soviet Union and its East European allies produce.

The habit of referring to the Soviet Union and the United States as "the two superpowers" skim over the profound differences in the economic, scientific and technological capabilities of the two countries. The Soviets may now agree that there are two superpowers, but they also see that only one of the two goes to the other to buy computers, steel foundaries, oil drilling equipment, wheat, corn and thousands of other products.

The Soviets know that they are 15 to 25 years behind America in computers. They know that their workers are vastly less productive than those of the West. They know that their industrial machinery is less efficient and less reliable than the West's. They know they are No. 2, by a good distance.

The Soviets must make judgments about their potential enemies' intentions, and it is in this realm that traditional Russian suspicion and fears must come into play. Americans are often tempted to believe that the Soviets must realize that our intentions are peaceful, benign. The Soviets don't see it that way.

History is important in this regard—more important than it ever seems to be for Americans. How many Americans remember that the U.S. Army joined with forces from Britain, France and Japan in invasions of Russian territory in 1918 to support rebellious "Whites" against the Bolshevik "Reds"? That long-forgotten military misadventure helped convince generations of Soviet leaders that the western powers did actively and aggressively wish them ill.

For years afterward the United States refused to recognize the Soviet Union. (Ambassadors were finally exchanged in 1934.) During the 1930s from the Soviet point of view, the Western powers did not seem alarmed at the prospect of Nazi aggression eastward, and eventually Hitler invaded the Soviet Union, causing staggering losses and damage. After the uneasy wartime alliance collapsed in the late 1940s, the Soviets watched as America embarked on what must have appeared to Moscow as an orgy of anti-communism, John Foster Dulles ringed the Soviet Union with a network of military treaties, then threatened to "roll back" communism from Eastern Europe.

Then in the '60s came the Cuban missile crisis—a threat to bring down the holocaust that America obviously took seriously—and the American adventure in Vietnam, coupled with a dramatic improvement and buildup of American strategic forces.

For a nation that has suffered invasion, which fancies itself "the vanguard of the international working class" in a struggle against capitalism, which has always regarded foreigners as dangerous almost by definition, all were ominous signals.

This analysis is obviously argumentative. The Soviets were not innocent bystanders throughout these years. They too sent out alarming signals; many of the moves that alarmed them were prompted by their moves that alarmed the West. The point here is that the Russians were genuinely alarmed; they saw cause to fear that the West harbored aggressive intentions against them.

Today the new "correlation of forces" appears to have persuaded the Russians that they are no longer vulnerable to Western attack. But that does not make it comforting. The United States continues to press forward in new areas of military technology, and in many fields continues to hold apparent advantage over the Soviets—in anti-submarine warfare capability, in cruise missiles, in "smart" weapons that can find their targets electronically, and others.

Moreover, recent history teaches the Soviets that they must continually fear the unknowable—the next unexpected breakthrough in American technology. Authoritative Pentagon sources say that the United States is today testing new weapons about which nothing is publicly known, and some of them have the potential for radically changing the "correlation of forces" in the future.

Reading recent Soviet comments on the latest round of the strategic debate in Washington, one senses the concern with which the Russians view the mirror in this unprecedented relationship. Sounds of alarm in Washington cause alarm in Moscow.

Georgi Arbatov, the Kremlin's principal expert on the United States, observed on Moscow television recently, "It is understandable that the American generals do not like the situation when parity exists, and when they cannot attack our country, cannot blackmail us, because nuclear war would be suicide for the United States. But it is a fact the Americans will have to live with. Many serious changes have taken place for America in this respect. The country has lived for 200 years under different conditions from other countries, beyond two oceans and with feelings of complete national security, and now it has begun to live like all other countries; it is just as vulnerable in case of war as the others."

INDUCTION INTO FLORIDA CITRUS HALL OF FAME OF ANTHONY T. ROSSI

(Mr. IRELAND asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. IRELAND. Mr. Speaker, one of my constituents, Mr. Anthony T. Rossi, has just been inducted into the Florida Citrus Hall of Fame, which is dedicated to those individuals who have given unselfishly of their time and effort in the development of the Florida citrus industry.

Mr. Rossi first came to the United States from Sicily when he was 20 years old. As his life proves what can be accomplished in this great country of ours, I would like to share his biography with you and my colleagues.

ANTHONY T. ROSSI

Anthony T. Rossi, a native of Messina, Sicily, was 20 years old when he came to the United States. For several years he followed a variety of occupations. He was a restaurateur with an establishment in Miami Beach and one in Bradenton when, in 1947, he began his first venture in Florida citrus, as a gift fruit shipper. Rossi supplied retail outlets in the Miami area, and in an effort to get closer to the source of supply, opened a gift fruit shipping establishment in Palmetto. From that beginning, he founded Tropicana Products. Rossi is an inventor, an innovator, a creator of new concepts in products, in marketing, in business operation. In the late 40s, he established a business to section oranges and grapefruit, which were then packed under vacuum and rushed to northern markets as a fresh citrus salad—the forerunner of the chilled section industry. In the early 1950s, recognizing the potential for a pure, natural-strength citrus juice as close as possible to the fresh-squeezed product, Rossi founded the chilled juice industry, now the fastest-growing segment of the Florida citrus industry. To his credit are ideas which have revolutionized the processing industry—a fleet of refrigerated trucks with which he established nation-wide distribution . . . the first commercially acceptable high-speed aseptic glass-packaging line for a food product . . pioneering of bulk shipments of juice to packaging points in the north . . bulk transportation by steamship . . the first floating citrus processing plant . . water conservation methods . . new concepts in the manufacture of citrus pulp . . the invention of a high-speed glass bottle decorating machine . . refrigerated vending equipment . . casing machines . . heat exchangers . . the first unit train, moving a whole trainload of citrus products north. Rossi established the first vertically-integrated processing industry in Florida; when the demand for glass bottles grew, he built and ran his own glass bottle manufacturing plant. When he wanted a new container for FCOJ, he devised on easy-open plastic can and built a plastic manufacturing plant; he was the first to incorporate a corrugated board manufacturing plant and box manufacturing plants as a part of a citrus processing facility. He pioneered the establishment of a pellet operation for marketing citrus pulp, and was one of the developers of an export market for that product. Now in his 70s, Rossi is still actively engaged in the management of Tropicana Products. He has been a leader in religious and charitable endeavors in his community and nationwide. He is a trustee of Columbia Bible College in Columbia, S.C., and has been named by the Grand Council of Columbia Associations for their leadership award for distinguished service and achievement by an Italian-American in the field of business, in 1972. In the same year, he received the Golden Plate Award as one of America's Captains of Achievement, and in 1975, he received the Freedom Foundation Award. But of Rossi's achievements in 30 years in Florida citrus, the establishment of a new product—chilled juice—will probably be the one for which he is longest remembered.

UT LIBRARY ADDS 4 MILLIONTH VOLUME TODAY

(Mr. PICKLE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PICKLE. Mr. Speaker, in addition to an excellent faculty and student body, to join the ranks of "great" universities an institution must have an outstanding library.

Today the University of Texas Tower in Austin will shine not because it is a holiday or because the Longhorn athletic teams have been victorious but because of an outstanding academic achievement: the addition of the 4 millionth volume to the UT library.

Mrs. Dolph Briscoe, wife of the Texas Governor, will be on hand to present the book to the library.

I am enclosing an article from the UT News Service about this momentous occasion:

LIBRARY WEEK

AUSTIN, TEX.—When the University of Texas Tower is lighted orange Feb. 23, it will not be in celebration of a sports victory or holiday, but in recognition that the UT Library added its four millionth volume on that day.

Dr. Lorene L. Rogers, UT Austin president, has designated Feb. 16–23 Campus Library Week and directed that the Tower lights be switched to orange to mark that academic milestone.

During Library Week, the General Libraries will conduct a countdown to the four millionth volume, adding one important book each day of the week. Mrs. Dolph Briscoe, wife of the Texas governor, will present the four millionth book on Feb. 23.

The text of Dr. Rogers' proclamation follows:

"Whereas, the libraries of the University of Texas at Austin are about to add their Four Millionth Volume, and

"Whereas, these libraries are a repository of knowledge, the acquisition and sharing of which is the purpose of The University, and

"Whereas these libraries serve not only the local campus but are also a major educational resource for the people of the State of Texas and the nation and

"Whereas these libraries attract scholars for research from all parts of the world.

"Now, therefore, I, Lorene L. Rogers, President of The University of Texas at Austin, do designate the week of February 16–23 Campus Library Week; in recognition whereof I have directed that on February 23, the day commemorating the addition of the Four Millionth Volume, The University Tower be lighted orange.

"In witness whereof I have hereto set my hand and caused the seal of The University of Texas at Austin to be affixed. Done at Austin, Texas, this Fifteenth Day of February in the Year of our Lord One Thousand Nine Hundred Seventy-Seven.

PRESIDENT CARTER'S PROPOSED REVISIONS OF FISCAL YEAR 1978 BUDGET

(Mr. CEDERBERG asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. CEDERBERG. Mr. Speaker, yesterday we received President Carter's revisions of the fiscal 1978 budget. I read these revisions very carefully, and just as carefully I reread some of the President's campaign promises. Some of those promises sound pretty good to me. But if this is the best he can do for a program, then the taxpayers are in for a long cold winter which will last about 4 years.

President Carter has pledged, without qualifications, to balance the Federal budget by the end of his first term, that is, by fiscal 1982 at the very latest. Yet his budget revisions would increase outlays by $6.2 billion in fiscal 1977, and by $19.4 billion in fiscal 1978, and would increase the Federal deficit by $10.8 billion in each year. Of these outlay increases, economic stimulus and reestimates under current law account for $2.2 billion in fiscal 1977, and $8.5 billion in fiscal 1978. The remainder—$4 billion in fiscal 1977 and $10.9 billion in fiscal 1978—represents net program increases and expansions, which will make the task of restraining and balancing the Federal budget in future years that much more difficult.

It is particularly important to note that these revisions do not include 5-year projections, which would show the long-term spending commitments which President Carter proposes.

President Carter has pledged, without qualification, to reduce unemployment and inflation to 4 percent by the end of his first term. His "economic stimulus" program is not an economic program at all, but simply a redistribution of income between individuals, and a redistribution of funding between Federal, State, local and private sources. The $50-per-person income supplement is totally irrelevant to the problems of long-run economic growth and will probably have little short-run impact, because the income supplemental will be paid with funds which the Federal Government must borrow from other sources in the private sector. The public works and countercyclical spending programs will simply substitute Federal spending and borrowing for spending or borrowing by State and local governments.

President Carter has pledged to reduce defense expenditures by $5 to $7 billion, and to maintain national security. I will support any reductions in defense programs or activities which are not essential for national security. But President Carter's revisions of the defense budget do not, for the most part, conclusively address the merits of individual programs or activities. Nearly all of the $2.7 billion in reductions which can be specifically identified in Secretary Brown's statement of February 22, represents postponements and deferrals of programs which have been thoroughly studied and justified, which is false economy for the purposes of political scorekeeping. Most of this money will be spent anyway in subsequent years, when inflation will increase costs and reduce purchasing power.

Finally, President Carter has pledged to improve the efficiency and effectiveness of Federal programs and activities. Yet he rejects out of hand nearly all of the reform proposals in President Ford's budget which were precisely intended to make Federal programs more efficient and responsive, such as block grants for child nutrition, health, and education, and reform of the food stamp program. In the case of employment training programs, the President proposes a step backward to federally controlled categorical programs.

In short, Mr. Speaker, it appears to be business as usual. And I, for one, do not intend to let the taxpayers forget it.

Mr. Speaker, I am including additional printed material and tables in the Extensions of Remarks of the RECORD.

FEDERAL EMPLOYEES CONFLICT-OF-INTEREST DISCLOSURE ACT

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, today I am introducing a bill which attempts to eliminate potential conflicts of interest—or at least make others aware of such conflicts—among Federal employees. The Federal Employees Conflict-of-Interest Disclosure Act will require:

First, that each Federal employee at GS–13 and above who has been employed for less than 3 years file with the agency a description of each job held during the 3 years preceding his/her employment;

Second, that former Federal employees who were GS–13 or higher file an annual report describing each position held during the 3 years after Federal employment;

Third, that the reports filed with the agencies be made available to the public; and

Fourth, that each agency submit an annual report to the Speaker and the President of the Senate containing the information filed by the current and former Federal employees.

Many parts of the private sector have a vast economic stake in official policies of numerous Federal agencies. In discharging their responsibilities, Federal employees dramatically affect private industry by funding and contract awards, safety and licensing decisions, and myriad other official determinations. Although I recognize that Government often must seek expertise from the private sector, the relationship between Government agencies and private industry in this context must remain impartial and unbiased. I think that this bill will help achieve that end:

H.R. 3928

A bill to require Federal employees compensated at the rates in effect for GS–13 and above to disclose each position held by such employees during the three years preceding and following their employment with the Federal Government

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Employees Conflict-of-Interest Disclosure Act".

PURPOSE

SEC. 2. It is the purpose of this Act—

(1) to require each Federal employee whose rate of compensation is equal to or greater than the minimum rate of compensation for grade GS–13 to file with the Federal agency in which such employee is employed a description of each position held by such employee during the three years preceding such employee's Federal employment;

(2) to require each former Federal employee whose salary rate at any time during such employee's Federal employment was equal to or greater than the minimum rate of compensation for grade GS–13 to file with the Federal agency in which such former employee last worked a description of each position held by such former employee during the three years after the termination of such former employee's Federal employment;

(3) to require each Federal agency to file annually with the President of the Senate and the Speaker of the House of Representatives a report containing the information filed with it by Federal employees and former Federal employees under this Act; and

(4) to require each Federal agency to maintain a file containing the information filed under this Act and to make such file open for public inspection during the regular working hours of such agency.

REPORTING REQUIREMENTS

SEC. 3. (a) (1) Each employee of an agency who has been an employee of an agency for less than three continuous years and who is compensated at a rate equal to or greater than the minimum rate of compensation in effect for positions classified in grade GS–13 of the General Schedule under chapter 51 of title 5, United States Code, shall, not later than thirty days after first attaining such level of compensation and once each year

thereafter until such employee has been an employee for three consecutive years or more, file a report as provided in paragraph (2) with the head of the agency in which such employee is employed.

(2) Each report filed by an employee under paragraph (1) shall provide, in such form and manner as the head of the agency involved may prescribe—

(A) the name and address of such employee;

(B) the name and address of each employer of such employee during the three-year period ending with the beginning of such employee's current employment by an agency;

(C) the period during which such employee was employed by each such employer;

(D) the title of each position held by such employee in such previous employment;

(E) a brief description of the duties performed by such employee in each such previous position;

(F) a brief description of the duties performed by such employee in such employee's current position;

(G) the current rate of compensation of such employee; and

(H) if such employee has duties which, directly or indirectly, include participation, through decision, recommendation, investigation, or otherwise, in connection with awards of grants, contracts, or other forms of business or financial interests, a list of any grants, contracts, or other forms of business or financial interests which a former employer of such employee listed under subparagraph (B) has obtained within the twelve months preceding the filing of such report, or is attempting to obtain at the time of the filing of such report, from the agency in which such employee is currently employed.

(b)(1) Each individual who is a former employee of an agency who at any time during such employment was compensated at a rate equal to or greater than the minimum rate of compensation in effect for positions classified in grade GS–13 of the General Schedule under chapter 51 of title 5, United States Code, shall, not later than thirty days after the first, second, and third anniversaries of the termination of such former employee's employment with an agency, file a report as described in paragraph (2) with the head of the last agency in which such former employee was employed.

(2) Each report filed by a former employee under paragraph (1) shall provide, in such form and manner as the head of the agency with which such report is filed may prescribe—

(A) the name and address of such former employee;

(B) a brief description of the official duties of such former employee in [the last] [each] position held by such former employee in an agency;

(C) the rate of compensation of such former employee immediately before the termination of such former employee's employment with the last agency in which such former employee was employed;

(D) the date of the termination of such former employee's employment with the last agency in which such employee was employed;

(E) the name and address of the employer, if any, of such former employee at the time such report is filed;

(F) the title of the position held by such former employee at the time such report is filed;

(G) a brief description of the official duties of such former employee in such position; and

(H) if such former employee, while employed in an agency in a position compensated at a rate equal to or greater than the minimum rate of compensation in effect for positions classified in grade GS–13 of the General Schedule, had duties which, directly or indirectly, involved participation, through decision, recommendation, investigation, or otherwise, in connection with awards of grants, contracts, or other forms of business or financial interests, a list of any grant, contracts, or other forms of business or financial interests (i) which the employer of such former employee has obtained from such agency during the 12-month period preceding the filing of such report or (ii) which such employer is attempting to obtain from such agency at the time such report is filed.

EXCEPTIONS

SEC. 4. (a) The reporting requirements of section 3 shall not apply to any employee or former employee of the Central Intelligence Agency or the National Security Agency, Department of Defense, if the director of the agency concerned determines that such employee is, or such former employee was, engaged in the performance of duties the disclosure of which would jeopardize the national security.

(b) Whenever the Director of Central Intelligence or the Director of the National Security Agency makes a determination under subsection (a), he shall enter a certification of such determination in the file required to be maintained pursuant to section 5 in lieu of the report by the employee or former employee involved which would otherwise be submitted under section 3 for entry in such file.

PUBLIC AVAILABILITY OF REPORTS

SEC. 5. The head of each agency shall maintain a file at the headquarters of such agency containing a copy of each report filed with such agency under section 3, and such file shall be open for public inspection during the regular working hours of such agency.

REPORTS TO CONGRESS

SEC. 6. The head of each agency shall, not later than March 1 of each year, submit a report to the President of the Senate and the Speaker of the House of Representatives containing a copy of each report filed with such agency under section 3 during the preceding calendar year.

PENALTIES

SEC. 7. Whoever knowingly violates section 3 of this Act shall be fined not more than $1,000, or imprisoned not more than six months, or both.

DEFINITIONS

SEC. 8. As used in this Act:

(1) The term "agency" means—

(A) an Executive agency, as defined in section 105 of title 5, United States Code;

(B) the Botanic Garden;

(C) the Library of Congress;

(D) the Government Printing Office;

(E) the Office of the Architect of the Capitol;

(F) the Cost-Accounting Standards Board; and

(G) the Executive Office of the President.

(2) The term "employee" means an officer or employee in or under an agency, including a consultant or part-time employee of an agency.

TRANSITION

SEC. 9. (a)(1) Any employee to whom section 3(a) applies on the date of enactment of this Act shall file a report as required by such section—

(A) not later than 60 days after the date of enactment of this Act; and

(B) once each year thereafter until such person has been an employee for not less than three consecutive years.

(2) The head of each agency shall, not later than 120 days after the date of enactment of this Act, submit a report to Congress containing a copy of each report filed with such agency pursuant to paragraph (1)(A).

(b) Section 3(b) shall apply to any person described in such section who terminates employment with an agency after the date of enactment of this Act.

ATOMIC BOMBS

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PRICE. Mr. Speaker, recent accounts in the news media and the CONGRESSIONAL RECORD of February 10 about the design of an atomic bomb by an undergraduate student at Princeton University impelled me to subject the young man's treatise to a knowledgeable review.

I want to report that the facts are considerably less spectacular than the intimations highlighted in the press. Mr. Phillips' paper does not specify how to make a nuclear explosive. Nor does it contain information classified under the Atomic Energy Act; this was related to the Director of the FBI on February 1, 1977, by ERDA.

His study paper, quoting entirely from unclassified sources available to all in the open literature, suggests materials and concepts one might collect in an attempt to fabricate a nuclear explosive. Mr. Phillips concludes by stating that if his chosen method were 5 percent efficient, it might have a blast yield equivalent to 6 kilotons of TNT. His conclusion involves a number of suppositions and a great deal of speculation.

Mr. Phillips may be commended for his inclination to take on a difficult intellectual challenge. Those involved in nuclear weaponry know how difficult it is to design and fabricate such explosives. Consider the fact that it took the Indian Government, with all the national resources at its disposal, over 10 years to create and detonate a nuclear explosive device.

No reasonable antiproliferation system can be viewed as infallible in context of the political will of an individual nation. Additionally, no reasonable system of safeguards can be deemed completely foolproof when one deals with the fertile minds of gifted individuals. There is no question that it is in our national interest to develop the best possible worldwide controls of nuclear materials while assuring the availability of the atom for the world's energy needs.

NUCLEAR POWER AND THE ENERGY PROBLEM

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PRICE. Mr. Speaker, last month we again got a glimpse of the tip of the iceberg of the energy problem this Nation is facing. As a consequence of the record low temperatures we experienced last month the supplies of energy fuels in

major areas of our Nation did not keep up with demands. Serious personal hardships and economic penalties resulted. Unfortunately, this latest experience portents more frequent and more serious incidents of energy shortages we must contend with before we can do anything of significance to reduce the growing disparity between demand and supply. We face this unfortunate situation because our domestic sources of oil and natural gas are not adequate to meet our needs, and their rate of production will continue to fall, while the leadtime needed to compensate by increasing the efficiency of use of energy fuels and developing alternate sources to any significant degree, will take a decade or more.

Of course, we must resort to conservation to the maximum degree. This takes time, too. It takes time and wealth to replace machinery, put lighter and more efficient automobiles into use and modify and design buildings which utilize energy more efficiently. Unfortunately, we have in certain instances reached a point of no return in reconciling energy demand and supply discrepancies. One such instance concerns last week's announced shutdown of aluminum production capacity in the State of Washington because of a shortage of electrical energy generating capacity. This reduction of production capacity cannot help but have an adverse effect on our domestic efforts of producing lighter cars and other more efficient machines. Still, we must do more than increase the efficiency of use of energy to reduce the demand and supply discrepancy. We must obtain more energy from domestic resources which do not have the limitations of supply that oil and gas do.

Fortunately, we do have abundant supplies of coal. We also have abundant supplies of nuclear fuel which, if utilized in the efficient manner our scientists and engineers have planned, are sufficient for hundreds of years. This assumes the utilization of the breeder reactor system which is now into the commercial demonstration phase. The fundamental problem with these existing major resources of energy is the long time it takes to get additional units of capacity into operation. For example, it takes over 10 years to bring a nuclear power plant into operation. The time to bring a coal plant into operation is not much shorter. These long leadtimes are not dictated by the technical problems involved in building such plants but are brought about by administrative and legal procedures concerning licensing and regulation which have been imposed on such activities. It is, in a manner, shameful to observe these completely unreasonably long leadtimes in bringing into service powerplants of a type which have been completely developed and tested, compared to what we accomplished just a few years ago. I am referring to such things as the building and placing into operation of our first full-scale uranium enrichment plant in less than 3 years. This was a plant which was started at a time when we were not even certain of the availability of satisfactory material for the process. This plant, covering some 46 acres, and therefore one of the country's largest production facilities, was placed into useful operation in 1945. The first full-scale plutonium production reactor was built and placed in operation in 1944 only one year after construction was started. There are many such examples.

Obviously, we must find ways to shorten the present leadtimes. The present leadtimes mean that nothing can be started now to alleviate our energy shortages by nuclear power before the mid-1980's. And, as I have stated before, adding energy generating capacity fueled by coal, which is the other type of fuel we have in adequate amounts, takes a comparable amount of time.

A development which occurred during the height of our cold weather seige last month reflected the payoff of vision in planning for energy sources 10 to 20 years ago. This concerned the great contribution our fledgling group of nuclear power plants made to the energy dilemma we faced on January 17, the day of record low temperatures. Our nuclear generating capacity, as reported in the Chicago Tribune, permitted us to avert a major blackout. The situation which existed that day is well explained in the compilation put together by the Atomic Industrial Forum, in response to numerous requests, which I would like to include at the close of my remarks. As indicated in the following, the nuclear plants were pushed to the limit to meet our needs. The Chicago area obtained 48 percent of its electrical energy needs from nuclear generating stations, and the New England power pool obtained 30 percent of its capacity from nuclear-fueled generating plants.

It appears to me that the most prudent action which can be taken now to alleviate major future energy problems is to construct all the generating capacity we can which will not require oil or gas as a fuel—which is coal and nuclear generating capacity. We are indeed fortunate to have indigenous supplies of coal and uranium, including the technology to go with it, to provide for our needs. In addition, based upon what I have heard of plans of certain electrical generating utilities to hold back adding generating capacity because of the confusion which has been generated by various announcements that all our problems can be solved by conservation or doing without, I believe it is critically important to clarify this matter. This, in my view, calls for the announcement of a national policy calling for the addition of all of the electrical generating capacity we can which will only be dependent on our domestic resources of coal and nuclear fuel. If we are sufficiently successful in our efforts it may even be possible to cut back on present generating plants which utilize fuels presently in critical supply.

The February 7 report of the Atomic Industrial Forum follows:

NUCLEAR POWER AND THE ENERGY CRISIS, FEBRUARY 7, 1977

The following statistical data and sidebar items bear importantly on your coverage of this winter's energy situation:

Had the approximately 20 billion kilowatt-hours of electricity estimated to have been produced by nuclear power plants in January not been available, these consequences would have resulted:

More than 257,000 jobs lost in the month.

Nearly $230 million lost in monthly wages.

A reduction of some $3.8 billion in the month for the various goods, products and services that make up the Gross National Product.

Additionally, the 10 million homes; 1 million stores, office buildings and schools; and 60,000 factories, industries and manufacturing plants that could have been served by this nuclear generation would have needed their energy requirements met by other means.

Filling these demands for electricity by other sources would have required:

32 million barrels of oil, nearly 13 per cent of current monthly domestic production, or

182 billion cubic feet of natural gas, more than 10 per cent of current monthly production, or

9.6 million tons of coal, about 17 per cent of current monthly production.

NOTE.—Economic impacts are based on projections derived from U.S. Department of Commerce indexes on the historical relationship between energy, employment and productivity. Classes of customers served by electricity are based on historical patterns as reported by the Edison Electric Institute.

SOME REGIONAL REPORTS ON NUCLEAR-POWER CONTRIBUTIONS

January 17, 1977, brought the eastern half of the nation to the brink of a power-supply crisis, according to Frank Starr, reporting in *The Chicago Tribune*, and it was largely thanks to nuclear power that a major blackout was averted. The surge in power demand that day, says *The Tribune*, could not have been met by the coal-dependent utilities, many of whose plants were down for maintenance and much of whose coal was frozen in barges, hopper cars and stockpiles. Fortunately, nearly all Eastern nuclear generating units were operable that day and utilities pushed them to the limit: Commonwealth Edison, in Chicago, derived 48 per cent of its power from six of its seven nuclear reactors; Northeast Utilities and TVA were wheeling power to the Midwest and South; the Edison Electric Institute reports that all seven nuclear units under the New England Power Pool were on line, supplying 30 per cent of that region's electricity and exporting 1,200 megawatts to the South and West. The cold weather affected only one nuclear power plant, according to EEI: the Virginia Electric and Power Company's Surry station was closed for several hours when heavy icing on the James River blocked intake to the plant's cooling system. Reports Starr: "In short, it probably can be said, with only slight exaggeration, that nuclear power bailed the country out of an emergency on the morning of January 17. The anti-nuclear lobby won't be pleased about that, but it did happen."

Northeast Utilities, which serves Connecticut and parts of Massachusetts, reports that nuclear power now accounts for 53 per cent of its system needs; that it enabled Northeast to reduce its dependency on imported oil from 28 million barrels in 1973 to just 13 million barrels in 1976; that nuclear generation represented a saving of $74 million in 1976; and that in 1977 alone, nuclear power will offset the need for 21 million barrels of oil.

The three-unit Browns Ferry nuclear station—largest operating nuclear plant in the world—enabled the Tennessee Valley Authority to meet an unprecendented winter peak load demand on January 17 and still funnel power to several other hard-pressed utilities. The January 17 surge on the TVA system was 3 million kilowatts above any previous peak; ironically, this is almost precisely the amount of capacity represented by Browns Ferry. In

December and January, Browns Ferry averaged 16 per cent of TVA's total power production, and since October 1976, largely due to the economics of Browns Ferry, TVA has been able to reduce customer charges by about $3.00 per 1,000 kilowatt-hours.

The Pilgrim station in Plymouth, Massachusetts, produced 34 per cent of Boston Edison's electric generation during the last six months of 1976, saved consumers nearly $27 million and offset the burning of 3.5 million barrels of oil, according to preliminary figures released last week by the utility. The nuclear plant operated all but 44 hours during the six-month period at an average capacity (operating level) of 70 per cent. Fuel savings (nuclear versus oil) over the six months were actually $37.2 million. Because Pilgrim's capital cost is higher than a comparably sized oil-fired unit, the total economy from its operation was $26.9 million.

The electric output for the week ending January 22 was 45,639,000,000 kilowatt-hours, setting another weekly record, according to the Edison Electric Institute. It represents an increase of 11.9 per cent over the comparable week in 1976, and tops the previous high of 45,459,000,000 kilowatt-hours for the week ending January 15.

Nuclear power plants in the U.S. last year produced slightly more than 200-billion gross kilowatt-hours of electricity. There are now 64 operable nuclear reactors, accounting for 8.8 per cent of total installed capacity and approximately 10 per cent of domestic output.

INTRODUCTION OF TAX AND LOAN ACCOUNT LEGISLATION

(Mr. MITCHELL of Maryland asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MITCHELL of Maryland. Mr. Speaker, today I am introducing a bill to "authorize the Secretary of the Treasury to invest public moneys, and for other purposes." This legislation is needed to resolve equitably the problem of allowing the Treasury to both earn interest on public bank deposits and compensate depositories for services they now render to the Treasury free of charge.

Since being established in 1917, our Federal tax and loan account system has involved billions and billions of dollars which have been deposited in commercial banks and other depository institutions. These deposits, which constitute a significant part of the Treasury's operating cash, earn no interest. Banks, however, have been able to use these Treasury tax and loan account funds to invest in earning assets. On the other hand, banks now perform certain services for the Treasury free of charge.

I recognize that depository institutions should be compensated for their services in connection with maintaining the Treasury's tax and loan accounts, and for handling and processing Federal tax deposits and food stamps and redeeming U.S. savings bonds. However, the facts show that the income they now receive by investing tax and loan account funds more than compensates for the costs they accrue in providing services to the Treasury. A 1974 Treasury study of tax and loan accounts showed that in 1972, the annual earnings exceeded the expenses of handling the Treasury's accounts by $170 million. While it is true that average annual tax and loan account balances have declined significantly within the past few years, taxpayers are still losing millions. Table 1 shows the annual high, low, and average Treasury tax and loan account balances for the period 1966–76. It is time to give the Treasury the authority to invest these balances, matching the authority it already has to directly pay depository institutions for services they now render to the Treasury free of charge.

TABLE 1.—*Treasury tax and loan account balances*

[Annual figures in billions of dollars]

Year	High	Low	Average
1966	$11,274	$447	$4,324
1967	9,979	710	3,775
1968	8,004	1,029	4,191
1969	9,720	709	4,329
1970	7,990	894	4,022
1971	8,532	846	5,146
1972	10,251	1,737	5,648
1973	10,854	800	5,644
1974	9,340	520	3,913
1975	7,249	7	1,853
1976	4,260	67	1,394

Source: Treasury Bulletin.

RECENT HOUSE ACTION

Mr. Speaker, in the recent past, there have been numerous proposals in the Congress to allow the Federal Government to earn interest on its tax and loan account balances. During the 94th Congress, 10 bills toward that end, sponsored by 115 Members of the House of Representatives, were introduced, including H.R. 3035. The House Banking Committee's Subcommittee on Domestic Monetary Policy, then chaired by the Honorable Wright Patman, held 2 days of hearings in September 1975 on H.R. 3035. At that time, the subcommittee adopted an amendment in the nature of a substitute, which was subsequently favorably reported by the full Banking Committee. Later, on December 15, 1975, that bill was passed overwhelmingly by the House; 391 for it, zero against.

Basically, H.R. 3035, as amended, would have allowed Treasury to invest its tax and loan account deposits in the short-term securities of depository institutions and of the United States and its agencies at negotiable interest rates, thereby, earning interest on those funds. Also, in the interest of equity, provision was made to allow savings and loan associations and mutual savings banks to act as depository institutions for Treasury tax and loan account deposits.

Consideration of this legislation involved the effects on small banks, which includes many minority banks, of implementing this proposed investment authority. In this connection, it was pointed out that Treasury would institute a flexible system to accommodate these banks. The effects of the proposed investment authority on small banks and minority banks are extremely important. Let me assure my colleagues that any possible problems will be uncovered, considered, and solved when the Subcommittee on Domestic Monetary Policy, which I chair, takes up the bill I am introducing today.

THE NEED TO ACT NOW

Mr. Speaker, the bill I am introducing today is cosponsored by 51 Members. Considering the gains to taxpayers and to the Treasury provided by this legislation, and also in fairness to banks which provide services to the Treasury, there is no reason why prompt action should be delayed. The sheer folly of allowing Treasury to continue losing between $25 million and $50 million per year should not be tolerated any longer. During times when inflation and recession have both left deep scars in our economy, there can be no good reason for holding back on a measure which will help the Federal Government operate on a more efficient and businesslike basis and also help reduce our massive Federal deficit, even if only by a small amount.

As chairman of the Subcommittee on Domestic Monetary Policy, I am scheduling hearings on this tax and loan account legislation on March 9.

MINORITY ENTERPRISE PROVISION TO LOCAL PUBLIC WORKS CAPITAL DEVELOPMENT AND INVESTMENT AMENDMENTS (H.R. 11)

(Mr. MITCHELL of Maryland asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MITCHELL of Maryland. Mr. Speaker, in an attempt to provide economic stimulus and attack the pervasive effects of unemployment the Public Works and Transportation Committee is offering H.R. 11 for consideration. The history of public works projects, as a countercyclical device, reveals that local government expenditures for projects create direct jobs and stimulate complementary expenditures in the material and supply market. With an existing 15 percent rate of unemployment in the construction industry increases in public works expenditures will cause increases in the capital stock and assist in stabilizing the industry whose workers and complementary businesses are vulnerable to cyclical variation. Because I totally support the theory of a "triggered public works mechanism," I have developed an amendment to refine the bill's intent.

If public works projects are to have optimum effect on both the economy and the labor force, we must both trigger and target the public works bill. Estimates reveal that there is currently 35 percent unemployment in the minority construction sector and an estimated 20 percent of the complementary construction industries that are minority owned have dissolved in the midst of a depression in the minority business sector. As the Public Works and Transportation Committee utilizes targeting to emphasize the value of domestic economic growth through the use of a "buy American provision," I am

emphasizing the value of minority business development by targeting and adopting the provision that 10 percent of the articles, materials, and supplies which will be used in any accelerated public works project must be procured from minority business enterprises. My amendment ensures domestic growth and will stimulate the declining minority business sector.

The Federal Government has not played its role in the quest for economic parity. In fiscal year 1976 Federal agencies purchased a variety of goods and services amounting to $68 billion. In total, Federal procurement represents approximately 6 percent of the gross national product or 17 percent of the Federal budget. In the process to parity the minority business sector should receive from 15 to 18 percent of the contract receipts, however, in fiscal year 1976 the minority business sector received less than 1 percent of the contract receipts of the Federal Government.

The Congress concerns itself with the fiscal problems of the cities, crime, and unemployment. I submit to my colleagues that urban development and fiscal stability is tantamount to minority business development; reductions in crime and a reevaluation in the value of life is tantamount to minority business development; and reductions in unemployment causing additional demand and growth are directly related to minority business development.

I urge my colleagues to support my amendment and promote growth in the minority business community. I appeal to the consciousness of parity and not the vote of disparity in requesting that Members of this legislative body support my amendment to insure minority business participation in the contruction industry.

The following are the provisions of my amendment:

Page 2, line 23, insert "(1)" immediately before "Notwithstanding".

Page 3, line 7, strike out the quotation marks and the period immediately following the quotation marks.

Page 3, immediately after line 7, add the following:

"(2) Notwithstanding any other provision of law, no grant shall be made under this Act for any local public works project unless at least 10 per centum of the articles, materials, and supplies which will be used in such project are procured from minority business enterprises. For purposes of this paragraph, the term 'minority business enterprise' means a business at least 50 percent of which is owned by minority group members or, in case of publicly owned businesses, at least 51 percent of the stock of which is owned by minority group members. For the purposes of the preceding sentence, minority group members are citizens of the United States who are Negroes, Spanish-speaking, Orientals, Indians, Eskimos, and Aleuts."

LOBLOLLY

(Mr. HALL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HALL. Mr. Speaker, recognizing the unique excellence of the Loblolly, a student publication at Gary High School, in Panola County, Tex., the State of Texas, through a formal senate resolution, has officially congratulated the students of Gary High School for this fine project as well as their history teacher and sponsor, the Honorable Lincoln King.

In view of the esthetic and practical skills displayed by the students, including silviculture, historical research, business management, and the artistic implementation of their many cultural interests, I believe it is a rewarding experience for the Members of this House to know that so many young people in east Texas have, in such notable manner, already assumed their heritage as responsible citizens of this great Nation.

I add my personal commendation to the text of Texas Senate Resolution 49, which follows:

SENATE RESOLUTION

Whereas, the Loblolly magazine project at Gary High School in East Texas represents a significant achievement which has earned wide recognition since its inception in January, 1973; and

Whereas, The purpose of the publication, named for the loblolly pine which is indigenous to the area, is to record and preserve the history, culture, and folklore of Panola County and East Texas; and

Whereas, The students involved in the project do all of their own interviewing, photography, and writing, and working on the magazine has led them to discover their own heritage and taught them how to manage a business successfully; and

Whereas, Because of the success of their efforts, these students and their publication have received recognition from a number of sources, including the New York Times, the U.S. News and World Report, the Dallas Morning News, Grit, the Houston Post, the Shreveport Journal, and many East Texas newspapers; and

Whereas, The Gary students were commended by resolution of the Panola County Commissioners Court for the collection and preservation of county history, were awarded a certificate of recognition by the American Revolution Bicentennial Commission of Texas for bicentennial leadership, and were presented with a trophy from the Texas State Historical Association as the outstanding first year Junior Historian Chapter of Texas schools in 1976; and

Whereas, The University of Texas Interscholastic League awarded a plaque to Loblolly for "Magazine Excellence" in 1975, and the Southern Interscholastic Press Association gave the publication its highest ratings for a folklore magazine and for photojournalism; and

Whereas, Loblolly has received grants for assistance in production, operation, and distribution of the magazine from the Texas Commission for the Arts and Humanities, the American Revolution Bicentennial Commission of Texas, and the Southland Foundation; and

Whereas, An article from Loblolly was included in Some Still Do, the latest annual book of the Texas Folklore Society; and

Whereas, The 1976 awards program of the American Association for State and Local History presented a Certificate of Commendation to the students at Gary High School for publishing Loblolly and thereby gaining a better understanding of the area and transmitting this understanding to others; and

Whereas, The people of the State of Texas are justly proud of the exceptional achievement of the Gary High School students in the publication of Loblolly, a magazine which has gained nationwide recognition; now, therefore, be it

Resolved, That the Senate of the 65th Legislature of the State of Texas congratulate all students involved in the Loblolly magazine project and their history teacher and sponsor, Lincoln King, for their outstanding accomplishment; and, be it further

Resolved, That copies of this Resolution be prepared for the sponsor and students of Gary High School as an expression of esteem from the Senate of the State of Texas.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. JONES of North Carolina (at the request of Mr. WRIGHT), for February 23 and 24, on account of official business.

Mr. GONZALEZ, for today and the balance of the week, on account of illness.

Mr. HAWKINS (at the request of Mr. WRIGHT), for February 22, 23, and 24, on account of medical reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. EDWARDS of Oklahoma), to revise and extend their remarks, and to include extraneous matter:)

Mr. KEMP, for 30 minutes, today.

Mr. COHEN, for 10 minutes, on February 24.

Mr. EDWARDS of Oklahoma, for 10 minutes, today.

Mr. BADHAM, for 5 minutes, on February 24.

Mr. DERWINSKI, for 5 minutes, today.

Mr. FISH, for 10 minutes, today.

(The following Members (at the request of Mr. FLIPPO) to revise and extend their remarks and include extraneous material:)

Mr. CORNELL, for 5 minutes, today.

Mr. AUCOIN, for 5 minutes, today.

Mr. DRINAN, for 60 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. BAUCUS, for 10 minutes, today.

Ms. MIKULSKI, for 5 minutes, today.

Mr. CARR, for 5 minutes, today.

Mr. ANDREWS of North Carolina, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. EILBERG, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $715.

(The following Members (at the request of Mr. EDWARDS of Oklahoma) and to include extraneous matter:)

Mr. COCHRAN of Mississippi.

Mr. YOUNG of Florida in five instances.

Mr. FINDLEY.

Mr. ASHBROOK in two instances.

Mr. KELLY in two instances.

Mr. DERWINSKI in four instances.

Mr. CEDERBERG.
Mr. SYMMS.
Mr. RUDD.
Mr. GRASSLEY.
Mr. WHITEHURST.
Mr. SKUBITZ.
Mr. STEIGER in two instances.
Mr. SPENCE.
Mr. BROWN of Michigan.
Mr. GILMAN in two instances.
Mr. ABDNOR in two instances.
Mr. PRESSLER.
Mr. QUAYLE.
Mr. DORNAN.
Mr. EVANS of Delaware.
Mr. PURSELL.

(The following Members (at the request of Mr. FLIPPO) and to include extraneous matter:)

Mr. RICHMOND.
Mr. FRASER in five instances.
Mr. JACOBS.
Mr. EILBERG.
Mr. WOLFF in two instances.
Mr. TEAGUE in two instances.
Mr. DE LUGO.
Mr. SOLARZ.
Mr. AUCOIN.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. STARK.
Mr. MOTTL.
Mr. HAMILTON.
Mr. BRODHEAD.
Mr. LEDERER.
Mr. RISENHOOVER in two instances.
Mr. MCDONALD.
Mr. DRINAN in two instances.
Mr. MURTHA in three instances.
Mr. AMMERMAN in two instances.
Mr. EDGAR in three instances.
Mr. BROWN of California in two instances.
Mr. ZEFERETTI.
Mrs. ANDREWS of North Carolina in three instances.
Mr. ROSENTHAL.
Mr. UDALL.
Mr. MINISH.
Mr. FORD of Michigan.
Mr. STEED.
Mr. BLANCHARD.
Mr. STUDDS.
Mr. BRECKINRIDGE.
Mr. WIRTH.

ADJOURNMENT

Mr. FLIPPO. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 16 minutes p.m.), the House adjourned until tomorrow, Thursday, February 24, 1977, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

800. A letter from the President of the United States, transmitting proposed supplemental appropriations for fiscal year 1977 for the District of Columbia (H. Doc. No. 95–86); to the Committee on Appropriations and ordered to be printed.

801. A letter from the Secretary of Agriculture, transmitting the annual report on the Renewable Resources Program, pursuant to section 8(c) of the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended; to the Committee on Agriculture.

802. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Federal Crop Insurance Act and for other purposes; to the Committee on Agriculture.

803. A letter from the Acting Staff Secretary, National Security Council, transmitting a report on the Council's activities under the Freedom of Information Act during calendar year 1976, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

804. A letter from the Executive Officer, U.S. Arms Control and Disarmament Agency, transmitting a report on the Agency's activities under the Freedom of Information Act during calendar year 1976, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

805. A letter from the Comptroller General of the United States, transmitting a list of reports issued or released during January 1977, pursuant to section 234 of the Legislative Reorganization Act of 1970; to the Committee on Government Operations.

806. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to amend title I of the Foreign Relations Authorization Act, Fiscal Year 1977 (Public Law 94–350; 90 Stat. 823) to authorize appropriations for fiscal years 1978 and 1979 and for other purposes; to the Committee on International Relations.

807. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Elliot L. Richardson, nominated to be an Ambassador at Large and the Special Representative of the President for the Law of the Sea Conference and Chief of Delegation, and his family, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

808. A letter from the Acting Administrator of General Services, transmitting a report on a building project survey for San Jose, Calif., requested by a reduction of the House Committee on Public Works and Transportation adopted February 8, 1977; to the Committee on Public Works and Transportation.

809. A letter from the Administrator, National Aeronautics and Space Administration, transmitting a draft of proposed legislation to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes; to the Committee on Science and Technology.

810. A letter from the Comptroller General of the United States, transmitting a report on the Labor Department's Employment Service (HRD–76–169); jointly, to the Committees on Government Operations, and Education and Labor.

811. A letter from the Comptroller General of the United States, transmitting a report finding that lower airline costs per passenger are possible in the United States and could result in lower fares (CED–77–34, February 18, 1977); jointly, to the Committees on Government Operations, and Public Works and Transportation.

812. A letter from the Assistant Secretary of State for Administration, transmitting appropriations requests for the U.S. Emergency Refugee and Migration Assistance Fund, pursuant to section 2(c)(3) of the Refugee and Migration Assistance Act of 1962; jointly, to the Committees on International Relations, and Appropriations.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MAHON:

H.R. 3839. A bill to rescind certain budget authority recommended in the message of the President of January 17, 1977 (H. Doc. 95–48), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

By Mr. ASHBROOK:

H.R. 3840. A bill to make technical amendments to provisions relating to vocational education contained in the Education Amendments of 1976; to the Committee on Education and Labor.

H.R. 3841. A bill to exclude certain members of the staff of a permanent foreign diplomatic mission, and their families and servants, from diplomatic immunity from criminal and civil process; to the Committee on International Relations.

H.R. 3842. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. ASHLEY:

H.R. 3843. A bill to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, to establish a National Commission on Neighborhoods, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BAFALIS:

H.R. 3844. A bill to amend the Internal Revenue Code of 1954 to eliminate the adjusted gross income limitation on the credit for the elderly; to the Committee on Ways and Means.

By Mr. BINGHAM:

H.R. 3845. A bill to extend for an additional year (through the fiscal year 1978) the recently enacted 8-percent increase in social services funding for child care under title XX of the Social Security Act, and to provide for further increases in such funding thereafter to reflect rises in the cost of living; to the Committee on Ways and Means.

By Mr. BLANCHARD:

H.R. 3846. A bill to amend title II of the Social Security Act to increase to $4,800 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted an individual each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

H.R. 3847. A bill to amend title II of the Social Security Act to increase to $4,800 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted an individual each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

By Mr. BOWEN:

H.R. 3848. A bill to amend title II of the Social Security so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. BREAUX:

H.R. 3849. A bill to establish qualifications for individuals appointed to the National Advisory Committee on Oceans and Atmosphere and to authorize appropriations for the committee for fiscal year 1978; to the Committee on Merchant Marine and Fisheries.

By Mr. BRINKLEY:

H.R. 3850. A bill to repeal the Occupational Safety and Health Act of 1970; to the Committee on Education and Labor.

By Mr. BROOMFIELD:

H.R. 3851. A bill to terminate all price-support programs for tobacco beginning with the 1978 crop of tobacco; to the Committee on Agriculture.

H.R. 3852. A bill to prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned, or retired; to the Committee on House Administration.

H.R. 3853. A bill to amend the Internal Revenue Code of 1954 to provide tax relief for homeowners; to the Committee on Ways and Means.

H.R. 3854. A bill to provide property tax relief to low-income elderly homeowners through direct reimbursements; to the Committee on Ways and Means.

By Mr. BROWN of California:

H.R. 3855. A bill to amend the Federal Railroad Safety Act of 1970 to direct the Secretary of Transportation to issue regulations requiring locomotives and rear cars to be equipped with bulletproof glass; to the Committee on Interstate and Foreign Commerce.

By Mr. BURGENER:

H.R. 3856. A bill to amend title 38 of the United States Code to remove the time limitations within which programs of education for veterans must be completed; to the Committee on Veterans' Affairs.

By Mr. BURGENER (for himself and Mrs. PETTIS):

H.R. 3857. A bill to provide for the reauthorization of a comprehensive study by the Army Corps of Engineers of the water resources problems and needs of the Whitewater River Basin, Riverside County, Calif.; to the Committee on Public Works and Transportation.

By Mr. BURLESON of Texas:

H.R. 3858. A bill to provide that individuals who retired on disability before October 1, 1976, shall be entitled to the exclusion for disability payments under section 105(d) of the Internal Revenue Code of 1954 without regard to the income limitation in such section, and for other purposes; to the Committee on Ways and Means.

By Mr. BURLESON of Texas (for himself, and Mr. KRUEGER):

H.R. 3859. A bill to repeal the carryover basis provisions added by the Tax Reform Act of 1976; to the Committee on Ways and Means.

By Mr. CARNEY:

H.R. 3860. A bill to amend title 39, United States Code, to permit individuals to return congressional questionnaires, and to mail Federal income tax returns, free of postage; to the Committee on Post Office and Civil Service.

H.R. 3861. A bill to amend title 38 of the United States Code in order to require the Administrator of Veterans' Affairs to pay a $150 allowance to any State or any agency or political subdivision of a State in reimbursement for expenses incurred in the burial of each veteran in any cemetery owned by such State or agency or political subdivision of a State, if the cemetery or section thereof is used solely for the interment of veterans; to the Committee on Veterans' Affairs.

By Mr. CARNEY (by request):

H.R. 3862. A bill to amend chapter 23, United States Code, so as to provide that where death occurs in a State Home, the Administrator shall pay the actual cost (not to exceed $250) of the burial and funeral, and transport the body to the place of burial in the same or any other State; to the Committee on Veterans' Affairs.

H.R. 3863. A bill to amend title 38, United States Code, so as to authorize furnishing of memorial markers for graves in private cemeteries wherein the remains of an honorably discharged serviceman are not recoverable; to the Committee on Veterans' Affairs.

By Mr. CARR:

H.R. 3864. A bill to amend the State and Local Fiscal Assistance Act of 1972 to provide incentives for the funding of education by means other than property taxes; to the Committee on Government Operations.

By Mr. CARR (for himself, Mr. WIRTH, Mrs. SCHROEDER, Mr. PEPPER, Mr. MCCLOSKEY, Mr. OTTINGER, Mr. MOTTL, Mr. MOFFETT, Mr. PRITCHARD, Mr. KREBS, Mr. SHARP, Mr. DUNCAN of Oregon, Mr. GRADISON, Mr. PANETTA, Mr. BRODHEAD, Mr. EDWARDS of Oklahoma, Mr. SEIBERLING, Mr. GLICKMAN, Mr. STEERS, Mr. FISH, Mr. RICHMOND, Mr. DOWNEY, Mr. BAUCUS, Mr. NOLAN, and Mr. CHARLES WILSON of Texas):

H.R. 3865. A bill to require Federal agencies to report to Congress certain expenditures made for or on behalf of Members of Congress or employees of Congress and to provide for the reimbursement of such expenditures; to the Committee on House Administration.

By Mr. CHAPPELL (for himself and Mr. LEHMAN):

H.R. 3866. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. CORNELL:

H.R. 3867. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for sewer charges in the same manner as the deduction allowed for real property taxes; to the Committee on Ways and Means.

By Mr. CORNELL (for himself, Mr. BALDUS, Mr. BLOUIN, Mr. BONIOR, Mr. BUTLER, Mr. CARR, Mr. CONYERS, Mr. DODD, Mr. DUNCAN of Tennessee, Mr. ERTEL, Mr. GEPHARDT, Mr. HARRINGTON, Mr. KOSTMAYER, Mr. MAZZOLI, Mr. PREYER, Mr. RINALDO, Mr. STARK, Mr. STEERS, and Mr. WIRTH):

H.R. 3868. A bill to revise the laws governing appointments to the service academies so as to relieve Members of Congress from the responsibility of making nominations for appointments thereto, and for other purposes; jointly, to the Committees on Armed Services and Merchant Marine and Fisheries.

By Mr. CORRADA:

H.R. 3869. A bill to amend title 5 of the United States Code to prohibit the consideration of certain matters in the determination of cost-of-living allowances for employees stationed outside the continental United States; to the Committee on Post Office and Civil Service.

By Mr. COUGHLIN (for himself, Mr. CRANE, Mr. FLOWERS, Mr. EDGAR, Mr. GOLDWATER, Mr. GOODLING, Mr. RUPPE, and Mr. VANDER JAGT):

H.R. 3870. A bill to amend the Internal Revenue Code of 1954 and certain other provisions of law to provide for automatic cost-of-living adjustments in the income tax rates, the amount of the standard, personal exemption, and depreciation deductions, and the rate of interest payable on certain obligations of the United States; to the Committee on Ways and Means.

By Mr. CORRADA:

H.R. 3871. A bill to amend the Social Security Act to provide that Federal assistance to Puerto Rico, the Virgin Islands, and Guam under the AFDC, child welfare, medicaid, and social services programs shall be furnished on the same basis (under the same formula and without specific dollar ceilings) as in the case of other States, and to amend section 228 of such act to extend to Puerto Rico, the Virgin Islands, and Guam the program of special benefits at age 72 for certain uninsured individuals; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. D'AMOURS:

H.R. 3872. A bill to prohibit any State from imposing a tax on the income derived by any individual from services in the Federal area within such State if such individual is not a resident or domiciliary of such State or of any other State which imposes a tax on income; to the Committee on the Judiciary.

By Mr. DINGELL (for himself, Mr. STAGGERS, Mr. EDGAR, Mr. MOSS, Mr. FISHER, Mr. DAN DANIEL, Mr. BALDUS, Mr. LEHMAN, Mr. DOWNEY, Mrs. LLOYD of Tennesee, Mr. BRODHEAD, Mr. WHITEHURST, Mr. DUNCAN of Tennessee, Mr. HARRIS, Mr. FRASER, Mr. MURPHY of New York, Ms. KEYS, Mr. PEASE, Mr. SLACK, Mr. MOFFETT, Mr. MOORHEAD of Pennsylvania, Mr. BADILLO, Ms. MIKULSKI, Mr. MEEDS, and Mr. MAGUIRE):

H.R. 3873. A bill to provide for the protection of franchised distributors and retailers of motor fuel; to encourage conservation by requiring that information regarding the octane rating of automotive gasoline be disclosed to consumers; and to prevent deterioration of competition in gasoline marketing; to the Committee on Interstate and Foreign Commerce.

By Mr. DINGELL (for himself, Mr. ERTEL, Mr. ROONEY, and Mr. MCKINNEY):

H.R. 3874. A bill to provide for the protection of franchised distributors and retailers of motor fuel; to encourage conservation by requiring that information regarding the octane rating of automotive gasoline be disclosed to consumers; and to prevent deterioration of competition in gasoline marketing; to the Committee on Interstate and Foreign Commerce.

By Mr. DOWNEY:

H.R. 3875. A bill to amend the Fair Credit Reporting Act of 1975; to the Committee on Banking, Finance, and Urban Affairs.

H.R. 3876. A bill to amend title II of the Social Security Act to increase to $7,500 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

By Mr. DOWNEY (for himself, Mr. BONIOR, Ms. CHISHOLM, Ms. COLLINS, of Illinois, Mr. DELLUMS, Mr. DRINAN, Mr. EDGAR, Mr. EILBERG, Mr. HYDE, Mr. LENT, Mr. MAGUIRE, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. MCKINNEY, Mr. RICHMOND, Mr. SCHEUER, Ms. SPELLMAN, Mr. VENTO, and Mr. BALDUS):

H.R. 3877. A bill to amend the Older Americans Act of 1965 to provide relief for older Americans who own or rent their homes; to the Committee on Education and Labor.

By Mr. DRINAN (for himself, Mr. BADILLO, Mr. BONIOR, Mr. CARR, Ms. CHISHOLM, Mr. CORMAN, Mr. DERWINSKI, Mr. EDWARDS of California, Mr. GIBBONS, Mr. HOLLENBECK, Mr. HORTON, Mr. LAFALCE, Mr. MAGUIRE, Mr. MCKAY, Mr. MOAKLEY, Mr. MOORHEAD of California, Mr. MOSS, Mr. OTTINGER, Mr. SCHEUER, Mr. SIMON, Ms. SPELLMAN, and Mr. WAXMAN):

H.R. 3878. A bill to strengthen the warning label required on cigarette packages, extend such warning to cigarette advertisements, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DRINAN (for himself, Mr. BADILLO, Mr. BEDELL, Mr. CARR, Ms. CHISHOLM, Mr. CORMAN, Mr. EDWARDS of California, Mr. GIBBONS, Mr. HORTON, Mr. LAFALCE, Mr. MCKAY, Mr. MOAKLEY, Mr. MOORHEAD of California, Mr. MOSS, Mr. ROYBAL, Mr. SCHEUER, and Ms. SPELLMAN):

H.R. 3879. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize the regulation of tobacco products under that act in the same manner as food is regulated under that act; to the Committee on Interstate and Foreign Commerce.

By Mr. DRINAN (for himself, Mr. BEDELL, Mr. CLAY, Mr. CONYERS, Mr. DELLUMS, Mr. DOWNEY, Mr. FRASER, Mr. METCALFE, Mr. MITCHELL of Maryland, Mr. RICHMOND, Mr. ROSENTHAL, and Mr. STARK):

H.R. 3880. A bill to abolish the death penalty under all laws of the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. DRINAN (for himself, Mr. BADILLO, Mr. BONIOR, Mr. CARR, Ms. CHISHOLM, Mr. CORMAN, Mr. EDWARDS of California, Mr. GEPHARDT, Mr. GIBBONS, Mr. LAFALCE, Mr. MAGUIRE, Mr. MCKAY, Mr. MOAKLEY, Mr. MOORHEAD of California, Mr. MOSS, Mr. OTTINGER, Mr. ROYBAL, Mr. SCHEUER and Mr. WAXMAN):

H.R. 3881. A bill to establish a health protection tax on cigarettes, and for other purposes; to the Committee on Ways and Means.

By Mr. DRINAN (for himself, Mr. BADILLO, Mr. BONIOR, Mr. BRODHEAD, Mr. CARR, Ms. CHISHOLM, Mr. CORMAN, Mr. DERWINSKI, Mr. EDGAR, Mr. EDWARDS of California, Mr. GIBBONS, Mr. HOLLENBECK, Mr. MAGUIRE, Mr. MCKAY, Mr. MOAKLEY, Mr. MOORHEAD of California, Mr. MOSS, Mr. ROYBAL, Mr. SCHEUER, and Mr. WAXMAN):

H.R. 3882. A bill to regulate smoking in Federal facilities and in facilities serving interstate common carrier passengers, and for other purposes; jointly to the Committees on Interstate and Foreign Commerce, and Public Works and Transportation.

By Mr. EDWARDS of Alabama:

H.R. 3883. A bill to amend the Elementary and Secondary Education Act of 1965 to provide for drug abuse therapy programs in schools; to the Committee on Education and Labor.

H.R. 3884. A bill to make the use of a firearm to commit certain felonies a Federal crime where that use violates State law, and for other purposes; to the Committee on the Judiciary.

By Mr. EDWARDS of Oklahoma:

H.R. 3885. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

By Mr. FLORIO:

H.R. 3886. A bill to grant a Federal charter to the National Opportunity Camps; to the Committee on the Judiciary.

By Mr. FORD of Michigan (for himself, Mr. BRODHEAD, Mr. CLAY, Mr. EDGAR, Mr. EILBERG, Ms. MIKULSKI, Mr. PRICE, Mr. RANGEL, Mr. ROYBAL, and Mr. VENTO):

H.R. 3887. A bill to amend the Fair Labor Standards Act of 1938, to require prenotification to affected employees and communities of dislocation of business concerns, to provide assistance (including retraining) to employees who suffer employment loss through the dislocation of business concerns, to business concerns threatened with dislocation, and to affected communities, to prevent Federal support for unjustified dislocation, and for other purposes; jointly, to the Committees on Education and Labor and Banking, Finance and Urban Affairs.

By Mr. FRASER (for himself, Mr. BEDELL, Mr. BEILENSON, Mr. BINGHAM, Mr. BLOUIN, Mr. BRODHEAD, Mr. BROWN of California, Mr. JOHN L. BURTON, Mr. CARR, Mrs. CHISHOLM, Mr. CONYERS, Mrs. FENWICK, Mr. FLOOD, Mr. HARKIN, Mr. LEACH, Mr. MADIGAN, Mr. MAZZOLI, Mr. METCALFE, Mr. MIKVA, Mr. MOAKLEY, and Mr. MOFFETT):

H.R. 3888. A bill to add certain lands to the Boundary Waters Canoe Area, to redesignate such area as the Boundary Waters Wilderness Area, to withdraw certain authorities for timber harvesting and vehicle use within such area, to increase the payments made to counties respecting such area, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. FRASER (for himself, Mr. OTTINGER, Mr. NOLAN, Mr. REUSS, Mr. RICHMOND, Mr. SCHEUER, Mr. SEIBERLING, Mrs. SPELLMAN, Mr. STEERS, Mr. VENTO, Mr. WEISS, Mr. WINN, and Mr. WIRTH):

H.R. 3889. A bill to add certain lands to the Boundary Waters Canoe Area, to redesignate such area as the Boundary Waters Wilderness Area, to withdraw certain authorities for timber harvesting and vehicle use within such area, to increase the payments made to counties respecting such area, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. FRASER (for himself, Mr. ANDERSON of Illinois, Mr. RAILSBACK, and Mr. STARK):

H.R. 3890. A bill to add certain lands to the Boundary Waters Canoe Area, to redesignate such area as the Boundary Waters Wilderness Area, to withdraw certain authorities for timber harvesting and vehicle use within such area, to increase the payments made to counties respecting such area, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. FUQUA:

H.R. 3891. A bill to amend the Food Stamp Act of 1964 by revising the eligibility requirements for participation in the program and increasing the overall efficiency of the program administration through the imposition of a national income formula, and for other purposes; to the Committee on Agriculture.

H.R. 3892. A bill to prohibit any change in the status of any member of the uniformed services who is in a missing status under chapter 10 of title 37, United States Code, until the provisions of the Paris Peace Accord of January 27, 1973, have been fully complied with, and for other purposes; to the Committee on Armed Services.

H.R. 3893. A bill to authorize recomputation at age 60 of the retired pay of members and former members of the uniformed services whose retired pay is computed on the basis of pay scales in effect prior to January 1, 1972, and for other purposes; to the Committee on Armed Services.

H.R. 3894. A bill to amend title 10 of the United States Code in order to establish an Optometry Corps in the Army and the Navy and to provide a separate optometric service within the Air Force; to the Committee on Armed Services.

H.R. 3895. A bill to amend the Occupational Safety and Health Act of 1970 to provide that where violations are corrected within the prescribed abatement period no penalty shall be assessed; to the Committee on Education and Labor.

H.R. 3896. A bill to prohibit travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned, or retired; to the Committee on House Administration.

H.R. 3897. A bill to amend the Communications Act of 1934 with respect to the removal of licenses for the operation of broadcasting stations; to the Committee on Interstate and Foreign Commerce.

H.R. 3898. A bill to amend the Controlled Substances Act to provide penalties for persons who obtain or attempt to obtain narcotics or other controlled substances from a retail pharmacy by force and violence, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 3899. A bill to amend title 39, United States Code, to provide that buildings constructed for use by the U.S. Postal Service shall be designed and constructed in a manner making them accessible to the physically handicapped; to the Committee on Post Office and Civil Service.

H.R. 3900. A bill to amend title 39, United States Code, to require the U.S. Postal Service to make certain considerations prior to the closing of third- and fourth-class post offices; to the Committee on Post Office and Civil Service.

H.R. 3901. A bill to amend section 21 of the Second Liberty Bond Act to provide for the retirement of the public debt; to the Committee on Ways and Means.

H.R. 3902. A bill to amend the Internal Revenue Code of 1954 to exempt nonprofit volunteer firefighting or rescue organizations from the Federal excise taxes on gasoline, diesel fuel, and certain other articles and services; to the Committee on Ways and Means.

H.R. 3903. A bill to establish a program of comprehensive medical, hospital, and dental care as protection against the cost of ordinary and catastrophic illness by requiring employers to make insurance available to each employee and his family, by Federal financing of insurance for persons of low income, in whole or in part according to ability to pay, and by assuring the availability of insurance to all persons regardless of medical history, and on a guaranteed renewable basis; jointly to the Committees on Ways and Means, and Interstate and Foreign Commerce.

H.R. 3904. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for optometric and medical vision care; jointly to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. GIBBONS:

H.R. 3905. A bill to authorize recomputation at age 60 of the retired pay of members and former members of the uniformed services whose retired pay is computed on the basis of pay scales in effect prior to January 1, 1972, and for other purposes; to the Committee on Armed Services.

By Mr. HANLEY:

H.R. 3906. A bill to amend title 5, United States Code, to make Inauguration Day a legal public holiday; to the Committee on Post Office and Civil Service.

By Mr. HARKIN (for himself, Mr. DELANEY, Mr. OTTINGER, Mr. MCHUGH, Mr. RAHALL, Mr. MURPHY of Pennsylvania, Mr. ROYBAL, Mr. GILMAN, Mr. KINDNESS, Mr. EDGAR, Mr. BONIOR, Mr. BEARD of Rhode Island, Mr. ROSE, Mr. CARNEY, Mr. FASCELL, Mr. SCHEUER, Mr. HAWKINS, Mr. COHEN, Mr. PERKINS, Mrs. SPELLMAN, Ms. MIKULSKI, Mr. BEDELL, Mr. SIMON, Mrs. COLLINS of Illinois, and Mr. CARR):

H.R. 3907. A bill to establish a program for repairing and replacing unsafe highway bridges; jointly to the Committees on Public Works and Transportation and Ways and Means.

By Mr. JACOBS (for himself, Mr. MCCORMACK, Mr. CORNWELL, Mr. GLICKMAN, Mr. COLLINS of Texas, Mr. SANTINI, Mr. FITHIAN, and Mr. MARKEY):

H.R. 3908. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only ap-

ply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

By Mr. JOHNSON of Colorado:

H.R. 3909. A bill to authorize the Secretary of the Interior to engage in feasibility investigations of a potential water resource development; to the Committee on Interior and Insular Affairs.

By Mr. KASTENMEIER (for himself and Mr. BEDELL):

H.R. 3910. A bill to amend the Clayton Act to provide for additional regulation of certain anticompetitive developments in the agricultural industry; to the Committee on the Judiciary.

By Mr. KEMP (for himself, Mr. RAHALL, Mr. STOCKMAN, Mr. WALKER, and Mr. WHITEHURST):

H.R. 3911. A bill to exempt sales by small producers of certain natural gas from regulation of the Federal Power Commission and from the requirement of certificates of public convenience and necessity of section 7(c) of the Natural Gas Act; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. KEMP (for himself and Mr. RONCALIO):

H.R. 3912. A bill to incorporate the National Ski Patrol System, Inc.; to the Committee on the Judiciary.

By Mr. KILDEE (for himself, Mr. MURPHY of New York, Mrs. LLOYD of Tennessee, Mr. DAN DANIEL, Mr. QUIE, Mr. FUQUA, Mr. LOTT, Mr. PEASE, Mr. EDWARDS of Oklahoma, Mr. MCCORMACK, Mr. LUKEN, Mr. CORRADA, Mr. SCHEUER, Mr. MAZZOLI, and Mr. STOCKMAN):

H.R. 3913. A bill to amend title 18, United States Code, to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation; to the Committee on the Judiciary.

By Mr. KILDEE (for himself, Mr. MURPHY of New York, Mr. VENTO, Mr. BEVILL, Mr. BEDELL, Mr. TREEN, Mr. EDGAR, Mr. DICKS, Mr. SIMON, Mr. BALDUS, Mr. BONIOR, Mrs. CHISHOLM, Mr. NOLAN, Mr. MOTTL, Mr. MOORHEAD of California, and Mr. NEAL):

H.R. 3914. A bill to amend title 18, United States Code, to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation; to the Committee on the Judiciary.

By Mr. KOCH (for himself, Mr. BADILLO, Mr. BONIOR, Mr. BROWN of California, Mrs. CHISHOLM, Mr. CONYERS, Ms. FENWICK, Mr. HAWKINS, Mr. HOWARD, Mr. JENRETTE, Mr. MIKVA, Mr. NEDZI, Mr. OBERSTAR, Mr. PATTISON of New York, Mr. PRICE, Mr. SCHEUER, Mr. STARK, Mr. WEISS, Mr. CHARLES H. WILSON of California, and Mr. WOLFF):

H.R. 3915. A bill to amend part B of title IV of the Social Security Act to provide, as the primary form in which services are to be furnished under the child-welfare services program, for supportive day treatment and in-home services to children and families; to the Committee on Ways and Means.

By Mr. KOCH (for himself, Mr. PEPPER, Mr. ANDERSON of California, Mr. BADILLO, Mr. BAUCUS, Mr. BEARD of Rhode Island, Mr. BIAGGI, Mr. BINGHAM, Mr. BLOUIN, Mr. BONIOR, Mr. BRODHEAD, Mr. CARNEY, Mr. CLAY, Mrs. COLLINS of Illinois, Mr. CONYERS, Mr. DELLUMS, Mr. DIGGS, Mr. DOWNEY, Mr. DRINAN, Mr. DUNCAN of Tennessee, Mr. EDGAR, Mr. EDWARDS of California, Mr. EILBERG, Mr. FASCELL, and Mr. FORD of Michigan):

H.R. 3916. A bill to amend part B of title XVIII of the Social Security Act to broaden the coverage of home health services under the supplementary medical insurance program and remove the 100-visit limitation presently applicable thereto, and to eliminate the requirement that an individual need skilled nursing care in order to qualify for such services, to amend part A of such title to liberalize the coverage of post-hospital home health services thereunder, to amend title XIX of such Act to require the inclusion of home health services in a State's medicaid program and to permit payments of housing costs under such a program for elderly persons who would otherwise require nursing home care, to provide expanded Federal funding for congregate housing for the displaced and the elderly, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. KOCH (for himself, Mr. PEPPER, Mr. FLORIO, Mr. HARKIN, Mr. HARRINGTON, Mr. HAWKINS, Ms. HOLTZMAN, Mr. HOWARD, Mr. HUGHES, Mr. HYDE, Ms. KEYS, Mr. LEHMAN, Mr. LENT, Ms. MEYNER, Ms. MIKULSKI, Mr. MINETA, Mr. MOAKLEY, Mr. MURPHY of Pennsylvania, Mr. NEAL, Mr. NIX, Mr. NOLAN, Mr. RAHALL, Mr. RANGEL, Mr. RICHMOND, and Mr. RINALDO):

H.R. 3917. A bill to amend part B of title XVIII of the Social Security Act to broaden the coverage of home health services under the supplementary medical insurance program and remove the 100-visit limitation presently applicable thereto, and to eliminate the requirement that an individual need skilled nursing care in order to qualify for such services, to amend part A of such title to liberalize the coverage of post-hospital home health services thereunder, to amend title XIX of such act to require the inclusion of home health services in a State's medicaid program and to permit payments of housing costs under such a program for elderly persons who would otherwise require nursing home care, to provide expanded Federal funding for congregate housing for the displaced and the elderly, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. LEACH:

H.R. 3918. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. LEGGETT:

H.R. 3919. A bill to authorize the Secretary of the Interior to construct, operate and maintain a hydroelectric powerplant as an addition to the existing Monticello Dam, Solano Project, California, under Federal Reclamation Laws; to the Committee on Interior and Insular Affairs.

H.R. 3920. A bill to amend the act of September 26, 1950, to enlarge the service area of the Sacramento canals unit of the Central Valley project to include Yolo and Solano Counties, Calif.; to the Committee on Interior and Insular Affairs.

H.R. 3921. A bill to amend title 5, United States Code, to provide that Japanese-Americans who were placed in internment camps during World War II shall be credited for civil service retirement purposes with the time they spent in such camps; to the Committee on Post Office and Civil Service.

H.R. 3922. A bill to amend the Maritime Academy Act of 1958 in order to authorize the Secretary of the Navy to appoint students at State maritime academies and colleges as Reserve midshipmen in the U.S. Navy, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries, and Armed Services.

By Mr. LLOYD of California (for himself, Mr. BAUCUS, Mr. BEDELL, Mr. CAPUTO, Mr. D'AMOURS, Mr. EDWARDS of Oklahoma, Mr. HARKIN, Mr. HIGHTOWER, Mr. ROBINSON, and Mr. SANTINI):

By Mr. SOLARZ (for himself, Mr. BAUCUS, Mr. DOWNEY, Mr. DRINAN, Mr. EDWARDS of California, Mrs. FENWICK, Mr. FRENZEL, Mr. GEPHARDT, Mr. HAWKINS, Mrs. MEYNER, Mr. SCHEUER, Mr. SIMON, Mr. STEERS, Mr. Mr. WAXMAN, Mr. WEISS, and Mr. WIRTH):

H.R. 3957. A bill to authorize Federal agencies to experiment with flexible and compressed employee work schedules; to the Committee on Post Office and Civil Service.

By Mr. SPENCE:

H.R. 3958. A bill to provide for the establishment of a national cemetery in the State of South Carolina; to the Committee on Veterans' Affairs.

By Mr. STAGGERS:

H.R. 3959. A bill to require the distribution of pinpoint disaster assistance for elementary school facilities destroyed or seriously damaged between January 2, 1968, and October 1, 1978; to the Committee on Education and Labor.

H.R. 3960. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. STAGGERS (for himself and Mr. DEVINE):

H.R. 3961. A bill to amend the Consumer Product Safety Act and to aid in the enforcement of acts implemented by the Consumer Product Safety Commission; to the Committee on Interstate and Foreign Commerce.

By Mr. STEIGER:

H.R. 3962. A bill to increase the maximum Federal contribution to the cost of any State meat or poultry inspection system from 50 to 80 percent; to the Committee on Agriculture.

By Mr. STEIGER (for himself, Mr. OBEY, Mr. CORMAN, Mr. MCHUGH, Mr. SANTINI, Mr. BAUCUS, Mr. PRESSLER, Mr. NEAL, and Mr. DODD):

H.R. 3963. A bill to provide the American consumer the assurance that foreign dairy products marketed in the United States meet minimum standards of quality by requiring the inspection of these products at the U.S. ports of entry, at the foreign milk processing plants which provide dairy products for export to the United States, and at the foreign dairy farms which supply milk to foreign milk processing plants for the production of dairy products to be exported to the United States; to the Committee on Agriculture.

By Mr. STUDDS:

H.R. 3964. A bill to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976; to the Committee on Ways and Means.

By Mr. TEAGUE (for himself, Mr. MILFORD, Mr. LLOYD of California, Mr. GOLDWATER, and Mr. GLICKMAN):

H.R. 3965. A bill to authorize research, development, and demonstration projects relating to aviation, and for other purposes; to the Committee on Science and Technology.

By Mr. VANDER JAGT:

H.R. 3966. A bill to encourage the implementation of certain State and local programs to conserve natural gas; to the Committee on Interstate and Foreign Commerce.

H.R. 3967. A bill to assure the availability of adequate supplies of natural gas at reasonable prices for consumers, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 3968. A bill to amend the Internal Revenue Code of 1954 to provide for tax credits for expenditures by a taxpayer for solar heating and cooling equipment installed in new or existing residential buildings, and tax credits for expenditures by an individual for insulation in such individual's principal residence, and for other purposes; to the Committee on Ways and Means.

By Mr. WIGGINS:

H.R. 3969. A bill to establish a National Court of Appeals, and for other purposes; to the Committee on the Judiciary.

H.R. 3970. A bill to amend title 28 of the United States Code to provide for prompt destruction of certain contraband, and for other purposes; to the Committee on the Judiciary.

H.R. 3971. A bill to improve the appellate court system, and for other purposes; to the Committee on the Judiciary.

By Mr. WIGGINS (for himself, Mr. PATTERSON of California, Mr. BROWN of California, Mr. BADHAM, Mr. LLOYD of California, and Mr. HANNAFORD):

H.R. 3972. A bill to establish an additional U.S. district court in the State of California; to the Committee on the Judiciary.

By Mr. WOLFF (for himself, Mr. WALSH, Mr. CARNEY, Mr. EDWARDS of California, Mr. RODINO, Mr. PRICE, Mr. PURSELL, Mr. DOWNEY, Mr. SOLARZ, Mr. LEHMAN, Mr. ADDABBO, Mr. MOAKLEY, Mr. ROE, Mr. NEAL, Mr. HOWARD, Mr. RANGEL, Mr. BOWEN, Mr. BIAGGI, Mr. HYDE, Mr. THOMPSON, Mr. LAFALCE, Mr. CONTE, Mr. MAZZOLI, and Ms. CHISHOLM):

H.R. 3973. A bill to amend title 38, United States Code, to provide counseling for certain veterans; to permit acceleration of monthly educational assistance payments to eligible veterans and dependents; to revise the criteria for nonaccredited courses; to provide alternative financial and educational assistance to peace-time post-Korean veterans affected by the expiration of their delimiting period; to provide for a conditional extension of the delimiting period for certain Vietnam era veterans; to provide for the development of additional educational, employment, and adjustment assistance programs for veterans; to provide for the correction and preclusion of, and protection against, abuses and misuse of veterans benefits; and to otherwise enhance and improve the effectiveness, integrity, and utilization of veterans readjustment assistance programs; to the Committee on Veterans' Affairs.

By Mr. WOLFF (for himself, Mr. STOKES, Mr. STUDDS, Mr. PATTERSON of California, Mr. NOLAN, Mr. BADILLO, Mr. MURPHY of Pennsylvania, Mr. SEIBERLING, Mr. ROSENTHAL, Mr. BURKE of Florida, Mr. ZEFERETTI, Ms. COLLINS of Illinois, Mr. STEERS, Mr. ANDERSON of California, and Mr. MAGUIRE):

H.R. 3974. A bill to amend title 38, United States Code, to provide counseling for certain veterans; to permit acceleration of monthly educational assistance payments to eligible veterans and dependents; to revise the criteria for nonaccredited courses; to provide alternative financial and educational assistance to peace-time post-Korean veterans affected by the expiration of their delimiting period; to provide for a conditional extension of the delimiting period for certain Vietnam era veterans; to provide for the development of additional educational, employment, and adjustment assistance programs for veterans; to provide for the correction and preclusion of, and protection against, abuses and misuse of veterans benefits; and to otherwise enhance and improve the effectiveness, integrity, and utilization of veterans readjustment assistance programs; to the Committee on Veterans' Affairs.

By Mr. WOLFF (for himself, Mr. RICHMOND, Mr. CORNWELL, Mr. DRINAN, Mr. LEDERER, Mr. APPLEGATE, Ms. HOLTZMAN, Ms. MIKULSKI, Mr. WIRTH Ms. SPELLMAN, Mr. MOFFETT, and Mr. CORRADA):

H.R. 3975. A bill to amend title 38, United States Code, to provide counseling for certain veterans; to permit acceleration of monthly educational assistance payments to eligible veterans and dependents; to revise the criteria for nonaccredited courses; to provide alternative financial and educational assistance to peace-time post-Korean veterans affected by the expiration of their delimiting period; to provide for a conditional extension of the delimiting period for certain Vietnam era veterans; to provide for the development of additional educational, employment, and adjustment assistance programs for veterans; to provide for the correction and preclusion of, and protection against, abuses and misuse of veterans benefits; and to otherwise enhance and improve the effectivenes, integrity, and utilization of veterans readjustment assistance programs; to the Committee on Veterans' Affairs.

By Mr. ZABLOCKI (by request):

H.R. 3976. A bill to authorize supplemental military assistance to Portugal for the fiscal year 1977, and for other purposes; to the Committee on International Relations.

By Mr. ZEFERETTI:

H.R. 3977. A bill to require that a percentage of U.S. oil imports be carried on U.S. flag vessels; to the Committee on Merchant Marine and Fisheries.

By Mr. BROWN of California (for himself, Mr. JEFFORDS, Mr. RICHMOND, Mr. BAUCUS, Mr. DRINAN, Mr. BEDELL, Mr. OTTINGER, Mr. OBERSTAR, Mr. HARRINGTON, Mr. MOTTL, Mr. MCKINNEY, Mr. PICKLE, Mr. MOAKLEY, Mr LONG of Maryland, Mr. BALDUS, Mr. KREBS, and Mr. PANETTA):

H.R. 3978. A bill to authorize the inclusion of solar energy research, development, and demonstration programs in certain agricultural programs; to the Committee on Agriculture.

By Mr. JEFFORDS (for himself, Mr. BINGHAM, Mr. HARRINGTON, Mr. BEDELL, Mr. OBERSTAR, Mr. OTTINGER, Mr. BROWN of California, Mr. MOTTL, Mr. MCKINNEY, Mr. DRINAN, Mr. RICHMOND, Mr. MOAKLEY, Mr. BAUCUS, and Mr. LONG of Maryland):

H.R. 3979. A bill to amend the Foreign Assistance Act of 1961 to encourage greater emphasis on the production and conservation of energy in developing countries through the development and utilization of unconventional energy technologies; to the Committee on International Relations.

By Mr. JEFFORDS (for himself, Mr. BROWN of California, Mr. HARRINGTON, Mr. BEDELL, Mr. OBERSTAR, Mr. OTTINGER, Mr. MOTTL, Mr. MCKINNEY, Mr. DRINAN, Mr. RICHMOND, Mr. MOAKLEY, Mr. BAUCUS, Mr. LONG of Maryland):

H.R. 3980. A bill to amend the Federal Nonnuclear Energy Research and Development Act of 1974 to provide for cooperative programs with less-developed countries for the development of unconventional energy technologies; jointly to the Committees on Science and Technology and International Relations.

By Mr. DRINAN (for himself, Mr. BAUCUS, Mr. BEDELL, Mr. BROWN of California, Mr. HARRINGTON, Mr. JEFFORDS, Mr. LONG of Maryland, Mr. MCKINNEY, Mr. MOTTL, Mr. OBERSTAR, Mr. OTTINGER, and Mr. RICHMOND):

H.R. 3981. A bill to provide for incentives for the commercial application of solar energy, energy conservation, and renewable resource equipment and devices in homes, neighborhood and community structures, small businesses, and facilities owned or occupied by nonprofit organizations; jointly to the Committees on Banking, Finance and Urban Affairs and Small Business.

By Mr. MCCORMACK (for himself, Mr. OTTINGER, Mr. BAUCUS, Mr. BEDELL, Mr. BROWN of California, Mr. DRINAN, Mr. HARRINGTON, Mr. JEFFORDS, Mr. LONG of Maryland, Mr. MCKINNEY, Mr. MOAKLEY, Mr. MOTTL, Mr. OBERSTAR, Mr. PICKLE, and Mr. RICHMOND):

H.R. 3982. A bill to promote the use of energy conservation, solar energy, and total energy systems in Federal buildings; to the Committee on Public Works and Transportation.

By Mr. OBERSTAR (for himself, Mr. HARRINGTON, Mr. BAUCUS, Mr. BEDELL, Mr. BROWN of California, Mr. DRINAN, Mr. JEFFORDS, Mr. LONG of Maryland, Mr. MCKINNEY, Mr. MOAKLEY, Mr. MOTTL, Mr. OTTINGER, Mr. PICKLE, and Mr. RICHMOND):

H.R. 3983. A bill to provide for the procurement by the General Services Administration of existing solar energy devices for use in Government buildings; to the Committee on Public Works and Transportation.

By Mr. BEDELL (for himself, Mr. MOTTL, Mr. JEFFORDS, Mr. BAUCUS, Mr. BROWN of California, Mr. DRINAN, Mr. HARRINGTON, Mr. LONG of Maryland, Mr. MCKINNEY, Mr. MOAKLEY, Mr. OBERSTAR, Mr. OTTINGER, Mr. PICKLE, and Mr. RICHMOND):

H.R. 3984. A bill to amend the Small Business Act and the Federal Nonnuclear Energy Research and Development Act of 1974 to provide certain assistance to individuals and small business concerns in the areas of solar energy equipment and energy-related inventions; jointly to the Committees on Small Business and Science and Technology.

By Mr. MOAKLEY (for himself, Mr. BEDELL, Mr. BROWN of California, Mr. OTTINGER, Mr. BAUCUS, Mr. JEFFORDS, Mr. LONG of Maryland, Mr. HARRINGTON, Mr. MOTTL, Mr. OBERSTAR, Mr. MCKINNEY, and Mr. RICHMOND):

H.R. 3985. A bill to amend the Internal Revenue Code of 1954 to provide income tax incentives for the conservation of energy used to heat or cool residences and commercial buildings, and for the utilization of renewable fuel energy sources; to the Committee on Ways and Means.

By Mr. MAHON:

H.J. Res. 269. Joint resolution making an urgent supplemental appropriation for fiscal year ending September 30, 1977, for disaster relief; to the Committee on Appropriations.

By Mr. BROOMFIELD:

H.J. Res. 270. Joint resolution proposing an amendment to the Constitution of the United States to provide for mandatory retirement of Members of Congress and the Federal judiciary; to the Committee on the Judiciary.

By Mr. CARNEY (for himself, Mrs. FENWICK, Mr. WALKER, Mr. DE LA GARZA, Mr. BROWN of Ohio, Mr. ROE, Mr. YATRON, Mr. JOHN L. BURTON, Mr. EILBERG, Mr. DELANEY, Mr. BEARD of Rhode Island, Mr. WINN, Ms. MIKULSKI, Mr. WHITLEY, Mr. RAHALL, Mr. MCDADE, Mr. MOAKLEY, Mr. KEMP, Mr. THONE, Mr. LENT, Mr. VENTO, Mr. LOTT, Mr. BEVILL, Mr. SIMON, and Mr. NEAL):

H.J. Res. 271. Joint resolution authorizing the President to proclaim the week beginning November 6, 1977, and ending November 12, 1977, as National Volunteer Firemen Week; to the Committee on Post Office and Civil Service.

By Mr. CARNEY (for himself, Mr. DOWNEY, Mr. SARASIN, Mr. FLORIO, Mr. WAXMAN, Mr. LAFALCE, Mr. BALDUS, Mr. HOWARD, Mr. WOLFF, Mr. WHITEHURST, Mr. HORTON, Mr. HUGHES, Mr. BADILLO, Mr. ABDNOR, Mr. MITCHELL of New York, Mr. ROBINSON, Mrs. LLOYD of Tennessee, Mr. YOUNG of Florida, Mr. JENRETTE, Mr. RICHMOND, Mr. WYDLER, Mr. CAPUTO, Mr. ENGLISH, Mr. MOLLOHAN, and Mr. OTTINGER):

H.J. Res. 272. Joint resolution authorizing the President to proclaim the week beginning November 6, 1977, and ending November 12, 1977, as National Volunteer Firemen Week; to the Committee on Post Office and Civil Service.

By Mr. CARNEY (for himself, Mr. LLOYD of California, Mr. WALSH, Mr. GILMAN, Mrs. SPELLMAN, Mrs. COLLINS of Illinois, Mr. STEERS, Mr. STOCKMAN, Mr. ERTEL, Mr. DAVIS, Mr. MOFFETT, Mr. SCHEUER, Mr. AKAKA, Mr. FRENZEL, Mr. GLICKMAN, Mr. BONIOR, Mr. FISK, Mr. FORSTHE, Mr. HOLLENBECK, Mr. GUDGER, and Mr. DICKS):

H.J. Res. 273. Joint resolution authorizing the President to proclaim the week beginning November 6, 1977, and ending November 12, 1977, as National Volunteer Firemen Week; to the Committee on Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRINKLEY:

H.R. 3986. A bill for the relief of Habiba Saidzada; to the Committee on the Judiciary.

By Mr. D'AMOURS:

H.R. 3987. A bill for the relief of Raymond J. Coughlan; to the Committee on Post Office and Civil Service.

By Mr. GIBBONS:

H.R. 3988. A bill for the relief of Lt. Col. Frank A. Moorhead; to the Committee on the Judiciary.

By Mr. LAGOMARSINO:

H.R. 3989. A bill for the relief of Robert W. Patterson; to the Committee on the Judiciary.

H.R. 3990. A bill for the relief of Mrs. Frances Parker; to the Committee on the Judiciary.

By Mr. LEGGETT:

H.R. 3991. A bill for the relief of James U. Rollins; to the Committee on the Judiciary.

By Mr. LUJAN:

H.R. 3992. A bill for the relief of Cesar Grana; to the Committee on the Judiciary.

By Mr. STAGGERS:

H.R. 3993. A bill for the relief of John G. Davis; to the Committee on the Judiciary.

By Mr. WIGGINS:

H.R. 3994. A bill for the relief of Charles P. Abbott; to the Committee on the Judiciary.

H.R. 3995. A bill for the relief of Habib Haddad; to the Committee on the Judiciary.

H.R. 3996. A bill for the relief of Mrs. Young Hee Kim Kang, Hee Jae Kang, Hee Jin Kang, and Hee Soo Kang; to the Committee on the Judiciary.

By Mr. WIRTH:

H.R. 3997. A bill for the relief of the Jefferson County Mental Health Center; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

52. The SPEAKER presented a petition of W. T. O'Neill, executive vice president, Newport News Shipbuilding & Dry Dock Co., Newport News, Va., relative to the cost accounting standards program, which was referred jointly, to the Committees on Government Operations, and Banking, Finance and Urban Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 11

By Mr. HARKIN:

Page 5, immediately after line 21, add the following new section:

"SEC. 113. Notwithstanding any other provision of this Act, 3 per centum of all amounts authorized to carry out this title shall be available only for making grants to States and local governments for projects for the replacement or reconstruction of bridges on those highways which are on any Federal-aid system. For purposes of this section, the terms 'Federal-aid system' and 'highway' have the meaning given such terms in section 101 of title 23, United States Code.

Page 5, line 14, strike out "113" and insert "114".

Page 5, line 22, strike out "113" and insert "114".

Page 6, line 6, strike out "113" and insert "114".

By Mr. KINDNESS:

Page 3, strike out lines 8 through 20, inclusive, and insert in lieu thereof the following:

SEC. 2. (a) Subsection (a) of section 108 of the Local Public Works Capital Development and Investment Act of 1976 (P.L. 94-369) is amended to read as follows:

"(a) Notwithstanding any other provision of this Act, all funds appropriated after February 22, 1977, under authority of this Act shall be allocated by the Secretary among the States in the ratio that the number of unemployed persons in each State bears to the total number of unemployed persons in all States. Notwithstanding any other provision of this Act, not more than 2½ per centum of all amounts appropriated to carry out this Act shall be granted to Indian tribes under this Act for local public works projects.".

Reletter succeeding subsections and references thereto accordingly.

Page 5, immediately after line 21, add the following new section:

"SEC. 113. Notwithstanding any other provision of this Act, 2 per centum of all amounts authorized to carry out this title shall be available only for making grants to States and local governments for projects for the replacement or reconstruction of bridges on those highways which are not on any Federal-aid system. For purposes of this section, the terms 'Federal-aid system' and 'highway' have the meaning given such terms in section 101 of title 23 of the United States Code.".

Page 5, line 14, strike out "113" and insert "114".

Page 5, line 22, strike out "113" and insert "114".

Page 6, line 6, strike out "113" and insert "114".

By Mr. MITCHELL of Maryland:

Page 2, line 23, insert "(1)" immediately before "Notwithstanding".

Page 3, line 7, strike out the quotation marks and the period immediately following the quotation marks.

Page 3, immediately after line 7, add the following:

"(2) Notwithstanding any other provision of law, no grant shall be made under this Act for any local public works project unless at least 10 per centum of the articles, materials, and supplies which will be used in such project are procured from minority business enterprises. For purposes of this paragraph, the term 'minority business enterprise' means a business at least 50 percent of which is owned by minority group members or, in case of publicly owned businesses, at least 51 percent of the stock of which is owned by minority group members. For the purposes of the preceding sentence, minority group members are citizens of the United States who are Negroes, Spanish-speaking, Orientals, Indians, Eskimos, and Aleuts.".

EXTENSIONS OF REMARKS

CONGRESSIONAL RURAL CAUCUS EXECUTIVE COMMITTEE PROPOSES $16.4 BILLION RURAL DEVELOPMENT BUDGET FOR FISCAL YEAR 1978

HON. JOHN BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1977

Mr. BRECKINRIDGE. Mr. Speaker, "underemployment and unemployment," "deficit spending and economic stimulus," "job creation," and other words and phrases continue to frustrate the best intentions of everyone concerned with solutions to adverse economic conditions.

The success or failure of any public jobs program will ultimately depend on the ability of the private jobs sector to support it, including the time element for such support. In this context, the fate of the private jobs sector will depend on the impact of programs envisioned by and for the public jobs sector, because the private jobs sector must provide the tax base and tax revenues for the financial support of such programs.

As chairman of the bipartisan congressional rural caucus, I respectfully submit a report on CRC budget proposals for selected rural loan, grant, and special programs for fiscal year 1978, totaling $16.4 billion which call for the maximum utilization of already existing and proven loan and grant programs under Farmers Home Administration and Small Business Administration. The semifinal CRC report recommends farm and nonfarm lending authorization increases under Farmers Home Administration and Small Business Administration, where applicable, making available financial resources to accommodate credit needs. It also stimulates the economy with protection of existing jobs plus the creation of new and additional jobs, resulting in tax revenues from wages and salaries as well as profitability potential for farm and nonfarm enterprises.

The full implementation of these financial resources to meet such credit needs is of the utmost importance to our farmers, nonfarmers, and our Nation. It creates jobs at a profit to the taxpayer without deficit financing and utilizes existing and experienced Federal and private resources, already in place, throughout the country in urban as well as rural areas.

This proposed $16.4 billion program,

which might well produce in the neighborhood of 2 to 3 million private sector jobs, is more than 95 percent privately, nontax dollar funded.

In behalf of the CRC Executive Committee, the report follows.

Subject Report on semi-final CRC budget proposals for selected rural loan, grant, and special programs for fiscal year 1978.
From Congressman John B. Breckinridge, Chairman. (225-4706)
Contact Frank G. Tsutras. (225-5080)

The CRC Executive Committee released its semifinal CRC budget proposals for selected rural loan, grant, and special programs for fiscal year 1978 which include recommendations for selected Farmers Home Administration program funding levels of $557 million for grant appropriations and $15.9 million for loan level authorizations by the appropriations committees, totaling $16.4 billion.

The proposed $557 million grant appropriations include $85 million for rural housing programs, $397 million for community programs, and $75 million for business and industrial programs, all of which are appropriated items.

Housing program grants—Housing Act of 1949

[In millions]

Farm labor housing grants (516)	$25
Housing repair grants (504)	20
Mutual and self help housing site grants and technical assistance (523)	10
Housing research grants (506)	10
Rent supplements (521)	15
Technical assistance grants (525)	5
Total housing program grants	85

COMMUNITY PROGRAM GRANTS

Water and waste disposal planning grants (306)	30
Water and waste disposal development grants (306)	300
Rural community fire protection grants (title IV RDA)	7
Rural development planning grants (306)	10
Pollution abatement project grants (310b)	50
Total community program grants	397

BUSINESS AND INDUSTRIAL PROGRAM GRANTS

Rural development grants (310B)	50
Small enterprise pollution abatement grants (312)	25
Total business and industrial grants	75

The proposed $15.9 billion loan authorization levels include $2.3 billion for farmer programs, $6.6 billion for rural housing programs, $4.0 billion for rural community programs, and $3.0 billion for rural business and industrial programs, which do not directly add to Federal budget outlays inasmuch as, with the exception of interest subsidies and losses, insured loans do not add directly to budget outlays. These loans are resold through the Federal Financing Bank, and guaranteed loans do not appear in the Federal budget except as losses occur—so-called subisidies/losses are offset by 100 percent return on investment.

Farmer program loan authorization levels

[*In millions*]

Emergency loans (321) (Can be increased as required)	200
Farm ownership loans (303)	1,000
Operating loans (311)	1,000
Soil and water loans (304)	60
Grazing loans (306)	10
SCS loans (P.L. 83-566, Sec. 8) (P.L. 87-703, Sec. 102)	30
Indian tribal land acquisition loans (306)	11
Recreation loans (304)	5
Total farmer program loans	2,316

HOUSING PROGRAM LOAN AUTHORIZATION LEVELS (HOUSING ACT OF 1949)

Low income housing loans (502)	3,000
Moderate income housing loans (502)	2,000
Above moderate income housing loans (502) (Guaranteed)	500
Rental housing loans (515)	1,000
Farm labor housing loans (514)	25
Housing repair loans and other (504)	20
Mutual and self help housing site loans and technical assistance (523)	10
Site loans (524)	5
Mobile park loans (527)	2
Predevelopment loans (525b)	3
Total housing program loans	6,656

COMMUNITY PROGRAM LOAN AUTHORIZATION LEVELS

Water and waste disposal loans (306)	3,000
Community facility loans (306)	1,000
Total community program loans	4,000

The existing authorities for the Secretary of Agriculture constitute one of the most effective, economical, and beneficial ways to alleviate and eliminate underemployment and unemployment in rural areas, providing a much-needed job-creation stimulus for farm and nonfarm stable employment, including the rural disadvantaged. These proposals can also save the lives of many farm and nonfarm operations currently facing disastrous financial crisis or possible bankruptcy for reasons beyond their control.

The CRC report recommends that Federal agencies with established and proven loan programs should place greater responsibility on the supervised financial institution with the major portion of the loans consummated. Such authority shall be a discriminate authority to approve loans on an automatic or semiautomatic basis by those banks which exercise good credit and judgment and maintain satisfactory records of loan repayment. This would eliminate the heavy burden of unnecessary paperwork and detailed analysis.

The potential for job-creation and jobs-saved could total hundreds of thousands, resulting from a major injection and availability of private capital in the form of Federal guaranteed and insured loans and a small Federal grant resource.

This program will significantly alleviate the urban underemployment and unemployment problems by creating jobs in rural areas and decreasing rural migration to the cities in search of employment.

The CRC proposals supplement existing authorities available to the Secretary of Agriculture under title VI of the Rural Development Act to bring together the full resources of the executive branch to stimulate the economy by planning for and providing thousands of jobs in the construction of needed community, water and waste disposal facilities; new farm and nonfarm enterprises; the practical renovation and new construction of housing; and, above all, the advice, counsel, and financial assistance to keep existing farm and nonfarm enterprises from bankruptcy.

The Congress, the President, and the Cabinet should expand the FmHA business and industrial loan programs and the Small Business Administration programs to reflect the following data.

In my March, 1976 separate views to the House agriculture budget—House of Representatives committee print, Committee on the Budget, "Views and estimates on the congressional budget for fiscal year 1977" March 22, 1976, page 45—and in testimony before the House Small Business Committee—Hearings before the Subcommittee on SBA Oversight and Minority Enterprise of the Committee on Small Business", March 4, and April 1, 1976, page 20—I noted the jobs creation effect of expanding the loan authority of the SBA and the FmHA. Since that time I have, with the assistance of the Economic Division of the Congressional Research Servive, explored these programs extensively—especially their relation to the problem areas of employment and inflation. The extent of their present and potential cost and benefits to the American taxpayer appears below.

In 1976 the SBA loaned approximately $2 billion to various enterprises throughout the Nation, creating approximately 288,000 jobs in the private sector. SBA's 4,200 employees cost the taxpayers approximately $200 million in administrative costs. Based on SBA's 5 percent loan loss ratio—$2 billion times 5 percent—$100 million will not be recovered. Thus $1.9 billion will be repaid to the taxpayers with principal and interest. The estimated 288,000 SBA jobs created in the private sector cost approximately $200 million for administration and $100 million for loan losses, for a total cost of $300 million.

Because these estimated 288,000 jobs are private sector jobs—that pay rather than absorb taxes—my task force estimates that the total benefit to the taxpayer is as follows:

1976 tax revenue and savings for 288,000 SBA program-created jobs

	Per job	*Total*
Federal individual income tax	$2,300	[1] $662
Federal corporation tax	1,134	326
Federal welfare savings	2,500	720
State and local tax	2,114	609
Total	8,048	2,317

[1] In thousands.

Simply stated, the total $2.3 billion in benefits, less the $300 million in SBA costs, leaves a total net benefit of $2 billion to the taxpayers thereafter; for every taxpayer's dollar put out by SBA, the taxpayers receive a return of seven dollars, or $1 cost for $7 benefits received.

It is significant to note that with 9 million small businesses in the United States, the SBA was only able to help less than 30,000. Of the 370,000 new businesses incorporated in 1976, SBA will only be able to help 8,000. Many of these are in small towns and rural communities as well as center cities. Obviously, the demand is there for a major expansion of the FmHA and the SBA programs.

The major advantage in the expansion of FmHA and SBA programs is that they are not pilot programs. They are highly successful existing programs which are known to the President, Congress, and the business and financial communities. By merely increasing the current average loan from $100,000 to $1 million SBA could increase the number of jobs ten fold without adding a single new SBA employee. Especially important is the fact that by using existing FmHA and SBA offices the towns, cities, counties, states, and regions of high unemployment could be targeted for their share of the increased employment activity. Every single new or expanding business enterprise in private sector employment would be reducing inflation by increasing competition, invention, innovation, and aggressive pricing—the basic philosophy of our patent and antitrust laws.

The CRC Executive Committee has mailed

over 500 copies of the semifinal CRC budget report to and discussed same with the CRC members, the CRC advisory team, the chairmen and all members of selected congressional committees and subcomittees, the congressional leadership, the President and Vice President, the executive branch, and farm and nonfarm agricultural and rural development resources nationally. This is part of the overall coordination and communication policy of the CRC Executive Committee. Consideration, comment, modification, and/or approval has been requested from each recipient of the report.

The CRC Executive Committee is actively arranging for participation in selected congressional committee and subcommittee hearings to discuss the proposed rural development budget report for fiscal year 1978. Hearings are scheduled for 3, 4, and 5 March to accommodate the requirements of the Congressional Budget and Impoundment Control Act.

On 7, 8, and 9 March 1977, the House Committee on Agriculture will convene budget task force groups to discuss budget needs for fiscal year 1978.

The House Committee on Agriculture has scheduled a full committee business meeting for 10 March 1977, 10 a.m., 1301 Longworth Building, to discuss budget recommendations for fiscal year 1978 to the House Committee on the Budget.

Please let us have your comments as soon as possible.

Thank you.

For every taxpayer's dollar put out by the Farmers Home Administration and the SBA, the taxpayers receive a $7 return, or $1 cost for $7 benefits received in the first year and, hopefully, the number of jobs, tax base and revenue will increase in subsequent years.

The major advantage in the expansion of FmHA and SBA programs lies in the fact that they are not pilot programs, but rather highly successful existing programs which are familiar to the President, Congress, the business and the financial communities. Mathematically, by merely increasing SBA ceilings to $20 billion, SBA could increase the number of jobs tenfold without adding a single new SBA employee, which would mean approximately 3 million new private sector jobs. One caveat that should be included here is that, under the proposal, SBA and FmHA loan standards would remain just as strict as they now are, insuring a healthy loan-loss ratio at or near its present figure.

Especially important is the fact that by using existing FmHA and SBA offices, the towns, cities, counties and regions of high unemployment could be targeted for an equitable share of increased employment activity. Every single new or expanding business enterprise in private employment would be reducing inflation by increasing competition, invention, innovation and aggressive pricing—the basic philosophy of our patent and antitrust laws.

EDWARD O. HUDSON, SR.

HON. FLOYD SPENCE

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 24, 1977

Mr. SPENCE. Mr. Speaker, earlier this month, on February 7, South Carolina lost an outstanding citizen, a dedicated civic and business leader, when Edward Osborne Hudson, Sr., of Orangeburg passed away. He was not only quite successful in business but also thoughtful of the needs of others, generous in the support of worthy causes. He enjoyed the esteem and respect of all who knew him. I am pleased to say that he was a valued friend of mine.

E. O. Hudson's example is worthy of emulation by all of us and it was quite fitting that his hometown paper, the Times and Democrat, should devote a lead editorial in tribute to his life and works. I commend the editorial to my colleagues and am pleased to include it at this point in the RECORD:

E. O. HUDSON SR.

Edward Osborne Hudson Sr. was a man of the "old school." Even on the day of his death, Monday, this enormously successful businessman, was on the job working because he never forgot the values taught him as a youth: honesty, integrity and hard work.

His great success in the mercantile field throughout the southeastern United States never overshadowed his memory of how he began the Belk Hudson chain in 1931 from a small store on Orangeburg's Russell St. Forty-five years later, that Russell St. store is marked as the birthplace of the Belk Hudson chain of 20 stores in South Carolina, North Carolina, Georgia and Florida. Mr. Hudson had five employes on opening day in 1931. At the time of his death there were 630 persons in four states in his employment.

It must not be said that Mr. Hudson, known to all as "E.O.", did not appreciate what he had accomplished. Far from it. He knew exactly what value should be placed upon accomplishment, and always kept in mind that accomplishment preceded value; and to that end, he went to great lengths to ensure that in his dealings with the communities in which his businesses were located, E.O. Hudson gave as well as he received.

Orangeburg is one of the great beneficiaries of E.O. Hudson. He was one of the builders of retail Orangeburg. His three stores in this city, two in the center city business area and one at the Orangeburg Mall, remain as testimony to his progressive thinkings and abilities.

Mr. Hudson had great faith in Orangeburg. In the late 1950s and early '60s when Orangeburg's main avenue of retail traffic was dotted with vacant stores, Belk Hudson's store was expanded and remodeled. Mr. Hudson often said "Our day is just around the corner." He was right, so right that a few years later he opened second and third stores in Orangeburg.

It is a good bet that on the day E.O. Hudson died he had devoted some thoughts to the opening or expansion of a store. He was always planning ahead.

From modest offices on Amelia St. in the shadows of his still operating initial Russell St. store, Mr. Hudson made the key decisions for his 20 stores. One could learn a great lesson in retailing by watching him at work in his office. Charts, statistics and other graphic data were in profusion as always well-groomed, blue-suited, unlit cigar-chewing E.O. Hudson ran his prosperous chain of stores.

Mr. Hudson kept a lively interest in higher education, contributing large sums of money to Columbia College, an institution supported by the United Methodist Church of which Hudson was a dedicated member. Columbia College recognized his generous support of the college in September 1974, when a dormitory was named "Hudson Hall." The recognition was not only for Mr. Hudson, but also for his wife, Lillian, who has served the college for a number of years as a member of its board of trustees.

He was a man who kept alive his faith in God, not wearing it on his sleeve, but maintaining and sustaining it in his everyday life by his actions.

Our sympathy goes to the widow and two sons, E.O. Hudson Jr., vice president of the Belk Hudson group, and the Rev. Thomas F. Hudson, Priest of the Good Sheppard Episcopal Church in York, S.C.

CONGRESSMAN EDGAR'S TESTIMONY ON THE NATIONAL MASS TRANSPORTATION ASSISTANCE ACT

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. EDGAR. Mr. Speaker, I testified this morning before the Senate Subcommittee on Housing and Urban Development on S. 208, the National Mass Transportation Assistance Act of 1977, introduced by Senator WILLIAMS. I would like to share my prepared remarks with those of my colleagues who are concerned about the future of transportation in this Nation:

TESTIMONY BY CONGRESSMAN ROBERT W. EDGAR

Mr. Chairman, I am pleased and honored to be the first witness before this Subcommittee to discuss some thoughts on the reform of transportation policy. I commend the Subcommittee for recognizing the importance of quick consideration of the many reforms suggested by Senator Williams in S. 208, the "National Mass Transportation Assistance Act of 1977." I testify as a supporter of many of the provisions of S. 208, and I hope to work on behalf of these ideas as a member of the Surface Transportation Subcommittee of the House Public Works and Transportation Committee.

Before making specific comments on S. 208, let me state my hope that this Congress will begin the arduous process of reviewing all Federal transportation statutes with a view toward developing comprehensive policies to address the needs of Intercity Transportation, Rural Transportation, and Urban Transportation.

I prefer this coordinated and comprehensive approach over the past practice of developing one law for one mode of transportation, and a separate law for another mode of transportation. I hope we will steer clear of developing a long-run "transit policy." Rather, I would prefer to see the Congress develop a comprehensive set of amendments to implement a long-run "urban transportation policy."

S. 208 is a mass transportation assistance bill and thus deviates from the direction I would like to see the Congress take. However, this bill addresses an immediate need—the need for increased transit capital spending in fiscal year 1978—and thus it is essential that it be considered now rather than postponed until Congress gets around to the framing of a more comprehensive bill.

Because I recognize the need for immediate action, I hope this Subcommittee will report some kind of transit assistance bill soon. I do, however, recommend against making long-run extensions of urban mass transportation programs, and suggest that S. 208 be amended to authorize programs through FY 1979, and not beyond. Passage of this bill should not detract from efforts to develop a more comprehensive urban transportation policy.

What S. 208 should do, and must do, is allow the Secretary of Transportation to continue making obligations under the Section 3 program at a reasonable rate. If the Secretary is not given additional authority, he will be unable to make commitments for

new starts on major transit projects, and he may be unable to consummate commitments already made.

My concern is that the Section 3 program should continue rather than slow down. In the Philadelphia urbanized area, in which my Congressional district is found, there is a tremendous need for capital improvements above and beyond those which have already been funded under the Section 3 program. Most important to our area is a proposed fixed-transit revitalization program that will cost somewhere between $400 and $800 million. This is not a grandiose program for new subway lines. It is a program to keep what we have from falling apart. The need will not go away. It will only grow worse with inattention.

Other large metropolitan areas have similar needs. And, of course, many areas can justify the construction of new systems but cannot move forward without partial Federal funding. I am sure that the Subcommittee will receive testimony from many transit operators outlining their needs. The Subcommittee will also receive testimony from the American Public Transit Association, which has examined the current Section 3 program and has found disturbing evidence that the program has bankrupted the Urban Mass Transportation Fund well ahead of schedule.

Rather than duplicate testimony you will receive later this week, I will offer some specific suggestions on S. 208:

(1) As mentioned previously, I would change Section 3 of S. 208 to provide the Section 3 program with a two year authorization of $4 billion—$1.9 billion for FY 1978, and $2.1 billion for FY 1979. Hopefully, a comprehensive urban transportation bill developed by this Congress will address the question of extending the Section 3 program into the 1980's.

(2) Section 5 of S. 208 extends the Section 5 program to September 30, 1982. So as not to interfere with our options in developing a more comprehensive operating assistance policy later this session, I would recommend that the current Section 5 authorizations, which extend to FY 1980, stand.

(3) I agree with the premise of S. 208 that a separate pool of Section 5 funds should be available to the Secretary of Transportation for disbursement to areas which have a particularly intense need for additional operating assistance. Among other things, Section 5 of S. 208 will permit the Secretary to channel additional operating assistance to areas hard hit by the withdrawal of Federal subsidies to Conrail under Section 17 of the Urban Mass Transportation Act of 1964.

However, I disagree with the concept of giving the Secretary complete discretion to allocate this additional Section 5 assistance as he chooses. Every urban area in the nation will likely descend on the Department of Transportation, cup in hand, to get a piece of the action.

I propose that Section 5 of S. 208 be amended to instruct the Secretary to allocate these additional Section 5 funds to each urban area on the basis of a formula, which the Secretary would devise, based on passenger miles of public transportation service, and such other factors as he feels appropriate. I believe that we would be doing the Secretary a favor by constricting his options slightly as far as this new authorization is concerned.

I also believe that any assistance offered under this section of S. 208 should be offered only on the understanding that the recipient urban area is making reasonable progress in developing improved state and local funding sources to underwrite transit operating deficits. The Secretary should be authorized to use the leverage of Federal grants approval in getting each urban area to develop a predictable, permanent state or regional funding mechanism for transit operations.

Despite current maintenance of effort provisions under Section 5, few transit operators have developed the kind of predictable local funding base that is necessary for the effective planning and operation of transit services.

(4) Section 8 of S. 108 amends Section 12 of the Urban Mass Transportation Act of 1964 to permit the funding of project design and engineering work under Section 3. This change is extremely important and will enable states and local public bodies to develop better project proposals and capital improvement programs. I would also specify under this section, that "Environmental Impact Studies" are eligible activities under Section 3, so that future projects are not delayed because of inadequate funding for these analyses.

(5) I would like to suggest a clarification of eligible activities under Section 5. I believe that the Urban Mass Transportation Act of 1964 should be amended to specify that vanpooloing, carpooling, dial-a-ride, and subscription bus service, are eligible activities under these sections. This amendment would be consistent with the UMTA proposed policy statement published October 20, 1976, entitled "Paratransit Services." The statement proposes Section 3 and Section 5 for paratransit modes. I agree with the statement articulated in the proposed policy that—

". . . paratransit—flexible, collective transportation services, operated publicly or privately and using small or intermediate-sized vehicles—has an important role to play in such a unified transportation system. Its various forms, when properly designed and implemented as part of an areawide transportation plan, can satisfy a wide range of transportation needs that would otherwise remain unmet or provided for less effectively. In rural America, in small towns and in suburban communities where population densities are low and travel patterns diffuse, paratransit will often be the most economical form of local public transportation. In many communities large and small, paratransit can offer the best means of serving the needs of elderly, young, and handicapped persons, and those who do not own cars and have no convenient access to regular public transportation . . ."

There are exciting and innovative forms of transportation which are bridging the gap between private transportation and public mass transportation. These new modes, are being categorized as "paratransit", and include commuter ridesharing, in its forms of carpooling, vanpooling, and buspooling; dial-a-ride; and jitney service. In general, they are very flexible and cost-effective. In the case of commuter vanpooling, programs are paying for themselves out of participant fees. Already, over 800 commuter vans are operating. Van manufacturers are having a difficult time coping with the heavy demand for vehicles. The Commuter Computer program in Los Angeles, for example, operates 70 vans. They have 200 vans on order.

Unfortunately, there are many obstacles in the way of expanded reliance upon paratransit. There are problems with over-regulation, unavailability of insurance, and overstrict labor standards. But perhaps the largest barrier to the introduction of successful paratransit programs is financial. Although a typical program requires only meager funding for start-up and operation, federal funding is presently inadequate. Other than revenue sharing, the only funding available for vanpooling programs are from state highway apportionments. Many states do not take advantage of this opportunity. In the first two years that this funding source was available, $10 million was set aside by 28 states and Puerto Rico for carpool demonstration projects. Under the new highway legislation, these funds can now be used for vanpooling projects. There has been much progress where funding has been available. There is a $7.5 million program authorized for carpooling and vanpooling demonstration projects, but the funds have never been appropriated.

On January 4th, I introduced H.R. 869 to provide a stable and adequate source of funding for ridesharing. The bill, the "Federal-Aid to Ridesharing Act of 1977," also articulates a national ridesharing policy, and consolidates Federal ridesharing activities under one roof within the Urban Mass Transportation Administration. Twenty-one Members of the House of Representatives have cosponsored this legislation. But until legislation such as H.R. 869 is enacted, there needs to be a source of funding which existing programs can turn to when their demonstration grants are exhausted, and a source of funding for new programs to tap other than highway funds which, in most cases, have already been earmarked for highways.

Mr. Chairman, attached to my statements is an appendix describing commuter vanpooling and its many benefits.

(6) I would like to also bring to the attention of this Subcommittee an amendment I introduced to H.R. 3155 last year which my committee colleagues and I believe has merit. The amendment authorizes a study of the transportation component of social service programs by the Department of Transportation. Recommendations would be sent to the Congress based on the study, to centralize, consolidate, or modify these programs to make the delivery of transportation more efficient and cost-effective.

The amendment received favorable comment from former DOT Secretary William Coleman, and was approved by the Surface Transportation Subcommittee. The 94th Congress adjourned before action on the legislation could be completed.

This amendment has been applauded by many organizations who are committed to improving social service transportation for our citizens. Many of the ideals of H.R. 3155 are embodied in section 11 of S. 208, and I feel it would be very appropriate and desirable for the Subcommittee to include the language of this amendment in this bill.

Mr. Chairman, I am inserting the text of the amendment at this point in my statement:

"STUDY OF FEDERAL SOCIAL SERVICE TRANSPORTATION

"SEC. —. The Secretary of Transportation is authorized to study the transportation component of those Federal programs and projects providing social services. Upon completion of such study, the Secretary shall propose a plan to centralize or modify the transportation component of such Federal programs and projects to make the delivery of transportation services financed by Federal funds, in whole or in part, more efficient, more cost-effective, and to avoid duplication of services by furthering cooperation among all Federal departments and agencies with jurisdiction over such transportation services. On or before ——, the Secretary shall report to the Congress such study, together with legislative and administrative recommendations, and additional reports and comments as the Secretary deems appropriate."

Mr. Chairman, I once again wish to thank you and the Subcommittee for inviting me to testify on this important legislation, and I am pleased to respond to any questions you or the other Members wish to ask.

APPENDIX

For the benefit of Members on the Committee who may be unaware just what commuter vanpooling is and what its benefits are, I would like to use this appendix to discuss it.

The commuter vanpool program was pioneered by the 3-M Company in April, 1973. In a typical employer-sponsored program, the employer purchases vans and arranges for an employee driver to manage the van's operation. Employees are matched to a convenient van route, and they are transported to and from work. The riders are charged a fee based

upon the cost of operating and maintaining the van, and the vehicle's amortization cost. The driver receives a free ride and use of the vehicle on weekends. No subsidies are necessary, unlike conventional forms of mass transit. The vanpool is rarely in competition with mass transit because the average vanpool trip is nearly 25 miles, one way. The private automobile is usually the only alternative for vanpool participants and it takes little imagination to think of the benefits to the company, the participants and the public in general.

According to the Federal Energy Administration, each of the 800 commuter vans currently operating saves an average of 5,000 gallons of gasoline each year. Twenty-seven percent of commuters travel more than ten miles to work one-way. Yet this small segment accounts for 68 percent of vehicle miles traveled, according to FEA statistics. It is clear to me that paratransit modes can play a constructive role in reducing vehicle miles traveled by raising the average vehicle occupancy. We in government must be very sensitive to any innovations which can reduce our dependence upon foreign imports. Transportation has historically been very energy-inefficient. I am convinced that paratransit in general, and commuter vanpooling in particular, can make significant contributions to diminishing our energy dependence.

There are numerous other benefits. Air quality could be improved if commuters abandoned their cars for the vanpool. On the average, each commuter van reduces carbon monoxide emissions by 16 tons each year, and hydrocarbon emissions by .2 tons each year, according to the Environmental Protection Agency. Ridesharing plans may be a component of State Implementation Plans which are required under the Clean Air Act. In Boston, EPA has required employers in the metropolitan area with over 1,000 employees to publicize the benefits of vanpooling, and initiate a program for employees who are interested in participating in a program.

Traffic congestion can be reduced significantly when each van replaces six automobiles. Over $7 million in road construction costs are being saved because an aggressive vanpool program in the State of Tennessee has allowed a two lane highway to a nuclear plant site to substitute for a four lane highway.

Participating employers are finding that they don't need to build as many parking spaces when their employers are vanpooling. They also report that their labor pool is increased, because workers without personal vehicles who live in remote areas can conveniently be transported to work.

Some vanpoolers are motivated by the idealism of saving energy, reducing pollution load, and relieving traffic congestion. But most are attracted to the significant savings on commuter costs which they experience by sharing the ride. Participants in a 9 person commuter vanpool can reduce their monthly commuting costs from $136.65 to $39.87 for a 60-mile round trip to work, according to the FEA. This is almost $1,100 each year in savings, which represents a much greater stimulation of our economy by each person than a $50 tax rebate, considering that the commuter's saving is mostly OPEC's loss.

TWELFTH DISTRICT CITIZENS OPPOSE ARMED SERVICE UNIONIZATION—FAVOR THE MILITARY DRAFT

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. MURTHA. Mr. Speaker, I want to share with my colleagues the results of a poll I took recently of the area I represent on the questions of unionization of the armed services and a return to the draft.

This is a mail poll of 7,000 residents of the district. The results of the latest "Instant Poll" showed:

Question 1. Do you favor or oppose unionization of the armed services?

	Percent
Favor	4
Oppose	95
Undecided	1

Question 2. Would you favor or oppose reinstituting the military draft?

	Percent
Favor	69
Oppose	28
Undecided	3

Mr. Speaker, on the second question I would note for my colleagues that a recent Gallup poll showed two-thirds of the respondents favored a universal 1-year public service commitment by all young men and women, which was also mentioned by many citizens responding in favor to my poll.

THE 60TH ANNIVERSARY OF BATTLE CREEK PTA/PTSA

HON. GARRY BROWN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. BROWN of Michigan. Mr. Speaker, the Battle Creek Council of Parents and Teachers; and the Parents, Teachers, and Students Association are celebrating their 60th anniversary this week.

As you know, the National Parent Teachers Association holds the distinction of being the world's largest volunteer organization. Its members demonstrate a strong, active commitment to the betterment of their own communities, and the opportunities of their children.

The accomplishments of the Battle Creek PTA/PTSA testify to this commitment and the contribution that PTA members everywhere are making. At the same time, they indicate the changing nature of the community's experiences and needs over the years.

Early efforts of the Battle Creek PTA focused on child welfare and clothing for needy children. There was also an emphasis placed on passing school bond issues. In the twenties work was directed toward support of health clinics and study groups.

In the mid-thirties, citizens developed diphtheria immunization programs, actively supported establishment of better safety standards in schools, and encouraged development of recreational facilities.

The forties saw the development of advisory councils to aid the Board of Education. In the fifties, formation of adult education programs, establishment of scholarship funds and vocational training were focal points for PTA efforts.

The sixties brought confrontation with drug abuse in younger children. The citizens also directed their energies to the special education needs of the community, black awareness, and discipline problems in the schools. The PTA was actively supportive of Head Start and the Job Corps.

To day, all these and new efforts continue to receive backing of firmly committed citizens concerned about their children and their community.

Mr. Speaker, the members of the Battle Creek PTA/PTSA have every right to be proud of their 60 years of service to the community, as do PTA members everywhere. The occasion reminds us all that it is just such commitment that makes our communities and our Nation great.

VETERANS' PENSIONS

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. YOUNG of Florida. Mr. Speaker, on January 4, I introduced H.R. 1385, a bill to prevent veterans' pensions from being reduced and sometimes eliminated because of increased social security benefits. I have introduced the same bill in previous years, and am hopeful that the House Veterans' Affairs Committee will soon take the necessary steps to alleviate this unjust situation. Although the plight of our Nation's veterans, retired on fixed incomes, is a nationwide problem, I am kept more aware of the immediacy of the problem, because my district of Florida is attractive to retired Americans from all over the country, including many, many veterans. I would like to quote for you from just three of several hundred letters I received from people in my district following the distribution of veterans' pension checks in January.

A veteran's widow wrote:

When my husband passed away, I was awarded $60 per month. Since, I have been cut gradually each year. In 1976 I was down to $20.40, and this year it is only $10.90. V.A. and S.S. are my only sources of income. I have no home of my own and no other income. I am 81 years old, and in need of medical care. I have no immediate family, and I am practically blind, and unable to do any sort of work. I have worked and paid taxes all my life. It just isn't fair.

A veteran told me:

At an age approaching 81 years, one would think Congress could show compassion . . . We certainly do not want what is termed a "hand out", nor do we wish to be considered welfare cases, for we, at the time our country needed Help, we volunteered our services, and in return, we Veterans are entitled to at least a fair shake in the matter of our pensions.

Another veteran said:

I need that $96! I am a cancer victim, in and out of VA hospitals for operations. I am blind in one eye. My wife is bedridden, a stroke victim. I am not able to take care of her. Our expenses per month exceed our Social Security checks and $53.50 VA pension.

Frustration, a lack of understanding of the system, and the general cry, "It just is not fair" are the underlying themes of every letter I receive from re-

tired veterans who have had their VA pensions reduced when their social security pensions have been increased, and frankly, I share their feelings. Why is Congress so slow to act and react to the overwhelming needs of this particular group of people? What is the object of doling out larger sums of social security to these people, in an effort to help keep their standard of living above the poverty level and to keep abreast, somewhat, of the rising costs of their living expenses, if we direct the hand of the Veterans' Administration to reach down into their only other pocket and pick from it a vital part of their livelihood?

H.R. 1385 is a very simple bill. It says that recipients of veterans pensions and compensation funds are not to be penalized by increases in monthly social security benefits. It requires no great amount of time or study by the committee to understand it. It does require some compassion for older Americans who have served their country and who now need our help to live decent lives. Lets not make them wait any longer. I urge all Members of this House to acknowledge this problem. To take seriously and personally into account the enormity of this problem and to react, by making every effort to untie H.R. 1385 from whatever redtape may be impeding its progress through the legislative process.

EITHER COLD OR HUNGRY IS PLIGHT OF MANY AMERICANS

Hon. Theodore M. (Ted) Risenhoover

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. RISENHOOVER. Mr. Speaker, right now, while Congress is permitting itself an automatic pay raise, millions of older and less privileged Americans are faced with the choice of spending their limited funds on either food or fuel—being cold or going hungry.

I have introduced legislation to exclude Members of Congress from future Federal pay raises recommended by the Presidential Commission. If a salary raise is merited at all, it should be for succeeding Congresses—not for the one which is allowing the pay raise to go through. I believe that this question should be publicly debated in the Halls of Congress.

The idea of giving Congressmen economic independence to help remove the vestiges of temptation is valid. However, this cannot be done at the cost of arousing massive public distrust and alienation which might occur as the result of a salary hike. We need to give just reason to the American public so that they can believe that their Congress is one that is responsive to their problems. At a time when so many of our constituents are struggling to make ends meet, I firmly believe that Members of Congress have a public obligation to not receive an automatic, undebated pay raise.

My colleagues, we are first and foremost public servants. Our actions should and must reflect this posture.

Thank you.

BUSINESS WEEK ARTICLE DESCRIBES BENEFITS OF COMMUTER VANPOOLING

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. EDGAR. Mr. Speaker, the latest issue of Business Week contains a stimulating and provocative article on commuter vanpooling, an innovative transportation mode which is saving energy, reducing pollution load, relieving traffic congestion, and saving thousands of dollars for participants.

I introduced on January 4, H.R. 869, the Federal-aid to Ridesharing Act of 1977, to promote activities such as those described in this article. I believe that it merits the attention of all of my colleagues, and I insert it at this point for the RECORD:

COMMUTER VANS CATCH ON AT CORPORATIONS

A new type of mass transit network is quietly taking root around the U.S. Unlike the space-age systems proposed for many cities in recent years, it is based on a mundane vehicle: the small 10- or 12-passenger van. A growing number of companies and groups are setting up fleets of such vans to haul employees—and in some cases the general public—to and from work. Despite the pedestrian image of such an approach, transit planners are beginning to think "van pooling," as it is called, offers major hope for unsnarling the tangle of urban transportation.

Van pooling's most significant test is shaping up in Los Angeles, where a program that will soon be the nation's biggest got under way last month. And the concept's future seems assured if van pools can lure commuters in auto-happy Los Angeles to leave their cars at home.

So far, a surprising number of Angelenos want to do just that. Seventy vans are already carrying 700 passengers daily, with 2,100 other commuters signed for 200 more vans to be delivered in April. The city's vans should be hauling 5,000 people to work by yearend and ultimately up to 100,000, figures David J. Lester of Atlantic Richfield Co., the program's prime mover.

A HIGH OLD TIME

The reason van pooling is catching on in Los Angeles and elsewhere is that it offers something for everyone. Riders join for comfort, convenience, and camaraderie. A van picks them up at or near their homes and deposits them at the door of their office building. En route they can read, sip coffee, chat with a fixed group of neighbors, or sleep—and many riders bring pillows. In Los Angeles' new super-luxury vans, which have airplane-type seats and carpeted walls and ceilings for soundproofing, riders can also listen to music on stereo headsets.

"We have a high old time," says Harvey Chapman, an engineer with 3M Co. in St. Paul, one of 1,000 riders in that company's pioneering, four-year-old van pool. Chapman's van group has become a sort of club, meeting for lunch and outings.

For the several dozen U.S. companies that have launched van pools over the past few years, they offer a chance to "do something for the environment" and possibly save money at the same time. A 300-person waiting list for parking space is what prompted Philadelphia's SmithKline Corp. to start a van pool last April. And 3M figures it has saved $2 million by eliminating a planned parking garage.

PEER PRESSURE

Continental Oil Co. in Houston, which in two years has organized 11 employee van pools in seven states, says the pools have cut both tardiness and one-day absences. "If you have a hangover or are just sleepy you might ordinarily call in sick," says William Fortune, the company's director of special projects. "But in a van, the 11 other passengers would kid you the next morning. Peer pressure makes you come to work." Conoco hopes to double its 54-van fleet this year, and it may accept noncompany riders as an environmental gesture.

Best of all, van pooling pays for itself—in striking contrast to the nation's debt-ridden public transit systems. Unpaid drivers are the key to van poolings financial success. A 37-van pool that Chrysler Corp. launched last June for Detroit-area employees is typical: The monthly riders' fee of $21.50 to $39.50— the latter for a 100-mi. round trip—allows each 12-passenger van to break even with nine riders. Chrysler splits the 11th and 12th fares with the volunteer driver, who rides free and can use the van on weekends—although he must also keep it clean and tidy.

As an extra incentive for car-loving Los Angeles communters, some corporate backers of the city's new multicompany program are subsidizing employees who participate. ARCO, for example, pays $15 to $22 of each fare—but still saves money because it would otherwise give each employee a parking space worth $25.

GOING PUBLIC

The Los Angeles program is one of the few that is open to all comers. Program coordinators, backed by the mayor's office, use slide shows to proselytize management and employees at local companies. Only a few companies, including International Business Machines Corp., refuse to cooperate. ("We do not allow outside solicitation of our employees," says an IBM spokesman.) Riders currently signed up work for 287 businesses. Companies elsewhere in the country are also considering "going public" to make van pooling a genuine mass transit system. For them, the Los Angeles experience will be crucial.

But there are at least two potential roadblocks. One is a shortage of vans: It currently takes several months to fill large orders. The other problem is liability insurance. Drivers are "risking every cent they've got in lawsuits," claims Frank Davis, a transportation specialist at the University of Tennessee and coordinator of a multicompany van pool in Knoxville. Not even Los Angeles' $10 million-per-van insurance is adequate, he feels, because each van occupant injured in an accident could sue for that amount.

Davis has been working with insurers to develop a safer approach, possibly obliging the rider to buy his own insurance. The New York-based Insurance Services Office, an auto insurers' trade group, may soon announce a new plan. In a study of 1,000 "vehicle-years" of van pool operation, only two minor accidents have turned up.

Another obstacle has been overcome in some states: Recent legislation in California, Tennessee, and elsewhere has removed restrictions on pool vans behaving like common carriers by signing up the general public.

ECOLOGICAL DIVIDENDS

The number of vans in pools has grown from near zero five years ago to more than 1,000 at present. Enough programs exist that their backers recently formed a National Association of Van Pool Operators, with 38 members. In April the group will hold its first national conference to discuss the concept's future.

Van pooling is bound to grow further, partly because the Urban Mass Transportation Administration is warming to it. UMTA

gave Knoxville $900,000 last year to buy vans and set up its program. This year it is making two more grants: $684,000 for a Marin County (Calif.) system and $520,000 for the Norfolk (Va.) area.

UMTA is realizing that van pools can produce a sizeable payoff in reduced pollution and fuel use. 3M's 92 vans are saving 225,000 gal. of gasoline a year over what their passengers would burn in private cars. Where vans reduce peak loads on urban rail and bus lines, they can help such systems avoid buying extra equipment that sits idle between rush hours. The new Marin County system is aimed at helping to avoid building another Golden Gate Bridge. And in sprawling areas of low residential density such as Los Angeles, van pools "can get people out of their single-occupant automobiles when other forms of mass transit would be too expensive to offer," says Paul Fish, UMTA's manager of "para-transit" projects. Meanwhile, however, Southern Pacific Transportation Co., which has been trying to give away vans to its San Francisco peninsula commuters in order to drop its deficit-ridden rail service (BW–Nov. 22, '76), still lacks enough takers.

Van pooling could prove a bonanza for van builders. So far Chrysler's Dodge Div. has won the lion's share of orders because it produces large, roomy vans. Although Chrysler is delighted with its own employee van pool, it views the growth of van pooling with mixed emotions. "It takes people out of their cars," says Herbert C. Wood, Chrysler's manager of consumer relations. "So it's pretty much a trade-off."

JOBS CREATION ACT—H.R. 2589

HON. J. DANFORTH QUAYLE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. QUAYLE. Mr. Speaker, I am a cosponsor of H.R. 2589, better known as the Jobs Creation Act introduced by Mr. KEMP of New York on January 27 of this year. I would like now to speak on an important idea found in Mr. KEMP's bill: Federal tax reduction.

Presently the American workers work for themselves 3 days a week and for some agent of government 2 days a week. Recent new estimates have placed total governmental expenditures—State, local, and Federal—at the even higher total of 43 percent of GNP. So American workers while producing all of this Nation's goods and services get to keep only a fraction of what they produce. The share going to American workers has been shrinking for some time and simultaneously their incentives to continue producing have fallen. After all, how much would any man produce if all of it were taxed away? None of course. We have been moving in that direction and at a rapid pace.

I favor reversing this unhealthy trend by reducing marginal rates of taxation across the board for all workers. All members of the business community from factory work to corporate president will then work harder motivated by the incentive that they retain a greater portion of their earnings. Working harder, they produce more. GPN grows faster than before and while the share of GPN spent by the Federal Government declines a smaller share of a larger national production nevertheless produces more Federal revenue. Thus marginal tax rate reduction will make workers better off than before since they get to keep more of what they produce and will also increase revenues going into the Federal Treasury.

Most recently in this century, President Kennedy sponsored a proposal to permanently cut high rates of personal taxation in 1962. The benefits from his program are well documented. GNP grew more rapidly as predicted, workers received a higher share of what they produced and an expanding tax base permitted increased Federal revenues helping to balance the budget.

This rate reduction program will produce more stimulus to the economy than the proposed $50-per-person rebate package and will not fuel the inflationary fire many economists fear will soon reappear. It is appropriate that the Congress consider these ideas at the same time as the third concurrent resolution on the budget for fiscal year 1977 now before the House.

"CALIFANO'S SPUR TO CIVIL RIGHTS"

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. DRINAN. Mr. Speaker, I know that my colleagues will want to see the splendid tribute to Secretary Joseph Califano in the Christian Science Monitor for February 22, 1977.

The Monitor praises Secretary Califano for his very boldly expressed intention to bring about "a change from the mismanagement, confusion, and uncertain leadership on civil rights which he found at HEW as a legacy from the previous administrations."

The Monitor also notes that the promise enforcement of civil rights laws by Attorney General Bell is "an uncertain trumpet next to" the pledge of Mr. Califano.

The editorial follows:

CALIFANO'S SPUR TO CIVIL RIGHTS

Secretary Joseph Califano has taken charge of civil rights at the Department of Health, Education, and Welfare (HEW) in the welcome forthright manner predicted by Andrew Young. Mr. Young spoke in response to the concern of some fellow black Americans that he had accepted the international post of United Nations Ambassador when he might have been closer to their urgent needs at HEW. He said he had no doubts about Mr. Califano's zeal on matters like civil rights and poverty—and added that Mr. Califano was a better manager than he.

Last week manager Califano came out loud and clear for a change from the mismanagement, confusion, and uncertain leadership on civil rights which he found at HEW as a legacy from the previous administrations. The situation had been careless at best and lawless at worst, he said, noting the accumulation of neglected civil rights files.

For example, the Nixon-Ford administrations had imposed a kind of moratorium on carrying out the law which specifies that federal funds be withheld from schools violating discrimination statutes. Mr. Califano said he did not want to cut off funds to any educational institution, but he served notice HEW would do so if necessary to obtain compliance. Referring to school desegregation, sex discrimination, and protection of the handicapped, he promised a "comprehensive effort to put HEW's civil rights enforcement effort on a sound and effective footing."

The question now is how thoroughly Mr. Califano and his bureaucracy will follow through on his assurances. He has already called for the reopening of six school desegregation cases. He is suddenly faced with acting on the decision by an HEW administrative law judge that more than $40 million in federal funds be withheld from Chicago unless its public school system brings itself into compliance with civil rights law.

The civil rights road is not easy. The Carter administration will need a strong thrust not only from HEW but from the Justice Department. Attorney General Bell, too, promises enforcement of civil rights laws, but his remarks on desegregation last week did not appear precisely tuned in to Supreme Court action; they seemed an uncertain trumpet next to Mr. Califano's. The new HEW Secretary has at least begun by recognizing the necessity of building an atmosphere for confidence in the government's will to enforce the law. It is a good start.

ANNIVERSARY OF LITHUANIAN INDEPENDENCE

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. BRODHEAD. Mr. Speaker, on February 16, 1918, the Lithuanian National Council unanimously declared Lithuania's independence and established the Republic of Lithuania, despite a peace treaty with the Soviet Union, Lithuania was invaded by that country in 1940, and later by the Nazis.

After the war, the country was illegally seized again by the Soviet Union. However, the Soviet Union will never be able to dominate the irrepressible spirit of the Lithuanian people, whose zeal for liberty and basic human rights is undiminished. The United States has never recognized the Soviet Union's forcible annexation of Lithuania, and I believe this country must continue to protest in the strongest terms the oppression of the Lithuanian people.

I recently received a resolution that was adopted by the Detroit Lithuanian Organizations Center on the commemoration of Lithuania's Independence Day, and I want to share it with my colleagues:

RESOLUTION

We the United States citizens of Lithuanian descent residing in the Greater Detroit area and having met on February 13, 1977 at 12:30 p.m. at the Lithuanian Cultural Center at 25335 West Nine Mile Road, Southfield, Michigan to commemorate Lithuania's Independence Day, hereby declare that:

Whereas the three once sovereign Baltic States of Lithuania, Latvia and Estonia are illegally occupied by the Soviet Union;

Whereas the United States Senate unanimously passed Resolution 319 on July 26th in the Bicentennial Year 1976 of our Republic stating that United States should continue not to recognize this illegal occupation. Now therefore, be it resolved

That the United States raise the question of this hideous occupation at the Belgrade

Conference as the most pressing moral issue and as a fitting tribute to the just aspiration to liberty and freedom by those oppressed people;

That we empower the Chairman of the Day to sign this Resolution and resolve to send it to the President, the President of the Senate, the Speaker of the House of Representatives and the Senators and Representatives from the State of Michigan.

CONGRESSIONAL ETHICS

HON. JOSEPH S. AMMERMAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. AMMERMAN. Mr. Speaker, the subject of congressional ethics and the proposed new ethics code are attracting much attention these days. It seems to me that in light of the congressional pay raise we have a great moral obligation to move ahead with the recommendations of the Commission on Administrative Review, chaired by the distinguished gentleman from Wisconsin (Mr. OBEY).

I thought I would share with the Members the views on the Obey commission's ethics package that I expressed to my constituents in the 23d Congressional District in a recent newspaper column:

Wayne Hays is long gone from Congress but he still is casting a ghostly presence here.

A major order of business for the 95th Congress has been to see what can be done to curb the abuses of power identified with Hays.

A special Commission on Administrative Review, composed of House members and private citizens, has been exploring the many issues raised by recent congressional scandals. The panel recently made its most far-reaching proposals to date by calling for a new code of ethics for House members.

The main points of that code are:

COMPREHENSIVE FINANCIAL DISCLOSURES

Members would have to list, and to identify the source of, all income over $100 from any one source, gifts of more than $250, reimbursements from any one source of more than $250, property holdings of $1,000 or more, debts of $2,500 or more, and securities transactions of more than $1,000. Gifts of more than $100 from interest groups and lobbyists would be banned entirely.

AN END TO "OFFICE ACCOUNTS"

These accounts, which are supposed to help defray the costs of running congressional offices, can and have become "slush funds" for the personal enrichment of members. I do not have such an account nor will I establish one, regardless of whether the House bans them or not.

There are now no controls of any kind over office accounts. Campaign committees, in contrast, must file regular disclosure statements with the Federal Elections Commission and are subject to numerous legal restrictions. The House Commission on Administrative Review wisely has called for a total ban on office accounts.

OUTSIDE INCOME

The commission recommends that all outside earned income, such as fees from speeches and books, and income from business activities be limited to 15 per cent of a member's income. Fees specifically would be limited to no more than $500 each. There currently are no overall restrictions on outside income, although fees are limited to $2,000 each and $25,000 per year.

MAILINGS AND TRAVEL

The commission would prohibit travel at taxpayers' expense by "lame duck" members of Congress (members who have not been re-elected). The panel also has recommended a number of changes in congressional mailing procedures. The most important of these is a prohibition on mass mailings, such as newsletters, within 60 days of a congressional election. Currently, a mailing can go out as late as 28 days prior to an election.

To me, one of the especially interesting aspects of the commission's work was the survey it conducted of House members and of the general public on these matters.

According to the survey, public confidence in members of Congress is low—unsurprising, given recent events. I was surprised, and pleased, to see that there is public support for greater expenditures to permit members to do a better job of carrying out their official responsibilities.

In particular, there is a great public desire for more information about what is happening in Washington. And there is public agreement that public money should be substituted for uncontrolled private funds such as office accounts, the survey found.

Another very interesting finding of the survey is that members indicated a degree of concern about the ethics problem equal to their constituents' concern.

If so, it should mean that the ethics package—which I support and will vote for—will prevail when it is sent to the House for approval.

CONGRESSIONAL RECORD REFORM

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. STEIGER. Mr. Speaker, I want to make very clear that this statement is not being spoken by me on the House floor.

Today I am reintroducing a resolution to make the RECORD a more accurate reflection of proceedings on the House floor. I have done this for the past 7 years.

Although my proposal has not received action in the past four Congresses. I have more confidence that the RECORD will be made honest in the 95th Congress. I am especially pleased that more than 100 of my colleagues have joined in cosponsoring the resolution. This broad-based, bipartisan support is a measure of the commitment to change shared by so many of us in this body.

Senator BOB PACKWOOD of Oregon has introduced identical legislation in the other body. He has received good support for it there.

Our proposal states specifically that any remarks not actually delivered on the floor "shall appear, as may be appropriate, following the record of the entire debate to which they are germane and prior to the record of a vote except that such insertions shall be preceded and succeeded by a printed designation which clearly distinguishes the insertion from verbatim remarks." The printed designation could be brackets, bullets, or stars.

This legislation was developed by Senator PACKWOOD and me in conjunction with representatives of the Government Printing Office and the Joint Committee on Printing. They told us this would be an effective, simple way to make the RECORD a more accurate reflection of what happens on the floor. Senator HOWARD CANNON, chairman of the joint committee, has endorsed our recommendation in a letter to joint committee members.

There is clear need for this reform. It deals directly with one of the most persistent, and legitimate criticisms of Congress—that our own record of proceedings is a deliberate distortion of what happens on the floor.

Unlike the British and Canadian Hansards, which are verbatim accounts of parliamentary sessions, the RECORD is estimated by GPO to contain about 70 percent extraneous material never said on the floor of the House or Senate.

Cost is another key reason for change. The RECORD only 4 years ago had 38,500 pages and cost $8.8 million; in fiscal year 1976, it grew to 51,000 pages and cost $14.6 million. A single page of the RECORD, which cost less than $100 a little over a decade ago and $238 only 3 years ago, is expected to cost $317 in fiscal year 1977. If costs continue to rise and nothing is done to reduce extraneous material in the RECORD, the cost of printing it could be prohibitive in only 5 or 6 years.

Another critical problem with the RECORD is that it is used by administering agencies as they interpret legislative intent for carrying out Federal laws. When the RECORD gives an inaccurate reflection of debate, the agency is misled. This has already happened and will only increase if we permit the growing abuse of the CONGRESSIONAL RECORD.

Under law, the RECORD is "substantially a verbatim report of proceedings." But, in fact, it does not even come close to meeting that less than rigid standard.

This year, with sufficient support we have an excellent chance to make the RECORD adhere to its legal guideline. I hope that more Members will join in this effort so that the reform can take effect at the earliest possible date.

CONGRESSIONAL PAY RAISE

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. O'BRIEN. Mr. Speaker, I have two basic and strong objections to the congressional pay raise. One, there is no justification for this Congress to raise its own salary during the present term of office. It is bad policy. It is also bad politics. I fully supported the effort by Mr. WHALEN and others to prevent any pay raise during the current term of office. I feel I have a bargain with the voters of the 17th District of Illinois. I knew what the wages were when I sought their votes. So did they. It would be nothing less than a betrayal of this compact to take a pay raise after the term began.

Second, the manner in which the Congress was deprived of its vote on the question of a pay raise gives me great trouble. The contortions of the House leadership

to hustle the pay raise through without a rollcall vote goes straight to the question of congressional ethics. How can we in good conscience ask the American people to trust the Congress when they have before them such a glaring example of why they should not trust the Congress?

For my part, I intend to handle this pay raise just as I have in the past and return it to the U.S. Treasury.

INCOME TAX INFORMATION FOR TAXPAYERS AND OLDER AMERICANS

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. PRESSLER. Mr. Speaker, I represent a State with an unusually large number of elderly citizens. I am acutely aware of their problems and it is my aim to help those older Americans who have contributed so much to the growth and development of this great country in any way that I can.

For several years now, the Senate Committee on Aging has published a checklist of itemized deductions for individual taxpayers. The purpose of this summary is to protect older Americans from overpaying their income taxes.

First, it offers guidance for individuals to determine whether it would be to their advantage to itemize their deductions or compute their taxes on the basis of the tax tables.

Second, the summary also includes a brief description of the other tax relief measures available to older Americans, such as the retirement income credit, the total or partial exclusion of a gain on the sale of a personal residence, and others. I believe it is a particularly useful guide to older Americans since they they simply do not have the financial resources to go out and hire a tax consultant and as a result often end up paying much more in taxes each year than is necessary.

I would also like to point out that persons who discover that they overpaid their taxes in prior years have recourse. They may file an amended return—Form 1040X—to claim deductions initially overlooked. Form 1040X must be filed within 3 years after the original return was due or filed, or within 2 years after the tax was paid, whichever is later.

Mr. Speaker, as a service to all taxpayers, and especially to elderly Americans, I ask that this checklist be added to my remarks at this time. Its publication in the RECORD will help to bring this information to the older citizens of South Dakota, as well as older Americans in all 50 of these United States.

The checklist follows:

CHECKLIST OF ITEMIZED DEDUCTIONS FOR SCHEDULE A (FORM 1040)

MEDICAL AND DENTAL EXPENSES

Medical and dental expenses (unreimbursed by insurance or otherwise) are deductible to the extent that they exceed 3 percent of a taxpayer's adjusted gross income (line 15c, Form 1040).

INSURANCE PREMIUMS

One-half of medical, hospital or health insurance premiums are deductible (up to $150) without regard to the 3 percent limitation for other medical expenses. The remainder of these premiums can be deducted, but is subject to the 3 percent rule.

DRUGS AND MEDICINES

Included in medical expenses (subject to 3 percent rule) but only to extent exceeding 1 percent of adjusted gross income (line 15c, Form 1040).

OTHER MEDICAL EXPENSES

Other allowable medical and dental expenses (subject to 3 percent limitation):

Abdominal supports (prescribed by a doctor)
Acupuncture services
Ambulance hire
Anesthetist
Arch supports (prescribed by a doctor)
Artificial limbs and teeth
Back supports (prescribed by a doctor)
Braces
Capital expenditures for medical purposes (e.g., elevator for persons with a heart ailment)—deductible to the extent that the cost of the capital expenditure exceeds the increase in value to your home because of the capital expenditure. Taxpayer should have an independent appraisal made to reflect clearly the increase in value.
Cardiographs
Chiropodist
Chiropractor
Christian Science practitioner, authorized
Convalescent home (for medical treatment only)
Crutches
Dental services (e.g., cleaning, X-ray, filling teeth)
Dentures
Dermatologist
Eyeglasses
Food or beverages specially prescribed by a physician (for treatment of illness, and in addition to, not as substitute for, regular diet; physician's statement needed)
Gynecologist
Hearing aids and batteries
Home health services
Hospital expenses
Insulin treatment
Invalid chair
Lab tests
Lipreading lessons (designed to overcome a handicap)
Neurologist
Nursing services (for medical care, including nurse's board paid by you)
Occupational therapist
Ophthalmologist
Optician
Optometrist
Oral surgery
Osteopath, licensed
Pediatrician
Physical examinations
Physical therapist
Physician
Podiatrist
Psychiatrist
Psychoanalyst
Psychologist
Psychotherapy
Radium therapy
Sacroiliac belt (prescribed by a doctor)
Seeing-eye dog and maintenance
Speech therapist
Splints
Supplementary medical insurance (Part B) under Medicare
Surgeon
Telephone/teletype special communications equipment for the deaf
Transportation expenses for medical purposes (7¢ per mile plus parking and tolls or actual fares for taxi, buses, etc.)
Vaccines
Vitamins prescribed by a doctor (but not taken as a food supplement or to preserve general health)
Wheelchairs
Whirlpool baths for medical purposes
X-rays

TAXES

Real estate
State and local gasoline
General sales
State and local income
Personal property

If sales tax tables are used in arriving at your deduction, you may add to the amount shown in the tax tables only the sales tax paid on the purchase of five classes of items: automobiles, airplanes, boats, mobile homes, and materials used to build a new home when you are your own contractor.

When using the sales tax tables, add to your adjusted gross income any nontaxable income (e.g., Social Security, Veterans' pensions or compensation payments, Railroad Retirement annuities, workmen's compensation, untaxed portion of long-term capital gains, recovery of pension costs, dividends untaxed under the dividend exclusion, interest on municipal bonds, unemployment compensation and public assistance payments.

CONTRIBUTIONS

In general, contributions may be deducted up to 50 percent of your adjusted gross income (line 15c, Form 1040). However, contributions to certain private nonprofit foundations, veterans organizations, or fraternal societies are limited to 20% of adjusted gross income.

Cash contributions to qualified organizations for (1) religious, charitable, scientific, literary or educational purposes, (2) prevention of cruelty to children or animals, or (3) Federal, State or local governmental units (tuition for children attending parochial schools is not deductible). Fair market value of property (e.g., clothing, books, equipment, furniture) for charitable purposes. (For gifts of appreciated property, special rules apply. Contact local IRS office.)

Travel expenses (actual or 7¢ per mile plus parking and tolls) for charitable purposes (may not deduct insurance or depreciation in either case).

Cost and upkeep of uniforms used in charitable activities (e.g., scoutmaster).

Purchase of goods or tickets from charitable organizations (excess of amount paid over the fair market of the goods or services).

Out-of-pocket expenses (e.g., postage, stationery, phone calls) while rendering services for charitable organizations.

Care of unrelated student in taxpayer's home under a written agreement with a qualifying organization (deduction is limited to $50 per month).

INTEREST

Home mortgage.

Auto loan.

Installment purchases (television, washer, dryer, etc.).

Bank credit card—can deduct the finance charge as interest if no part is for service charges, loan fees, credit investigation fees, or similar charges.

Points—deductible as interest by buyer where financing agreement provides that they are to be paid for use of lender's money. Not deductible if points represent charges for services rendered by the lending institution (e.g., VA loan points are service charges and are not deductible as interest). Not deductible if paid by seller (are treated as selling expenses and represent a reduction of amount realized).

Penalty for prepayment of a mortgage—deductible as interest.

Revolving charge accounts—may deduct the "finance charge" if the charges are based on your unpaid balance and computed monthly.

Other charge accounts for installment purchases—may deduct the lesser of (1) 6 percent of the average monthly balance (average

monthly balance equals the total of the unpaid balances for all 12 months, divided by 12) or (2) the portion of the total fee or service charge allocable to the year.

CASUALTY OR THEFT LOSSES

Casualty (e.g., tornado, flood, storm, fire, or auto accident provided not caused by a willful act or willful negligence) or theft losses to nonbusiness property—the amount of your casualty loss deduction is generally the lesser of (1) the decrease in fair market value of the property as a result of the casualty, or (2) your adjusted basis in the property. This amount must be further reduced by any insurance or other recovery, and, in the case of property held for personal use, by the $100 limitation. You may use Form 4684 for computing your personal casualty loss.

CREDIT FOR CHILD AND DEPENDENT CARE EXPENSES

Certain payments made for child and dependent care may now be claimed as a credit against tax instead of as an itemized deduction.

If a taxpayer maintained a household that included a child under age 15 or a dependent or spouse incapable of self-care, a taxpayer may be allowed a 20 percent credit for employment related expenses. These expenses must have been paid during the taxable year in order to enable the taxpayer to work either full or part time.

For detailed information, see the instructions for Form 2441 on page 17.

MISCELLANEOUS

Alimony and separate maintenance (periodic payments).

Appraisal fees for casualty loss or to determine the fair market value of charitable contributions.

Union dues.

Cost of preparation of income tax return.

Cost of tools for employee (depreciated over the useful life of the tools).

Dues for Chamber of Commerce (if as a business expense).

Rental cost of a safe-deposit box for income-producing property.

Fees paid to investment counselors.

Subscriptions to business publications.

Telephone and postage in connection with investments.

Uniforms required for employment and not generally wearable off the job.

Maintenance of uniforms required for employment.

Special safety apparel (e.g., steel toe safety shoes or helmets worn by construction workers; special masks worn by welders).

Business entertainment expenses.

Business gift expenses not exceeding $25 per recipient.

Employment agency fees under certain circumstances.

Cost of a periodic physical examination if required by employer.

Cost of installation and maintenance of a telephone required by the taxpayer's employment (deduction based on business use).

Cost of bond if required for employment.

Expenses of an office in your home if employment requires it.

Payments made by a teacher to a substitute.

Educational expenses required by your employer to maintain your position or for maintaining or sharpening your skills for your employment.

Political Campaign Contributions.—Taxpayers may now claim either a deduction (line 32, Schedule A, Form 1040) or a credit (line 52, Form 1040), for campaign contributions to an individual who is a candidate for nomination or election to any Federal, State, or local office in any primary, general or special election. The deduction or credit is also applicable for any (1) committee supporting a candidate for Federal, State, or local elective public office, (2) national committee of a national political party, (3) State committee of a national political party, or (4) local committee of a national political party. The maximum deduction is $100 ($200 for couples filing jointly). The amount of the tax credit is one-half of the political contribution, with a $25 ceiling ($50 for couples filing jointly).

Presidential Election Campaign Fund.—Additionally, taxpayers may voluntarily earmark $1 of their taxes ($2 on joint returns) for the Presidential Election Campaign Fund.

For any questions concerning any of these items, contact your local IRS office. You may also obtain helpful publications and additional forms by contacting your local IRS office.

OTHER TAX RELIEF MEASURES

Filing status	*Required to file a tax return if gross income is at least—*
Single (under age 65)	$2,450
Single (age 65 or older)	3,200
Qualifying widow(er) under 65 with dependent child	2,850
Qualifying widow(er) 65 or older with dependent child	3,600
Married couple (both spouses under 65) filing jointly	3,600
Married couple (1 spouse 65 or older) filing jointly	4,350
Married couple (both spouses 65 or older) filing jointly	5,100
Married filing separately	750

Additional Personal Exemption for Age.—Besides the regular $750 exemption allowed a taxpayer, a husband and wife who are 65 or older on the last day of the taxable year are each entitled to an additional exemption of $750 because of age. You are considered 65 on the day before your 65th birthday. Thus, if your 65th birthday is on January 1, 1977, you will be entitled to the additional $750 personal exemption because of age for your 1976 Federal income tax return.

General Tax Credit.—A new general tax credit is available. For this credit, the taxpayer may claim the greater of (1) $35 per exemption shown on line 6d, Form 1040A or Form 1040, or (2) 2 percent of taxable income (line 15, Form 1040A or line 47, Form 1040) but not more than $180 ($90, if married, filing separately).

Multiple Support Agreements.—In general, a person may be claimed as a dependent of another taxpayer, provided five tests are met: (1) Support, (2) gross income, (3) member of household or relationship, (4) citizenship, and (5) separate return. But in some cases, two or more individuals provide support for an individual, and no one has contributed more than half the person's support. However, it still may be possible for one of the individuals to be entitled to a $750 dependency deduction if the following requirements are met for multiple support:

1. Two or more persons—any one of whom could claim the person as a dependent if it were not for the support test—together contribute more than half of the dependent's support.

2. Any one of those who individually contribute more than 10% of the mutual dependent's support, *but only one of them,* may claim the dependency deduction.

3. Each of the others must file a written statement that he will not claim the dependency deduction for that year. The statement must be filed with the income tax return of the person who claims the dependency deduction. Form 2120 (Multiple Support Declaration) may be used for this purpose.

Sale of Personal Residence by Elderly Taxpayers.—A taxpayer may elect to exclude from gross income part or, under certain circumstances, all of the gain from the sale of his personal residence, provided:

1. He was 65 or older before the date of the sale, and

2. He owned and occupied the property as his personal residence for a period totaling at least 5 years within the 8-year period ending on the date of the sale.

Taxpayers meeting these two requirements may elect to exclude the entire gain from gross income if the adjusted sales price of their residence is $20,000 (this amount will increase to $35,000 for taxable years beginning after December 31, 1976) or less. (This election can only be made once during a taxpayer's lifetime.) If the adjusted sales price exceeds $20,000 (this amount will increase to $35,000 for taxable years beginning after December 31, 1976), an election may be made to exclude part of the gain based on a ratio of $20,000 (this amount will increase to $35,000 for taxable years beginning after December 31, 1976) over the adjusted sales price of the residence. Form 2119 (Sale or Exchange of Personal Residence) is helpful in determining what gain, if any, may be excluded by an elderly taxpayer when he sells his home.

Additionally, a taxpayer may elect to defer reporting the gain on the sale of his personal residence if within 18 months before or 18 months after the sale he buys and occupies another residence, the cost of which equals or exceeds the adjusted sales price of the old residence. Additional time is allowed if (1) you construct the new residence or (2) you were on active duty in the U.S. Armed Forces. Publication 523 (Tax Information on Selling Your Home) may also be helpful.

Credit for the Elderly.—A new, expanded, and simplified credit for the elderly has replaced the former more complex retirement income credit.

A taxpayer may be able to claim this credit and reduce taxes by as much as $375 (if single), or $562.50 (if married filing jointly), if the taxpayer is:

(1) Age 65 or older, or

(2) Under age 65 and retired under a public retirement system.

To be eligible for this credit, taxpayers no longer have to meet the income requirement of having received over $600 of earned income during each of any 10 years before this year.

For more information, see instructions for Schedules R and RP.

Earned Income Credit.—A taxpayer who maintains a household for a child who is under age 19, or is a student, or is a disabled dependent, may be entitled to a special payment or credit of up to $400. This is called the earned income credit. It may come as a refund check or be applied against any taxes owed. Generally, if a taxpayer reported earned income and had adjusted gross income (line 15c, Form 1040) of less than $8,000, the taxpayer may be able to claim the credit.

Earned income means wages, salaries, tips, other employee compensation, and net earnings from self-employment (generally amount shown on Schedule SE (Form 1040) line 13). A married couple must file a joint return to be eligible for the credit. Certain married persons living apart with a dependent child may also be eligible to claim the credit.

For more information, see instructions for Form 1040 or 1040A.

GEORGE EVANS—A TEACHER

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. AuCOIN. Mr. Speaker, as some of my colleagues know, I formerly worked as an administrator in higher education.

It was at a time we knew as the turbulent and trying sixties.

In those years, I developed an abiding respect for the best of the poeple I lived and worked with on college campuses. These were the searchers, the inquirers, the probers—who provoked thought and brought out the best in young minds.

One of those persons is Dr. George Evans, a professor of English at Pacific University, a small, independent college in Forest Grove, Oreg.

I am proud to have worked with and to have known George Evans.

Then, as now, he has that passion for learning—as opposed to "teaching"—that sets a true teacher apart.

Recently, Dr. Evans wrote a short article in the university magazine, Pacific Today, which reflects on students of the sixties and seventies but, more meaningfully, captures that elusive quality of what education, and the act of teaching, should be.

When Dr. Evans says, "We must know more, yes, but, more importantly, we must be more," he is speaking not only of teachers and college administrators but of parents and of citizens. He is speaking of you and me.

Mr. Speaker, I commend to the attenof my colleagues this splendid article and I insert it at this point in the RECORD.

ARE STUDENTS REALLY CHANGING?
AND WHAT IS EDUCATION?

(By George Evans)

Ten years have passed, and the scene outside my Bates House office window seems unchanged: the same downy woodpecker, in search of its daily fare, corkscrews around the gnarled oak, half-dressed now in winter green. Behind it the redwoods stand aloof, untroubled by the formless dreams of young and old who pass beneath their limbs. And yet, despite appearances, much has changed in the decade since I arrived, fresh from graduate school, to begin my career of teaching at Pacific. In that time a president has retired, three buildings have burned, five deans have resigned, scores of faculty have departed for the green pastures of large state and private schools, and Boxer, that battered dog of many lives, appeared once and was dispatched forthwith to a well-deserved retirement.

And what of the students ten years later? Are they as changeless as the trees outside my window? They certainly don't look the same. Released from the Victorian dress code they now dress to please themselves, freeing the dean for concerns of greater moment. But it is in the classroom, we are told by the student watchers in numerous popular and professional journals, that the real change is taking place. The 70's students are less prepared, less literate, less interested in the drama of national and world affairs than any preceding generation, certainly less than the demanding, involved students of the 60's.

The judgment sounds familiar. Young people struggle to express themselves, to understand who they are and what their destiny will be, and older people tell them that they and their world are going to the dogs. I heard the story as a student in the 50's, and older graduates have, undoubtedly, been fed from the same bowl of sour grapes.

Instead of following the familiar script, I would like to suggest that students and faculty today are much the same, at least in essential ways, as they were ten or twenty years ago. And the meeting of the two in that mysterious, elusive experience we call education is also much the same, though my feelings about that experience have shifted radically over the years.

When I think of what influenced me the most as a student, what subtly changed me and how I looked at myself and the world, I remember men and women, not classes, not buildings, not even books. I remember the geologist whose love—nay, whose passion—for his subject infused all of us with the same excitement. I can no longer recall the difference between dolomite and limestone, but I remember the teacher's love for the earth, his home; and I look at that earth today through different eyes because of him. I don't remember a thing from a brilliant lecture on Leibnitz, but I do remember the gentle man who invited me to his home to talk, over a glass of wine, of my life and dreams, matters I had thought too unimportant for so learned a man.

I can remember almost no details from any class or exam or research paper, but I do remember the individuals who were my teachers. I remember those who were condescending, who endured the classroom hour with barely disguised disdain for us who knew so much less than they in their day as students. From them I learned little. I remember those who loved what they were doing, who enjoyed talking with us about the mundane and the magnificent. From them I learned much, but for what I learned there is no instrument for measurement.

The conventional wisdom often says that the best teacher—and the best parent—is the one who knows the most and is able to convey that knowledge within the allotted class time or maturation period. We thus frantically fill up our classes and family life with information and rules, facts and logical arguments. The more we convey, the more successful we are. We teach through the force of our minds and our minds alone. Or so we think. It is possible, however, that we are like the doctors that Kubler-Ross writes of in her books on death and dying—professional, technically competent men and women who surround themselves with charts and graphs and jargon and deceptions because they are afraid to talk with the dying patients about what is most important to them: the passing of life and the reality of death.

Our job as teachers and parents, I believe, is to talk with living patients, the young people we share life with, about what it means to be alive. We have no dearth of facts and information. We are not short of examinations to test the quantity of information that has been passed from one mind to another. But the question arises; how does this wealth of information make us any different from a book or tape which can be purchased and digested at far less expense and pain for the student or child?

Human behavior, I have come to believe, is shaped slowly and imperceptibly, not by books or facts or rules, but by example, by personal encounters with friends, teachers, family, by the manner in which others live their lives. I'm not sure that many teachers or parents would agree with this, and I'm not sure that I'm willing to face the implications for myself, but I think it is not what we know but what we are that really matters in the educational experience. To believe this is to suffer a nagging sense of failure as a parent and teacher because while it is easy enough to measure what we know by books read and lectures delivered, it is a most painful task to measure what we are as human beings and how we have lived in that relentless and penetrating spotlight young people turn upon our every word and act.

Afraid of that spotlight, we close the doors of office and home. We read more journals and join more professional societies. We consult the experts and become experts ourselves in raising children. Inflated with the power we have over the lives of young people, bloated with self importance, we ascend Olympus and are lost in the sunshine of our knowledge.

To be effective teachers and parents is both simple and difficult. We must first come down from Olympus and admit to ourselves and to others that we are, all of us, searching; and that though we are older and more knowledgeable, we are not necessarily any wiser about this business of living. Having descended from our Olympian Splendor and detachment, we must reveal what we are as human beings, warts and all. That will be, for most of us, a lesson in humility. We will have to admit that we know very little, that our jobs and our lives are at times depressing, and that what we do sometimes seems to have little enduring meaning. And having admitted this, we might go on to show in our daily lives that like Sisyphus, condemned by the gods to roll the stone eternally to the top of the mountain, we will find happiness born of pain, and that in our common lot of rolling the stone we are brothers—teacher and student, parent and child—weak, struggling, often benighted, but rolling it nonetheless with whatever dignity and courage and hope we can summon from within.

We must know more, yes, but more importantly, we must be more. That is what young people, unconsciously perhaps, were asking of adults when I was a student, and that is what they are asking today. It is what we in turn should be asking of them. What profit is there to a society if its most brilliant men and women cheat on their taxes or burglarize political opponents or are simply cold and insensitive to the needs of others?

Small liberal arts schools like Pacific, because of their size and the kind of faculty they attract, are well suited to the kind of education which touches both the heart and the head. Like all institutions, including most notably the family, which we in some ways resemble, we have failed and failed often; but I am holding on to the faith that we have succeeded more than we have failed, and that the quality of the people we have graduated will confirm that faith.

CITIZENS FOR NEIGHBORHOOD SCHOOLS

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. MOTTL. Mr. Speaker, I would like to call to the attention of my colleagues and their constituents a group called "Citizens for Neighborhood Schools, Inc." from Cleveland, Ohio.

Citizens for Neighborhood Schools feels that the way to insure that every child may attend a neighborhood school is through the Congress. In an effort to restore faith in the democratic process, this group has initiated a campaign to convince the general public to communicate with their legislators on the need for neighborhood schools.

I wish to publicly commend Citizens for Neighborhood Schools for handling this matter entirely in a legal and professional manner. They do not advocate defying the law, but rather they stress working closely with those that make the laws.

Citizens for Neighborhood Schools would also like to encourage citizens across the country to take a renewed interest in their Government and to open

the lines of communication with their elected officials. For further information on Citizens for Neighborhood Schools, Inc. address inquiries to P.O. Box 17312, Cleveland, Ohio 44117.

OPPOSING THE CONGRESSIONAL PAY RAISE

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. EDGAR. Mr. Speaker, I would like to commend the efforts of many of my colleagues who courageously faced head-on the controversial issue of the congressional pay raise. Despite the support of many Members, including myself, to at least bring the increase to a floor vote, we are today confronted with the knowledge that we have, in effect, given ourselves a $12,900 pay raise.

We in this House have never missed an opportunity to be the leaders in asking our constituents to make personal sacrifices. We have implored labor to buffer their wage requests. We have asked business and industry to control price increases. We have asked everyone to turn down their thermostats, not to drive over 55 miles per hour, and to purchase fuel-efficient automobiles and appliances.

Many of my colleagues, Mr. Speaker, have joined in this effort of sacrifice. But on the whole, this effort has been virtually symbolic. We have effectively insulated ourselves against the suffering of our constituents. We as Members have no fear of inflation, because we now get automatic pay increases. For at least 2 years, we have little fear of getting a pink slip for reasons far beyond our control, such as an energy shortage. We feast at sumptuous banquets and are served at countless parties in well-heated, cozy House dining rooms. It makes it easy to forget the thousands of our citizens who in recent weeks have had to choose between a warm environment and a full stomach.

I am sure that a very large proportion of those who we represent would jump at the chance to find productive employment at an annual salary of $12,900. It will take positive action by us to change this system whereby we make ourselves eligible for automatic pay increases.

I do not know of a single Member of this House who would undergo true hardship if this raise had been denied. Yet it is clear that those we represent are very concerned with the pay raise issue. Some of these people have undergone hardships such as seeing their meager savings eroded by inflation, or having the family breadwinner laid off because of the loss of a government contract. It is difficult to explain why Members of Congress require this raise. I certainly cannot explain it.

This raise will only serve to increase our isolation from the economic realities which confront those we represent. While much has been made of the fact this increase will be tied to a new code of ethics, I believe that this is an unfair package to offer the American people.

I am hopeful that the House will see fit after this debacle to move ahead on H.R. 1365, the Congressional Pay Raise Deferral Act, sponsored by Congressman WHALEN and cosponsored by over 70 other Members, including myself. I believe that this legislation is the best way out of the morass we currently find ourselves in. If the Members of this body wish to demonstrate their concern for the ethics and integrity of the House of Representatives, they will act to remove the conflict-of-interest inherent in the present system whereby we must consider salary proposals which are to the immediate personal benefit or detriment of each of us. H.R. 1365 could easily remedy this situation by deferring any increase in Members' salary until the start of the Congress following the one in which it is approved. Mr. Speaker, I urge favorable consideration of this legislation by the House immediately.

COMMENT BY "JANE'S ALL THE WORLD'S AIRCRAFT" ON SOVIET VERSUS AMERICAN MILITARY STRENGTH

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. MURTHA. Mr. Speaker, during a recent inspection tour I made of the Norfolk Naval Base, my attention was directed to an article that is very important to deliberations by Congress on our national defense.

I do not believe anyone contradicts "Jane's All the World's Aircraft" as a leading international assessment of air and military strength. The following article appeared in the Parade section of the Norfolk Virginian-Pilot and summarizes some very important conclusions reached in the new edition of this publication.

[From the Parade Section, Feb. 13, 1977]

SOVIET AIR SUPREMACY

The new edition of "Jane's All the World's Aircraft," published in London, claims the Soviet Union is vastly superior to America in military aviation. So superior, in fact, that the U.S. might be compelled to resort to nuclear weapons if war developed between the two superpowers.

J.W.R. Taylor, respected editor of "Jane's," says there is great doubt that the U.S. can match the Soviet Union in conventional warfare at this time. Taylor says that our aircraft currently consist of old bombers and interceptors, while the Soviets are constructing the latest swing-wing bombers and supersonic fighters infinitely better than the MIG-25 a Soviet defector turned over to Japan last September.

Taylor maintains that we are underestimating the excellence of the Soviet "Backfire" bomber, which is—no matter what the Russians say—a long-range weapon that can bomb targets in the U.S. and then land in Cuba. Taylor quotes the chief of staff of Britain's Royal Air Force as saying, "Backfire, faster than Concorde and with a much longer range, may prove an even greater danger to Allied shipping than the relatively slow-moving Russian submarines."

Taylor explains that 20 years ago Great Britain assumed future wars would be nuclear wars and decided incorrectly that, under such circumstances, Britain needed no new bombers or fighters.

"The United States had the same wrong thought somewhat later," he says, "and has yet to take the positive step of rebuilding its air defense. . . . The three immediate requirements for the U.S. are to recognize that Backfire is a strategic weapon, to build the B-1 bomber as its wholly essential and uniquely flexible counterpart, and to order as a matter of urgency replacements for Aerospace Defense Command's time-expired F-106 Delta Dart interceptors."

LEGISLATION AIMED AT MORE USE OF U.S.-FLAG OIL TANKERS

HON. LEO C. ZEFERETTI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. ZEFERETTI. Mr. Speaker, today I am introducing legislation aimed at alleviating the problems posed to the economy and the environment of the United States through excessive reliance on foreign-flag tankers for the import of oil and petroleum derivatives. The legislation mandates that at least 25 percent and hopefully 30 percent of all oil imported to the United States be carried by U.S.-flag tankers.

According to recent estimates the United States now imports 44 percent of its oil. This figure may be translated to approximately 9 million barrels a day. Admittedly, this is evidence of extreme dependence on foreign oil producers and it is a situation that is far from desirable. However, it is not the most pressing issue we have at hand. Reducing the amount of oil imported would cripple the industry of this Nation and inflict severe hardships on the general public. What staggers the imagination is that 96 percent of what the United States imports is being transported in vessels that are either foreign-owned or are flying a foreign "flag of convenience."

In many cases, the foreign tankers that transport the energy resources which fuel our Nation are disasters waiting to happen. In some cases they did not wait, as recent events attest, and ran aground as the result of incompetent navigation or broke apart under the forces of nature, spilling thousands of gallons of precious energy on the once-splendid seas which have come to be viewed by some as the "Atlantic Oil Drum."

This is a situation that is criminal at best and we need not look across the seas to point the finger of blame. Much of the blame can be laid on the shoulders of the oil industry.

Members of the oil industry regularly resort to the practice of transporting oil under flags of convenience to obtain larger profits—but at what cost to the oceans and lands from which they extract their cash flow in the form of crude oil. It is inexcusable that U.S. corporate giants can resort to engaging vessels that are no more than rust buckets fast approaching the end of their sea-worthiness to transport cargo which is so obviously essential and at the same time so potentially devastating. While the industry reaps the profits offered by tax dodges

and cut-rate crews, the Nation is suffering from the loss of revenue.

The situation has already gone too far and this Nation must assert itself before any more oiled water passes under the bridge. Last month the New York Times reported that—

Increasingly the oil-producing countries are demanding that a greater percentage of the oil must be carried in their own ships. For example, Saudi Arabia, by 1980, will require that 50 percent of its exported oil move in Saudi-Arabian-flag vessels. Venezuela and Algeria have similar 50 percent rules coming into effect.

It is high time the United States make similar demands.

That is why I have introduced legislation to assure that the Secretary of Commerce be empowered to take steps to assure that 20 percent of all oil transported for import to the United States be carried by U.S.-flag ships at this time. This legislation would also insure fair and reasonable participation of U.S.-flag ships in the transport of oil from all geographical areas where oil is produced, refined or both.

The draft of this legislation also sets a date of June 30, 1978 at which time the level of oil imported to the United States by U.S.-flag ships be increased to 25 percent. By June 30, 1980, the percentage should be increased to 30 percent providing the tonnage of privately-owned U.S.-flag commercial vessels, including those on order and scheduled to be ready for commercial service by that date will be adequate to carry that amount.

The advantages of this quota for U.S. oil transport are obvious and great in number. First of all, the economy will receive a boost as the number of ships being built increase with the demands for commercial tonnage and the number of merchant men needed to man these vessels will reduce the ranks of the unemployed. With the reduced use of flags of convenience the revenue from taxes on oil imports will increase.

There is also the issue of safety—not just environmental, but defense in times of military conflict. Construction of all types of ships for the American merchant marine has been allowed to decline from its status as the world's largest since World War II. This legislation would do much to stimulate the construction of merchant marine vessels. Should an international emergency occur, these ships would be ready on a moment's notice to serve America's needs. At present the Defense Department has little command over runaway flag ships which are often American-owned. During the Vietnam airlift some of the foreign flag vessels under U.S. contract refused to transport any U.S. defense cargo in deference to the political views of the country's flag displayed.

Finally, it should be obvious that the type of environmental disasters we have witnessed in the past year will decline with the institution of uniform regulations and increased numbers of new and safer tankers. International safety standards are lower than ours and with the increased numbers of U.S.-flag ships, inadequate requirements will no longer be the norm because we will not have to rely on foreign flotillas.

IMPROVING THE REGULATORY SYSTEM

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for February 23, 1977 into the CONGRESSIONAL RECORD:

IMPROVING THE REGULATORY SYSTEM

One of the reasons for the lack of confidence in government is the rash of new regulatory mechanisms established by the federal government in recent years for pollution control, industrial health and safety, consumer product quality and safety and for other purposes. These regulations have begun to generate a blacklash of resentment against excessive red tape, bureaucratic control and loss of freedom.

People understand that government frequently has to regulate, but they are deeply concerned that when government acts, it often does so in ways that are ineffective and inefficient. To restore confidence in government, we must make government work better. A few facts show that the task of improving the regulatory system will not be easy.

The growth of the federal regulatory system has been striking. In 1976, the total cost of regulation was about $3 billion, with 77 federal agencies engaged in regulating some aspect of private activity. Fifty of these agencies have been created since 1960. By one count there are 100,000 federal employees engaged in regulatory activity. Last year alone the federal government issued 10,245 new regulations, adding to the more than 60,000 pages of regulations already in existence. But the distinguishing mark of today's regulatory system is less its size than its complexity. It encompasses 60,000 sources of water pollution, 100 million automobiles, the health and safety of all the working places in the country, and the structure of all health care systems and federal manpower programs.

Most members of Congress believe that the regulatory system is not working well. It has generated ineffective and inefficient answers to important social problems. Unacceptably high costs of enforcement, extensive time delays and too much rigidity for a complex economy are common problems. Too many decisions about individual economic activity have been transferred from the market place to the government.

Not all regulations are bad, of course, and there is no talk in Washington today of deregulation if by that term one means no regulation whatsoever. The question is how to modernize and reform the regulatory system.

I have come to the conclusion that we just cannot go on imposing regulations and solutions over an ever-widening sphere of economic activity. Although there are no simple answers to the complex problems of regulation, I have come to believe that the Congress is going to have to look for alternative approaches. Among the steps we should take are these:

(1) We have to ask the right questions: Can the free market do the job? Do the benefits of the regulation exceed the cost? How effective can we expect a proposed regulation to be?

(2) We must open up the regulatory process. If a government bureaucrat's power is totally secure then he is not going to be responsive. When his power can be challenged, he becomes responsive. Such a challenge can only be made if the public's business is done in public.

(3) The Congress will have to exercise its oversight responsibilities by enacting "sunset" legislation under which each agency or program will face an automatic termination date unless the Congress or the President specifically approves its continued operation. The Congress should also try to check the tremendous growth of discretionary power within the federal bureaucracy by using its power to veto the results of administrative rulemaking.

(4) We have to reduce the rapid turnover of high level regulatory personnel, require economic impact studies for major regulations, and apply common sense to the enforcement and implementation of regulations.

(5) The most important step we can take to improve the regulatory process is to use economic incentives. The market can work for us if the private sector is given incentives to act for social ends. This can be done with fewer regulations if we think in terms of new strategies. For instance, a set of national effluent and emission charges should be implemented under which taxes would be levied on each unit of air and water polluting substance discharged. Through utilization of such a device we could move toward a cleaner environment by making the reduction of pollution a paying proposition.

In some cases outright regulation is the least costly and the most effective solution. For example, we should prohibit outright the discharge of very toxic chemicals such as kepone. But generally speaking, I think the use of economic incentives to guide decisions is best. Effluent charges for pollution control, incentive contracts in manpower training programs, efficiency oriented medical reimbursement plans and congestion charges at airports all merit consideration.

These proposals are no panacea for the problems of a government that has grown too large, too powerful, too costly, too remote, and too intrusive into the daily lives of the American people. But, they could be helpful.

TRIBUTE TO MRS. MARGARET AMOUREUX

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. STARK. Mr. Speaker, I think my colleagues will agree that a longstanding and devoted public servant is deserving of a pause in our activities for praise of her dedicated service. Mrs. Margaret Amoureux of Oakland, Calif., has more than once demonstrated her worthiness in this regard.

Mrs. Amoureux has been a teacher in the public schools for 30 years. After teaching at Bethune Cookman College in St. Louis, Mo., Margaret has been teaching in Oakland, first at Castlemont High, and now at Merritt Junior College.

Mrs. Amoureux's record outside of her professional career is equally impressive. Her persistent desire to improve and enrich the lives of her fellow citizens has had significant results. Margaret's most recent success has been her diligent and inspired management of Supervisor John George's election campaign last year, in

Oakland. Her repetoire of memberships in political and community organizations includes influential and active groups such as the NAACP, the Oakland Black Caucus, the Executive Board of Black Women Organized for Political Action, and the position of alternate to the Democratic National Convention of 1972.

Californians and members of the Oakland community alike are sure to join me in wondering how Mrs. Amoureux saves time and energy for herself and her family. Montaigne said:

He who does not live some degree for others hardly lives for himself.

Perhaps this doctrine can serve to explain the dedication to public service which Mrs. Amoureux's career has consistently displayed over the years.

TYLERTOWN TIME CAPSULE

HON. THAD COCHRAN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. COCHRAN of Mississippi. Mr. Speaker, on February 11, 1977, a time capsule was buried on the grounds of the new city hall building in Tylertown, Miss. The capsule contained numerous items of local interest and its contents were planned to give inhabitants living in Tylertown in 2076 an idea of what the people, the community, and life in rural Mississippi was like in 1976.

Life in Tylertown and Walthall County is typical of small town life in Mississippi. The area is blessed with a near nonexistent crime rate, a clean environment, a progressive administration, and a citizenry dedicated to preserving the traditional values and freedoms of American life. I am proud to report that they are succeeding.

One of the items included in the capsule is a letter from the editor and publisher of the Tylertown Times, Paul Pittman. Mr. Pittman is one of Mississippi's most distinguished journalists. The letter is addressed to the citizens of 2076 and it speaks for itself as a timeless message of hope, and a belief in our country's future. It is a pleasure to share it with my colleagues:

[From the Tylertown (Miss.) Times, Feb. 17, 1977]

A MESSAGE TO CITIZENS OF 2076

The whole concept of a time capsule like one buried here Friday has an element of egocentric vanity about it. It is based on the speculation that the inhabitants of Tylertown in the year 2076 will find the capsule, will bother to open it and will be interested enough to examine the contents.

That conceded, the editor of The Tylertown Times included the following letter, published here, for the interest of those who keep scrapbooks, or whose imagination might be stimulated by the thought:

FEBRUARY 11, 1977.

To the Citizens of the 21st Century—Year 2076 A.D.:

We hope that you will find the contents of this time capsule interesting. Those of us who gathered the materials in it indulged in moments of fascinating speculation about what you would be like and what you might think of these relics of the past.

One of my associates, reflecting on today's shortages of energy, the predictions of a new era of abnormally cold weather and the complications of our presently expanding technology, suggested that the human race by the year 2076 may find itself regressing—unable to cope with the problems of the environment in which it finds itself.

I choose to believe otherwise. I must believe that man's spirit and courage and adaptability will, if not for the short term, at least in the long term, prevail over the circumstances.

With that in mind, I send greetings from the past. May you, today, reflect on your heritage. I assure you that there were citizens standing on this spot on Febraury 11, 1977, when this capsule was buried, who cherished the virtues of good will, humility of spirit, concern for their neighbors and a respect for the Almighty. I know them well. They join with me in saying to you: God bless you and keep you.

Sincerely,

PAUL PITTMAN.

JFK STRIKES AGAIN

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. SYMMS. Mr. Speaker, today's editorial in the Wall Street Journal deserves the attention of every Member of this House, as well as the much deserved praise for our colleague from Buffalo—J. F. K.—KEMP that is:

JFK STRIKES AGAIN

Rep. Jack F. Kemp, the Buffalo Republican, has for four years advocated permanent tax cuts to expand the economy but has never been able to sell the House Republican leadership or the Ford White House. Now that he has a Democrat in the White House to push against, Mr. Kemp is making headway. President Carter may soon be lucky enough to get pushed over.

Two weeks ago Republicans on the House Budget Committee unanimously signed on the Kemp idea as an alternative to Jimmy Carter's program of rebates and public works. These committee Republicans are now advocating that each income tax bracket be lowered 15%—approximately from 70% to 60% at the top and from 14% to 12% at the bottom. This would roughly adjust for the inflation of the last two years, which has pushed everyone into higher brackets.

With the support of the House GOP leadership, the Budget Committee minority plans to stage a vote on this alternative when the House Budget resolution comes up today. To accommodate the Carter economic program, the planned deficit has to be raised to $70.3 billion from the $50.6 billion already approved. Mr. Kemp will argue that his plan would be more successful in stimulating the economy and thus government revenues, and that therefore a lower deficit ceiling would be needed. In reality, the vote will simply give House members a non-binding way to express their preference between rebates and job programs on one hand and permanent tax reduction on the other.

While we don't expect the GOP to be successful in this vote, it would certainly be doing the President a big favor if it were. Instead of scattering money over the landscape, which is the essence of the Carter program, the Republican alternative would increases incentives to production. In inviting an increase in the supply of goods produced, the lower rates will expand employment and real incomes without requiring monetary manipulations by the Federal Reserve. It is vastly superior not only to the Carter plan but to the gimmicky jobs program advanced by Senate Republicans in their attempts to imitate Democrats.

The President, of course, has been assured that his program will stimulate just as well as permanent tax cuts, though of course the Fed has to "accommodate" it by gunning the money supply. By our reckoning, though, if the Fed does gun the money supply all the economy will get is more inflation, which pushes up everyone's taxes. And if the Fed doesn't do so, the Carter program will create no new jobs and the money for the most part will go down the drain.

Why don't the House Democrats support the GOP alternative? Jack F. Kemp, who is sometimes caricatured as a right-wing football player, unabashedly gives credit for his idea to John F. Kennedy. In 1962–63 Mr. Kennedy argued that the way to get the country moving again was not through higher spending but through lower tax rates. His tax cut reduced each bracket roughly 25%—from 91% to 70% at the top and 20% to 14% at the bottom. At the time House Republicans voted 3-to-1 against this step, and were squashed in the 1964 elections as the JFK tax cuts proved a smashing economic success.

It is not only baffling, but almost comical, that Mr. Carter rejects this Democratic precedent while embracing the tax rebate scheme adopted by Gerald R. Ford in 1975, with ill effects on the economy and his own re-election bid. Happily for the nation, some House Democrats are beginning to scratch their heads in wonder too. Rep. Andrew Jacobs of Indiana and five other Democrats last week ridiculed and voted against Mr. Carter's rebate scheme, which survived the Ways and Means Committee by a vote of only 20–17. Meanwhile, Democrats are seething at Mr. Carter's slashing of dams and water projects while proposing a jobs program for more leaf-rakers.

So when the House votes on the permanent tax cut, Democrats can easily support it knowing the real credit is due their JFK. Republicans can do the same. And if the Republican program should pass, everyone could breathe easier about the outlook for the economy.

PARDON FOR DRAFT VIOLATORS TOO BROAD

HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. GRASSLEY. Mr. Speaker, in his first day of office, President Jimmy Carter pardoned practically all Vietnam war draft-law violators. Mr. Carter, in keeping with a campaign pledge, granted a full, complete, and unconditional pardon to almost everyone convicted of breaking the Selective Service Act during the war. The amnesty covers an estimated 13,000 mostly white, middle-class men who had the education, money, and counseling to avoid the draft and another 250,000 men who never registered. However, it excluded nearly 100,000 men who deserted the Armed Forces.

Although some groups have attacked the amnesty plan because it did not include deserters, I agree with those who

say the program is too broad. The vast majority of you who have written me in the last week have said the same thing.

Mr. Carter's sweeping pardon has no precedent in American history. Neither the post Civil War nor the post World War II pardons were as inclusive as the Carter program.

Senator BARRY GOLDWATER was correct when he warned that Mr. Carter's program "will utterly destroy the effectiveness of any draft should we feel the need to go back to a selective service." That is the sentiment of most veterans' groups as well. After all, if in the future we face some grave military crisis and every young man has the choice of obeying or flouting the draft law, believing he can escape scot free, our national security will be jeopardized.

The director of the ethics and public policy program at Georgetown University said:

If no penalty—not even compensatory civilian service—were meted out to draft violators, would this not encourage self-indulgence, cowardice, and disrespect for the very disciplines of freedom which are under siege around the world?

In 1974, President Ford granted amnesty to draft evaders who agreed to perform some form of alternative service. Almost 13,000 men took advantage of that program. Close to half of them were granted outright pardons.

President Carter, however, would without questioning their motives for evading the draft, grant clemency to everyone. The refusal of some young men to answer their country's call to duty in Vietnam certainly can be justified on religious and moral grounds. Conscientious objectors to all wars were given the option of alternate civilian service during the Vietnam era, and 35,000 draftees chose that option. Another 30,000 more, at their request, received noncombatant military service in the medical corps.

Those draftees who opposed only the Vietnam war and, therefore, could not qualify for alternative service could serve a prison term instead of fighting.

Still thousands of young men fled the country or refused to register for the draft. Instead of granting them a blanket pardon, as Mr. Carter did, I believe we should onsider clemency on a case-by-case basis.

Throughout our history, U.S. Presidents have granted clemency almost exclusively case by case. In fact, about the only time this was not the case was after the Civil War, when President Andrew Johnson granted a blanket pardon not to Union soldiers but to Confederate soldiers to try to unite the country.

By granting clemency to the thousands of young men who fled the Vietnam war with no questions asked, President Carter will only encourage young people to escape, rather than work through the system, in the future. He is also demeaning those who served in Vietnam, whether or not they thought the war was right, and those who gave their lives for our country there. One young man who served two tours of duty in Vietnam told the American people last week:

I think Carter sold out every American vet living and dead. If I had known this would happen, I would have gone to Canada to hang out.

Instead of healing this Nation, Mr. Carter's amnesty program has only opened up new wounds. I hope he will reconsider his plan before it is too late.

MANDATORY SENTENCING BILL SUPPORT GROWING

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. ANDERSON of California. Mr. Speaker, the support for our legislation to provide a minimum mandatory prison sentence of 5 years for anyone convicted of misusing a firearm by committing a Federal crime is growing with each day.

Citizens from across the country are calling my office and voicing their support for this sensible bill that does a very sensible thing—punish anyone who misuses a gun. National organizations are offering their support, and additional Members of this Congress are continuing to add their names to the growing list of cosponsors. I might add, Mr. Speaker, that this list now numbers over 100.

I ask consent to include with my remarks several letters that I have received in support of this legislation. In addition, I urge any Member who has as yet not cosigned this bill, to do so. It is about time to recognize our responsibility to address this problem with firm action and decisive steps.

Mr. Speaker, the letters follow:

WILMINGTON, CALIF.,
February 3, 1977.

Re: H.R. 1559

DEAR CONGRESSMAN GLENN:, Your comments on the minimum mandatory prison sentence bill and the reading of said bill (which you sent to me 26 January) contents, leaves me with the feeling that you, like myself, are greatly concerned with the coddling of convicted slayers who use a gun in the commission of a crime. It is high time that we reverse the trend that has been prevelant these many years of bleeding for the criminal and just plain ignoring the feelings of the victims and their families.

I do thank you most heartily for forwarding to my attention the bill described and most assuredly congratulate and support you in this important item.

I hope you continue in good health and may God Bless.

Respectfully,

B.J. CANNISTRACI.

So. WALNUT ST.,
Lomita, Calif.

Hon. GLENN M. ANDERSON,
Longworth Bldg.,
Washington, D.C.

DEAR SIR: I see by today's "Daily Breeze", (Page D 3) that you have introduced legislation calling for mandatory prison terms of at least five years for any one convicted of committing a federal crime with a fire arm.

If The "Breeze" is correct, let me be among the first to offer my thanks to you for your untiring efforts in behalf of all the decent law-abiding citizens in our great nation. I do hope you will be successful in your endeavors. I'll be watching with a great deal of interest as this is very important legislation.

It is the only answer to those who would deprive us of our right to keep and bear arms as guaranteed to us by our constitution. They will surely try again this session to sneak some form of anti-gun legislation through the hallowed halls of congress. I hope you will be watching as I will. They must be stopped at all costs. Again I thank you and with best wishes I remain;

Respectfully,

Mr. D. "L". HARRIS.

CONTRA COSTA COUNTY,
Martinez, Calif., January 24, 1977.

Hon. GLENN M. ANDERSON,
The House of Representatives, House Office Building, Washington, D.C.

DEAR MR. ANDERSON: I certainly endorse your bill H.R. 1559 concerning additional penalties for the use and/or possession of firearms during the commission of crimes.

It requires some premeditation when a criminal arms himself with a firearm. It also implies a willingness to use the firearm if necessary.

It is my opinion that the certainty of a long prison sentence will be a significant deterrent against using firearms. Best wishes.

Very truly yours,

HARRY D. RAMSAY, *Sheriff-Coroner.*

CALIFORNIA RIFLE AND PISTOL ASSOCIATION, INC.,
Garden Grove, Calif., February 14, 1977.

Hon. GLENN M. ANDERSON,
House Office Building,
Washington, D.C.

DEAR CONGRESSMAN ANDERSON: Thank you for your letter of January 25, 1977 in which you enclosed a copy of your HR-1559.

We are in complete support of the mandatory penalty concept for the use of firearms in the commission of a violent crime. I suggest you consider an amendment to your bill which will subject an accomplice to the same punishment as the criminal who had in his possession or used a gun during the commission of the crime.

You may be aware that the California Supreme Court recently held that because of the language of California's mandatory penalty law an accomplice not using or having a gun in his possession during the commission of the crime could not be subject to the mandatory additional penalty. Legislation has been introduced to correct the flaw and I suggest you amend your bill to take care of this problem before some federal judge finds the same flaw in your bill, should it become law.

You may quote us as supporting your HR-1559.

Sincerely,

JAMES R. SEABERRY,
President.

SHERIFF'S DEPARTMENT,
Colusa, Calif., January 21, 1977.

Hon. GLENN M. ANDERSON,
House of Representatives, House Office Building, Washington, D.C.

DEAR SIR: I want to take this opportunity to commend you in your efforts to control the use of firearms during the commission of crimes. I feel that Bill H.R. 1559 will be a deterrent.

During the past few years all crimes have increased throughout the United States. I feel the Courts are somewhat responsible for this because of recent Court decisions and minimal penalties handed down to convicted criminals. More mandatory penalty laws should be enacted.

I support Bill #H.R. 1559 and urge its enactment.

Yours very truly,

JOHN J. TROUGHTON, Jr.,
Sheriff.

SHERIFF'S DEPARTMENT,
Bakersfield, Calif., January 17, 1977.

Hon. GLENN M. ANDERSON,
Member of Congress, House Office Building, Washington, D.C.

DEAR CONGRESSMAN ANDERSON: Your proposal of mandatory penalties under H.R. 1559 has my unqualified support. Until such time that the criminal element in this country is made aware of the definite period of confinement for each violation committed, we will continue to see an unacceptable increase in crime.

This type of legislation is a step in the right direction.

Sincerely,

AL LOUSTALOT,
Sheriff.

BUFFALO RESCUE

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. JACOBS. Mr. Speaker, despite all of the implications of our late and lamented Great Dane, at the request of Alice Widener, I insert the following article which appeared in the Indianapolis Star on February 9, 1977:

[From the Indianapolis Star, Feb. 9, 1977]

BUFFALO RESCUE—STAR GIVES GREAT PERFORMANCE

(By Alice Widener)

What can fly through the sky with the greatest of ease and rescue a snow and ice bound city of half a million population by delivering a total of 2,000,000 pounds of heavy equipment and a battalion of the Army engineering corps? Answer: the United States Air Force C–5 built by Lockheed—the one that several members of Congress and other backward-ho advocates tried not only to ground but also to knock off the assembly line in the 1960s.

Today, the entire population of the city of Buffalo is indebted to the C–5 for a massive delivery of immensely heavy snow removal equipment such as four snow blowers weighing 18,000 pounds each and five scoop loaders weighing 268,000 pounds so that lifesaving paths could be cleared for delivery of medicines, medical attention, food, fuel and other vital necessities.

On Feb. 2, a Lockheed-built Air Force C–5 took off from JFK International Airport in New York and one hour later landed at Buffalo, lowered its ramp and disgorged four snow blowers and 20 operators on the run. The equipment was furnished by New York City and the press is full of wonderful tales about the N.Y. Snow Commandos winning the deep winter Battle of Buflalo.

What the press also should be full of, in my judgment, is highest praise for the U.S. Air Force and Lockheed Aircraft for winning the battle of the C–5 a few years ago in the face of bitterest possible opposition by members of Congress and by the anti-military cabal in our nation.

It was a very hard, nasty fight! I know because two of us in the press—Robert M. Bleiberg, editor, Barron's National Business & Financial Weekly, and yours truly—got into the fight on what was then the unpopular side, the Air Force-Lockheed side—but eventually became the winning, life-saving side.

On Aug. 17, 1970, Barron's declared that some senators' "escalated war" on Lockheed was "indefensible" and reminded Americans, "During the past half-century, Lockheed Aircraft corporation time and again has made aviation and aerospace history . . . Survival of Lockheed as a going concern is clearly vital to the national security."

On Oct. 24, 1970, after a personal trip to Lockheed at Dobbins Air Force Base, Marietta, Georgia, I wrote, "Like every great performer, the C–5 has had her ups and downs. Up there (in the sky), she's a real bird . . . The difference between the marvelous new C–5 Galaxy Air Freighter and the small Air Force transport in which I flew to West Berlin, shortly after the airlift that kept it free, is as great as the difference between the old S.S. Olympia that crossed the Atlantic in 12 days and the S.S. Queen Elizabeth . . . For peace and defense, we need the biggest, best and most capacious air freighters that our industrialists, engineers, mechanics and designers know how to build. Folks, if you could see the C–5 soar up and away into the sky as I did, you'd say she's a real star."

What a star she is today!

Everybody knows that the C–5 saved Israel in the Yom Kippur War.

Now everybody ought to know that the C–5 (plus some C–130s and C–141s) saved half a million Americans in the city of Buffalo during our peacetime weather crisis, a natural catastrophe of the kind that can strike any part of our nation for any reason.

The lesson of the C–5 rescue of Buffalo which took place on the very day President Jimmy Carter made his first fireside chat to the American people, illustrates in remarkable fashion the wisdom of the President's statement, "Our nation was built on the principle of work and not welfare—productivity and not stagnation."

Today, far too many vocal zealots are opposing the kind of brilliant, progressive productivity in our nation that can solve our energy crisis and make our peace-defense military establishment the best in the world. Nothing better illustrates the marvelous linkage of peace-defense equipment than the C–5 Air Force transport plane. Best in defense is best for peace. All Americans can be and should be star performers.

THE ENERGY PROBLEMS AS SEEN BY DR. SCHLESINGER AND THE YEAR AHEAD

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. MURTHA. Mr. Speaker, no issue facing Congress will continue to preplex the Nation as much as the energy problem. Unable to be solved by a "quick fix," single bill, or generally agreed-to plan, the debate promises to be intricate and hotly contested.

And well it should be. For in the energy policies we set in the months ahead will rest the economic development of the United States for the remainder of this century.

I am not among those, Mr. Speaker, who feel the years since the Arab oil embargo have been wasted in the energy field. Public information on the issue has increased greatly, 55 energy laws have been passed by Congress, giving us a base to build upon, and, most important, a general philosophy of approach has formed.

I was impressed by a speech given by Presidential Energy Advisor James R. Schlesinger in June 1972. At that time he predicted our energy problems and suggested what should be done to solve them.

This discussion by Dr. Schlesinger 5 years ago began by noting:

As a nation we have begun to recognize that we have reached a condition in energy affairs in which abundance and flexibility are passing and shortages and stringency of supply are believable. This is basic to the widespread interest in formulating an energy policy, but we are far from a consensus on the nature of the proper policy or even on what features to include in a program of action. It will be difficult to develop or to implement an all-inclusive energy policy. But defining the problems and informing the public are necessary, first steps toward solution of the broader problem.

As I noted, in the time since that speech I believe we have made significant progress in Dr. Schlesinger's goals of informing the public.

In his speech, Dr. Schlesinger highlighted what many of the key points of the overall energy philosophy have become. He began by talking about restructuring the energy approach:

The solution may lie in the building of greater flexibility and diversity into the supply situation rather than trying to find ways better to manage a touch-and-go situation. In the short-term this might mean measures to augment stocks, standby capacity, and ready reserves . . . It might require special incentives, taxes, regulation, and controls to assure that suppliers or consumers will implement the desired changes or pay for them.

Coupled with those changes is a second key element of that philosophy—insuring results.

If we limit the import options and change the pricing of domestic gas, there must be assurance that additional domestic fuel supplies will be forthcoming and the cost must be fairly predictable. The assumption that any cost is acceptable and the consumer will readily pay is an illusion that may be quickly dispelled.

And Dr. Schlesinger went on to indicate that a third element of the philosophy must include long-range outlooks built upon new approaches:

I would like to see the Nation expand its energy options, not restrict them. This means diversification of our energy R. & D. efforts and encouragement of work on all the promising technologies that can contribute toward an optimal energy economy.

Next, Dr. Schlesinger outlined the fact that the problem goes well beyond energy into areas that affect supply and demand by using coal as an example:

Although gasification and liquefaction of coal are high priority programs for industry, they should in no way detract from the long list of research programs to improve mining, cleaning, transportation, and use of coal.

I also agree with Dr. Schlesinger's early assessment of the need for a full role for coal in the energy picture:

In my judgment coal must maintain an important place in the energy economy of the future. The magnitude of the problem with which we are all struggling requires the maximum contribution from each of our fuel industries. Unless we are oblivious to the serious implications of the growing dependence on fuel imports . . . we shall want to develop our domestic resources as fully as practical.

Finally, Dr. Schlesinger cited a concern of many citizens in our Nation, and came to a conclusion I endorse:

> This society should be able to attain its goals for environmental improvement without sacrificing historical economic gains or rejecting important social values.

The key for the year ahead is to move from this general philosophical concept to policy specifics. As I indicated earlier, that will require some give-and-take and involve some difficult votes by every Member of Congress. I would not pretend to have all the answers, but I would like to sight some principles and basics I believe belong in such a policy approach.

First. Conservation—There is no doubt we all share a burden for remaining wasteful in our energy use. As President Carter said recently:

> The amount of energy being wasted which could be saved is greater than the total energy that we are importing from foreign countries.

Second. Independent audits—I also support President Carter's move for an independent audit of energy supplies. Last year I suggested the U.S. Geological Survey be assigned this task on a regular basis. I would stress the independent audit needs to be ongoing.

Third. Incentives—The Government must provide incentives to expedite the energy priorities. Last session and this I have supported legislation to provide tax credits for home energy improvements. Soon I will be introducing legislation to improve the tax picture for industries to adopt pollution control devices and to switch to alternate energy sources.

Fourth. Uncertainty—The final point is that Congress must remove the uncertainty that develops our Nation's policy around every energy source. We cannot expect citizens, companies, and research facilities to operate in an unknown climate. Toward that end, just as President Carter is setting a deadline for submission of his energy package, I would hope Congress would set a deadline for ourselves of dealing with all phases of the energy crisis and insuring a coordinated policy.

As President Carter said in his remarks to the Nation on energy,

> We must face the fact that the energy shortage is permanent. There is no way we can solve it quickly.

With the efforts of all parts of our society, however, I am confident we can move toward the solutions over the months ahead.

TUG AND THE NEW WORLD LIBERATION FRONT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. McDONALD. Mr. Speaker, from the frequency and number of its bombings, the New World Liberation Front—NWLF—is the most active revolutionary terrorist group in this country.

The NWLF was formed in the summer of 1974 by the fugitive members of the Symbionese Liberation Army—SLA—William and Emily Harris and Patricia Campbell Hearst—shortly after the May 17 Los Angeles shootout in which six SLA terrorists were killed. The SLA fugitives fled back to San Francisco and enlisted the support of the Bay Area Research Collective—BARC—an openly pro-SLA support group organized by Kathleen Ann Soliah, a friend of the SLA's dead Angela Atwood, and by persons associated with the fringes of the terrorist underground in Berkeley.

In a cassette tape recorded message from the three SLA survivors which was delivered by a contact to Pacifica radio station KPFK in Los Angeles, William Harris said:

> We have come together in many different cells, * * * . We have taken many different meaningless names. But we are not hung up on names, for, as comrades-in-arms, we are one in our struggle for freedom. * * * let it be known that the Malcolm X Combat Unit of the Symbionese Liberation Army [the Harrises and Hearst] proudly takes up the banner of the New World Liberation Front.

The NWLF's terrorist career commenced with a pipe bomb—which did not explode—placed at the Burlingame, Calif., GMAC offices on August 6, 1974. The SLA's BARC "second team" included Kathleen Soliah; her boyfriend, James Kilgore; her younger brother and sister, Steve and Josephine Soliah; Bonnie Jean Wilder; Michael Bortin and his girlfriend, Maoist activist Pat Jean McCarthy. Members of the "second team" began their bombings while the Harrises and Hearst were still being hidden by radical sports analyst and critic Jack Scott.

The SLA's "second team" had previously been involved in revolutionary organizations and terrorist actions. On March 30, 1972, Berkeley police discovered bombs, explosives, chemicals and a Soviet AK–47, a fully automatic assault rifle, in a Berkeley garage.

Three men were arrested in a police stakeout. They were William Brandt, with whom Wendy Yoshimura who had rented the garage under the alias Anne Wong was living; Michael Bortin, a 1969 Berkeley SDS officer who was working with Steve Soliah as a house painter; and an SDS Weatherman from Lawrence, Kansas, named Paul Rubenstein. Rubenstein at the time of his arrest was living in a commune with Jim Kilgore, Steve Soliah, Soliah's girlfriend Emily Toback, Kathy Soliah, and Bortin's girlfriend, Pat Jean McCarthy, active in Venceremos and Bay Area Maoist circles.

Bortin and Rubenstein were sentenced to a year in the county jail, but William Brandt received a 1- to 15-year State prison sentence. Radical sports critic Jack Scott and his common law wife Micki McGee were friends of Jim Kilgore and Kathy Soliah. After the arrest of the revolutionary army band, Micki McGee Scott "cleaned out" the Brandt/Yoshumura apartment while Jack Scott drove the fugitive Yoshimura first to Los Angeles and then arranged for her to be taken by the "underground" to the east coast.

From that time, Jack Scott, Micki Scott, Kathy Soliah, Jim Kilgore, Pat Jean McCarthy, and Jay Weiner were all frequent visitors to the imprisoned Willie Brandt, whose attempts for parole have been repeatedly denied.

A newly published book, "The Voices of Guns," by Vin McLellan and Paul Avery [G. P. Putnam: $14.95] has placed in the public domain a great deal of previously unpublished detail gathered from persons who knew the various SLA members, from the court transcripts of several SLA trials, and apparently from FBI 302 forms completed during extensive post-conviction interviews with Patricia Hearst. Comparison of the McLellan and Avery book with other material has provided considerable information on the underground of radical activists and New Left attorneys who helped hide the terrorist fugitives, carried messages between prisoners and the SLA, helped plan jailbreaks, and gave them money.

Of the nine NWLF bombing units which had appeared by 1976, only one was not a direct NWLF operation. The NWLF, in its various communiques had stated that the only criterion for becoming a member of the organization was going out and committing bombings or other acts of armed struggle. An applicant organization soon appeared—the Emiliano Zapata unit.

The Zapata Unit also worked in close association with an "above ground" support unit, the New Dawn Party, and published a proarmed struggle newspaper, the People United. Several Zapata Unit/New Dawn Party members were arrested late in 1975 in a Richmond, Calif. "safehouse." Daniel Gregg Adornetto pleaded guilty to possession of explosives charges and received the maximum 10-year sentence. However, Adornetto cooperated with law enforcement and provided information that a Cuban Communist saboteur was among the Zapata Unit members who avoided being arrested. This demonstrated that although the New Dawn Party professed a Maoist ideology, they had received Cuban Communist support. It has also been widely reported that evidence was obtained showing that Weather Underground fugitive Jeff Jones had been in the Zapata Unit house.

On August 9, 1976, four Zapata Unit/New Dawn Party members pleaded guilty to lesser charges of illegal possession and storage of explosive materials. Janice Orson received a 1½-year sentence; Ellen Kesend a 2½-year sentence; Steven Scipes, 5 years; and Frederick Salkind, the son of Isadore and Eleanor Salkind who in the 1940's ran the Thomas Jefferson bookstore for the Communist Party, U.S.A. in Washington, D.C., also received a 5-year sentence. Others involved with the Zapata Unit included Larry Kissinger and Steven Queener from whose father's business in Idaho the explosives were obtained for Zapata Unit bombs.

Another NWLF unit has appeared in New England—the Sam Melville/Jonathan Jackson Unit. To avoid confusion, the NWLF west coast Jonathan Jackson/Sam Melville Unit announced in Jan-

uary that it had changed its name to the Eugene Kuhn Brigade, after an elderly man who froze to death in his unheated house recently. The New England Melville/Jackson Unit has taken credit for several bombings during the spring and summer of 1976 and is charged with the attempted kidnaping of the president of the Polaroid Corp. Several accused members of the terrorist organization are now awaiting trial in Massachusetts.

At the present time a number of BARC/SLA/NWLF personalities are fugitives. They include Kathleen Ann Soliah; Josephine Soliah; Bonnie Jean Wilder who was in the process of joining the police department when the capture of the Harrises, Yoshimura, and Hearst revealed her belongings in the fugitives' apartments; and James Kilgore. Steve Soliah was acquitted of participating in an SLA bank robbery in Carmichael, Calif., in which a woman was shot to death, reportedly by Kathleen Soliah, after Soliah's long-term girlfriend provided him with an alibi. Only after Soliah's case had gone to the jury was it discovered that Emily Toback had lied. At the time of the bank robbery she and Soliah were not in her apartment: she was at Folsom prison visiting an inmate. Steve Soliah and Michael Bortin have denied committing criminal acts. However, it appears that Bortin has since gone underground; he failed to appear for a recent court hearing.

The NWLF has specialized in terrorist extortion campaigns directed against bay area businessmen and public officials. It has also joined the ranks of transnational terrorism. The NWLF's predecessor, the Revolutionary Army, had bombed the Iranian consulate in San Francisco during its short career. On July 1, 1976, and again on September 10, 1976, the NWLF detonated powerful plastic explosives bombs at the home of the South African consul-general in San Francisco. The fact that the terrorists attacked the consul's home, rather than his offices, and at night when he and his family were asleep, clearly shows an attempted murder. Late in 1975, the NWLF targeted San Francisco public officials—the county supervisors—for terrorist extortion.

On January 11, 1976, bombs were discovered inside candy boxes mailed to Supervisors Quentin Kopp and John Barbagelata. When Supervisor Kopp's secretary opened the candy box, a piece of cellophane fell between the circuit contacts, preventing the bomb from exploding. The other supervisors were immediately contacted by police. At the time of their call, Supervisor Barbagelata's children were coming back to the house from the post tossing the candy box bomb casually in the air. Only providence kept it from exploding in their hands.

NWLF bombings continued throughout the year. On December 14, 1976, the daughter of Supervisor Diane Feinstein found a massive pipe bomb filled with plastic explosive in a windowbox at the family home. The blasting cap had misfired. Had it exploded as intended, the house and most likely its occupants would have been destroyed.

With its true SLA leadership in jail or underground, the Bay Area Research Collective, P.O. Box 4344, Berkeley, Calif. 94704, is in a state of collapse. As its principal overt support of terrorism project, BARC had published 10 issues of "Dragon," a newsletter containing communiques, internal criticism by terrorist revolutionaries, and bomb and fuse-making instructions. BARC intended "Dragon' to provide "a dialog to alleviate the isolation of the underground."

Now after intensive investigation by law enforcement agencies, financial problems and the disappearance of its leadership, BARC wants a lower profile. In a letter circulated to its subscribers and supporters in January, BARC said they "need time to sit back and evaluate our successes and failures, digest the changes we have gone through and discuss new directions for our work as aboveground revolutionaries."

BARC continued:

> We have observed that no matter how hard we try to keep things in perspective, we are misleading people—not only people supporting guerrilla struggle, but those actively engaged in it. The revolutionary movement in this country is not large. Those who support armed struggle comprise just a small segment of the larger movement. Too often we have seen the comrades conclude, after reading Dragon, that there is either a large clandestine network deeply rooted in the masses or that one is just around the corner. We have never, nor do we now think that such is the case.

Although BARC hopes to remain in existence as a collective "at least for the time being," it says "for us to continue to go through the motions of publishing "Dragon" without political direction—or enthusiasm would be nothing more than pseudo-revolutionary busy work."

Analysis indicates that BARC is suffering from the effects of the split in the Weather Underground Organization. A hard core, the Revolutionary Committee, wants to continue the WUO's tradition of terrorist bombings. Another group of WUO regulars wants to surface and lead the American left in formation of a new vanguard Marxist-Leninist party. BARC's ties to the now disintegrated aboveground WUO organization, the Prairie Fire Organizing Committee—PFOC—seem broken. And BARC/PFOC activist Jeff Sokolow is now concentrating on writing for the Bay Area office of the "Guardian," an independent Maxist-Leninist weekly which supports the Cuban, Vietnamese and Red Chinese varieties of Marxism-Leninism.

NWLF AND TUG

Although BARC is in a state of collapse, the New World Liberation Front has a second support group operating in the San Francisco Bay area—the Peoples Information Relay-1—PIR-1. PIR-1 publishes another proterrorist journal, "The Urban Guerrilla—TUG—and operates a terrorist press service, the PIR-1 News Service—PNS—which for a small monthly fee will deliver fresh terrorist communiques to Bay Area media subscribers and phone them collect or mail them to more distant PNS subscribers.

TUG was hailed by the Bay Area Research Collective as "a new publication put out by the People's Information Relay I. Its primary objective is to relay information for the New World Liberation Front."

The principal figures in PIR-1, TUG and PNS are a 38-year-old ex-convict named Jack Rodgers, now using the name Jacques Rogiers; and his 25-year-old companion, Andre Marie Lougher. Rogiers and Lougher have repeatedly boasted to the press of their role as "NWLF couriers" in collecting NWLF communiques and redistributing them to the media on behalf of their underground comrades.

Rodgers served 5 years in the California correctional system for narcotics possession and was discharged from parole in 1974. In February 1976, Rodgers was arrested and charged with failing to appear before a grand jury; however contempt charges were later dropped. In October 1976, Andre Lougher was acquitted of charges of attempting to intimidate a Federal grand jury investigating NWLF terrorism.

On January 23, 1977, Rodgers was arrested at his house at 423 Oak Street, San Francisco, Calif. 94102 [415/864-6953] which adjoins the TUG print shop and the PIR-1 office which has its own press and photographic set up. A 6-hour search by police resulted in the removal of two truck-loads of paper and other evidence.

TUG No. 4 was distributed after Rodgers' arrest by other PIR-1 members. This latest issue of NWLF communiques reinforces the position of the group as transnational terrorists, with statements of support for the Palestine Liberation Organization—PLO—and threats against the "Jewish-American ruling class." Transnational terrorism is defined as terrorist actions carried out by local terrorists in one country in support of terrorists in a different country.

The New England Sam Melville/Jonathan Jackson Unit, in a communique taking credit for the attempted bombing of the Union Carbide offices in Needham, Mass., stated:

> Our task in the belly of the beast must be to provide principled armed support to oppressed people who are struggling for liberation. We must attack the enemy from within. A thousand times we must attack the enemy for it is strong * * * and vulnerable * * *. We're involved in a War—A people's war against those who oppress the people. This is war in the clearest sense of the word.

The NWLF responded to Rodgers' arrest with new threats and bombings. The NWLF statement after the arrest said,

> Your recent action against our courier, Jacques Rogiers, has left us with no choice but to escalate our tactics.

The NWLF stated that "death warrants" would be issued for Supervisors Kopp, Feinstein and Barbagelata; for San Francisco County Jail medical personnel Robert Mendel and Barry Kramer; and for Assistant U.S. Attorney Raymond Bietz who unsuccessfully prosecuted Andre Lougher, unless the NWLF's demands were met.

The NWLF communique set January 27 as their deadline. On the night of January 27, the NWLF struck, but not at the named targets. Five bombs were

placed in a PG&E substation alongside transformers and exploded. An estimated $250,000 damage resulted.

On February 4, 1977, the NWLF detonated a pipe bomb placed under the car of San Francisco District Attorney Joseph Freitas. The car was parked outside his home. An hour earlier, another bomb had exploded in the Federal Immigration Building, but did little damage.

A woman caller told Associated Press that the Freitas bomb had been placed by the Lucio Cabanes Unit of the NWLF. A later typed message directed to a TV station said the bombs were in retaliation for the arrest of Rodgers "our courier."

Rodgers—and previously Ande Lougher—are represented by National Lawyers Guild activist J. Tony Serra, who at a press conference on February 10 with Rodgers said,

It is inferable that the group will stage more armed acts because officials have not met its demands.

Serra continued "infering" that "between now and March 21—Rodgers' trial date—more bombings will be claimed."

Rodgers then claimed that there was nothing illegal about being a member of and courier for a terrorist group, and asserted he was charged not for acts of extortion but for exercising his first amendment rights as a newsman and publisher to gather and disseminate news. Despite the recent documentation that Rodgers had advance knowledge of NWLF bombings, he asserted his only role with the terrorists was to "contribute information to the media."

Statements made by ACLU of Northern California Executive Director Fishlow indicate that the ACLU is supporting Rodgers' claim to first amendment immunity.

Other members of the TUG/PIR–1/PNS collective include Cynthia Cole, Kit Bowden, and Marlene Tobias. They say Ande Lougher is "out of town" and unavailable for comment.

Murderous terrorists like the NWLF, SLA and Weather Underground can only be effectively combatted by thorough investigations by Federal and local law enforcement of subversive groups and their sympathizing networks. The draft legislation prepared by the ACLU, Center for National Security Studies, and Committee for Public Justice would preclude investigation of these groups. I urge my colleagues to reject such efforts.

CAP SAVES 34 LIVES IN 1976

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. WOLFF. Mr. Speaker, it is with great pride and pleasure that I bring to the attention of my colleagues the many successful rescue missions accomplished by the Civil Air Patrol during 1976.

I am proud to serve as a member of the Congressional Squadron of the CAP, and congratulate my fellow CAP units on their brilliant performance during the last year. We owe a great deal to these flyers who, through their brave and dedicated efforts, have assisted rescue missions throughout the country, saving many lives.

CAP SAVES 34 LIVES IN 1976

Following are brief descriptions of the rescue missions in which Civil Air Patrol was credited with saving a life during 1976.

While most people throughout the nation were celebrating the arrival of the new year in January 1976, members of the Wyoming Wing were busy assisting persons stranded in a winter blizzard. Wyoming members used four-wheel drive vehicles and worked transporting stranded individuals to safety. Fifty-seven persons were assisted during the two days, and CAP was credited with saving the lives of two of the people caught in the blizzard.

The Florida Wing was credited on Jan. 9 with saving the lives of a couple missing overnight in a boat. Fifteen minutes after taking off to assist in searching for the two people, the CAP aircraft spotted the boat aground on a shallow bank. The sheriff's department was called to the scene and rescued the couple.

TWO SAVED

A ground search team from the New York Wing saved the lives of two people who crashed Jan. 16 in a light aircraft near Westchester, N.Y. CAP searchers were called into action after a CAP pilot who was making an approach landing to the airport picked up a signal from the crashed aircraft's emergency locater transmitter (ELT).

An intensive six-day search in Alaska for a missing light aircraft was concluded successfully on Jan. 22 with the recovery of the pilot and his passenger. The missing plane was located in a remote area in Merrial Pass northwest of Anchorage. Two saves were credited to the Anchorage CAP unit due to the remoteness of the area, cold winter temperatures and the improbability of recovery without assistance.

SAVE IN WASHINGTON

Fast action by two members of the Washington Wing Jan. 29 proved to be instrumental in saving the life of a man who was in critical condition after inhaling cyanide gas. The CAP members transported some cyanide antitoxin from Spokane to Yakima, Wash., to save the man's life.

Two young Oregon hikers were saved Feb. 2 by a ground search team. The team located the missing hikers on the 500-foot level of Mt. Hood and turned them over to their parents.

A missing light aircraft was spotted by the Texas Wing on Feb. 14 and the unit was credited with saving the life of the pilot. After pinpointing the location, the CAP members radioed the information to the local sheriff and the injured pilot was driven to a local hospital for treatment.

AIRLIFT OF BLOOD

Two members of the Idaho Wing airlifted three pints of blood from Spokane, Wash., to Bonner's Ferry, Idaho, on March 7 which helped save the life of a hospital patient. The blood was needed to stabilize a 79-year-old woman suffering from internal bleeding.

CAP and Air Force rescue forces joined together to save the life of a pilot of a light aircraft which had broken through the ice of a frozen lake near Skwentna, Alaska, March 29. The Anchorage CAP unit located the downed aircraft and due to darkness, an Air Force aircraft was launched to conduct a flare drop while a helicopter made the pickup.

The ELT again proved helpful in saving the life of a downed pilot whose aircraft crashed in Texas in April. The Texas Wing was credited with the save after they "homed in" on the ELT signal and directed a state helicopter to the site for the recovery.

HOSPITAL PATIENT AIDED

Emergency airlift of urgently needed blood and survival instruments by the Idaho Wing helped save the life of a hospital patient May 14. CAP completed the lifesaving mission in a little more than an hour after receiving the call for help. CAP flew the needed blood and instruments from Sand Point, Idaho, to Spokane, Wash., for use in the children's ward of the Sacred Heart Hospital.

A search for a 17-year-old girl, who was on special medication for epilepsy, was concluded when the Wisconsin Wing aircrew located her in a ditch six miles south of Colifax, Wisc. Local law enforcement officials were directed to the scene and rushed the girl to the hospital.

MISSING MAN FOUND

On June 12, a Wisconsin Wing ground search team saved the life of a man missing from the Southern Colony Home. The man was located near the Bong Recreation Area about 10 minutes before sunset with severe weather forecast for the night.

The last save recorded during the first six months of the year was credited to the Oregon Wing when it saved the life of an injured hiker. The ground team located the missing hiker in less than three hours after being notified of the emergency. He had fallen and broken his left shoulder and was unable to find his way out of the area.

ELT USEFUL

The 20th and 21st saves of the year came on Aug. 9 when an ELT again proved instrumental in helping save the lives of a pilot and passenger of a light aircraft which crashed on the outskirts of Oakland, Calif. The California Wing followed the ELT signal and directed a rescue team to the crash site for the recovery.

Two days of search efforts paid off Aug. 11 when the Maine Wing located a downed aircraft by tracking its ELT signal. The light aircraft had crashed on a flight from Caribou, Maine, to Manchester, N.H. A U.S. Coast Guard helicopter was called to the crash scene and the pilot was hoisted aboard.

TWO SAVED AUG. 15

Two saves were recorded on Aug. 15 when the Idaho Wing was credited with saving the life of a hospital patient through the airlift of urgently needed rare blood and the Minnesota Wing saved the life of a missing man. The 80-year-old man was spotted by a Minnesota aircrew and picked up by a civilian ground team.

CAP recorded its fifth live saved during the month of August with the emergency airlift of a wounded man on Aug. 26. The patient, a gunshot victim, was picked up and transported from Clear, Alaska, to the Fairbanks hospital by a CAP unit in Clear.

The Colorado Wing concluded an intensive six-day search for a missing light aircraft on Oct. 2 and was credited with saving the lives of the two persons aboard. The wreckage was located in the vicinity of Monarch Pass by the Colorado Wing. Ground vehicles were called in to recover the survivors.

PASSENGER SAVED

CAP's 28th save of the year came Oct. 4 when search crews of the Illinois Wing located a downed aircraft in the vicinity of Manteno, Ill. The local sheriff's department was called to the scene and transported the surviving passenger to the Kankakee Hospital. The pilot was killed in the crash.

During the last part of October and early November, four hunters were added to the list of lives saved by CAP in 1976. The Montana Wing spotted an overdue hunter on Oct. 27 and radioed his position to a private helicopter in the vicinity. The man was suffering from exposure and disorientation.

On Oct. 30 the Colorado Wing saved the life of a 15-year-old boy who had become

lost while elk hunting. A CAP aircrew located the boy and directed ground teams to the scene.

30 MINUTES REQUIRED

It took the Wisconsin Wing less than 30 minutes to find a missing hunter on Nov. 8. The hunter was found in good condition, but was suffering from hypothermia, a condition in which the inner body temperature is lowered and, if not corrected, can result in death.

The New Mexico Wing saved the life of a hunter on Nov. 17 by reporting the lost man's location to an Army National Guard helicopter which picked him up. Six CAP aircraft participated in the two-day search for the man.

The 33rd life-saving effort in 1976 was on Nov. 29 when the Colorado Wing saved the life of a hospital patient by airlifting urgently needed blood. The CAP aircrew transported the blood from Denver to Haxton, Colo.

The final save of the year came Dec. 17 with the medical evacuation of a badly burned 11-year-old boy from Clear, Alaska, to the Fairbanks hospital. The Clear CAP unit transported the injured boy and was credited with the save.

INDIVIDUAL INITIATIVE HELPS SENIOR CITIZENS: SARI MITCHELL AND HER INFLATION FIGHTERS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. DORNAN. Mr. Speaker, Congress has long wrestled with the problems which face our elderly citizens: The problem of loneliness, the problem of getting out and around, the problem of buying food on a dwindling real income, and the problem of meeting nutritional needs. Unfortunately, congressional solutions to these problems usually take the form of mammoth bureaucratic programs that are both ineffective and impersonal.

Congress could learn something from Los Angeles' Sari Mitchell and her Inflation Fighters.

Sari Mitchell is a young and lovely lady who has succeeded in doing what 535 men in Washington—aided by a nationwide bureaucracy—have been unable to do: help the elderly help themselves. This top local television personality has created an imaginative new service to the elderly. As a member of the Mayor's Council on Senior Citizens, Sari arranged for daily buses to take hundreds of elderly to agricultural areas surrounding greater Los Angeles. Although no longer a member of the council, Sari continues her fine work as part of the We the People Foundation, under the chairmanship of Mr. A. John Merlo.

When the seniors arrive in the agricultural areas, they may not only have an enjoyable outing, but purchase food direct from the farmers at prices much lower than wholesale. During the trips, Sari and her Inflation Fighters, Barbara Strasser and Harry Huett, give nutritional tips and money saving ideas to their passengers.

The seniors love it, the farmers love it, and Sari and her coworkers love it.

I commend Sari and her Inflation Fighters for their valuable service to the elderly of the Los Angeles area. Their personal commitment and caring do what no bureaucrat or Federal fund can. These Los Angelenos allow the elderly to enjoy themselves while coping with inflation.

Mr. Speaker, so that my colleagues may be made familiar with the good work of Sari Mitchell's organization—and hopefully learn something from it—I include articles from the Oxnard Press Courier and the Los Angeles Times in the CONGRESSIONAL RECORD:

[From the Los Angeles Times, Nov. 20, 1975]

SENIORS ON A BARGAIN BINGE

(By Jean Bennett)

The local school teacher and housewife both claimed the produce was second-rate because all the good stuff was sent to the big-city markets. But they were pushing loaded carts through the checkout where owners Nick Marsis and Jess Avila were bagging boxing and overworking the cash register. And two busloads of quiet discerning senior citizens from South Los Angeles thought the fruit and vegetables were just fine, thank you, shopped like fury and left about $700 at the "Sunny Nik" produce stand at the five-road, intersection in quaint Oxnard.

These people, representatives of 22 senior citizen clubs in Los Angeles, all on Social Security and only a few having small additional pensions, saw that the produce was good and the price certainly right. Some with lots of fun left in them bought absolutely huge pumpkins for $2 and then had to help each other lift them. Those of frailer spirit, bought normal-sized pumpkins for $1. They also bought bags of beautiful tomatoes at 19 cents a pound. For $1 they bought eight pounds of Delicious apples or four large eggplants or eight cucumbers or 10 small cauliflowers or eight cantaloupes or three large honeydews or eight pounds of onions. Six bell peppers were 25 cents and four red peppers were 25 cents and pinto beans were 39 cents a pound.

PACKED A LUNCH

They all felt it was more than worthwhile packing a lunch and paying $5 for the bus-trip to join Sari's Inflation Fighters. They had a beautiful day-long ride up Pacific Coast Highway into the farmland. They bought produce, meat, and eggs at discount prices. They stopped off at a winery for a tasting. They had fun and fellowship— a day out with a bright, young tour leader and a marathon-talking hardworking and helpful bus driver.

A word here about Sari Mitchell who runs the buying tours as well as occasional and inexpensive tours for seniors to San Diego, San Francisco and Las Vegas, with Barbara Strasser and Harry Heuitt.

$3000 BAKE-OFF WINNER

Sari Mitchell was born in Mississippi, raised in Chicago and attended the University of Colorado. She was a $3,000 Bake-Off winner for her "Hawaiian Tuna Puffs." The fact that at the time she was 8½ months pregnant and the Pillsbury Company sent a doctor to accompany her from Chicago to the 1961 Bake-Off in Los Angeles is the type of thing that just seems to happen to her. Now Sari has a full-time job to support her four children who range in age from 5 to 15 because so far none of the tours has ever netted these three people more than $35 each—what with $100-a-day bus rental, free cold drinks and telephone. Sari does radio, television and has published three books. These art forms revolve around her ability to turn junk into treasure.

As the bus rolls along, she and Harry Heuitt vie for the mike. He jokes, his captive audience laughs and gently chides him. She entertains by giving out money-saving tips. How about filling holes in plaster walls with toothpaste, cleaning silver in water in

which Irish potatoes have been boiled, or what about cleaning off rust with a mixture of apple cider, vinegar and water.

She passed out free sodas, held onto the backs of seats as the bus winged along and said, "We love seniors. We prefer them to young people and we want to help them."

At the produce stand, Heuitt had loaded the luggage compartment of the bus with each person's bags and boxes, stapling a slip of paper with a number to each. Then to the Saticoy Meat Packing Co., 1691 Los Angeles Ave., Saticoy, where in addition to being granted wholesale prices an additional 5% discount is given to Inflation Fighters' buses. Harry placed all the meat packages on dry ice in the holds. One woman bought $62 worth wholesale, paying $59 for it. A random listing per pound retail is: bacon $1.89; pork butt roast, $1.29; pork shoulder roast $1.05; country spare ribs $1.29; center cut pork chops $1.75; loin lamb chops 99 cents; crown roast of lamb $1.19; veal steak $1.19; leg of lamb $1.29; chuck steak 69 cents; T-bone steak $1.89; leanest ground beef $1.09; chuck ground 79 cents; corned beef $1.09; boneless rolled roast $1.55; filet mignon $2.29. The meat was excellent in appearance and, as Mrs. Shackelford said, was trimmed well.

Naturally, the amount of money at hand and the amount of storage at home determined the size of the purchases. A number of people said they had upright freezers. Several said they had only small units in their refrigerators. Others said they could use freezers of friends. Still others bought in large quantity to share with stay-at-homes. Mrs. Evans admitted she was glad she came, although it had been a big joint effort to get her on the trip. And it was always she who was the last shopper, carefully selecting her merchandise, slowly climbing back on the bus, her white hat square on her head, while her peers waited patiently.

Next stop was the S & K Ranch at Moorpark where only Sari Mitchell is allowed out of the bus since humans can give diseases to chickens. Price for large, fresh eggs to the Inflation Fighters was 59 cents a dozen. S & K sells them to stores for 66 cents a dozen, to the public for 71. The 27th bus tour Nov. 11 purchased 77 dozen eggs. Sari collected the egg money in her hat that at another time had doubled as a litter bag and still another as a cold soda can dispenser.

The last stop was at Brookside where Harvey Reese had spread out cheese, crackers and five wines for tasting and where some of the elders bought a bottle or two and made it quite clear that it was for medicinal purposes only.

Harry Heuitt, whose regular job begins at 5 a.m. daily when he buses 40 commuters to Los Angeles from Westlake, had stowed the vast quantities of food so packages could be removed with the least amount of confusion at each of four stops. Bus tours had always ended at 3 p.m., Sari said, but because these folk had bought so much, the last of the 38 riders were not dropped off until 5:30 p.m. It was dark and it was hard to sort out the last of the precious loot. One package seemed to be missing, its owner distraught until Sari found it on the bus.

"Now you can smile again," she said.

Truth of the matter is, everybody was smiling.

[From the Press-Courier, July 19, 1967]

SENIORS HUNT BARGAINS IN OXNARD

(By Jane Nolan)

Oxnard became a cornucopia of bargains Thursday for a group of Los Angeles senior citizens.

The 40 men and women were on an outing sponsored by Inflation Fighters which has made 175 trips to Oxnard in the last eight months. The seniors made their first stop at Donlon Farms, shopping for fresh produce. They next stopped at Chase Bros. Dairy on Wolff Road for lunch and complimentary milk. Wonder Bread Bakery in Camarillo and Brookside Winery in Ventura were also on the agenda.

The three Angelenos behind Inflation Fighters are Sari Mitchell, Barbara Strasser and Harry Huett, who provide bus transportation and scout around for bargains.

"I used to come up here to shop. I would make it like an outing. It's fresh, it's rural, it's charming," said Sari Mitchell, who works with the Mayors Council on Aging in Los Angeles.

She wanted to share her bargain-finding knack with senior citizens.

Mrs. Mitchell did volunteer work with the seniors helping them recycle second-hand items into usable treasures. (She has written a book, "Junk for Joy," and has been signed to do a nationally syndicated television show, "Sari's Treasure Chest.")

Seniors from different city and county recreation centers, churches and banks contact Inflation Fighters when they want to take advantage of the one-day trips. (The seniors are taken to Redlands to buy chickens and turkeys for Thanksgiving, Lancaster for cherries and Indio and Palm Springs for nuts and dates.) Cost of the transportation is $5.

"Seniors don't have cars and they can't walk far. They love one-day trips," said Mrs. Mitchell, a former Pillsbury Bake-off winner in 1961.

For an hour, the group poked among the fresh produce sections, examining lemons, grapes, plums, bananas, potatoes and tomatoes.

"One little woman who has been on 12 trips with us said she has bought a freezer since she's been going on shopping trips with us," said Mrs. Mitchell.

COMPUTER TECHNOLOGY

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. TEAGUE. Mr. Speaker, in a recent address to the American Institute of Industrial Engineers, Dr. George E. Mueller discussed the problems and solutions confronting us in the field of computer technology. Dr. Mueller's remarks merit attention, I believe, not only because of their relevance to our own responsibilities in authorizing and appropriating funds for Federal programs, but also because of their significance to our society generally. A key passage of Dr. Mueller's speech states:

The truth is that today's computers are wonderfully efficient at performing complex mathematical calculations—but they are woefully *deficient* at all those storing, sorting, and fetching operations that are involved in data base management. However, these mundane tasks constitute 90% of what we ask computers to do today. In other words, the computer industry has gone through three generations of development to perfect machines optimized for 10% of the workload.

I am enclosing a copy of Dr. Mueller's address in the RECORD for the consideration of my colleagues:

ADDRESS OF DR. GEORGE E. MUELLER

I've been asked to speak on "What's ahead for data base systems?" Implicit in that question is a basic presumption that we'll continue to do things pretty much as we are now—perhaps with some fancier terminals or some clever new programming legerdemain.

I see quite a different future. Indeed, it would perhaps not be too strong to say that I see the end of the computer era as we know it today. I believe that most of today's computers will be replaced by quite different machines, machines that will make today's number crunching computing systems as obsolete as the dinosaur. And the basic factor that will force this transformation is what we prosaically call "data base management."

The truth is that today's computers are wonderfully efficient at performing complex mathematical calculations—but they are woefully deficient at all those storing, sorting, and fetching operations that are involved in data base management. However, these mundane tasks constitute 90 percent of what we ask computers to do today. In other words, the computer industry has gone through three generations of development to perfect machines optimized for 10 percent of the workload.

Moreover, that workload disparity will inexorably widen in the years ahead. As data processing becomes an ever more pervasive part of our everyday lives, the new applications will have little need for complex arithmetic calculations. Rather they will have a simple primary need to query a data base and get a specific answer as quickly and cheaply as possible. Simple as that need may be, it presents what I regard as virtually insurmountable problems for the computers we have today.

To appreciate the reasons for this anomaly, you must understand why they have evolved as they have. The early computers were principally asked to do complex arithmetic calculations. They were asked to do simpler data manipulation operations as well, but since it was hard enough to sell one computer, much less two, in those days, designers naturally structured their machines for the more difficult task. As a result, the computer architect became optimized for such necessary esoterica as double precision arithmetic. Each subsequent generation of computers followed this path, leading to the enormously complex adding machines we have today.

Now, those complex 30 x 30 matrices, those sophisticated instruction sets, and all the data *redundancy needed* for number crunching uses up a great deal of CPU time. Moreover, the executive routines, the operating systems, and the memory configurations are carefully tailored to meet the requirements of complex arithmetic calculations. They perform these functions very well too, but that very excellence has made their application to data base management functions a difficult and inefficient task. The result, even in this age of microminiaturization, has been large banks of computers and storage devices in order to fulfill an organization's *total* processing needs. Adding a new data base access function today involves a contest between the programmer and the computer. Since the computer's architecture is so structured and inflexible, the computer invariably wins such a contest. The programmer must resort to convoluted paths and excessive time and storage just to enable his company to keep track of inventory.

This year's Mars Viking landing is certainly illustrative of the situation we have gotten ourselves into. Certainly, the guidance of the vehicle required complex calculations, but by far the largest processing job was tagging and storing data for retrieval and evaluation. About the most complex computation required on this latter role was multiplying by a constant. Yet banks upon banks of essentially identical computers were called upon to perform both types of processing tasks, and they were only marginally effective in keeping up with the stream of data pouring back from Mars.

The problem is certainly not limited to a major scientific project like Mars Viking. A normal meteorological satellite will saturate

even the biggest of today's computers. It is inefficient; it is costly; but it is the best we can do with today's computer designs. Moreover, these problems and costs vary only in degree from those faced by businesses in using their computers for such everyday activities as inventory and payroll.

Remember, too, that we're not asking much of our computers yet in the matter of data base management. As we move toward a paperless society, the demands for efficient storage and retrieval will become ever more acute. When we abandon the crutch of the ubiquitous computer readout—I wonder if we ever will, entirely—more and more of our records will be relegated to electronic storage.

Even if the paperless society is far off now, we can already see applications crying for efficient data base management systems popping up every day. Banks are turning to electronic funds transfer; when a customer makes a purchase, his file must be searched and modified with a minimum of delay.

Businesses are linking their manufacturing plants and their sales offices over phone lines and all share a common data base; when a customer wants to know if an item is in stock, or when he can take delivery, the file for that part must be searched and perhaps modified—again with a minimum of delay. The pressures are steadily mounting for a common data base for maintaining records needed by various government agencies. The incipient explosion of the word processing market may well double electronic storage requirements before 1980.

We simply won't be able to meet these growing demands by making our number crunching computers bigger and faster. For both technical and economic reasons, we are nearing the end of the line on *that* brute force approach. The magnitude of the data base management role is reaching such proportions that a radically different approach is essential.

There is no question in my mind but that an entirely new type of processor will be developed in the next five to ten years, and that this new machine will be optimized for data base management functions. I suppose, out of habit, we'll still call them computers, but they will be very different from the computers we know today. With the lower hardware costs resulting from large scale integration devices, we will no longer be economically required to force-fit a number crunching computer to data base management functions. We will be able to afford two types of processors. The workhorse machine will handle all the data base management functions that will so predominate. The few percent of the tasks requiring complicated calculations will be handled by stripped-down versions of today's computers.

What's needed to develop these new data base management machines? Essentially, we'll need three developments—first, a brand new architecture, optimized for data base management; second, better mass storage hardware and techniques; third, better security and privacy systems.

Athough the new architecture will be strikingly different from that used in today's computers, I do not feel that it will be expensive to develop. In effect, this architecture will eliminate many of the overhead and cataloging functions that use up so much CPU time and will substitute an instruction set optimized for the information storage functions of addressing, sorting, fetching, list processing, and the like.

Effective utilization of mass storage will be an essential feature of the new architecture. Today's computers are quite wasteful of mass memory for two principal reasons. First, the file systems inherently result in substantial areas of the disk being unused. In order to allow for recording of large files, a programmer faces a Hobson's choice. One alternative is to allot a larger contiguous file space than needed for the majority of his batches; in record-by-track systems, this precaution involves entire tracks, but in any event a "holey" disk is inevitable if contiguous space is to be allocated for the maximum batch size. The other alternative is dynamic disk allocation, whereby a batch is packed in pieces in whatever spaces are available on the disk. This alternative suffers from the excessive amount of time required to record and subsequently address that data in that batch. Neither alternative is efficient, and an entirely new approach is needed to permit automatic compaction of data, yet still enable all necessary expansion and immediate access of the complete file without delay.

The second requirement for efficient mass memory utilization is the elimination of redundancies. Today's computer systems store huge amounts of redundant data—including all that blank space—simply because the computer architecture is such that data cannot be recovered in a usable form unless it is recorded in a pre-set file format. Hence, since it is now very inefficient to use the CPU for multiple fetching and reformating of common data for different applications, files are maintained on disks for each application, even though much common data is maintained from file to file.

Another major change that will be required to effectively implement a responsive data base system is the system access provisions. Even in the "simplest" time-sharing systems today, a trained programmer is needed to enter and retrieve data efficiently. Languages such as BASIC have helped somewhat, but operators still must be trained, and generally the programs they write are extremely inefficient in terms of number of fetches, mass memory allocation, and the like.

The new system architecture must allow for the fact that tomorrow's systems will be used by clerks, not programmers. Ideally the clerk should be able to enter a request in free-form English without resorting to special key words, mnemonics, or special symbols. The system should not even demand that the clerk spell correctly, or enter the request in any structured order. In effect, the system should respond to the clerk just as if it were another person.

The second major area of development needed is the storage medium itself. There is no doubt in my mind that we cannot afford to rely solely on electromechanical devices such as disks and magnetic tapes. Not only are the storage requirements going to grow tremendously, but fail-safe operation will be extremely important. As we move toward a paperless society, more and more of our essential records will be stored exclusively on these devices. Electromechanical devices inherently are subject to breakdown, an eventuality that would at best disrupt the system, and at worst cause these essential records to be irrevocably lost. It appears to me that these electromechanical storage media will be replaced by fail-safe, cost-effective solid state mass memories.

Fortunately, we are on the verge of a breakthrough in memories. The work on electron-beam, laser, and super-cooled memories is extremely promising. The use of magnetic bubbles as a storage medium is just starting to be exploited but I see no technological reason why this could not be a viable approach. All in all, I am confident that cost-effective, solid state mass storage will be fully developed within the next five years. When that occurs, we'll have both the processing capability and the storage capability to build spectacularly different and larger data base management systems.

What might such a system look like? Well, I certainly expect that a typical system will be quite large with geographically dispersed elements probably linked by voice-grade communications links. The processing elements will undoubtedly be distributed, with intelligent terminals accessing a common data base. In such a large, dispersed system, the bulk of the data entry and processing will undoubtedly be performed on a batch basis locally with transmission of compacted, formatted data at night.

The system will be so designed that clerks can enter data and access the data base using free-form English commands. The intelligent terminals will probably provide cues on the display screen (or perhaps audibly) so that relatively unskilled operators will be sure to enter all needed commands, and will be alerted when they have made input errors. Initially, there will probably be printers at each terminal, but as we move closer to the paperless society, the requested data will simply be displayed to the operator.

The clerk will ask, "What is the status of Part No. 123456?" and the system will display some such answer as "572 units are in inventory in Moline." In the same transaction, the clerk could order the part using his terminal, and the system would automatically transmit the instruction to Moline and modify the data base records accordingly.

There's nothing particularly new in this entire flow—except that it will be done simply and efficiently, because the machine is designed specifically for data base access. Since the complexity of today's number crunching computers will not be needed, the data base processing and storage equipment can be much more compact and less expensive. We won't need 100 MIP machines. The peripherals and I/O equipment can be much more efficient. We can take advantage of the remarkable breakthroughs in size and cost of computer modules we are starting to see today. I estimate that we'll be able to store and process at least a bibliography of all the literature in the U.S. using a system no larger than a conventional office desk. Today, if anyone even attempted such a gargantuan task, I suspect he would need at least a room full of data processing equipment.

One interesting possibility that may well affect the course of data base management systems in the development of voice controlled computers coupled with artificial intelligence. These devices would permit an operator to provide commands orally to the machine and receive data from the machine in voice form also. When this development is perfected, the operator will be able to talk normally to the computer in an interactive oral exchange. Moreover, the request need not be structured as it is today. Instead of issuing an instruction such as "Access File X, Segment Y," the operator can simply say, "Tell me what the market did today."

Perfection of voice controlled machines is probably 10 years in the future, depending on funding, but it is significant that we have machines with a 1000-word vocabulary right now. I expect that these devices initially will be used as input-output adjuncts to data base management systems. They will perform their primary input functions of voice recognition and automatic translation into machine code, and their output functions of translating machine code into English language equivalents and issuing semantically valid data.

Although these devices will initially be modular adjuncts to the primary data base systems. I expect that in subsequent generations they will influence the total system design. These later systems will be designed to take advantage of such voice translation capabilities as editing, and off-load these functions from the primary system to the voice input-output modules. In this way, these parallel developments will converge, perhaps in the 1990's.

Here I am, talking about second generation data base systems, and we aren't even close to the first generation systems. How will we get to these first truly effective systems? I am sure that the path will be the same as it was for computers. The first of

the new machines will be developed to meet government needs, then business, and finally the huge consumer market.

Why the government first? It's not just the more readily available funding; it's also the enormous data base inherent to modern government operations. Moreover, the size of this data base is greatly influenced by the widespread duplication of data. IRS data is duplicated by census data, which is duplicated by security data, *ad infinitum*. This duplication is becoming prohibitively expensive, and it is a problem for which a data base management system is an ideal solution. Certainly, the storage costs could be cut in half.

Business should benefit directly and quickly once system architectures and hardware are developed for the government market. As we have seen in the evolution of computers, the normal course of free enterprise will quickly stimulate manufacturers to adapt systems for the needs of large businesses, then smaller and smaller businesses, until the systems are as pervasive as computers are today. The process may occur even more quickly than did the proliferation of computers, since these machines will be designed for the primary processing needs of businesses, and they will be operable by untrained personnel.

I see no insurmountable technical barriers to this new processing era, but I do see a legislative stumbling block that could cause significant delays. The issue I am referring to is privacy. Not security, since I feel that encryption devices will certainly be added to prevent unauthorized access to privileged data. Privacy, however, is a much stickier issue.

The present legislative situation regarding privacy can best be described as chaotic, but if there is a trend, it is away from common data bases. The Privacy Act and various state laws evidence a supposition that since computers permit better records, they are a growing threat to personal privacy. If you read these laws literally, they imply that data bases not be maintained at all. Of course, this is honored more in the breach than the observance, but it does point up current attitudes that stand in the way of efficient data base systems.

There is such a basic illogic to this whole situation that it can only be based upon the fact that legislators, at least, do not fully understand how processors work. Certainly there is no technical reason why we cannot design a system of shared files without compromising privacy. Moreover, a citizen probably has more privacy with electronic records than he did with the old system of hard copy records. Still, there is a great concern that a citizen's records will be abused, presumably by some government or business employee who will use the more complete picture to the detriment of the citizen. The specter of a police state hovers over the entire issue.

The issue is further complicated by the legislative requirement for full government disclosure. How this can be reconciled with full privacy. I confess I do not know. Even so, there are no signs yet that pressure groups or legislators are taking a fully rational view of the issue to permit legislation that will curb abuses without halting the natural growth of the electronic age.

While much of this legislation is specific to government records, some of it extends to business records—particularly credit data—as well. Moreover, legislative roadblocks to shared government data bases will inevitably affect businesses because, as I have said, the first systems naturally would be developed for government use. The data processing industry is unlikely to make such a major investment while the legislative picture is so cloudy.

I am confident, however, that the current legislative tangle will not last long. The economic pressures for efficient data processing are simply too overwhelming. Just as industry is being stimulated to overcome the few technical barriers still remaining, so I think legislators will eventually be stimulated to enact legislation that will permit more efficient government and business without compromising personal privacy. When this occurs, we will see the end of the computer age and the natural evolution into the age of efficient shared data base processing.

In summary, data base management has already emerged as the biggest and fastest growing use of computers. Today's computers simply aren't good enough for the new workload. We must design machines specifically for this task, or we will be overwhelmed by the magnitude of the data involved. There is no reason why we cannot design such machines. The technology largely exists today. However, we must recognize that current privacy legislative proposals represent a major threat to the efficient data base management we so badly need. Privacy legislation dictating the organization and maintenance of centralized data files must be intelligently implemented. Otherwise, all our technology is for nought.

MR. CARTER AND THE ISSUES

HON. ELFORD A. CEDERBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. CEDERBERG. Mr. Speaker, the material referred to in the body of the RECORD follows:

JIMMY CARTER ON THE ECONOMIC ISSUES

Inflation and unemployment. The Republican Administration has tried to fight inflation with high unemployment and record high interest rates. The result has been the worst unemployment since the Depression, the highest average rate of inflation for any Administration in over 50 years, and the highest interest rates since the Civil War. I pledge that if I'm elected, we will never use unemployment and recession as a tool to fight inflation. We will put into place a coordinated set of programs which will reduce overall unemployment to 4% and inflation to 4% or less by the end of my first term.

Achieving a balanced budget. During the past eight years, the Republican Administration has given us the largest deficits and the most unbalanced budgets in the history of our country. Mr. Ford's $65 billion deficit for the last fiscal year is the largest in our history and is greater than all the deficits for the Kennedy-Johnson years put together. After we're finished with Mr. Ford's latest budget, the federal government will have accumulated more public debt in the past eight years than we had outstanding for the entire 192 preceding years of our history. I am committed to achieving a balanced federal budget by the end of my first term and to keeping government spending at or beneath its current share of our national output.

Financing our new programs. We will bring new initiatives to vital areas such as health care, housing and welfare reform carefully and prudently, *without any increase in taxes* and within the constraint of achieving a balanced budget by the end of my first term. We will finance these programs with the additional tax revenues which a growing economy will generate. As we put our people back to work, they can join the ranks of taxpayers instead of receiving tax-free unemployment compensation and welfare payments. The Republicans say it's too expensive to put our people back to work. I say it's too expensive not to.

Tax reform. If I'm elected, we're going to reform our tax laws to make them simpler, fairer, and more efficient. In 1974 there were 244 people with incomes over $200,000 who didn't pay one cent in federal income tax. We're going to close the loopholes and the tax shelters which permit that kind of an outrage. Under our tax reform, low and middle income taxpayers who earn their living from wages and salaries will pay less taxes because we will shift some of the tax burden to those individuals and corporations who take advantage of the special interest shelters and loopholes which we will eliminate. The tax values of legitimate deductions, such as the interest on home mortgages, will be retained.

EXTRACT FROM PRESS BRIEFING ON DEFENSE ADVISORY SESSION

PLAINS, GA., JULY 27, 1976

Question. Governor, could I ask you, in your campaign obviously you are going to have to address this, can you tell us whether the defense budget you will be recommending in your campaign will be roughly equivalent to the present defense budget, somewhat higher, or somewhat lower?

Governor CARTER. I can't answer that question yet. My belief, which has not been shaken, is that compared to the present defense budget, as it evolves from one year to another, no matter what the level is, that a saving can be realized of roughly 5 percent through some of the changes that I've advocated over a long period of time. But I can't give you at this point an exact figure for the next year or the following year's defense budget.

Question. I take it the savings may be eaten up by the need for development of weapons or other matters.

Governor CARTER. No matter what the level of the defense budget might be, to give us an adequate security force. The changes in the deployment of our armed forces, reduction in troops overseas, a change in the personnel policies of our country, an elimination of unnecessary functions of the Defense Department, all that can still result in the savings that I've outlined—$5–$7 billion, which would be about 5%.

FEBRUARY 22, 1977.

To: Mr. Cederberg.

From: Minority Staff, Appropriations Committee.

Re President Carter's Revisions of President Ford's Budget.

For fiscal 1977, President Carter's revisions of President Ford's budget would result in a $6.2 billion outlay increase to $417.4 billion, and a $4.7 billion decrease in revenues, to $349.4 billion level, enlarging the deficit by $10.8 billion, to $68 billion.

For fiscal 1978 the $440 billion outlay level in the January budget would increase by $19.4 billion to $459.4 billion, revenues would *rise* by $8.6 billion to a $401.6 billion level, and the projected 1978 deficit would increase $10.8 billion to a $57.7 billion level.

The economic assumptions underlying the budget revisions (shown for *calendar* years, not *fiscal* years) estimate somewhat greater economic growth and lower unemployment than appear in the January budget. The budget revisions do not allow for the severe cold weather impact nor the effects of western drought on the economy.

The following table "Comparison of Economic Assumptions" shows the difference between the January budget and the Carter revisions with respect to such key economic variables as Gross National Product, major

income shares, price changes and unemployment. GNP, or national output, is estimated to gain $4 billion, attaining an $1,884 billion level in current dollars in 1977, and to gain $13 billion to reach a $2,105 billion current dollar level in 1978. After adjusting for expected inflation the 5.2% real GNP growth in 1977 (per January budget) is assumed to rise to a 5.4% level in the Carter revision in response to the stimulus package. Similarly, the 1978 real growth is assumed to increase from a 5.1% to a 5.4% level.

The price assumptions in the Carter revision are similar to those in the January budget for 1977, the consumer price estimates are the same in 1978, but the GNP deflator (meaning economy-wide price changes) is slightly higher in the revision (6%) than the January budget (5.9%) for 1978.

Unemployment is assumed lower in both 1977 and 1978, according to the budget revision, showing a change from 7.3% to 7.1% in 1977, and from 6.6% to 6.3% in 1978. This outome is assumed to result from greater economic growth as well as additional public sector employment resulting from local public works, CETA, and anti-recession state and local fiscal assistance, described as $1.6 billion in 1977 and $6.2 billion in 1978.

The severe cold weather and western drought impacts on the economy may slow the economic recovery this year. The impact on energy requirements, upon fuels for both heating and energy requirements, upon industrial water uses in the west, and upon both water and fertilizer for crops, suggests it may be more difficult to achieve the economic growth rates and unemployment rates assumed in the budget revision message. The natural resource constraints cannot be readily changed by short-run fiscal policy which seeks to increase demand for national output.

Moreover, the character of the proposed economic stimulus package, which purports to assist private sector business activity by increasing consumer demand and by tax credits intended to stimulate private employment and new investment, appears *not* likely to be particularly effective because:

a. The $50 per head rebate or income supplement is to be a once-around affair, acting for a short temporary period, perhaps in the April-June quarter or a little later, but not comparable in effect with a permanent tax cut which could increase consumer spending regularly.

b. The social security credit to business firms for newly-hired workers could add moderately to liquidity of labor-intensive small businesses—and even large retailers—but at just over a penny per man-hour would probably not really add much to private employers' demand for additional workers.

Moreover, the addition of 700,000 new workers to total employment since November, the rise in help-wanted advertising, the steady growth of non-farm jobs and the significant decline of unemployment prior to recent cold weather, combine to suggest that private demand for labor has been growing significantly and would continue.

c. The alternative investment credit for business could modestly assist business firms seeking to add new equipment but is not designed to significantly help firms build new plant capacity, and thus fails to focus on crucial capital formation requirement and deals instead with a matter of lesser priority.

d. Finally, larger deficits, added public works not significantly related to productive capacity, and public sector jobs whose past accomplishments show little promise for the future, continue a trend which shifts resources from private to government control, enlarging the government role in the economy and diminishing the scope of private activities; in short, a policy aiming in the wrong drection.

COMPARISON OF ECONOMIC ASSUMPTIONS

[In billions]

	Actual 1975	Preliminary 1976	1977 January	1977 Revised	1978 January	1978 Revised
Gross national product:						
Current dollars:						
Amount	1,516.0	1,693.0	1,880.0	1,884.0	2,092.0	2,105.0

December over December	7.0	4.8	5.3	5.3	5.2	5.2
Unemployment rates (percent):						
Total	8.5	7.7	7.3	7.1	6.6	6.3
Insured [1]	7.2	6.4	5.4	5.4	4.6	4.4
Average Federal pay raise, October (percent)	5.0	4.8	6.5	6.5	6.3	6.3
Interest rate, 91-day treasury bills (percent) [2]	5.8	5.0	4.4	4.6	4.4	4.6

[1] Insured unemployment as a percentage of covered employment.

[2] Average rate on new issues within period; the rate shown for 1977 and 1978 was the current market rate at the time the estimates were made.

FISCAL YEAR 1977 OUTLAY REVISIONS

Outlays estimated in January at $411.2 billion are now revised to $417.4 billion. The increase of $6.2 billion includes:

[In billions]

Employment and training programs	$1.0
Local public works program	.2
Counter cyclical revenue sharing	.9
Proposed $50 payments—	
In excess of tax liabilities	1.4
Social Security	1.8
	3.2
Total	3.2
Federal supplemental unemployment benefits	.5
Unemployment insurance (reestimate)	−1.0
Food stamps and child nutrition	.7
Health care	.3
Foreign economic assistance	−.2
Mortgage credit programs (reestimate)	−.4
Interest (reestimate)	.3
Offshore oil land leasing receipts (change in timing)	.3

There is no change in net defense. Education, water resources development and net energy are changed each $50 million or less. Of the increases in 1977 outlays, $2 billion are for grants-in-aid, of which $1.8 billion is for economic stimulus.

FISCAL YEAR 1978 OUTLAY REVISIONS

[In billions]

Employment and training programs	$6.3
Local public works program	2.0
Countercyclical revenue sharing	1.6
Food stamp and child nutrition	2.1
Health care	1.3
Interest	2.0
Earned income credit	0.9
Federal supplemental unemployment benefits	0.4
Unemployment insurance (reestimate)	−1.2
Education	0.5
Veterans benefits	0.9
Water resources development	−0.3
Energy—Net increase	0.8
Defense—Net decrease	−0.3
Foreign economic assistance	0.6
Transportation (highways and railroads)	0.4
Social services	0.3
Offshore oil land leasing receipts (change in timing)	−0.3

Of the increases, about $10.0 billion are for grants-in-aid.

The net decrease for defense outlays is $0.3 billion; for budget authority the amount is a cut of $2.7 billion.

NATIONAL ASSOCIATION OF HOMES FOR CHILDREN ADOPTS EXEMPLARY CODE OF ETHICS TO PROTECT INSTITUTIONALIZED CHILDREN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. BIAGGI. Mr. Speaker, as a member of the House Select Education Subcommittee of the Education and Labor Committee, I have been deeply involved in the problems of foster children in this Nation. A great deal of my attention has been focused on the thousands of children who are placed through referrals into child care institutions.

I conducted 2 days of congressional hearings in 1975 looking into the foster care industry in the city of New York and discovered that many institutionalized children were becoming prisoners in the system with no real hope of attaining a life of permanency.

Subsequent to these hearings, some re-

forms have been made in the form of more periodic reviews of children in foster care and stricter licensing of foster care homes and institutions. I wish to bring to the attention of my colleagues an important document, the Code of Ethics of the National Association of Homes for Children, Inc. The code which was adopted on November 4, 1976, provides a model which respects the rights of all children under care, their right of individuality, their right to be free from neglect and abuse and above all the fundamental right of children to enjoy a life of permanence.

I offer for the consideration of my colleagues a copy of the Code of Ethics of the National Association of Homes for Children. I congratulate them on their initiative.

NATIONAL ASSOCIATION OF HOMES FOR CHILDREN: CODE OF ETHICS

We will protect children in our care from abuse or maltreatment, experimentation, economic exploitation, malnutrition and unsafe environments; and shall bring to account adults who thwart that purpose.

We will utilize fully our professional skills in striving to obtain for each child the permanence of a family life.

We will obtain or provide for children who are physically or mentally ill the best therapeutic care available to us.

We will provide every opportunity for children to learn and to develop whatever talents they may possess.

We will accord children in our care full respect as individuals, the full rights guaranteed all citizens of the United States, while teaching them to respect the rights of others.

We will respect the uniqueness of each child's race, culture and religion while attempting to instill a sense of self-worth, individuality, and the responsibilities as well as the privileges of citizenship.

We will nurture in each child the spiritual ethic appropriate to his background and religious heritage.

We will serve only those children for whom our service is appropriate and will plan carefully and realistically with, and for, each child, and, when available, with the family of the child.

We will strive to enhance the talents, techniques and compassion of adults in our employ.

We will use our knowledge and influence, as advocates for children, to improve social conditions, and develop resources beneficial to children and to the strengthening of American family life.

We will review constantly our services for relevance and effectiveness and shall strive to provide society and the community with child care services appropriate to their needs.

We will represent our services and intentions honestly and openly.

ANOTHER "VIETNAM" IN MIDEAST?

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. DRINAN. Mr. Speaker, I commend to my colleagues a perceptive article reprinted from the Boston Globe of February 22, 1977, which outlines the grim possibility that the deepening involvement of the United States in regimes like Iran and Saudi Arabia might lead to another Vietnam-like situation.

The article is written by Mr. Jerome Grossman, who helped to draft the foreign policy plank of the Democratic platform:

ANOTHER "VIETNAM" IN MIDEAST?

(By Jerome Grossman)

Anyone who thinks the United States cannot get fouled up in another Vietnam-type situation just hasn't been paying attention.

A curious situation has developed in Saudi Arabia and Iran. Both countries have purchased and are continuing to purchase large quantities of military hardware—mostly from the United States. Not only are these arms far in excess of any rational defense needs, but they are of such sophistication and complexity that the military personnel of the two countries cannot handle many of the weapons.

Thus, it has become necessary for Iran and Saudi Arabia to import many thousands of US military personnel as well as American civilian technicians, to install, maintain, operate and train. Some military experts say that it will be many years before Iranian and Saudi Arabian nationals will be able to take over these functions. Other experts doubt that they will ever be able to do so.

What we have, in effect, is a new type of American expeditionary force, hired by two authoritarian rulers, for apparently technical reasons. This is on a temporary basis, but it is likely to become permanent, particularly if the two rulers keep buying the latest American military equipment, thus requiring the presence of even more American technicians.

From the point of view of Iran and Saudi Arabia, an American presence would tend to dissuade hostile neighbors from military confrontation and indigenous revolutionaries from trying to topple these extraordinary repressive and backward regimes.

From the point of view of the Pentagon, American military and support forces with the most modern and sophisticated hardware and electronics have been installed near the Russian border and on the Indian flank, all at no cost to the American taxpayer—in fact at a profit to US multi-national corporations.

Has the US in effect, guaranteed the existence of the authoritarian regimes of Iran and Saudi Arabia?

Has the first payoff been made by Saudi Arabia in throwing the OPEC cartel into disarray by establishing its own oil price and increasing its production of oil?

Has the US again placed itself in a Vietnam-like situation where local factors in a far-off place could involve us in military support of outrageous regimes, first for short-term military and commercial profit, then to defend and rescue Americans thousands of miles from home? This is the way we became involved in Vietnam. We must guard against it happening again in Iran and Saudi Arabia.

THE NEED FOR CURRENT INTERNATIONAL POPULATION DATA

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. RICHMOND. Mr. Speaker, the world's population explosion has been too well documented to need further comment from me. It is now, and will remain, an integral part of nearly every problem, domestic or foreign, that is faced by the Congress of the United States. If we are to exercise good judgment, the requirement is that we have current international population data from the best possible source, which certainly must be completely objective.

As a member of the House Agricultural Committee and chairman of the Subcommittee on Domestic Marketing, Consumer Affairs and Nutrition, I have come to understand that the greatest threat to the food security of this globe and this Nation is the dramatic growth in world population that has occurred within the past few generations. If I, and other members of the Agriculture Committee, of Congress, and of the executive branch, do not have reliable population data, then how are we to make responsible decisions on food aid, on agricultural assistance, food reserves, or population policies? Obviously, we cannot.

For years, Mr. Speaker, population data has been made available to us by the International Statistical Program Center of the U.S. Bureau of the Census. Certainly, this organization is the best qualified to do the work.

Recently, it has come to my attention that this work is not funded by the Bureau of the Census. It is funded and authorized by the Agency for International Development Office of Population. This funding, however, is entirely discretionary. If AID wishes to pay for the work, it will be done. If AID does not wish to pay for the work, it will not be done. The Department of Commerce has no funds for this type of work, nor is it authorized to do so. This strikes me, Mr. Speaker, as "an astonishingly poor way to run a railroad."

According to Mr. James Turbitt, Associate Director of the Bureau of Census, for the year 1976:

The Bureau was not requested to produce world population figures.

With respect to 1975, I am informed that while all the new work on world population figures was done, it was never published. As for 1977, Mr. Turbitt has said:

The figures do not at present exist and cannot be supplied . . . without substantial investment of time and money which are beyond the current resources of the Bureau.

Mr. Speaker, who determines whether or not these population figures are made available to the Executive, the Congress, or to the public? The AID Office of Population. According to an editorial in the Roanoke Times of June 22, 1976, this same office refused to allow the publication of population data by the Bureau of the Census, because such data reflected poorly on AID programs.

I do not know whether this is true or not. The available evidence seems to point in that direction. But, Mr. Speaker, even if this is not the case, the possibility exists for it to be true. The Congress has, in effect, given the Office of Population a license to reveal, conceal, or even to manipulate population data.

For example, according to a special report of the Environmental Fund of May 1976, if the Census Bureau published population data without those changes AID wanted, "AID threatened to withhold the money for next year." I am shocked and outraged that this type of bureaucratic chicanery is going on. There is no possible excuse for it.

Therefore, Mr. Speaker, I am introducing legislation today to remedy this situation. It does not represent a change in our population policy. It does, however, directly authorize the Census Bureau and the ISPC to do the population work it is able and willing to do. In this way, we can eliminate a situation in which the evaluation of AID's programs lies solely within itself.

There are many Members of Congress as well as members of the general public who are interested in independent and timely population data. This legislation, I hope, will provide for this. Mr. Speaker, I insert the aforementioned editorial from the Roanoke Times in the RECORD following my remarks:

POLLUTING TRUTH AT THE SOURCE

Government agencies can make mistakes and so can private agencies and private people. Forgiveness on matters of opinion is a habit without which nobody could get along with each other. But there is one unforgiveable mistake: tampering with the facts at the source. That is: putting pressure on the Bureau of Census and other fact-gathering organizations.

The Environmental Fund, an organization concerned mainly with the soaring population of the world, finds reason to believe that the U.S. Agency for International Development (AID) is tampering with facts at the source of their being counted. Its May bulletin reported that it was having difficulty obtaining statistics from sources previously relied upon. It said:

"Late in 1975 we asked the Census Bureau if they were preparing international figures for 1975 and were told that they were, that the figures were nearly completed and would be published by January 15. In mid-January when we tried to obtain them, we were told that AID wanted changes made in them before they were released.

"We pointed out that the figures would be useless if they had been altered in order to please some other Agency. The reply was that if the research were published without such changes, AID threatened to withhold the money for next year."

The fund's bulletin called the action "bureaucratic chicanery." It can also be called preposterous, arrogant and evil. Congressmen could disagree on what to do with a crop shortage or surplus, but they would denounce any Department of Agriculture which fouled up the statistics at the source. Treasury Department financing, Federal Reserve System discounting, the cost-of-living index, price support levels—all of these problems require trustworthy, unpolluted statistics at the source.

Strong differences of opinion can and should exist over whether the size and means of foreign aid should be influenced by birthrates which swiftly overcome the good the aid accomplishes. But all parties to the dispute should have access to the best facts the guardian of statistics can gather. None should be misled by hoked-up statistics which make it easier for AID to justify a larger appropriation; or re-jiggered basic figures that argue for a reduction of AID.

Somebody at the very top of the federal government—at the State Department, the Office of Budget and Management, or the White House itself—should get out the whiplash. If the Environmental Fund complaint is not remedied, AID has committed the one sin that all reasonable disputants can agree upon. The most basic of governmental crimes is to destroy the basic evidence.

RAILROAD SAFETY

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. BROWN of California. Mr. Speaker, I have introduced legislation today that would require the use of bulletproof glass in windows on the locomotive and rear car of passenger and freight trains. For those of my colleagues who are not aware of the problem that has prompted this legislation, I would like to briefly explain the background of this issue.

Numerous incidents of rock throwing and shooting at train windows in southern California have been reported to me. These daily occurrences cause delays, in the least serious cases, and have caused personal injury to railroad workers in the most serious incidents. Current regulations requiring shatterproof glass on locomotives have been ineffective in stopping these inquiries, even when the windows are protected by external steel screens. On many sections of rail lines, engineers and trainmen routinely hide away from the windows in anticipation of an attack of rock throwers. One United Transportation Union letter detailing incidents along one section of track stated:

The engineer gets down low in the seat and blows the whistle and hopes he will not get glass in his eyes. The trainmen hide or stay away from all windows in the caboose.

Safety bulletproof glass of the type used in aircraft is available for use in locomotive and rear car windows. It can prevent small caliber bullets from penetrating and deflect hand-thrown objects even when the train is traveling at top speed. Spraying of glass particles in the event of window breakage is minimized, helping to eliminate the danger of eye injury. Adequate safety measures need to be taken nationwide before injuries increase in number or become more severe. The legislation I introduce today will require these measures.

These disruptions cause a great loss of time and efficiency, and the distraction from necessary safety functions that these incidents cause is very disturbing. I urge prompt action on this legislation. It may seem that this is of minor importance in the light of other pressing legislation, but I assure you that it is an important matter to the men and women who are operating our rail systems under present conditions.

CHRISTIAN SCIENCE MONITOR SUPPORTS FEDERAL GRAND JURY REFORM

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. EILBERG. Mr. Speaker, the Subcommittee on Immigration, Citizenship, and International Law is about to commence its hearings on proposals to reform the Federal grand jury system. I have introduced H.R. 94 suggesting such extensive, yet balanced, reforms.

After careful review of my proposals, the Christian Science Monitor, I am pleased to say, has come out in strong support of my bill. I am inserting in the RECORD that editorial, dated February 16, 1977:

GRAND JURY REFORM AT LAST?

Attorney General Bell has stepped into the urgent question of grand jury reform by recognizing the general need for it while opposing such a specific key element of reform as permitting a witness to have counsel present. Mr. Bell promises study of the matter, which was also undertaken by his predecessor. The happiest outcome would be for him to lend his support to the new refinement of reform legislation perennially and persistently introduced by Rep. Joshua Eilberg of Pennsylvania.

Subcommittee hearings on this legislation are expected the middle of next month. Representatives of the American Bar Association (ABA) have long backed efforts for reform. Passage of reform at long last would be a good way to begin the third century of a nation dedicated to liberty and justice for all.

Manifest abuses of the grand jury system have worked against justice. In his confirmation hearings Mr. Bell said it had become a tool of the prosecutor. But as the ABA convention considered adopting a slate of strong grand jury standards this week, Mr. Bell expressed reservations.

On the matter of permitting a witness to have counsel, the Attorney General, like his predecessor, makes the valuable point the grand jury should not be turned into a mini-trial. The secret proceedings of the grand jury were never meant to be an adversary procedure but an investigative process to protect the innocent while bringing wrongdoing to the surface.

The new proposed legislation aims to keep it from becoming an adversary procedure by limiting the counsel's role to that of advising the witness—and not, for example, challenging evidence. Also, it would allow the court to remove or replace counsel in certain circumstances, while seeing that free counsel, if necessary, is available in general. Evidence could be challenged at a required preliminary, pretrial hearing such as most states already have.

There are also other refinements to provide some flexibility in the application of the reforms as evaluated by the courts. But the thrust remains to combat absues by assuring the rights of the witnesses and the independence of the grand jury.

Thus not only must the witness be fully informed of his rights and other matters such as whether he is a potential defendant, but the jurors must be informed of their powers and duties—that they, not the prosecutor, are in control. Regulations on contempt and immunity would be tightened.

Beyond the legislation there are such pro-

posals as a constitutional amendment to continue the investigative power but end the indicting power of grand juries. This has been proposed by high-level studies in the past. There are also proposals to eliminate the grand jury, as happened more than four decades ago in Britain, where the grand jury began.

Certainly, unless the United States is to follow Britain's lead in this manner, it must reform the grand jury system that has served it well in many ways but has been subject to too much misuse.

JUD LOUPOT

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. TEAGUE. Mr. Speaker, it is not very often an individual gets a chance to do something nice for someone who he has held in high regard and has enjoyed his friendship for a period of 40 or more years. But I have been given this opportunity now, because of an article written by a newsman which appeared in a Dallas paper on my good friend, Mr. Jud Loupot of College Station, Tex.

Jud, who has affectionately become known in the area as "Old Army Lou" was my roommate at Texas A. & M. during the 1930's. He has been as good a supporter, loyal friend, and personal confidant as any man could want over the years. By the same token, he has been as loyal a supporter of Texas A. & M. as any individual by his many acts of human kindness to the students at the college. We both knew hard times, and Lou has done as much as anyone to alleviate the suffering of any brother Aggie, because of his own personal experiences.

I am proud to be able to pay tribute to Lou in the CONGRESSIONAL RECORD and prouder yet to say that he is my friend:

TWO RECALL DEPRESSION DAYS

(By Hank Wahrmund, Staff Writer)

Most people who lived through the Depression years following the stock market crash in 1929 probably prefer to ignore that period of their lives.

But J. E. Loupot, owner of Loupot's Bookstore at the Northgate in College Station, says those years had a very positive effect on him and many of his classmates when he attended Texas A&M from 1928–32.

"All the hard living made us such good friends, loyal to each other beyond description," Loupot says. "We lived almost like convicts while at A&M, with many guys sleeping in the horse stables or in a steam tunnel to get out of paying room rent and board fees."

Loupot says Aggies paid $18 a month room and board if they lived on campus. But for those days, he points out, that was a high expense for many Aggies.

"The kids who didn't pay for campus meals used to go out to the A&M livestock barns and get eggs from the chickens the university was raising for research," Loupot recalls. "Sometimes we'd barbecue some of the chickens. But one we accidentally got some prize poultry of high breeding and the school got real mad. After that, a poultry professor who understood our living situation pointed out which ones we could eat and which ones we should leave alone.

"We'd also drink milk from the cows at the dairy barns. Man, it was rough at times, but somehow we all made it. I wonder how today when I look back, but those guys all turned out to be really big leaders in business now."

One of Loupot's closest friends and a former A&M roommate is Cong. Olin E. (Tiger) Teague. According to Loupot, Teague was a model student as far as studying and grades went. But he says the two of them would combine their talents to provide their Aggie buddies with a little entertainment during those hard-pressed times.

"Tiger and I had the only radio in the Corps at that time," Loupot explains. "But with electricity off until 5 p.m. each evening, we had no way to listen to it during the day. So we got an electrical engineering major to rig us a wire from the YMCA building so we could tune into our favorite radio shows all day long. Unfortunately, the commandant caught us once during an unannounced inspection and we lost our wire."

Laughing as he recalls another incident, Loupot, or Lou as many of his friends call him, tells of a football game in Baton Rouge, La., against LSU while he was a student.

Lou and about 120 of his buddies "borrowed" a lot of eggs from the A&M farm, hard-boiled them, bought some bologna and loaves of bread and boarded an old flatbed truck for the game.

"We had to travel in third gear because there were so many of us," Lou remembers. "We had no money or game tickets, but we were ready for a good time. But it started raining close to Baton Rouge and our uniforms got soaked. So we went into this hotel and used a wringer to dry them. I mean, it was wild, all those Aggies running around in that laundry room without half their clothes on. Those hotel people thought we were nuts. At the game, we had to send one guy in on a regular game ticket and have him collect ticket stubs for us to sneak in on. It was rough, but we had a helluva good time, believe it or not."

As an entering freshman at A&M, Lou had only his high school ROTC uniforms to wear. To conform to A&M's uniform regulations, he says he was forced to trade, wheel and deal and spend his first semester's tuition and fees money buying the proper clothes.

"That's when I got started in the clothing business," Lou notes. "I ended up that first month of my fish year with so many different pieces of uniforms that I couldn't live in my dormitory room. By my junior year, my roommate and I had three rooms—one for living quarters and two for a clothing warehouse. But another surprise inspection by the commandant caught us and I was nearly kicked out of school. Then some friends of mine who were always so loyal to me pitched in and helped me build a little warehouse at Northgate. We used three saws and 10 hammers and did it in 24 hours. It was called the "Green Lantern and we served hamburgers and chili there, too."

The building still stands, just off of University Drive beyond Wyatt's Sporting Goods.

"We worked damn hard outside of school to keep body and soul together," he says, "and some guys couldn't take and left. I admit it was hard on many fish. Heck, our first day on campus we got off the train and this big senior told me to take his luggage off and deliver it to his room—said I would be 'his freshman.' I had to leave my few bags at the station for a week before I had time to go back and pick them up," Lou says, laughing.

"But seniors were gods then, they ran things," he explains. "If one of 'em told you to fly to heaven, well by God you sprouted wings and flew."

But Lou says an Aggie's ability to give and take orders really paid off later in the "outside world."

"If you look back at thing, I think you'll see that we Aggies came out way ahead of those other guys living on the 'Forty Acres' in Austin," he says, referring to graduates of Texas University. A lot of us are retiring from jobs now, but there were a lot of corporation presidents, bank chairmen, oil executives and many others who were successful mainly because of the hell they went through at A&M."

"They can say I'm crazy, but I never let that bother me before and I'm not letting it bother me now," says Lou. "I've always believed in Texas Aggies and they've been awfully good to me. What I learned at A&M in books I can resell to the university for $500. But that Aggie friendship is priceless—absolutely priceless.

"I'm not making a lot of money now, but I don't mind. I make enough to do what I like and I'd rather live here in College Station than anywhere else in the world."

Lou's devotion to A&M and its Cadet Corps is reflected in his annual "ice vigil," when he furnishes a truckload of ice to the cadets during Final Review ceremonies each spring.

"I've been bringing in ice since 1943 when I moved back here from Dallas," he says. "I know how hot it gets out there—that's why I do it. I can identify with the feelings of students, believe you me."

Much of the assistance Lou provides to Aggies goes unnoticed, though. For example, he's always ready to contribute money to student functions, especially Aggie parties sponsored by Corps outfits or dormitories, according to several former students.

In addition, Lou has posted bond over the year for many Aggies who were arrested late at night for public intoxication and were too embarrassed or ashamed to notify their parents.

"I've loaned out money and merchandise to Aggies just on their word as an Aggie," he says. "And I've lost very, very little money that way."

But Lou says A&M is losing a lot of its uniqueness and friendship now that its enrollment has soared from a few thousand in the pre-World War II years to nearly 30,000 this past fall.

"I was narrow minded for a long while about girls coming to A&M and the changing of the name from A&M College to A&M University," Lou admits. "I called Earl Rudder, who was president of A&M at the time (1963), and told him and wrote to a lot of former students that we were ruining A&M by changing it. The school would lose too much to change to that degree."

Loupot says his worst fears were for the "average, every-day student, the type who has no money or fancy clothes to wear. A&M's past greatness was that everyone was equal—no one knew how much money anyone else had because we all wore uniforms and all suffered and rejoiced the same as our A&M class distinctions allowed. But with girls and civilians, it was easy to tell who had a flashy wardrobe and a big car to take dates out in. That left out the common guy. I'm still fearful of that ruining A&M."

But more tragic than the problem of class distinctions is the gradual ebb of A&M treasured traditions, Loupot says.

"They brag now when 600 people show up for Silver Taps," snorts Lou. "That's pathetic. I wish that would change back most of all—that the attitude of caring for other Aggies would continue forever with all students."

But Loupot still has faith in A&M and Aggies. Over the entrance to his store is a replica of an old sign that reads:

"Through these doors pass the greatest men on earth: Fightin' Texas Aggies—Old Army Lou, Class of "32."

IS THERE MEAT IN YOUR FUTURE?—PART 2

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. ABDNOR. Mr. Speaker. "Is there meat in our future?" is a question we all need to ask ourselves periodically. Our plentiful supplies of high quality meat of every variety consistently available at reasonable prices is a daily fact of life we take for granted.

I have already commended the first two parts of a Washington Post series on the U.S. beef economy to the attention of my colleagues. The remaining articles are presented here:

[From the Washington Post, Feb. 1, 1977]

TREND TOWARD PRECUTTING DIVIDES MEAT INDUSTRY, LABOR

(By Dan Morgan)

Costas (Gus) Deaskalakias, chief cook and meat buyer at Blackie's House of Beef in Washington, used to need seven butchers to carve steaks and roasts from the beef carcasses he ordered.

Nowadays there are only two butchers working at Blackie's. The beef Deaskalakias buys has been precut in a cattle slaughterhouse 1,800 miles away.

The slaughter company, Monfort of Colorado, Inc., in Greeley, Colo., prepares the ribs, loins, chucks, rounds and sirloins, vacuum packs them in plastic bags and ships them to retail stores and restaurants in boxes.

At Monfort, steers enter the plant as half-ton live animals and exit in small cartons ready for the fresh meat trade.

The entry of the major slaughter firms into the meat cutting business in a big way is revamping the nation's $36-billion-a-year packing industry.

The speed of these changes can be seen in a single example: Iowa Beef Processors, Inc., founded in 1961, is now the world's largest beef packing firm, with annual sales of over $2 billion and a weekly cattle kill of 80,000 animals—about 10 per cent of the national total and more than the older firms of Swift, Armour, Wilson, Morrell and Cudahy combined.

Boxed beef has been a major part of this phenomenal growth. About two-thirds of Iowa Beef's sales volume consists of these cartons of meat precut at the slaughtering plant. And Iowa Beef's share of this trade nationwide is substantial.

About 25 per cent of the money people spend on food goes for meat. And about half of the meat purchases are beef. So changes of this magnitude in the beef economy are important to consumers.

The meat industry says that boxed beef has saved consumers money. It costs less to ship boxes of high-quality boned beef cuts than it does to transport whole carcasses, and the system reduces the middlemen's fees and markups, they argue.

But the Amalgamated Meat Cutters Union claims the real savings of companies such as Iowa Beef comes from their fighting the unions and underpaying workers in the new high-speed plants.

The butchers union claims that those tactics pose a greater threat than the introduction of boxed beef.

"We are not opposed to boxed beef," says Jesse Prosten, vice president in charge of the union's packing division. The union's argument is that beef carcasses have to be cut up somewhere, and it doesn't make that much difference where.

Prosten says that there hasn't been a massive loss of jobs of retail butchers in the big cities because of the new boxed beef. Supermarket chains which buy boxed beef still need butchers to trim it for the display counter.

However, checks in several cities don't seem to bear out Prosten. Wholesaler Stanley Rosen, who distributes beef in New York City, says that in 1970 he had 16 butchers carving up carcasses shipped to New York City from the Midwest.

Today, Rosen is mainly in the distributing business. He has gotten rid of the butchers and now needs only a small crew of warehousemen to handle the boxes of precut meat as they come in from the Midwest.

Moreover, beef in boxes has been at the heart of labor-management fights in the packing industry since the lates 1960s.

Butcher unions in Chicago and St. Louis have been alarmed enough about the influx of the precut products to have written restrictions on the use of them into labor agreements with retail stores. (The General Accounting Office in Washington is investigating the possible impact of these restrictions on food and cattle prices.)

Iowa Beef first cracked the New York City market with the precut products in 1969—but only after a bruising fight with labor unions that tarnished its reputation.

That year, the company settled a strike with the Amalgamated Meat Cutters at the Dakota City, Neb., plant. Iowa Beef brought in strikebreakers during the bitter strike. Some of the houses of these workers were subsequently dynamited.

The company's annual report just issued noted that the firm was only able to ship boxed beef to New York City after it agreed to withdraw a $4 million suit against three New York locals for an allegedly illegal secondary boycott of Iowa Beef's meat during the strike.

Later, it was revealed that there had been other sides to Iowa Beef's entry into the New York City boxed market.

In 1974, a New York State court convicted the company and its cochairman, Currier J. Holman, of conspiring with a crime figure to bribe union and supermarket officials. The judge, who fined the firm $7,000, said the scheme had been aimed at buying "instant labor peace" that would remove butchers union restrictions against boxed beef.

The meetings with union officials were arranged by Moe Steinman, who in 1971 set up a company that entered into an exclusive arrangement with Iowa Beef to distribute the company's products. The company, C. P. Sales Co. of Paramus, N.J., still receives commissions from Iowa Beef for meat sold in New York City, according to an Iowa Beef spokesman.

Steinman's son-in-law, Walter Bodenstein, runs C. P. Sales. Bodenstein was brought to Dakota City last fall to be a group vice president of Iowa Beef, but he resigned after 10 days following unfavorable newspaper publicity in the Midwest.

According to Iowa Beef spokesman Cornelius Bodine, Bodenstein's only problem is that "he has an unfortunate father-in-law."

The union struck Iowa Beef's huge, high-speed Dakota City plant for eight months in 1973 and 1974, and both company and union are braced for a possible new impasse in the next two weeks. On Jan. 22, the company's contract with the butchers union expired, and the two sides agreed to extend it for two weeks.

The bottom wage at Dakota is $5.57 an hour. Prosten said that the rest of the packing industry pays $6.42 an hour minimum. Iowa Beef's competitors also claim that the Nebraska-based company's wage scale has given it a competitive edge.

The company, says Prosten, is out to break the butchers union, but Bodine responds, "We don't go around breaking unions."

The meatcutters have suffered a series of setbacks since Iowa Beef began its phenomenal growth, though, efforts to organize workers at IBP's non-union Emporia, Kan., plant have been unsuccessful so far. When the company opened a new box beef plant in Amarillo, Tex., in 1974, a handful of construction workers petitioned for Teamsters union representation and won quick recognition from the company.

About 100 workers unaffiliated with the Amalgamated Meat Cutters Union have been on the job inside Iowa Beef's Dakota City facility since Dec. 6. They are affiliated with a union called the United Industrial Packing and Allied Workers, which Prosten calls "phony." The UIPAW represents the employees of another business, Farm Products Co., which leases space in the plant from Iowa Beef.

In a telephone interview last week, Iowa Beef spokesman Bodine denied there was any plan to use the UIPAW people to operate the Iowa Beef plant in the event of a strike by the butchers union.

Nevertheless, the situation suggest the tensions at work in an industry that has earned its reputation for tough dealing and cutthroat competition.

In January, 1975, the beef industry was rocked by the financial collapse of one of the fastest growing of the major slaughter operations, American Beef Packers, Inc., of Omaha. The company filed for a limited bankruptcy, leaving several hundred cattlemen holding worthless company checks for beef animals they had sold just before the collapse.

Congress subsequently ordered a tightening of financial rules for packers.

Within the beef packing industry, Iowa Beef is both feared and respected. Competitors say the company delivers enormous volumes of high quality meat all over the country at great speed.

"Iowa Beef is not afraid to use its muscle, and it has plenty of it," said an executive of a competing company. "We try not to have large unsold quantities of any product that Iowa Beef is also trying to sell. They can raise hell with any market."

[From the Washington Post, Feb. 2, 1977]

THE HAMBURGER SOCIETY AND AMERICA'S LOVE AFFAIR WITH BEEF

(By Dan Morgan)

Americans are now devouring hamburgers at the rate of 50 billion a year.

Hamburgers have become the people's food: the equivalent of the Italian's spaghetti, the Indian's curry or the Russian's borscht.

Americans spend more than $25 billion a year for beef, and a substantial amount of that money is for hamburgers.

If any proof of the entrenched position of the hamburger in the country's diet is needed, McDonald's Restaurants can give it. The chain, with 23 billion sold already, expects to open about one new outlet a day for the next 10 years.

In Woody Allen's film fantasy "Sleeper," it had taken two centuries for McDonald's to get over the trillion hamburger mark, but at the rate things are going that may be an overly cautious estimate.

The steak, that other great national symbol, has not yet been relegated to the scrap heap of history. Americans still eat slightly less than half their beef in the form of ground meat; the rest is steaks, roasts, and other prime cuts.

But cultural and economic developments have been paving the way for the eclipsing of steak, altering the tastes of consumers and changing the structure of the beef industry.

The preference of Americans for meals and snacks in restaurants and fast food stores shows no signs of letting up. Consumer Reports magazine predicts that by 1980 half the meals eaten in this country will be away from home, if present trends continue.

The fast food industry had sales of $23 billion in 1976, and that figure may double by 1980.

Many of the chains are expanding their menus and offering more salad, seafood, pizza and Mexican recipes, but hamburgers are still the staple of the fast food industry.

The other development that seems destined to speed up the evolution of the country into a hamburger society is economic.

Sometime soon—if not this year, then surely in 1978 and 1979—the price of beef is going to rise, possibly sharply.

The stage for this already has been set on the nation's ranges and farms and in cattle fattening yards, and there is no changing it. The size of the country's beef herd is now being rapidly reduced, as ranchers suffer some of their worst losses since the 1930s. So the supply of beef is bound to drop and prices are going to rise.

The Livestock Business Advisory Services, Inc., of Kansas City, Mo., predicts that a porterhouse steak that averaged $2.39 a pound in 1976 will cost as much as $2.50 this year and $2.70 in 1978.

Most of the steaks that Americans eat are carved from steers that have grown fat from substantial quantities of corn—as much as a ton of the grain, and sometimes more.

Corn prices are now the lowest they have been since 1972, but they are still high enough to substantially increase the price of raising choice, grain-fattened animals. As the price of that kind of meat increases, more consumers are likely to switch to cheaper hamburger meat, economists say.

"After 1977, steaks are going to be something we eat only on special occasions—on those evenings when we say, "Let's get out the Lowenbrau,'" said an economist.

In this changing situation, hamburger has a special role to play in the beef economy.

Unlike choice steaks, hamburger can be made from ground-up dairy cows, imported boneless beef, or from older breeding cows of the beef herd that have been fed mostly grass. Some hamburger meat comes from animals that have been fattened on costly corn, but only a small amount of it.

Hamburger prices haven't varied much since January, 1974. Ground beef was recently on sale for under 70 cents a pound in Washington. The average price nationwide has never gone over $1.05 a pound and has usually been considerably lower.

The price of sirloin steak also is about what it was three years ago, except that there was a sudden 50-cents-a-pound jump in early 1975. The average price hit $2.25 on July 4 of that year before sliding down again.

Understanding the reason for those developments is the key to understanding what has happened, and what will happen, to beef prices.

The price of corn has a powerful impact on everything that happens with beef, since the American beef animals that make tomorrow's steaks eat nearly one-sixth of the entire corn crop every year.

Cows don't eat much corn, but they do produce calves that will. Their heifers and steers grow up to eat corn in fattening yards, so the price of corn is an important economic indicator.

In 1974, the United States had the poorest corn crop in five years and prices rose sharply. And that event, overshadowed at the time by Watergate and the resignation of President Nixon, still has import for American consumers.

When the corn prices went up, cattle fatteners who buy 450- to 750-pound calves and yearlings from ranchers reduced the prices they were willing to pay for the young animals as an economy measure.

Ranchers responded by sending an unusually large number of their calves to the slaughterhouse instead of to the fattening yard. They also sent many of their cows to slaughter, because they figured there was no point keeping cows for breeding calves that couldn't be sold to the fatteners at a profit.

There was plenty of bargain hamburger meat, as well as beef cuts labeled "grass fed."

But since fewer animals were going to the feedlots to eat expensive corn, there was a shortage of choice, corn-fed beef. That is when the brief, 50-cents-a-pound price increase for sirloin occurred.

With that spurt as the incentive, cattle fatteners began buying up all the calves and steers they could get. What they found was that the American beef herd, which had been growing in size since 1967, was too large.

Too much beef was going to market, so retail stores have been holding down prices to sell it all.

That, in a nutshell, is why prices of both steak and hamburger are about what they were three years ago, despite a long period of inflation.

The large supply of beef coming to market has cushioned American consumers against the economic blows that have hit the beef industry in the last three years.

But the time is coming when consumers will feel the impact of higher corn, fertilizer, fuel and farm machinery prices.

"It's set in concrete," said Howard Madsen, economist with the American Meat Institute.

The price of choice beef is likely to rise because many of the calves that this year should be growing into mature steers in fattening yards were slaughtered in 1975 and 1976.

Many shoppers are expected to switch from steak to hamburger to save money. But the hamburger society also is almost sure to feel the impact of what has happened.

In 1975 and 1976, a record 11 million and 10 million cows respectively were slaughtered. Most of them were ground up for hamburger meat. This cow "factory," which produces tomorrow's steers, has been reduced in size. At the same time, that killing rate can't continue, which means the supply of hamburger meat on the market will be less. The American Meat Institute estimates that only 8 million cows will be killed in 1980—30 percent fewer than in 1975.

By that time, the expansion of the fast food industry will mean strong bidding for the available supply of hamburger. The number of fast food outlets is expected to increase from 28,000 to 43,000 by then.

Prices at fast food outlets and restaurants rose much more in 1976 than did the price of food in supermarkets.

Some nutritionists feel that a sharp increase in the price of both steak and hamburger would not be such a bad thing. They argue it might encourage people to eat more balanced meals.

Even though most hamburger meat comes from ground-up cows whose meat is lean, hamburger makers add substantial amounts of pure fat to give juiciness and bond the meat together. McDonald's hamburgers are only 19 percent fat, but some hamburgers are 30 percent fat.

Surveys of meats in fast food outlets show that they are extremely high in calories. According to Consumer Reports, a snack consisting of a Big Mac hamburger, french fries and a chocolate shake at McDonald's provided 1,100 calories. That is 40 percent of the recommended daily allowance for a man.

Higher prices might persuade some Americans to switch from steaks and hamburgers to pork chops and pork patties. That would cause packers and retail stores to offer farmers more for hogs. That, in turn, could persuade some Midwestern farmers to feed the corn they raise to a new litter of hogs instead of selling the grain. If foreign countries such as the Soviet Union wanted the corn badly enough, they might react by bidding up the price, and that could throw off the calculations of the cattle fatteners again.

The beef industry is reacting to such possibilities by inventing new ways to stretch consumers' beef-buying dollars. A new process debones chunks of the tough parts of the carcass, tenderizes them with needles, molds them together and freezes them into "loaves" that can be cut into steak-like cuts and thawed later.

There is no real evidence, though, that Americans' love affair with beef is ending. They have eaten more and more per person for the last 50 years. If higher prices slow the growth down for a while, it is likely to be only a brief pause in the expansion of the hamburger society.

THE FARMER'S STEER: WHERE YOUR MONEY GOES

On Jan. 17, Safeway stores in Washington were offering choice boneless sirloin tip roast for $1.39 a pound.

The same day, slaughterhouses in Colorado were paying farmers 37¾ cents a pound for 1,100-pound, corn-fed steers from which such steaks are cut.

The $1.01¼ difference is the subject of heated arguments among farmers, packers, meat wholesalers, retail chain stores and consumers.

Is such a markup justified? Consumers and farmers usually say it isn't; the beef middlemen say it is.

Here is what happened to the farmer's steer:

The packer paid $415.25 (37¾ cents a pound) for the live, 1,100-pound animal.

But the carcass of the slaughtered animal weighed only 680 pounds, so the cost of the meat and bone to the packer actually was 61 cents a pound.

Not all of that carcass could be served up as chucks, ribs, loins, sirloins and rounds though. (There is only about 13 pounds of tenderloin on a full-grown steer.) Much of the carcass is fat and bone that has to be trimmed away. And the carcass also loses about 13 pounds as it dries in the packer's cooling room.

Restaurant and retail cuts on such a carcass probably weigh only about 480 pounds. These cuts sold to chain stores in mid-January for about $450, or an average of slightly less than 96 cents a pound. The seller could have been a packing company, if it had a facility for meat cutting, or it could have been a wholesale meat dealer who buys carcasses and breaks them down into the primary cuts.

About 75 pounds of fat still had to be trimmed off those 480 pounds of cuts before they could be put in the display counter. That brought the weight of the meat down to 405 pounds. So the retail store that paid $450 for all those cuts actually was paying almost $1.10 a pound for them, not 96 cents.

And in mid-January, the average of all the cuts sold of that kind was about $1.37 a pound. The retail stores say the 27-cent difference goes to pay butchers and checkers, and for packaging and overhead—and a small profit.

Between packer and consumer also were transportation costs (4½ cents a pound from Colorado to the East Coast) and storage costs.

But there also were opportunities for profits. The carcass probably produced about 75 pounds of hamburger meat in addition to the cuts. And the packinghouse more than offset the cost of killing the animal by selling its hide, organs and inedible parts.

CONGRESSIONAL SALUTE TO THE LENNI-LENAPE GIRL SCOUT COUNCIL OF NEW JERSEY AND THE GIRL SCOUTS OF AMERICA IN COMMEMORATION OF THE 65TH ANNIVERSARY OF GIRL SCOUTING IN OUR NATION

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. ROE. Mr. Speaker, on Saturday, February 26, residents of my congressional district and the State of New Jersey will join with the officers and members of the Lenni-Lenape Girl Scout Council of New Jersey in commemorating the 65th anniversary of the Girl Scouts of America. I rise in tribute to the significant investment in the enrichment of the quality of our way of life that girl scouting has made here in America and to seek national recognition of the standards of excellence that the Lenni-Lenape Girl Scout Council has added to this most noble endeavor.

Mr. Speaker, the historic beginnings of the Lenni-Lenape Girl Scout Council commenced in Paterson, N.J. in 1923 under the exemplary leadership of Miss Dora Goodbody whose distinguished record of performance is lastingly etched in the annals of girl scouting in New Jersey and our Nation.

In 1968 the Councils of Clifton, Passaic-Garfield and Greater Paterson merged and in 1971 was joined by the Sussex-North Warren Council to establish the most esteemed organization of the Lenni-Lenape Girl Scout Council as it is comprised today.

The people of my congressional district and State of New Jersey are deeply appreciative and gratefully acknowledge the outstanding good works of the Lenni-Lenape Girl Scout Council, Inc., which, with the assistance of more than 2,500 adult volunteers, serves over 14,000 girls in the New Jersey counties of Passaic, Sussex, and portions of Warren, Bergen, and Morris. The Council Service Center is located at 555 Preakness Avenue, Paterson, N.J. and they maintain out-of-door program centers at Camp Clipawaga, Sparta, N.J.; Camp Meyer, Hewitt, N.J.; Camp Sunowa, Sussex, N.J.; Camp Te-Ata, Central Valley, N.Y.

Mr. Speaker, the objectives, scope and focus of the girl scout program are defined in four emphases adopted by the Girl Scouts of America, as follows:

THE EMPHASES

Deepening awareness of self as a unique person of worth.

Relating to others with increasing skill maturity and satisfaction.

Developing values to give meaning and direction to life.

Contributing to society through her own talents and in cooperative effort with others.

The Girl Scout program activities support the Emphases by providing opportunities to build knowledge, skills and competencies. In a group setting a girl develops sensitivity to the feelings, needs and attitudes of others; a sense of belonging and a sense of human interdependence.

To help achieve their objectives, the Girl Scouts are directed and assisted by many outstanding community leaders who generously and unselfishly extend their time and personal efforts to the youth who participate in Scouting throughout our community, State and Nation.

I especially commend to you the following officers and members of the board of directors of the Lenni-Lenape Girl Scout Council, Inc., for their dedication, direction, and personal commitment in achieving the goals and purposes of the Girl Scouts of America:

BOARD OF DIRECTORS, LENNE-LENAPE GIRL SCOUT COUNCIL

Mrs. Margaret Wend, President.
Mrs. Susan Ronk, First Vice President.
Mrs. Sharon Sullivan, Second Vice President.
Dr. Henry Bartol, Third Vice President.
Mrs. Eleanor Brychta, Secretary.
Mr. William Carew, Treasurer.
Mrs. Louise Bartley.
Miss Diane Bennett.
Mr. David Caliri.
Mrs. Carolyn Cox.
Miss Jan Engle.
Rev. Mary Frances Evans.
Mrs. Doris Gale.
Mrs. Ruth Gannon.
Mrs. Elaine Giardino.
Mrs. Ginney Gravatt.
Mr. George Kick.
Miss Iris Lynn.
Mrs. Geneva Maletsky.
Mrs. Carol Matheis.
Miss Theresa Rooney.
Mrs. Jane Roseman.
Mrs. Dorothy Volpe.
Mr. Ervin E. White.
Mr. Robert Wilcox.
Mr. Sy Baumstein.
Mrs. Adeline Shipp.
Miss Adele Collier.
Mrs. Mary Metzger.

Mr. Speaker, may I also take this opportunity to call your attention to a resolution I am introducing in the House today to commemorate the 65th anniversary of the Girl Scouts of America which will be celebrated during their official birthday week, March 6–12. The text of the resolution is as follows:

H.J. RES. 277

Joint resolution to commemorate the 65th Anniversary of Girl Scouts of the U.S.A. and provide for the designation of the week of March 6–12, 1977 as "Girl Scouts of America Week"

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That

Whereas Girl Scouts of the United States of America, chartered by the Congress of the United State is this year celebrating the 65th anniversary of its founding; and

Whereas Girl Scouts of the United States of America, begun as a movement to liberate girls from narrow, confining life-roles, has since taken the lead in advancing what are today universal concerns as protection of the environment, youth participation in self-government, strengthened roles for the volunteer worker, and international understanding through friendship; and

Whereas Girl Scouts of the United States of America is quietly and effectively helping to unite young Americans of all races, creeds, ethnic and economic backgrounds and is providing to millions of girls and adults unlimited opportunities for self-development and responsible service to their communities and to the nation; and

Whereas Girl Scouts of the United States of America, true to its pioneering tradition, continues to anticipate the changing needs of girls and of the society and to encourage its nearly four million members to be doers, rather than talkers, leaders, not followers, and givers, not takers: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled. That the week of March 6–12, 1977 is designated as "Girl Scouts of America Week" and the President is authorized and requested to issue a proclamation calling on the people of the United States to commemorate the Girl Scouts of the U.S.A. on the 65th anniversary of the founding of this most prestigious youth organization for its progressive spirit and for its firm commitment to the values that have made this a great nation.

Mr. Speaker, Girl Scouting in America began in Savannah, Ga., on March 12, 1912 under the direction of Mrs. Juliette Low, who, while living in England, became interested in the work of her friend, Lord Baden-Powell, founder of the Scouting movement. Mrs. Low was determined to have American girls share in the excitement of Scouting and, upon her return to the United States, established the first American Girl Scout troop. In June 1913, the first national headquarters of the Girl Scouts was opened. In June 1915, the Girl Scout organization was incorporated, and on March 16, 1950 the congressional charter was granted.

Today, Girl Scouting presents a single, continuing program of activities for girls as they progress through the four-age levels of Scouting: The Brownie Girl Scouts, the Junior Girl Scouts, the Cadette Girl Scouts, and the Senior Girl Scouts. These activities are based on six elements that form the foundation of the Girl Scout program—the meaning of the promise and laws, service to others, troop management by the girls themselves, citizenship, international friendship, health, and safety.

Since the date of the founding of the Girl Scouts of America, this prestigious youth organization has grown from an 8-member group to a 2.8 million current membership of young ladies. Through their leadership qualities of self-reliance, self-control, international friendships and exchange, kindness, courtesies, and eagerness to serve others, their contribution as citizens of their community has helped eliminate prejudices; provided leisure to young and adults alike, and particularly our disadvantaged and senior citizens; achieved a greater communion and understanding among the peoples of the world; and encouraged public concern as well as action programs for the preservation, protection and enhancement of our environment—all a significant investment in the enrichment and excellence of the quality of our way of life here in America.

Mr. Speaker, I appreciate the opportunity to present this statement today and know you and our colleagues will want to join with me in saluting the Lenni-Lenape Girl Scout Council and extend our heartiest congratulations and best wishes to the Girl Scouts of America upon the observance and celebration of their 65th anniversary in service to the youth of America and the leadership capabilities and future well-being of our Nation.

THE BOUNDARY WATERS WILDERNESS ACT

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. FRASER. Mr. Speaker, today, I and 34 of my colleagues are reintroducing the Boundary Waters Wilderness Act, a bill to extend full wilderness protection to the 1-million acre Boundary Waters Canoe Area in northern Minnesota.

The Boundary Waters Canoe Area has been the center of intense controversy since its inclusion in the national wilderness preservation system in 1964. Unlike other units within the system, the BWCA was declared by the 1964 Wilderness Act to be open to commercial timber harvesting and motorized travel. The result has been that motorboating is permitted on 19 designated routes covering 60 percent of the water surface area, logging is authorized in over 40 percent of the area, snowmobiling was allowed until this winter, and mining remains a threat despite enactment of restrictive legislation by the Minnesota Legislature. The bill we are reintroducing today would close the BWCA to all these activities.

Two recent Washington Star articles outlined clearly and forcefully the management problems which have embroiled the BWCA. Written by Tim Love, the articles underscore the need for a permanent legislative remedy to these problems. I commend the articles to my colleagues' attention. The articles and a list of cosponsors follow:

[From the Washington Star, Dec. 18, 1976]

"WOODSMAN, SPARE THAT TREE!" RINGS IN MINNESOTA

(By Thomas Love)

Slightly more than one million acres of silent wilderness in the sparsley populated area along the Canadian border serve as the perfect setting for a classic environmental confrontation.

Although the basic battle lines are drawn between conservationists and business interests, there are also charges of elitism, demands for the rights of the less than physically fit and charges that present trends will destroy any possibility that future generations will be able to savor nature as it was before man came along.

It isn't a new war. The present confrontation has its roots in the beginning of the century. But this could be the last battle because the chain saws of the loggers may roar in the wilderness within a week or so and the rest may be just academic.

The site of the confrontation is the Boundary Waters Canoe Area, the second-largest natural wilderness area in the nation and the largest east of the Rocky Mountains, the first part of which was designated public land in 1902.

The area, which contains 1,076 lakes and 1,200 miles of canoe routes, stretches 100 miles along the Minnesota-Ontario border. Together with the million-acre Quetico Provincial Park adjoining it to the north, it makes up what conservationists call one of the finest largely untouched natural areas on the continent and certainly one of the most accessible to the heavily populated part of the nation.

Where there aren't lakes and streams, the area is covered with Norway pine and white pine, a treasure trove for the constant demands of the lumber industry, as well as spruce and jack pine, an equaly valuable resource for the pulp mills, the largest industry in the state.

The present battle centers on the future of these trees—whether they should be cut and hauled away to become house rafters and newspaper pages or whether they should be kept in place to provide a mammoth recreational area for generations to come.

While the future of the area may hinge on this question, there are other differences which must be settled. For instance:

How much of the entire area should be preserved in its natural state and how much—if any—should be modified to make it more accessable through roads and trails?

What about mining? There are large deposits of low-grade copper and nickle ores in the region.

Should the wilderness area lakes and streams be reserved for paddled canoes or should motor-driven boats be allowed?

And during the winter, should the area be reserved for the hardy skier and snowshoer or should snowmobiles be allowed?

But for the moment, the question of logging is foremost in the minds of those involved in the controversy.

In 1902, the U.S. forestry commissioner withdrew 500,000 acres in the area from timber, minerals and homestead entry. In those days, national forests were viewed primarily as conservation areas, not the multiuse areas they now are.

By the end of 1908, an additional 660,000 acres were withdrawn.

The first "winderness" designation came about after a controversy about Forest Service road plans in 1926 when 640,000 acres were so defined.

From then until 1964 when the Wilderness Act was passed, private holdings were purchased by the government in several moves, a ban on airplane flights below 4,000 feet was imposed to prevent "fly-in" resorts, mineral exploration began and logging operations in some areas were started.

According to the Wilderness Act, its purpose was to provide areas "where the earth and its community of life are untrammeled by man, where man himself is a visitor who does not remain . . . retaining its primeval character . . . managed to preserve its natural conditions . . . where the imprint of man's work is substantually unnoticed."

However, a special section of the law applying solely to the Boundary Waters Canoe Area was added requiring that the area be managed "without unnecessary restrictions on other uses, including that of timber" and permitting "any already established use of motorboats."

This language, according to the conservationists, was purely and simply a political payoff to the strong timber and motorboat interests and destroyed the concept of a wilderness area.

On the other hand, those business interests insist the section merely recognized existing legal contracts of timber companies, the rights of those who can't—or don't wish—to paddle a canoe and the facts of life about the need for natural resources.

Under this mandate, the Forest Service divided the million acres into two zones for timber management purposes. The first, some 600,000 acres called the "interior zone," is closed to logging.

In the second, called the "portal zone," logging is allowed. This section includes about 160,000 acres of virgin timber.

The conservationists felt not only that any logging would destroy the area as a recreational site, but that the necessary logging roads through virgin timber would be terrible themselves and bring in hordes of people, making the area into a public park rather than a wilderness area.

They didn't take this compromise sitting down and went to court to block timbering in the entire area. The actions blocked any timbering on the tracts which had already been leased to timber companies as well as mining activities. The mining question is still pending.

The conservationists won their logging case in district court but lost on appeal. Last month the Supreme Court refused to stay the appeals court order and the logging companies prepared to start operations within days.

However, two stumbling blocks appeared. First, according to James Torrence, the Forest Service supervisor with control over the area, the six affected leases must be modified to meet new environmental requirements under a management plan developed while they were blocked by the pending court action.

This, he predicted, should block any logging until next week at the earliest and probably until after the first of the year. The amendments must be approved at the level of the Forest Service at which they were initially approved—in some cases in the office of the chief—and then must be accepted by the logging firms.

When that is accomplished, he said "there's essentially nothing in the legal sense to keep them from operating."

However, one industry spokesman was both optimistic and pessimistic. Arthur Ennis of Boise Cascade Corp. in Minnesota said earlier this week that the contract modifications pose little problem and "we thought we were in business. We thought we could start work early this morning."

But then two stumbling blocks in the guise of a federal and a state law arose. The controversial federal Wetlands Act, which gives the Corps of Engineers control over waters tributary to navigatable waters, requires permits for any construction—including logging road bridges—which could affect the watercourse.

"Apparently we're OK with the federal law since there are ways to bridge a stream without altering its course," Ennis said. "But things are changing by the moment. There's a state law passed in 1973 which has some very obscure sections relating to operating permits.

"It's still not clear if it applies only to state lands or if it applies to federal lands as well," he said. While the federal law just applies to activities which affect watercourses, "the state law applies to the alteration or disturbance of public waters—period," he said.

Conservationists, however, are not putting much stock in the protection of those laws and see federal legislation as the only possibility to save the wilderness area. And by the time the next Congress can tackle the problem it will be too late if the timbering is allowed to start.

Miron Heinselman, chairman of the Friends of the Boundary Waters Wilderness, the umbrella group for organizations fighting disturbance of the wilderness, is not optimistic. Although the basic case is still pending before the Supreme Court "we think the legal game is over," he said.

"It is now a matter for Congress. There is no way to solve all these threats to the wilderness without legislation," he continued. The conservationists want a law like that proposed in July by Rep. Donald Fraser, D-Minn., which would have given the entire million acres the same protection as other wilderness areas.

Although it failed to pass this year, the conservationists are optimistic that a similar proposal would be successful during the next session of Congress. Heinselman said that his group is working through interested congressmen to get the Forest Service to block the logging operations until the issue can receive full debate in Congress.

He has also issued a public appeal to the logging industry not to start operations until Congress considers the question.

"It is not good public policy to be debating the preservation of a wilderness while bulldozers are out destroying the place," he said.

But even after the question of the logging question is settled—one way or the other—there remains the question of how to operate the remaining or entire wilderness area.

That argument is no less heatedly debated than the one over logging.

On the one side are the strict conservationists who want to ban all motorized vehicles of any kind because they consider them incompatible with the very concept of wilderness. One of their publications states "most visitors . . . accept the lakeland environment on its own terms. There is solid evidence that almost all paddlers find their experience impaired by meetings with power boats."

The same, they say, goes for snowmobiles which they charge not only disturb the skier or snowshoer but cause physical damage to snow-softened terrain and undergrowth.

At one time the Forest Service ruled that snowmobiles were nothing but the winter version of a motorboat and ruled they should be allowed in the wilderness area. They have since been banned but their backers have gone to court and the issue has not been settled finally.

The opposite view holds that this is an elitist view. Many people cannot paddle a canoe, ski or hike—or don't want to—and they should also have use of the area.

Ed Junke of Ely, Minn., and a member of the Boundary Waters Resources Committee which backs use of motorboats and snowmobiles, said, "We have nothing against esthetic values and agree that people need a place to meditate, but I don't think they need a million acres.

"We feel that we should have a bit of the Boundary Water area. We just want a few trails and a few fishing lakes for winter fun. We're not selfish. We want everyone to be able to use it. We're not trying to keep anyone else out. We just think that everyone—the old, the young, the handicapped—should be able to use some of the area.

He said that snowmobilers frequently have to rescue stranded skiers and that the terrain is too thick for them to chase wild animals—a frequent charge—and that they seldom damage terrain since most of their activity is on frozen waterways.

[From the Washington Star, Dec. 21, 1976]

MINNESOTA WILDERNESS GIVEN REPRIEVE FROM TIMBERING

(By Thomas Love)

There will be no logging in the Boundary Waters Canoe Area in Minnesota until Congress has a chance to decide if the million-acre tract along the Canadian border should be preserved as a wilderness area.

Rep. James L. Oberstar, D-Minn., said last night that the four logging interests which were planning to start operations immediately have agreed not to begin cutting for at least six months.

"This is a great breakthrough," he said. "They agreed to forego their rights to log in the canoe area this year to give Congress an opportunity to act on pending bills designed to protect the area in varying degrees from intrusion." Jack Loren, executive director of the Isaac Walton League, praised Oberstar for getting the loggers to agree to suspend operations.

"Hopefuly, this will give Congress time to consider all the bills which have been introduced to decide what the future of the area should be," he said.

"This will allow the elected representatives of the American people to decide whether the area should be used for mining and logging or whether it should be preserved as a wilderness for future generations."

The future of the canoe area became a major concern of national conservation organizations when the Supreme Court last month backed an Appeals Court decision which overturned a District Court ruling which blocked logging in the area.

Although the tract was designed a wilderness area by Congress, a special provision of the wilderness bill decreed that it must be managed "without unnecessary restrictions on other uses, including that of timber."

Conservationists called the language a political payoff to the lumber industries of Minnesota, while those interests insisted that it merely represented a reasonable recognition of existing contracts and the need for use of natural resources.

Under those provisions of the law, the Forest Service which manages the region divided the million-acre canoe area into two tracts—a 600,000-acre "interior zone" which would be closed to logging and a 400,000 acre "portal zone" in which logging would be allowed.

In a move to settle this controversy between loggers and conservationists. Oberstar introduced legislation during the last session of Congress to divide the area roughly 60–40 between a recreational area in which logging would be allowed and a wilderness area in which it would be prohibited.

An alternative bill backed by conservationists was proposed by Rep. Donald Fraser, D-Minn., which would have given full wilderness protection to the entire million acres.

Neither measure was enacted before Congress adjourned but conservationists are optimistic that some measure to protect the canoe area will be enacted during the next session.

Oberstar said that his proposal would protect the virgin forest tracts within the canoe area while allowing logging where it would not be a major detriment. "I think the reaction has been so strong against logging in a virgin forest that this is a reasonable alternative to a total wilderness area," he said.

"I have been able to persuade them to wait for Congress to make its decision giving everybody the opportunity for a compromise," he continued. "This time the industry is wearing the white hat. There were no threats or pressure, but they gave up the rights they had won in court for a larger solution. I think this is a landmark decision."

SOLARZ CRITICIZES TERMINATION OF BOMB SALE TO ISRAEL

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. SOLARZ. Mr. Speaker, last week, in the midst of Secretary of State Cyrus Vance's journey to the Middle East to take new soundings on the potential for a Middle East peace agreement, the White House announced in Washington that the sale of CBU–72 bombs, the so-called concussion bombs, had been canceled.

It is my belief that this move by the Carter administration, its first decision on the flow of armaments to the Middle East, will have substantial negative implications for the U.S. drive for a Middle East peace settlement.

Aside from the debate concerning the advisability of the sale in the first place, an even more important question as far as I am concerned is the effect of the bomb sale cancellation on Israel's perception of the credibility of U.S. commitments.

If a peace agreement is to be negotiated in the Middle East in the near future, United States guarantees of the settlement will likely be one important element in getting all sides to make the necessary concessions for peace. The Israelis have traditionally been unwilling to put their vital security interests in the hands of other powers—and their suspicions were justifiably fortified by the abject failure of the United Nations in 1967 to prevent the outbreak of war and the precipitous withdrawal of U.N. peace keeping forces from key border areas.

Now the Carter administration has made a move which can only reinforce Israeli skepticism about the constancy of American pledges. After all, it was only last October that then President Ford approved the sale of CBU–72 units to Israel. Four months later a new President has repudiated the word of the previous U.S. Executive. How can the Israelis be sure that any guarantees provided by the Carter administration as a pre-condition for peace will not be junked by a subsequent administration?

I might add that in light of the various objections raised concerning the sale in the first place, Israel promised in a letter to the Pentagon on December 16, 1976, that she would use these bombs only against military fortified targets and only if Israel were attacked by more than one country. In fact, Israel had several important military roles slated for the CBU–72, including minefield clearing, the destruction of parked aircraft even if in protected locations and the attacking of hardened missile and missile radar sites.

Mr. Speaker, the New Republic car-

ried an excellent editorial on the cancellation of the sale which I would like to place in the RECORD at this point:

HOW NOT TO LIMIT THE ARMS TRADE

The same newspaper bringing the news that the US is cancelling a promised sale of CBU–72 bombs to Israel also reported that the South Africans would soon be manufacturing atomic weapons. For this they are in the debt not of that enterprising senior at Princeton, but of our own government which over the years has channeled enriched uranium and scientists to the Pretoria branch of the nuclear aspirants club. This confluence of news is only the latest evidence that there isn't much logic to who is and who isn't at the receiving end of America's largesse with military capability.

Retarding the arms race in the Middle East is a worthy goal, indeed a necessity, and Israel should not be immune from the process. We applaud President Carter's intentions. But what Carter has done in breaking the commitment his predecessor made to Israel may not have the salutary effect on the prospects for peace in the region that his advisers persuaded him it would. Politically, the move casts doubt on the credibility of US undertakings to Israel. Any significant territorial concessions Israel is asked to make in negotiations must be predicated on the assumption that American guarantees are reliable, and that one administration will not renege on the promises of a previous one. This is exactly what Carter said while he was campaigning, but it has not guided his behavior in his administration's first major act affecting the Arab-Israeli dispute. Former President Ford and former Secretary Kissinger thought the sale of the CBUs, which are particularly effective against hardened missile sites, aircraft revetments, minefields and tank clusters, was needed to help maintain the regional arms balance that had been upset by the transformation of primitive Saudi Arabia into a modern military power. The balance was always a precarious one. It assumed that Israeli technological superiority could neutralize the colossal numerical advantages the Arabs enjoyed in weapons and troops available for battle. But the general modernization of the Arab world, the possession of advanced weapons systems by all of the combatants, and the emergence of Saudi Arabia as a possible confrontation state (and almost certainly a supplier state) in another war has altered all of the old calculations.

If Carter is genuinely intent on limiting the arms race he should, having cancelled the CBU transaction with Israel, move also to curtail some of the bloated trade in arms with the Arabs. Of particular interest here are the 1600 laser-guided Maverick missiles and more than 100 F–5E aircraft capable of carrying them that the Saudis have contracted for (see "Arms Peddling," *TNR*, Oct. 2, 1976 and "Arms and More Arms," *TNR*, Oct. 16, 1976). This would be a sign of high seriousness and of the kind of even-handedness which is quite appropriate to our function as peace broker in the Middle East.

But even if he were to do that, Carter quickly would find that unilateral American restraint on arms sales cannot materially affect the influx of new and ever more dangerous weapons systems into the region. To be sure, the only arms route to Israel is via the United States. To that extent at least, the security of the Israelis is in our hands. But what we might refrain from selling to Egypt, Syria, Saudi Arabia, Jordan and other countries, they can get from the British (desperate now for cash), the French (eager for it under any circumstances) and the Soviets (whose political ends always are served by an arms imbalance in favor of the Arabs). The arms race in the Middle East can be stopped only if the other big arms sellers are willing for it to be stopped. President Carter might do well to make Russian cooperation on this matter a measure of whether detente can actually be made to work in that part of the world where the peace is actively and perpetually threatened.

TANKER SAFETY IMPROVEMENT ACT

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. WHITEHURST. Mr. Speaker, the Parade section of the February 20, 1977, Norfolk Virginian-Pilot contained an excellent article by Alexander Cockburn and James Ridgeway entitled "Liquid Natural Gas Tankers Rouse Fears of Catastrophe." It seems to me that these gentlemen's point is well taken, and I would like to share this article with my colleagues at this point in the RECORD.

On January 4, 1977, I introduced H.R. 711, the Tanker Safety Improvement Act. This bill was drafted primarily with oil tankers in mind, but there is no reason why its interpretation could not be broadened to include LNG—liquid natural gas. I hope that full hearings on this legislation can be held in the near future, and that prompt and favorable action will be taken in order that everything possible can be done to prevent further tragedies.

The article follows:

LIQUID NATURAL GAS TANKERS ROUSE FEARS OF CATASTROPHE

(By Alexander Cockburn and James Ridgeway)

In the summer of 1883, a gigantic explosion echoed across the world. The island of Krakatoa, off the coast of Indonesia, simply disappeared into the sea. Its remains were blown 17 miles into the sky and dust particles filtered around the globe, causing extraordinary sunsets remembered by all who had seen them for years afterward. Tidal waves were observed as far away as the English Channel. The noise of the explosion was heard 3000 miles away. Thirty-six thousand people in the near vicinity were killed.

The cause of this catastrophe was a mighty volcanic eruption. Scientists now speculate that the unparalleled intensity of the blast was caused by the sudden mixture of lava with seawater, leading to the creation and release of vast amounts of energy. This theory carries a startling message for modern times. For scientists now worry that the modern industrial age may have unwittingly developed the conditions under which the "Krakatoa effect" could be repeated on a smaller scale hundreds of times around the globe.

What frightens these scientists is not the specter of nuclear explosions with which mankind has lived since World War II, but an entirely new menace: liquefied natural gas. Natural gas, often found in the search for oil, is one of our most valuable fuels. It provides about one-third of all energy consumed in the United States. It is clean and, until recently, cheap. Now U.S. companies that produce and sell natural gas from the Southwest claim the resource is fast being exhausted and, in order to meet demands, they must look further and further afield.

SOLUTION: IMPORT GAS

While gas is a precious fuel in the U.S., in other parts of the world—the Middle East, Africa and Asia—it is regarded as of little use and burned off at the wellhead, its usefulness lost to mankind. One solution now being adopted by the oil and gas industries is to ship this foreign gas to the U.S.

Gas, of course, is an impractical cargo in its natural form. The solution has been to freeze it down into a liquid form at a temperature of about —260 degrees Fahrenheit. In this state, the gas is 1/600th of its original volume and becomes a practical shipping proposition.

Within the next few years, specially built tankers will begin transporting the liquefied gas from North Africa to ports up and down the Eastern Seaboard of the U.S. There are schemes to ship the gas from Asia and even Alaska to the West Coast by these tankers. Other countries are making similar plans. The small trade from North Africa to Europe is expected to increase, and a $3 billion project is well under way to ship liquid gas from Indonesia to Japan. The U.S. government, in fact, is issuing $730 million in loan guarantees to General Dynamics Corporation—the largest guarantee ever made to a single company—for the building of tankers to carry the gas from Indonesia. The U.S. also is negotiating with the Soviet Union to bring in gas from Siberia.

If all goes according to plan, within a decade or so, scores of these odd-looking ships will be crisscrossing the ocean and routinely sailing in and out of busy American ports with their cargoes of desperately needed fuel. As much as 15 percent of the nation's gas may soon be imported in this manner.

Both in government and industry, experts hail this development as an innovative answer to the energy crisis. But these same experts now are meeting with growing opposition to their plans. At the center of debate is the question of safety and the stark fact that the explosion of just one of these gas tankers in a U.S. port could kill upwards of 100,000 people.

Little real testing has been done on the safety of the new tankers that will carry the liquid gas in huge cylinders embedded in their hulls. In 1970 the U.S. Bureau of Mines mounted a brief experiment. A small quantity of liquid natural gas was dropped into an aquarium, which promptly blew up. Later the liquid gas was dropped into a pond, with equally explosive results. The bureau concluded in a report that no assurances can be offered "that these explosions could not scale up to damaging proportions in a massive spill." The scientists engaged in these experiments all recalled one of the few cases in which the effects of an accident involving liquid natural gas could actually be observed.

On Oct. 20, 1944, in Cleveland, Ohio, 2 million gallons of liquid natural gas burst from two storage tanks belonging to the East Ohio Gas Co. and created a firestorm. Liquid gas flowed down the streets and into the sewers. The slightest spark exploded it. Manhole covers sailed into the air and fell like bombs on the fleeing crowds. So intense was the heat that birds above the city burned alive as they flew. The streets became rivers of flame. Houses exploded. In the end, 29 acres of homes and stores were gutted and 131 people lost their lives. And the liquid gas tanks in Cleveland held only a small fraction of the amount carried by a modern tanker, which ranges from about 33 to 42 million gallons.

SAFETY STUDIES URGED

In recent months anxiety over the dangers of liquid natural gas has spread. No less a figure than Dr. Edward Teller, the nuclear

physicist often viewed as the father of the H-bomb, is concerned: "The gas shortage is apt to become very serious and therefore the importation of liquid natural gas may become really necessary. . . . Time and money spent on the safety of liquid natural gas is less than one percent of what has been spent on the safety of nuclear reactors. I am suggesting that, in view of our need for liquid natural gas, very greatly increased attention be paid to safety studies."

The Coast Guard is so concerned that it has established special procedures protecting gas tankers. In Boston, where small shipments of the liquid gas are already being off-loaded, the shipping lanes are cleared of other traffic long in advance. Fire departments are placed on standby alert. Tankers may only enter the harbor if visibility exceeds two miles. At the first sign of a thunderstorm, all unloading ceases.

CONGRESS CONCERNED

Citizens' groups around likely liquid natural gas terminals (such as Staten Island, N.Y., and Los Angeles) are opposing the building of such facilities. In the Congress, in the Federal Power Commission and in the Department of Transportation, politicians and officials are nervously considering improved safety precautions. Committees in the House may begin public inquiries shortly and could well involve testimony on the likelihood of the "Krakatoa effect" occurring in the event of an accident.

Over the last few months, this concern has been redoubled. Oil tanker disasters, including the explosion of one tanker in Los Angeles harbor and the wreck of another off Nantucket, have brought home in brutal fashion the result of lax safety measures on fuel shipments to the U.S. These calamities would pale in comparison with any accident to a liquid natural gas tanker. It is a race against time on more ways than one: the race to head off another energy crisis; the race of the tanker men to get their new fleets under way; the race of government regulators to catch up on safety precautions and head off what could be a terrifying catastrophe.

JOSEPH L. DARLINGTON

HON. JOE SKUBITZ

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. SKUBITZ. Mr. Speaker, last Friday, February 18, an old friend and neighbor of mine from my congressional district, Joseph L. Darlington, died at his family home near Arcadia, Kans. Joseph was born on February 23, 1882, and would have been 95 today. Following is a reprint of a newspaper article about Joseph.

JOSEPH L. DARLINGTON

Joseph L. Darlington, 94, died at the family home near Arcadia and Oskaloosa, Mo. He had been ill and was recently dismissed from Mercy Hospital in Fort Scott. He was born February 23, 1882, in Vernon County, Mo., the son of Martin and Barbara Rhorer Darlington. He attended school in Vernon County and began farming and raising cattle.

Mr. Darlington married Ida May Basham on February 11, 1903, in Fort Scott. They made their home in Barton County, Mo., on the family farm. Membership was held in the United Methodist Church of Arcadia, and Arcadia Lodge No. 401, IOOF.

Mrs. Darlington died April 28, 1964. He was also preceded in death by daughters Johnnie Pearl Darlington, on July 23, 1912, and Ida Darlington Shriver on July 12, 1934; one son, Joseph Darlington, March 24, 1972, and three infant sons.

Survivors include three sons, Thomas M. Darlington, of Holiday, Fla., Chester Darlington, of Pittsburg, Kans., and Paul Darlington, Oswego, Kans.; four daughters, Mrs. Neva Jean Hartzfeld of Arcadia, Mrs. Estele Hartzfeld of Kansas City, Kans., Mrs. Edna Weaver of Mound City, and Mrs. Mary Lou Robison of Olathe; two brothers, John Darlington of Pittsburgh, and Wayne Darlington of Pasco, Wash.; 24 grandchildren; 52 great-grandchildren; 18 great-great-grandchildren; and 2 great-great-great-grandchildren.

The family received friends from 7 to 8:30 p.m. Sunday at the First Christian Church in Arcadia, and Arcadia Lodge No. 401 IOOF held services at 8 p.m. in the church. Funeral services were at 2 p.m., February 21. Rev. Carl Walker III officiated. Burial was at McKill Cemetery, northeast of Arcadia in Vernon County, Mo.

PROFITS, PROGRESS, AND POLLUTION IN AMERICAN AUTOMOBILES

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. BROWN of California. Mr. Speaker, the Congress is once again faced with the problem of dealing with automobile emission standards. The propaganda on this subject has been distributed for years, with the approach that the automobile industry uses to argue for delays in cleaning up their auto exhausts changing as external events change.

A time-honored argument has been that the technology does not exist to clean up automobile emissions in an economical fashion. This argument has time and again been rebutted, most recently by the breakthrough made by Volvo with the three-way catalyst. The response of the automobile industry in Washington was to deny that they could meet the same standards. But Detroit did hedge its beats, at least for California, where the State has shown it is serious about enforcing stringent emission standards. Now both General Motors and Ford have announced that they will meet the California standards with an emission control system similar, but probably cheaper than the Volvo system. So much for the "technology does not exist" argument.

A second argument against emission controls has been economics. Well, once again the automobile companies have had record profits and sales, and this despite the enormous price increases for their automobiles. It is difficult to believe that this enormous industry, with its enormous profits, cannot produce pollution control equipment economically. In fact, American auto companies can do this, as they have shown when forced to produce a better product. If nothing else, they can apply some of their profits toward reducing the pollution load. By now it is obvious that I consider the arguments of the automobile industry in favor of delaying auto emission standards to be a case of special pleading. As in most cases of special pleading, the auto industry position is not consistent with proper public policy. This has been documented time and again, and can easily be inferred from the press accounts on this subject. It is important to remember this when the letters now being generated by Detroit to lobby the Congress arrive.

In order to share with my colleagues some recent articles on the auto industries' profits, and plans for auto emission controls in California, I insert the following items in the RECORD:

[From the Los Angeles Times, Feb. 18, 1977]

GM CARS IN STATE TO HAVE ADVANCED EMISSION UNITS

(By Harry Anderson)

General Motors Corp. will install three-way catalytic converters and electronically controlled carburetors on a limited number of cars to be sold in California beginning this fall, GM President Elliott M. Estes said here Thursday.

GM thus becomes the third auto maker to experiment with such advanced emissions control systems to meet California's tougher pollution standards. Volvo first introduced them on 1977 four-cylinder models, and earlier this month Ford Motor Co. said it would install similar devices on about 30,000 1978-model Pintos and Mercury Bobcats to be sold in the state.

During a press conference at the Greater Los Angeles Press Club, Estes said GM—which had earlier expressed concern that such three-way catalytic devices might not be practical—would introduce them on 1978 Pontiac Sunbirds equipped with 2.5 liter, four-cylinder engines and 1978 Buick Skyhawks equipped with 3.8 liter, V–6 engines. He said he expected the new system will be offered on "at least 1,400" cars and perhaps as many as 2,000 or more.

A big advantage of the new system, said Estes, will be to boost GM's fuel economy average in California. Currently, the company's car get about 2 miles per gallon less, on average, than those sold in the other 49 states. The fuel penalty has been attributed to the state's tighter pollution limits.

"We've got a chance of being within one mile per gallon of the federal fuel economy average" on 1978 models sold in California, he said.

Estes said GM had recently discovered a means to use a conventional automobile carburetor with a three-way catalytic converter by utilizing an electronic exhaust feedback and fuel metering system. Previously, the advanced converters could only be used with a much more expensive fuel injection system which GM didn't think was "reasonable" for mass production of cars, he said.

(Catalytic converters have been used on most new cars since 1975 to control emissions while affording better fuel economy. "Three-way" converters are so named because they are able to reduce emissions of all three major automotive air pollutants, while present converters affect only two.)

The company has not decided how much more it will charge for cars equipped with the new system, Estes said, but he expects its cost to be "less than half" what it would have been if GM had used fuel injection instead of the conventional carburetor. Fuel injection now costs $100 to $300 extra, he added.

"We're initiating this on a relatively low volume in California on the basis that this may be the next technological step in the emission control program," he said.

However, he declined to say if GM would utilize the new system on all of its cars if it proves successful in California. Eventually,

the nation may have to develop a "two-car" program in which some cars will be equipped with more pollution control devices for high-pollution areas.

"We say that maybe we shouldn't put that same car into Grand Island, Neb., where the wind blows every day so damned hard that whatever comes out ends up in Chicago in three minutes," said Estes.

Previously, GM had expressed concern that if all cars were equipped with three-way converters there would be insufficient rhodium to meet production needs. (Rhodium, a trace element extracted during the mining of platinum, is an essential part of the advanced catalytic system.)

However, Estes said Thursday that he foresees no shortage of the metal if its use is confined to California cars.

The GM executive said the company has been unable thus far to solve one problem with the advanced system. Its oxygen sensor, which directs the flow of fuel through the carburetor according to the amount of pollutants it measures in the car's exhaust, must presently be replaced every 20,000 miles, although "we're trying to get to 50,000." He said the sensor costs less than $20.

(Volvo recommends that its sensor be changed every 15,000 miles, and Ford has specified a change every 25,000 miles.)

At the press conference, Estes also said that:

He expects 1978-model GM cars to achieve better than 19 miles per gallon on average, and "hopefully 19½ m.p.g." That compares with 18.4 m.p.g. for 1977. He said the company expects to meet increasingly tight federal requirements for fuel economy without limiting production of its biggest cars—at least through 1980. The auto makers must average 18 m.p.g. for their 1978 models, 19 m.p.g. on the 1979s and 20 m.p.g. on the 1980s.

"We will have redesigned every single car in our line by 1980 to improve fuel economy," he said. Its redesigned intermediate cars—such as Oldsmobile Cutlass and Chevrolet Monte Carlo—which will be introduced next fall will average 3 m.p.g. more than their 1977 counterparts, he said.

GM has made "significant progress" in developing a new zinc/nickel oxide battery which could lead to production of a lightweight, inexpensive electric commuter car.

Such a vehicle could become an important factor in "at least 10 years or so." The electric car's drawbacks until now have been the high cost and weight of existing lead acid batteries.

He said GM has a "tremendously strong" program to produce a 2,500-pound, $3,500 two-seat electric car with luggage space and a range of 100 miles at up to 50 m.p.h.

[From the Washington Post, Feb. 16, 1977]

FORD SALES, PROFITS AT PEAK

(By Douglas Williams)

DETROIT, Feb. 15.—Despite a four-week strike last fall, Ford Motor Co. today reported worldwide record sales and profits for 1976 of $28.8 billion and $983 million respectively.

The Ford results had been widely anticipated and followed by a week General Motors Corp.'s similar report of a record $2.9 billion profit on worldwide sales of $47.2 billion.

Ford dollar sales were up 20 per cent from 1975's record $24 billion and profits were up 14 percent from the previous record of $907 million set in 1973.

Total car and truck sales for 1976 were a record 5.3 million compared to the previous 4.6 million set last year.

A joint statement by chairman of the board Henry Ford II and president Lee Iacocca said the 14 per cent rise in profits from 1973 was actually a 14 per cent decrease when measured in constant dollars to eliminate inflation.

The strike by the United Auto Workers against Ford last September and October reduced sales by 438,000 cars and trucks or about $2.1 billion and profits by $348 million, the company said.

A change in accounting practices to the last-in-first-out (LIFO) method reduced profits by another $81 million.

Ford indicated its expected results in a contradictory year when it worked five assembly plants, employing 23,000 blue collar workers, over the Christmas to New Year holiday producing intermediate and larger cars.

A major assembler in those plants, the most common UAW classification, grossed just over $168 for each eight-hour day clocked in that period.

Federal income taxes for 1976 were $731 million, according to Iacocca and Ford.

In their joint statement, the Ford executives said: "The U.S. economy is recovering from the pause that started last summer. In recent months, most leading indicators increased at an accelerated rate, giving us confidence that the recovery will continue through 1977."

They said the company produced 3.5 cents profits on each dollar of sales during 1976, compared with 1.4 cents on each sales dollar in 1975 and 4.0 cents in 1973.

General Motors made the same comparison a week ago, quoting 6.2 cents in after tax profit on the sales dollar in 1976 versus 3.5 cents in 1975 and 6.7 cents in 1973.

B.F. Goodrich Co., a major tire and rubber maker, yesterday reported sharply lower earnings for 1976, which it blamed on a 141-day strike by the United Rubberworkers Union last year.

Goodrich said its profits in the fourth quarter jumped to $22.9 million ($1.53 a share), nearly five times 1975's fourth-quarter earnings of $3.9 million (23 cents). Sales in the quarter gained nearly 3 per cent, $510.3 million from $495.9 million.

But for all of 1976, Goodrich earned $15.8 million (95 cents), off 28 per cent from 1975's $22.1 million $.41). Sales for the year rose nearly 5 per cent to $1.996 billion from $1.901 billion.

DAIRYMEN OPERATING AT A LOSS

Hon. Theodore M. (Ted) Risenhoover

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. RISENHOOVER. Mr. Speaker, Oklahoma State University has completed a study showing that dairymen in Oklahoma and surrounding States are losing $79.66 a year on each cow they are milking.

Worse, in the Midsouth region, dairymen are losing $174.58 annually, according to the OSU study by three experts.

At present, dairymen are receiving parity support of 77 percent. I have introduced legislation raising parity to 90 percent—which would assure a profit—not a loss—for farmers who produce the milk for our tables.

Several factors enter the current picture.

The drought has reduced foliage supplies and dairymen are forced to feed their herds more expensive grain.

Because of an equally sluggish market for beef cattle, dairymen are resisting the possibility of selling milk cows to the hamburger factory. Should the red meat market improve, I believe that many cows that are being milked would be sold to slaughter.

The beef market is so poor, I am told, that some ranchers have started selling their calves and milking beef cows because they need the cash flow—even if costs of production exceed the price they get for milk.

Housewives across the land should know that our farmers must have a profit if they are to continue producing the milk, meat, and other foods which we feed our families. Congress should take early steps to change public policy and place dairymen and ranchers on a solid footing for economic survival.

FEDERAL FLOOD INSURANCE

HON. JOSEPH S. AMMERMAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. AMMERMAN. Mr. Speaker, my newspaper report to the citizens of the 23d Congressional District of Pennsylvania this week concerns the Federal flood insurance program. I believe the information would be of value to the Members.

An important concern of mine for the past several days has been the threat of widespread flooding this spring in the 23d District, and the rest of Pennsylvania, as a result of the severe winter.

A number of Pennsylvania State officials were in Washington recently to brief the State's congressional delegation on the flood situation, among other matters.

They say the buildup of snow and ice this winter has been the worst since the 1930's. In some areas of Pennsylvania the ground is frozen to a depth of 40 inches.

If we have a fast thaw or extensive rainfall during the thaw, the ground will not be able to absorb the water from the melting snow and there will be very damaging floods.

At this point there is no cause for public alarm. Disastrous flooding is not inevitable, and a gentle thaw could resolve much of the problem.

However, it does seem likely that there will be at least some flood damage this spring, and I think prudence would dictate that the residents of the 23d District take some precautions against the threat.

The Government cannot stop floods from occurring. But your Government has made available to you a program which can help you protect yourself from flood losses—the Federal flood insurance program.

Most of the communities in the 23d District already are participating in the program. I urge those communities that are not participating to reexamine their situations and take another look at the program.

The Department of Housing and Urban Development, HUD, here in Washington has authorized the Pennsylvania Department of Community Affairs in Harrisburg to help communities prepare

their applications. And HUD has promised that it will cut the time it takes for the applications to be processed in Washington from the normal 6 days to 3.

In a participating community homeowners can purchase up to $35,000 insurance coverage on the houses plus $10,000 on contents.

The premium rate, which is federally subsidized, is 25 cents per $100 worth of coverage on your house; 35 cents per $100 for the contents. The maximum possible premium for a single-family home is $122.50.

This coverage may be obtained from any licensed insurance agent.

An important point to remember is that there is a 15-day waiting period before new policies become effective. So the sooner you acquire it the better.

I am not an insurance agent and I am not telling you to go out and buy the flood insurance.

I am telling you that the Federal Government established this program in 1973, that it is available to you and that given the prospects for flooding this year, it is a way to protect yourself against losses.

You ought to consider it.

TWENTY-THIRD CONGRESSIONAL DISTRICT

COMMUNITIES NOT PARTICIPATING IN THE FLOOD INSURANCE PROGRAM

LOYAL LEAGUE OF YIDDISH SONS OF ERIN CONDEMNS RELEASE OF ABU DAOUD

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. WOLFF. Mr. Speaker, once again, I would like to address myself to the serious problem of international terrorism which continues to threaten the safety and welfare of citizens of all nations.

The Loyal League of Yiddish Sons of Erin joins with me in condemning the many acts of terrorism with which we have been confronted in recent years, and in particular, concerns itself with the continuous struggles of Israel and Ireland.

In concert with many of my colleagues, I have expressed my extreme disapproval of France's action in releasing terrorist Abu Daoud. The Loyal League of Yiddish Sons of Erin has voiced these same views in the form of a mailgram to the Honorable Jacques Kosciusko-Morizet, Ambassador of France to the United States. I would like, at this time, to insert the contents of this correspondence as a reminder of the necessity of halting such actions in the future:

Abject surrender of notorious gangster and murderer Abu Daoud is a shameful and revolting chapter in the history of the Republic of France. In keeping with your humiliation it is fitting that you lower the Tri-color to half-mast in memory of the honor of the France that once was.

I would also like to thank Mr. Michael Mann, president of the Loyal League of Yiddish Sons of Erin, for bringing this important statement to my attention.

WHAT DO THEY WANT?

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. ABDNOR. Mr. Speaker, in a day and age when the environmental impact statement on just about everything has become a goal in itself, rather than a step to a further goal, it is occasionally appropriate to stop and wonder what is happening, and if what is happening is what we really want to happen.

The February 18, 1977 edition of the Rural Electric Newsletter contains a conversation piece by Mike Molony which asks a question we all need to ponder. I commend it to the attention of my colleagues:

CONVERSATION PIECE: WHAT DO THE ENVIRONMENTALISTS WANT?

A 184-page answer to that question was released here in Washington last week. The product of a $60,000 grant from the Rockefeller Brothers Fund, Inc., the report, entitled "The Unfinished Agenda," is billed as a "consensus document." In it, the nation's leading environmental organizations, including Friends of the Earth, Sierra Club, Natural Resources Defense Council, Wilderness Society, Zero Population Growth, National Wildlife Federation, the Nature Conservancy, Environmental Defense Fund, Izaak Walton League, National Parks and Conservation Assn. and the National and Massachusetts Audubon Societies, reveal their collective perception of the critical issues of the next decade.

To a great extent, most of the ideas in this "Citizens' Policy Guide to Environmental Issues" have been aired before in other reports, of other studies, by other task forces, funded by other foundations.

Where this particular document breaks new and disturbing ground, however, is in some recommendations which seem less concerned with the physical quality of our environment, and more related to our social and economic value system and the basic political philosophy of this nation.

There is no attempt to mask this focus. "This book is about a world transition from abundance to scarcity," they say, "a transition which requires a profound change of human values." And what are some of these values which the environmental consensus feels must be changed? Here are a few:

Establish a national goal of population stabilization or gradual decrease;

Eliminate additional tax benefits for those with three or more children;

Gradually reduce and stabilize quotas for legal immigration;

All forms of foreign assistance should be linked to bringing birth rates into line with death rates;

An all-out effort should be made to eliminate the most significant cause of human cancer—tobacco smoke;

The U.S. must develop a "worthy" land ethic;

Certain biological and genetic research should be banned entirely, and

The Council on Environmental Quality should monitor and analyze the environmental message contained in all programming and commercials on U.S. television.

Now this is not to say that a connection of sorts cannot be made between some of these factors and the ultimate quality of the environment. But I fear that, using the same logic, just as good a case might be made for the environmental undesirability of many more of the personal freedoms we long have cherished as Americans. Could not a case be made about the negative environmental impact inherent in our freedom to travel where and when we wish? How about our freedom to make use of and enjoy the parks and other wilderness areas which our taxes help to preserve and maintain?

We now have the freedom to choose for ourselves how best we can balance our concern for the quality of the environment with our desire for a quality of life made possible by adequate energy supplies and an active economy. Is this right in the best interest of the environment? Perhaps not—but I would maintain that overall, it is in the best interest of the people.

The environmental issue is an emotional one and is certain to spawn some who will propose, and wish they could impose, harsh and unjustifiable solutions to our environmental problems. To balance this, reasonable persons must never hesitate to speak out against unreasonable ideas for fear of being wrongly branded as not favoring a clean safe and healthful environment for us all. Preservation of our environment must be a top priority—but not the only priority.

—MIKE MOLONY.

SHOE IMPORTS

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. DENT. Mr. Speaker, by April 8, President Carter must start to act on the recent recommendation of the International Trade Commission to impose a tariff rate/quota system on shoe imports. The Commission recently concluded, by a unanimous margin, that increased imports of shoes have severely damaged the domestic industry, displaced workers, and threaten the remaining work force should the imports continue unabated.

In an informative letter to President Carter, AFL–CIO President George Meany has delineated the problems confronting the 265,000 workers in the shoe industry. I am including it at the end of my statement for my colleagues' information.

As many of you are aware, I personally do not believe that we can continue to systematically disregard the fate of small, labor-intensive industries in the United States. Such a policy ignores the importance of the large number of jobs presently provided in labor-intensive industries, and second, ignores the direct dependence of hundreds of American towns on manufacturing plants engaged in the labor-intensive production of goods. It is the payroll of the manufacturing plant circulating in the form of wages in a community that provides other jobs, that buys homes, that pays taxes, that provides community services. At a time when we need more jobs, it is ironic that we would consider not protecting the ones we already have.

It would seem fitting at the start of this new administration to reexamine those trade policies that directly and often adversely, affect the work force in the United States. The case involving the shoe industry is a good place to start.

AFL–CIO President Meany's letter follows:

AFL–CIO,
Washington, D.C., February 14, 1977.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The AFL-CIO urges you to save the jobs of thousands of American shoe workers by acting immediately to curb the flood of imported shoes now destroying U.S. jobs and production.

On December 28, 1976, the International Trade Commission unanimously concluded that the industry had been severely injured by imports—the second finding of injury in less than a year. And imports still pour in.

Shoe imports have risen from over 21% of the U.S. market in 1968 to about 50% in 1977. During this period alone, about 70,000 jobs in the U.S. shoe industry have been lost. The specific job losses and plant shutdowns have affected hundreds of communities in various parts of the nation—more than 100 in the past two years. These job losses also affect jobs of workers in supplying industries and local government workers, since the tax base of the community has been destroyed.

While the Congress is being urged to adopt special programs to create jobs, it would be unrealistic to ignore the 265,000 jobs in shoe production and related industries now endangered.

Because these problems are so serious, the AFL–CIO is concerned that the International Trade Commission did not grant the union request for quotas on imports. That would be the most effective and least expensive remedy for workers, employers, consumers and taxpayers. Instead, a majority of the Commission recommended a tariff rate quota. Such a quota will have no substantial effect without these three factors: (1) Raise that tariff quota rate by 50 percentage points; (2) permit no exceptions and (3) hold the tariff level for at least five years. Anything less amounts to slow but certain death of the industry and a substantial loss of jobs.

We urge you to regulate shoe imports as soon as possible with effective actions.

Sincerely,

GEORGE MEANY,
President.

RECENT ACHIEVEMENT OF AXEL H. HEIMER OF ST. THOMAS

HON. RON DE LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. DE LUGO. Mr. Speaker, it is a great pleasure to share with my colleagues the recent achievement of a native Virgin Islander. Mr. Axel H. Heimer of St. Thomas.

While assigned by the Department of the Interior as Acting Comptroller for the government of Guam and the Trust Territories, Mr. Heimer received a letter of recommendation from the Governor of the territory in appreciation for the technical assistance and training he provided to the staff of the bureau of budget and management research in developing an indirect cost allocation plan for the government of Guam.

Governor Ricardo Bordallo called Mr. Heimer's contributions "above and beyond the call of duty" and his able and expert assistance invaluable. The chief executive of the territory likewise inducted Mr. Heimer into the Ancient Order of the Chammori.

The outstanding performance and expertise offered by this Virgin Islander to his sister territory is a source of pride for all the citizens of the Virgin Islands. On their behalf, I congratulate Mr. Axel H. Heimer and salute his professional contribution.

CENTRAL ARIZONA PROJECT

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. RUDD. Mr. Speaker, Arizona citizens are shocked by President Carter's sudden decision to cut funds for the Central Arizona project from the fiscal year 1978 Federal budget.

This is a vital reclamation project that has been underway since it was first authorized by Congress in 1968. The CAP is 20 percent completed, and we currently have invested more than $390 million in its development and construction.

It would be economically and environmentally foolish to stop this project now, I hope that both the Carter administration and Congress will realize that fact.

Interior Secretary Cecil Andrus appeared before the House Interior Committee this morning to explain the President's action. I am a member of this committee and was not impressed with the inconsistencies in the administration's position or the way in which the decision to delete funding for the CAP was reached.

I would like to include my remarks to Secretary Andrus during the committee meeting at this point in the RECORD:

STATEMENT OF HON. ELDON RUDD, DURING APPEARANCE OF INTERIOR SECRETARY CECIL D. ANDRUS BEFORE THE HOUSE INTERIOR COMMITTEE, FEBRUARY 23, 1977

Secretary Andrus, the Imperial Presidency was established at 1600 Pennsylvania Avenue when President Carter ordered a halt to the funding of the Central Arizona Project and 18 other reclamation works.

The President says he moved in the interests of the environment and the economy. Well, people are a most important part of the environment of the United States. And the economy of much of the West is dependent upon water collected and delivered by reclamation projects.

I was out of Washington on a Congressional mission to the Panama Canal when the White House announcement was called into my office at 7:40 p.m. last Friday. To my knowledge, no member of the Arizona delegation had been consulted in advance about the President's decision.

Either the President had been badly misinformed—or his action demonstrates a callous disregard for the welfare of the people of the states affected, and ignores the wisdom of prior Congresses and prior Presidents who authorized these projects.

I am saddened by the President's action. I am dismayed by his apparent lack of under-

standing of the value of reclamation. I am incensed by the manner in which his decision was communicated.

Was this the action of a wise, compassionate, prudent President? Did he come to the Congress with newly discovered engineering and economic data? Did he solicit our advice to the course he proposed to take?

No, indeed. He announced the decision with all the humility and compassion of an arrogant emperor.

The bill authorizing the Central Arizona Project, which passed the Congress in 1968, was sponsored by the Honorable Carl Hayden, a distinguished Senator who is revered for his accomplishments for Arizona and the nation.

The 90th Congress authorized funds for engineering in the FY 1970 budget, and each succeeding Congress has authorized additional funds. To date, $390.4 million has been invested in the project.

This construction is to deliver a portion of Arizona's share of the Colorado River water to the water-short municipal, industrial, and agricultural users in Central Arizona.

Originally thought of as a rescue operation for agriculture, the population growth has changed that emphasis, with approximately 50 per cent now being allocated to municipal and industrial users.

The cut-off of funding will eliminate many jobs in Arizona. It is noteworthy that the President's press secretary has dismissed this aspect, saying that "Most of the workers are transients."

Does the President mean that transients aren't people who need jobs? Doesn't the President know that highly skilled construction workers are required by their trade to move from job site to job site? You can't stay in one place for 30 years drilling tunnels.

President Carter and his advisors—and I would guess you to be one of them—have had about four weeks to review the Central Arizona Project and the other projects to make up their minds. Prior Congresses and two former Presidents, after years of study and continued examination, all concluded that the CAP was a worthwhile investment—necessary to the welfare of Arizona.

These funds are not giveaways to the states involved. They are investments—and over the long-term most of the money will be repaid to the Federal treasury. In fact, Western reclamation projects have produced more wealth than all the gold ever mined in the United States. Water is the foundation for all that has been built in the West.

If this project is stopped by the President's action, we will lose the $390 million already invested. If it is delayed, 2 million people will face a certain serious water shortage by the end of the next decade.

At a time when the West is suffering from an acute water shortage, it is difficult—if not impossible—to understand the President's logic.

I can only guess that the President and his advisors took a survey of the vote count across the United States, and have determined that those states like Arizona that did not support him must now be penalized for their political views.

CUT REDTAPE AND PAPERWORK

HON. TOM STEED

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. STEED. Mr. Speaker, Congress enacted the Occupational Safety and Health Act in 1970 to protect American workers from occupational accidents and diseases. But in creating the administrative infrastructure of OSHA, Congress also created massive paperwork burdens for every employer in America.

The enabling statute does state that information required for the administration of OSHA should be obtained with a "minimum burden upon employers." However, in hearings throughout the Nation, witnesses constantly complained of what they felt were unnecessary paperwork requirements of OSHA.

The Commission on Federal Paperwork recognized the need for an in-depth, but expedited analysis of the more pressing paperwork burdens associated with the administration of OSHA. In 4 months, time, the Commission presented the Congress and the President just such an analysis, plus 26 specific recommendations for actual paperwork reductions, or areas of paperwork which should be monitored as the development and refinement of reporting requirements and various safety and health standards progress.

These recommendations include:

Relieving employers with less than 100 employees of the need to keep a log of illnesses and injuries;

Employers subject to multiple Federal agency jurisdictions should be able to report to a single source, which would in turn notify Federal and State agencies requiring information;

Eliminating recordkeeping requirements which have little or no impact on employee safety and health;

Developing an onsite consultation program to assist employers in complying with substantive and administrative requirements of OSHA;

The Commission recommended that:

Congress should reconsider its need for the very complex and expensive annual report which OSHA must submit;

Other recommendations include identification of paperwork burden areas which show promise of significant paperwork reductions.

Mr. Speaker, the OSHA study has outlined many areas of possible paperwork reform—reforms which can save the American businessmar, particularly the small businessman, millions of dollars, millions of man-hours, and immeasurable frustration. I shall discuss other Commission study efforts in the days ahead, including our examination of the Employment Retirement Income Security Act, ERISA, and shall report to the House specific savings associated with the implementation of our paperwork reductions recommended for OSHA and other programs.

LEGISLATION TO LIMIT DIPLOMATIC IMMUNITY

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. ASHBROOK. Mr. Speaker, one of the most abused areas of our law is that providing for diplomatic immunity. Many foreign diplomats and their staffs violate our laws with immunity. Then if anyone tries to do something about it, they fall back on the claim of diplomatic immunity.

Embassy personnel will park their cars in illegal zones and refuse to be responsible for parking violations. They will lease apartments and then refuse to pay the rent or cover any damage they may have done. They will be the party at fault in an automobile accident yet assume no liability to the injured party.

And these special privileges apply not only to a selected few. Embassy secretaries, cooks, chauffeurs, clerks, and any other positions you can imagine are all entitled to the same protection.

This situation is highly unjust. It is ridiculous to have all these people running around our society like a privileged class. That is why I am introducing legislation to severely limit diplomatic immunity.

My bill would exclude most of the people currently protected by diplomatic immunity. Cooks, chauffeurs, secretaries, and other staff members would be made responsible for their acts.

Specifically, my bill restricts those eligible for diplomatic immunity to the head of the diplomatic mission and his immediate family. In addition, two members of the staff with diplomatic rank and their immediate families would also be entitled to this protection. No one else would be able to claim the privilege.

My bill would bring a reasonable balance to the area of diplomatic immunity. The time for reform is long overdue.

GEN. TADEUSZ KOSCIUSZKO

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. LEDERER. Mr. Speaker, I insert into the RECORD the following remarks made by Mr. Henry J. Wyszynski, of Philadelphia, Pa. Mr. Wyszynski is the president of the Polish American Congress of Southeastern Pennsylvania.

On February 12, 1977, Mr. Wyszynski attended the ceremonies in Philadelphia honoring the Revolutionary War hero, Gen. Tadeusz Kosciuszko. At this celebration, Mr. Wyszynski delivered the following remarks:

REMARKS BY HENRY J. WYSZYNSKI

Thirty-three years ago at a Constitutional Assembly held in the City of Buffalo, New York, individual delegates from more than thirty states representing the religious, professional, veteran, social and civic groups of Americans of Polish heritage met to organize a national umbrella organization to concern itself with the welfare of over eleven million Polish Americans throughout the United States.

In the following year, the Southeastern Pennsylvania state division, comprised of over 250,000 Polish Americans in the metropolitan area of Philadelphia, Berks, Bucks, Delaware and Montgomery counties came into existence.

As a national body, the Polish American Congress devotes its energies to matters pertaining to the people of Poland, informing the American public of Poland's historic role, her aims, needs and her rights to independ-

ence. We have encouraged cooperation of America's democracy supporting the freedom loving people in Poland in the fields of civic, social, ideological and economic life.

On the domestic front, we have concerned ourselves with the improvement of the welfare of Americans of Polish heritage, with emphasis on the socio-economic problems of our neighborhoods, providing better job opportunities and to prevent discrimination against our people. As a result of our activities, increasingly qualified representation of the Polonia is being selected for high city, state and federal offices.

Today we gather in this historic area of the early colonies to pay tribute to a great American hero, Tadeusz Kosciuszko. He arrived here in the city of Philadelphia, the Cradle of Liberty, in the summer of 1776 as the first foreign volunteer to offer his outstanding military engineering expertise and to serve in the Colonial Armies under General George Washington, during the struggle for American freedom. That he was a resident of our great city was acknowledged by the United States government in the dedication of the Kosciuszko House at 301 Pine Street as a national memorial in 1977.

Now two hundred years later it is most befitting that we, as Americans, proudly honor the memory of General Tadeusz Kosciuszko, on this the 12th day of February, 1977, the 231st birthday of this American Revolutionary War hero, with these wreath laying ceremonies sponsored by the Polish American Congress of Southeastern Pennsylvania.

On the occasion of these ceremonies, as we open the third century of these United States in the shadow of the Liberty Bell and Independence Hall, it is also proper that we, the newly elected officers of our state division, formally inducted in your presence, reaffirm ourselvs to promulgate the original aims and purposes of our organization and carry on the traditions set out by the organizers of the Polish American Congress. With the help and assistance of our member organizations and the cooperation of our federal, state and local governments we pledge you this rededication, so help us God.

THE JEFFERSON COUNTY MENTAL HEALTH CENTER RELIEF ACT

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. WIRTH. Mr. Speaker, I am introducing today a bill for the relief of the Jefferson County Mental Health Center. Located in Lakewood, Colo., the center provides mental health services for a tri-county area. Unfortunately, the center has suffered a series of administrative misunderstandings with the Internal Revenue Service that can only be remedied through legislation.

The problem developed over the payment of social security taxes by the center. The Jefferson County Mental Health Center, a nonprofit organization, is exempt from employee participation in the social security program. However, employees at the center elected to participate in the program.

Proper forms were filed with the IRS and FICA taxes were deducted and paid beginning in 1963. However, in the course of an IRS review of the center, it was discovered by the IRS that the proper form for employee withholding had not been filed.

The IRS informed the center that because of a lack of the proper forms, the center had been wrongfully withholding the FICA tax. The IRS told the center to reimburse the employees for FICA taxes withheld and that the IRS would reimburse the center.

The Jefferson County Mental Health Center reimbursed 133 employees for a total of $74,128. Shortly thereafter, the IRS informed the center that proper forms had been originally filed and had now been located. Consequently, the IRS said it would not reimburse the center for money it had already returned to employees.

By this time, it was too late to get the money back from the employees, who had spent the money or were no longer employed by the center.

The IRS cannot remedy this unfortunate mistake because it does not have the authority to expend funds without a legal obligation to do so or a statutory authorization. This bill provides that the Secretary of the Treasury determine the amounts withheld and treat these amounts as tax overpayments which are then reimbursable to the center.

A companion bill had been introduced in the Senate by my colleague, Senator HASKELL. I hope this matter can be enacted upon quickly to remedy the situation for all concerned.

THE FEDERAL GOVERNMENT AND HIGHER EDUCATION

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. FORD of Michigan. Mr. Speaker, on February 11, our distinguished majority whip, Mr. BRADEMAS, addressed the National Association of Independent Colleges and Universities, NAICU, at its first annual meeting in New Orleans, La.

This organization is comprised of over 600 institutes of postsecondary education and includes on its secretariat the chief executive officers of 18 national postsecondary education associations.

The membership was, indeed, fortunate to hear an excellent speech entitled "The Federal Government and Higher Education" by my good friend and colleague, Mr. BRADEMAS, who has served on the Committee on Education and Labor for almost two decades. During this time, he has developed a national reputation for being one of the most well-informed, articulate, and effective education-oriented legislators in this body.

At this point, I would like to insert into the RECORD the text of this address for the benefit of my colleagues.

THE FEDERAL GOVERNMENT AND HIGHER EDUCATION

(An address by Congressman JOHN BRADEMAS, Chairman, Select Education Subcommittee, Committee on Education and Labor, and Majority Whip, U.S. House of Representatives, at the Annual Meeting, National Association of Independent Colleges and Universities, February 11, 1977, New Orleans, La.)

I am honored to have been invited to address you at the first annual meeting of the National Association of Independent Colleges and Universities. As one who has a special concern for private higher education and who has for over eighteen years sat on the committee in the House of Representatives with responsibility for higher education, I applaud the formation of your association and am confident that it will add a new dimension to the shaping of Federal policy in this field. You are clearly off to a running start by the selection of Steve Muller, my valued friend of over 25 years and an outstanding leader in American education, as the first Chairman of your Board of Directors, and John Phillips, an experienced and effective advocate, as your Association President.

I should like today to share some thoughts with you on what I perceive to be some major trends in postsecondary education; suggest the issues these trends pose, particularly for independant colleges and universities, comment on the likely responses to them from the Federal government; and then make bold to suggest what your role can be.

TRENDS IN POSTSECONDARY EDUCATION NEW DEMANDS

One of the most obvious trends affecting higher education, and, indeed, education at all levels, is the escalation in the demands being placed on educational institutions and educators. As a nation we have heaped on education the responsibility for solving many of our most intractable social problems and our most virulent social pathologies.

We expect education to cure the effects of centuries of slavery, segregation and racism. We expect education to create a new and equal role for women in our society. We expect education to integrate the handicapped into the mainstream of American life. We expect education to turn out people with the life skills to cope with the complexities of an industrial society. We expect education to train people to find jobs and make a contribution to the economy. We expect education to produce both good citizens and sensitive human beings. We expect education to help solve the problems of drug abuse, poor nutrition habits, inadequate consumer information, environmental abuse, and the breakdown of the family.

You and I know that many of our social institutions are in a state of flux and uncertainty, that the family, the neighborhood and the churches have all lost their traditional hold on individuals. But we seem to think that our educational institutions must—and can—take over many of the functions of these changing institutions.

EDUCATIONAL OPPORTUNITY

One important facet of these new demands on education is the opening of opportunities to groups that have heretofore either been excluded from or not enjoyed the full benefits of our educational system. Minorities, women, the handicapped, older Americans and adults generally are demanding that education be available to them and responsive to their needs. The assumption that a student in higher education is someone between the ages of 18 and 22 attending a four-year college full time does not fit the facts. The typical student is no longer young, full-time, just out of high school, a stranger to the world of work, necessarily seeking either a set of skills or an educational credential. And he is no longer overwhelmingly "he."

QUALITY EDUCATION

Another dimension of the new demands on higher education is the renewed emphasis on and commitment to quality education. For example, as *the Chronicle of Higher Education* reported this week: "Colleges and universities across the country—from Stanford and Harvard Universities to

Marist College in Poughkeepsie, New York—are reappraising their undergraduate curricular" A major thrust of this reappraisal is a strengthening of the liberal arts.

As you may know, an intensive review of the undergraduate program is underway at Harvard College. "The basic problem" writes Dean Henry Rosovsky, "is that our students arrive unevenly—sometimes inadequately—prepared; the variation in their intellectual training is significant. I am not at all disturbed by this fact," he continues. "To me it is an inevitable consequence of our openness to a large and heterogeneous society. But we should be disturbed if some of our students graduate with an inadequate education. To ensure that this does not happen, we first need to define a set of standards for undergraduate instruction."

And Dean Rosovsky goes on to describe the process whereby members of the Harvard community are seeking to define those standards.

But the movement to improve the quality of higher education extends beyond revitalizing the core content of the liberal arts curriculum. It also includes a new emphasis on providing students with vocational skills, however broadly or narrowly they are defined. This concern is reflected in the renewed interest in postsecondary vocational education, career education and competency-based education.

Now I am fully aware of the intense and healthy debate in higher education concerning the proper balance in defining educational goals between liberation of the intellect and provision of job skills. In his recent annual report, President Muller of Johns Hopkins made a powerful case for stressing the"value of learning for its own sake." He is right, for if students leave the university with highly marketable skills but few qualities of mind or spirit, higher education will have failed. It is equally clear that if students graduate as refined, cultured and enlightened human beings yet ill-prepared to earn their way in twentieth century America, higher education will also have been found wanting.

ACCOUNTABILITY

The renaissance of commitments to educational quality goes hand in hand with a rising insistence on accountability. Our colleges and universities are being called to account for their prudent and effectiveness in expending public monies. The institutions are being asked to justify to students and their parents their investment of time, energy and money.

FISCAL STRINGENCY

Still another trend with which everyone in this room is familiar is the increasingly stringent financial environment within which higher education exists. The halcyon days of the '60s are long behind us. There is instead a go-slow climate. That federal and state education appropriations, private giving, tuition increases and endowment earnings are all at best only keeping pace with the rate of inflation is a reality of which you scarcely need to be reminded.

PUBLIC SKEPTICISM

Together with the belt tightening in higher education—perhaps, some say a cause of it—is the loss of faith in education. Where supporters of education once needed only to express their needs to receive sympathetic attention, education is now the stepchild whose requests are greeted with skepticism.

The halo surrounding education has in part been dimmed by the crisis of confidence in all our institutions, including Congress. The new questioning is also a reflection of the swiftness with which we criticize our educational system when it has not achieved the impossible task of solving our most difficult problems and being all things to all people.

STATE ROLE

A final trend of potential significance to higher education is the new vigor of the states. Statewide planning for postsecondary education and the rapid growth in state programs of need-based student aid are only two manifestations of a larger role for the states encouraged by Federal policy.

All these trends I have enumerated are shaping the world within which, it seems to me, independent higher education will live for at least the foreseeable future. It is an environment both sobering and challenging and one that, in my view, poses three threats or dangers to independent higher education.

DANGERS TO INDEPENDENT HIGHER EDUCATION

The new demands on higher education, the concern to improve its quality, the cost burden of satisfying mandates for accountability, the lack of adequate funds—all these developments can threaten the continued viability or, at least, vigor of some of our independent colleges and universities.

FISCAL INSTABILITY

Many independent institutions exist on a thin margin between the black and the red. A new round of inflation, cutbacks in government funds, enrollment declines or even an unusually hard winter could tip at least some private institutions into a sea of red ink from which they might not emerge.

It must be noted that the widespread shutdowns of independent colleges which were frequently predicted in the late 60s and first few years of the 70s have not occurred. Indeed, these warnings began to be perceived like cries of "wolf" and when the dire predictions did not come true, the credibility of independent higher education among policy makers was damaged.

But I believe that most of us now realize that private higher education is faced not so much with a sudden cataclysm, a violent death by the guillotine. Rather the danger is a gradual erosion of the quality and uniqueness of independent institutions, a sapping of their vitality by slow starvation. Probably only very few independent institutions will be forced to close their doors, but some colleges and universities that remain open may be only shells of what they once were or could be.

SOCIAL ISOLATION

The second danger to independent higher education is closely related to the first. If private colleges and universities have no choice but increasingly to raise their tuition charges in order to remain solvent and if the tuition gap between the publics and the privates continues to grow, private colleges and universities may become the exclusive preserve of the affluent. The independent sector would continue to exist but it would no longer be able to make its unique contribution to American education—providing students from all circumstances both with a choice of higher education in diverse settings and a variety of educational, philosophical and religious orientations.

REGULATORY BURDEN

There is yet a third threat of which I want to speak. The web of Federal regulations dealing with subjects like affirmative action, elimination of age and sex discrimination, pension reform, equal pay, non-discrimination toward the handicapped, clean air, privacy and occupational health and safety can absorb not only the administrative energies and financial resources of independent colleges and universities, but these regulations also—at least in the eyes of some critics, many of them here in New Orleans today!—threaten in aggregate to erode the independence that characterizes these institutions.

FEDERAL ROLE AND INDEPENDENT HIGHER EDUCATION

Now let me assert, on the basis of my years of experience as a legislator, that there is a consensus in Congress that it is important to the nation that the Federal government provide support to higher education, both public and independent. And, therefore, I believe, there is a Federal responsibility to help alleviate the three threats to the independent sector of higher education which I have identified—fiscal instability, social isolation and loss of independence.

APPROPRIATIONS

The 95th Congress will consider measures on three fronts which can diminish each of these threats. First, appropriations. The Ford budget recommendations for higher education programs for the FY 77 supplemental appropriation and for FY 78 have been sent to Congress. They are, of course, inadequate, indeed in light of the needs of higher education, scandalous.

Within the next week the Carter Administration will be forwarding to Congress its recommended changes in the Ford budgets. I hope that the new Administration will demonstrate greater responsiveness to the needs of our institutions of higher education and of our students by advocating more money for student aid, research, and some of the categorical programs that have too long been unfunded or underfunded. Adequate funds for existing Federal higher education programs, student aid in particular, can make an important contribution not only to providing students with higher educational choice but also to stabilizing the financial condition of the independent sector.

REGULATORY REFORM

Second, after substantial prodding from Congress, the last Administration finally initiated efforts at simplification and rationalization of Federal regulations affecting education. I am confident that these efforts will continue. Secretary of Health, Education, and Welfare Califano has promised to review all existing regulations within the next few months. Regulatory reform, a subject which President Carter also addressed in his first "fireside chat", is, according to Secretary Califano, a "front burner" item.

I find it hard to argue against the intended objectives of the Federal regulations and the legislation which they seek to implement. There is, for example, a clear moral imperative that Federal funds not be used in ways that discriminate against women and minorities, and as an elected official I will vigorously resist any attempt to turn the clock back on our national commitment to equal opportunity.

But there are additional steps that can be taken, other than those already underway in HEW, to minimize what a number of institutions of higher education perceive to be the threat to their financial health and independence posed by Federal regulations. I expect that the House Subcommittee on Postsecondary Education, which is now chaired by Congressman William D. Ford of Michigan, an exceptionally able and effective legislator, will continue vigorous oversight of the regulatory process.

It sems to me that coping with the burden of contradictory and duplicative requirements might be made easier by more clearly focusing responsibility within the executive branch for the regulations. If it is made clear that passing the buck or pointing a finger at a neighboring agency is no longer acceptable, it may be easier to iron out some of the problems. President Carter's directive that all future regulations must be signed by the person who writes them should help

in assuring the accountability of the appropriate Federal officials.

LEGISLATION

The third front on which action is possible is new legislation.

I must candidly report to you that the 95th Congress is unlikely to undertake major legislative initiatives for higher education. The Education Amendments of 1976 were only signed into law on October 12 of last year. This law extends most of the Federal programs for higher education into the 96th Congress, 1979–80. The education authorizing committees, particularly the single Education Subcommittee of the Senate, will be preoccupied in this Congress with the Elementary and Secondary Education Act, which is expiring. Lacking a mandate for action provided by the expiration of the Higher Education Act and with a new Administration, which wants to go slow on major new program initiatives, this is not likely to be the Congress that addresses so fundamental an issue as that of providing more support for independent higher education. Rather the 95th Congress will be the one that tries to obtain enough funds effectively to implement programs already on the statute books and that seeks as well to stimulate reforms in administrative practices that will achieve greater program effectiveness.

This is not, of course, to say that we need no new legislation. There is an unfinished legislative agenda, and one issue on it that must be addressed is what many have referred to as "the tuition gap."

As a Member of Congress who represents the University of Notre Dame, St. Mary's College (Notre Dame), and Bethel and Goshen Colleges, I can tell you that I am very much aware of the competitive disadvantage under which many independent institutions labor.

On the other hand, of course, as the Member of Congress who represents Indiana University at South Bend, Purdue's Westville campus and many students who attend other institutions in the Indiana state university system, I can tell you that many American families are struggling even to find the money to send their children to the most inexpensive public institutions.

As many of you know, there was discussion in the last Congress by some of us on the Education and Labor Committee of ways in which Federal student aid programs might be redesigned in order to achieve a better balance between the goals of student access and choice.

Now this, of course, was a very difficult problem for under certain circumstances the needs of public and independent institutions could be perceived—wrongly, think—to be in conflict.

As you also know, we did not arrive at a solution to the problem. But a Federal student aid policy that will more adequately meet both the needs of all students and the needs of the variety of kinds of institutions remains on the congressional agenda. It certainly remains on my agenda.

I hope that even as Congress considers the future of the Elementary and Secondary Education Act, which as I have said, this Congress must, we shall also during the next two years put our time to good use in laying the groundwork for major improvements in Federal student aid policy when the Higher Education Act next expires.

THE ROLE OF THE INDEPENDENT INSTITUTIONS IN FEDERAL POLICY MAKING

Constructive dialogue

Let me conclude these remarks by offering you some unsolicited advice and admonition. There has, in my view, been too much unproductive sniping and wrangling between the public and the independent sectors of higher education and even among different factions within the independent sector. Of course, I realize that it is not helpful to paper over differences to achieve an unreal common front. Genuine and frank differences of opinion should be aired. But I would hope that you will not dissipate your energies in an internecine guerrilla war in higher education. More equitable and balanced Federal policies to aid independent higher education need not be attained at the expense of others. All of higher education can and should benefit from Federal legislation. Your attention ought to be devoted to the difficult and practical questions of shaping such legislation.

POLICY RESEARCH

Frequently in recent years I have criticized the higher education community for its failure to provide policy makers with thoughtful, reasoned analyses to enable us to deal intelligently with the issues facing higher education. In the case of the Education Amendments of 1972, legislation aimed at helping colleges, universities and students, higher education contributed almost nothing and much of the pick and shovel research as well as the politics had to be performed within Congress. The situation has improved somewhat since 1972, and in the consideration of the Education Amendments of 1976 we received some most helpful data and analyses from, among others, ACE, COFHE and the state loan guarantee agencies.

As Larry Gladieux notes in a forthcoming article in Change magazine:

"The past four years have brought substantial change to the associations. . . . New attitudes and new sensitivity are reflected in higher education's relations with Capitol Hill. Efforts have been made to generate better data to meet the needs of policy-makers. 'One Dupont Circle', home of most of the major higher education associations, is the locus of much new 'policy research.'"

Your own survey of your members' attitudes about Federal policy and the analysis of the results represent another good example of the kinds of information we need. I hope that we can look forward to more of such efforts, and that we can come to expect timely and relevant policy analyses to enlighten us in our legislative efforts.

INVOLVEMENT IN FEDERAL POLICY MAKING

The appropriations process for FY 77 and FY 78 has already begun. The preliminary regulations to implement the Education Amendments of 1976 are scheduled to be published for public comment in mid-February. You should be actively involved in these processes, particularly with respect to the regulation writing. If your voice is not heard you will be lumped in with kindergartens or steel mills, and it will be in large measure your own fault. I would also advise you not to overlook the new Congressional budget process, which is taking an increasing importance in setting spending priorities.

Finally, and more generally, I have perceived a backing away from the political process by many in higher education. There seems to be a fallout shelter mentality; "All the Federal government can do is hurt us, so let's head for the bunkers." Inevitably, the Federal government is going to act in ways that affect you, so you must therefore be invoved for self-protection if for no other reason.

But I believe, too, that the Federal government can be a creative instrument for helping address your needs and problems. It is, after all, your First Amendment right to petition your government for the "redress of grievances." Beyond that you have an obligation to participate as leaders of a vital sector of American higher education.

I hope that you of the National Association of Independent Colleges and Universities will vigorously and effectively exercise your right and your obligation. Independent higher education, all of higher education, the nation, will be the richer for your efforts.

THE 130TH ANNIVERSARY OF THOMAS EDISON

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. MINISH. Mr. Speaker, earlier this month, the Washington Post commemorated the 130th anniversary of the birth of Thomas Alva Edison with a story centering on a former employee's reflections on the great inventor. Mr. Edison, who spent the last 60 years of his life in New Jersey, developed many of his most illustrious ideas in the Garden State.

In order to provide my colleagues and constituents with added insight to Thomas Edison, the man, I submit the Post story for insertion in the CONGRESSIONAL RECORD:

[From the Washington Post, Feb. 11, 1977]

ARLINGTON MAN RECALLS GENIUS INVENTOR EDISON

(By Lynn Darling)

Sitting in his small Crystal City office lined with fading photographs, George E. Stringfellow is miles and years away from West Orange, N.J., where he worked for Thomas Alva Edison during the last eight years of the inventor's life.

The "old man," as his 85-year-old former associate calls him, died in 1931, and today marks the 130th anniversary of Edison's birth. But the years roll back easily for Stringfellow as he recounts the carefully stored stock of anecdotes in the hopes that his stories "will inspire future Edisons."

Glimmers of the man who disdained the title of scientist and called himself a "commercial inventor" show through as Stringfellow, dressed in a blue suit with the diamond pin that identifies him as a past imperial potentate of the Shriners, recalled the first day he met Edison in 1922.

Although Stringfellow had worked in Washington as the manager of the district office of Thomas Edison, Inc., since 1918, he had yet to meet Edison when a call came to report to headquarters in West Orange. "I'd never seen Edison," Stringfellow said. "He was just a name to me."

When he did meet the inventor of the incandescent electric light, Stringfellow recalled, he saw a 73-year-old man "who hadn't shaved in several days, wearing an acid-eaten duster and looking at me with those bright blue eyes of his." The inventor of a thousand modern day necessities "took a squint at me," Stringfellow said, "and I stood at attention." It was then that Edison offered him the job of general sales manager of the storage-battery division.

"I told him I wasn't sure I wanted the position," Stringfellow said. "I said to him, 'Mr. Edison, you fire men quite frequently and at my age (28 at the time) I can't afford to say that I'd been fired by Mr. Edison.'"

Stringfellow thought it over that evening, however, and the next morning, having received assurances of relative job security, he took the position. He remained with Edison, Inc., for 38 years, he said, rising to executive vice president.

Although Stringfellow remembers Edison as having little interest in the financial end of his enterprises, a scrapbook filled with yellowing, handwritten memoranda from the inventor himself testifies to a man who did

not keep his mind solely on test tubes and induction coils.

"Stringfellow," reads one of the memos from 1924, "I have not been under any delusions as to our sales force. Every sales manager we have has been a mental moron and I have kicked for years. I am glad you are changing and letting go the dead beats and are forming a well organized sales force."

Another memo followed quickly when Stringfellow made a decision without consulting Edison on a now unremembered matter. "Stringfellow," reads the hastily scrawled note, "I suggest that as I have about $20 million worth of past experience that a proposal be put to me that has been suggested to ascertain if I know any reason why it shouldn't work, Edison."

Stringfellow knew a hint when he saw one. At the bottom of the note there appears this appendage, followed by Edison's initials: "This is a good idea, and will be done in the future."

The bright young assistant is now an old man himself, and earnestly he spins his stories from the comfort of his office in an elegant 11th floor apartment in Arlington. There are tales of a practical joke played on the inventor when he was working around the clock inventing the phonograph. A breakfast of ham and eggs was ordered around 3 a.m., but the inventor fell asleep before it arrived. His associates, Stringfellow said, substituted a dirty but empty plate for the full one in front of him. When Edison awoke, Stringfellow recalled, Edison looked at the plate, rubbed his stomach, and said, "All right, boys, let's go to work."

In 1928, toward the end of Edison's life, Stringfellow recalled, he asked the inventor to write an article for the company's newsletter. "I'm feeling so bad that my mind refuses to function," came Edison's written reply. "Write what you think it should say and send it over."

Stringfellow realized then, he said that it was "time to extract everything I could from his mind" for use after Edison died. Every Saturday, he said he sent Edison a list of questions to answer for use in future emergencies when the inventor wouldn't be there to answer them in person.

One of the questions Stringfellow asked Edison was to "describe the effects upon the life of the Edison cell (battery) due to the presence of the following impurities." About 40 elements are listed on the sheet still in Stringfellow's possession. The only one to receive the clipped answer of "Don't know" was zirconium.

The answers proved invaluable, Stringfellow recalled six years after Edison death. In 1937, the company received a shipment of iron ore that contained a quantity of nickel for use in storage batteries. Stringfellow went to the vault where he kept the questionnaires and there was the answer: Nickel would cause no harm. If it had, the plant would have had to close temporarily.

WHY HELP BUILD SOVIET OIL AND GAS PRODUCTION?

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. ASHBROOK. Mr. Speaker, the United States is in the midst of a severe energy crisis. Factories have been shut down, schools closed and jobs lost. Unless we are prepared to face a dark future, we urgently need to develop new oil and gas reserves to meet our energy needs.

I find it incredible that at the same time we are suffering an energy crisis, American companies are selling oil and gas production technology and equipment to the Soviet Union. Yet, according to the February 3, Washington Star, this is exactly the case.

Armco Steel Corp. has announced that it will be providing the Soviets with offshore oil and gas production technology. In addition, the $30 million agreement also involves technology and equipment from the Rucker Co. of Oakland, Calif., and Stewart and Stevenson Oiltools Inc. of Houston, Tex.

It simply does not make sense for us to be aiding Soviet oil and gas production when the United States is in such desperate need. It is time to start putting American interests first.

Following is the article from the February 3, Washington Star:

SELLING SOVIETS OIL TECHNOLOGY

HOUSTON.—Armco Steel Corp. yesterday announced agreement to provide the Soviet Union with offshore oil and gas production technology through a subsidiary, Armco International Inc.

Harry Holliday, Armco president, said the $30 million, multi-year agreement also involves technology and equipment from The Rucker Co., Oakland, Calif., and Stewart & Stevenson Oiltools Inc. of Houston.

Holliday said Armco and the other companies would help the Soviet Union modify a manufacturing facility at Volgograd to facilitate production of submersible equipment needed for offshore oil and gas work.

TURKEY HAM RECEIVES RUSTY NAIL AWARD

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. FINDLEY. Mr. Speaker, it is a shame that the U.S. Department of Agriculture has put itself in a position to receive Farm Futures' first "Rusty Nail Award." The Department achieved this ignominy by allowing a turkey product disguised as ham to be sold to the public as "turkey ham." In the hope that Agriculture Department officials will correct this example of untruthful labeling and take care that future labeling decisions which confuse consumers be avoided, I am placing the article in the CONGRESSIONAL RECORD:

THE RUSTY NAIL AWARD: TO USDA FOR CONFUSING CONSUMERS ABOUT TURKEY AND HAM

Farmfutures awards its first "Rusty Nail" to the Agricultural Marketing Service (AMS) of USDA for a recent ruling on meat labeling. And our congratulations to Congressman Paul Findley of Illinois, a ranking member of the House Committee on Agriculture, for smoking them out.

"The Department of Agriculture has ruled that a concoction of pure turkey, which is pressed, tinted and scented to resemble ham, can be foisted on the consumer as turkey-ham when it contains not one morsel of ham," says Findley.

"The wary homemaker would never think of buying a pig in a poke, but what is she to do when Washington says it's legal for purveyors to wrap porkless turkey and label it ham? I think many homemakers seeing an item labeled turkey-ham will assume it's a combination of turkey and ham," Findley explains.

What does it mean to hog farmers? "Ham is more costly than turkey and the consumer has a free choice between these items at the meat counter."

What's the alternative? Findley believes both the turkey and pork industries would be better off with truthful labeling. If the turkey people have a good product, it could be called imitation ham or ham-flavored turkey. "Frankly, I like pressed turkey. I just believe in truth in labeling," Findley concludes. "This ruling that AMS has approved really doesn't meet that standard." Farm Futures agrees.

MOOD MUSIC FOR KOREA PROBE: THE CLANG OF JAILHOUSE DOORS

HON. RICHARD KELLY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. KELLY. Mr. Speaker, the American people are wise to the ways of Congress and to all the congressional variations of the shell game.

They are tired of investigations without prosecutions.

They know that ceaseless, well-financed investigations by Congress often are designed as much to further political careers as they are to shed light, or to call the guilty to answer.

That is the way the game is played.

But the alleged attempts by the Republic of Korea to seduce, buy, and otherwise influence Members of Congress, in discharge of their official duties, are serious matters, which may involve the security of the Nation. This Congress should investigate.

However, the American people also know that the way to identify a sincere effort to clean up any mess is by the sounds of a judge's gavel banging courts to order, and by the clanging of jailhouse doors.

What we do in Congress should in no way impede, delay, or replace enforcement of the law.

I have today introduced a joint resolution calling for immediate and concurrent investigation of the alleged activities of the Government of the Republic of Korea, as designed to influence Members of Congress, by the U.S. Department of Justice and the Federal Bureau of Investigation. It directs the prosecution of any past or present Member of Congress who should be called to account.

If we proceed on two fronts, the American people can be assured they will be informed and that those guilty of violating their trust will be prosecuted rather than merely exposed.

INCENTIVES FOR NATURAL GAS WITHHOLDING?

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. UDALL. Mr. Speaker, I would like to share with my colleagues a letter sent to Attorney General Bell by Ralph Nader, Mark Green, and Gary DeLoss, in which these three gentlemen express concern about our recent natural gas emergency.

An analysis of the energy issues debated on this floor shows that almost all the problems we face are exacerbated by the lack of competition in the petroleum industry. As an old-fashioned advocate of the free market system, I support all efforts—in the Congress, the executive, the judiciary, and by the public—to increase competition in our economic system, particularly in the mighty petroleum sector.

It should also be remembered when considering questions of energy supplies that we are dependent upon the oil and gas industries to provide with much of the data we require to set energy policy—and they often have an incentive to underestimate reserves and overestimate future demand.

CORPORATE ACCOUNTABILITY
RESEARCH GROUP,
Washington, D.C. February 9, 1977.

Hon. GRIFFIN BELL,
Attorney General of the United States, Justice Department, Washington, D.C.

DEAR ATTORNEY GENERAL: We have all heard that there exists a serious natural gas shortage, but no one in the federal government seems able to say why. Other than the severity of an unexpectedly cold winter, there are two possible causes. The integrated, interenergy natural gas firms claim that federal wellhead rate regulation has kept the price down, and with it their incentive to market natural gas interstate. Critics claim that natural gas companies are withholding available supplies in order to increase the pressure for deregulation and harvest the consequently higher prices. If such withholding were done by each firm separately and independently, the companies could be accused of avarice (and perhaps violation of the federal leasing laws), but not an antitrust violation. But if any withholding were jointly agreed on—either due to specific agreement (*United States* v. *Socony Vacuum*, 310 U.S. 150 (1940)) or indirect consensus (*see Interstate Circuit, Inc.* v. *United States*, 306 U.S. 208 (1939), *Federal Trade Commission* v. *Cement Institute*, 333 U.S. 683 (1948))—a violation of Section One of the Sherman Act would be clear.

The alleged natural gas shortage, therefore, does not compel the conclusion that an antitrust conspiracy has occurred. It does, however, permit such a conclusion. Only a Justice Department investigation can determine whether or not natural gas firms are engaged in an antitrust conspiracy to restrain trade in order to boost price. In instances where there is a victim (here, society short of gas) and the suspicion of foul play (an antitrust conspiracy) police investigations look for a) motive, b) opportunity, c) means and d) circumstantial evidence to make out a case. Based on such an analysis, it is our view that sufficient evidence of antitrust wrongdoing exists to justify a detailed investigation by the Antitrust Division:

A. Motive—Natural gas producers who sell in the interstate market today receive prices which reflect rates established by the Federal Power Commission at the time contracts were signed. These contract prices vary from $.20/mcf for gas sold under old contracts to $1.44/mcf for gas sold under the rate for "new" gas set by the FPC in 1976; the average price of interstate sales today is about $.50/mcf. If the gas producers presently selling in the regulated interstate market could eliminate federal regulation, they could sell their gas at the price equivalent of substitute oil products, which would be $2.90/mcf at today's OPEC-influenced price of $.42/gallon of middle distillate oil. If the eleven trillion cubic feet of gas presently sold annually under regulated prices were immediately deregulated and allowed to sell for $2.90/mcf rather than the current average price of $.50/mcf, the gas producers would receive over $26 billion more income annually for the same sales. Even the proposals to phase in deregulation gradually mean immediate gains of billions of dollars per year and merely postpone the larger benefits of total deregulation.

There is also the effect of deregulation on the prices of presently unregulated sales of gas in intrastate markets. If deregulation occurs on the interstate market, gas hungry customers in the major consuming states will bid up the price of gas presently sold only on the intrastate markets to the price equivalent of oil fuel substitutes, the $2.90/mcf described above. The average price of intrastate gas varies from state to state and exact statistics are unavailable, but gas sales at prices up to $2.00/mcf are pulling the average price upward rapidly toward the $1.50 mark. If the nine trillion cubic feet of gas sold annually in intrastate markets were to rise in price from an average of $1.50/mcf to $2.90/mcf, gas producers would receive $13 billion more income for the same sales.

The withholding of natural gas, therefore, could ultimately produce a $39 billion annual return to natural gas firms—which can be a sufficient motive for lawbreaking by those businesspersons who can resist anything except temptation.

B. Opportunity—In theory, there are three forces that could prevent gas producers from illegally withholding supply: government regulation, opportunity costs, and competition. In practice, all three are too weak to present a barrier to withholding of gas.

Government regulation. The Department of Interior has refused to use the leasing system for gas production on federal lands to require expedited production. The Federal Power Commission has refused to require gas producers to deliver gas in the quantities they have contracted with pipelines to deliver.

Opportunity costs. A study by the Library of Congress calculates that gas producers could profitably withhold supply in anticipation of deregulation for up to five years after developing a gas property, even if the regulated price increased at a rate of 30 percent per year.

Competition. Classical economic theory presumes that even if opportunity costs permit one gas producer to withhold production, competing producers would step in to enlarge their market shares by serving the first producer's unsatisfied pipeline customer. This predicted behavior, however, presumes that the gas industry is competitive. Otherwise, producers could withhold supply without fear of losing their market share.

It violates common sense and standard economic theory to argue that the natural gas industry is competitive—the large number of firms in the industry notwithstanding. For purported competitors have developed a web of partnerships (known euphemistically as "joint ventures") which inspire cooperation rather than competition. The major oil and gas producers have extensive partnerships with each other and with smaller companies in lease bidding, exploration, development, production, and pipelines. (See, e.g., The Structure of the U.S. Petroleum Industry, Committee on Interior and Insular Affairs, U.S. Senate (1976); Energy Industry Investigation, Part 1—Joint Ventures, Committee on the Judiciary, U.S. House of Representatives (1976)). In addition to overt partnerships, the boards of directors of the energy companies interlock indirectly, but extensively, through the intermediary boards of directors of major banks and other nonenergy corporations. (See, Keeler and Fritsch, A Citizen's Oil Factbook, Center for Science in the Public Interest (1975)).

Given FPC's and Interior's unwillingness to compel production and delivery of gas and the anticompetitive structure of this industry, the opportunity to withhold natural gas seems clear.

C. Means—The uniquely anticompetitive partnership arrangements in the oil and gas industry not only remove the threat of competitive disadvantage that might discourage withholding, they also provide multiple means for illegal collusive withholding of gas supplies. When partners make joint decisions on lease bidding, exploration, development rates, production rates, and pipeline construction schedules, they can easily choose to delay delivery of gas to the market under the guise of ordinary business decisions. For the more sophisticated conspirators, there is a "phases of the moon" device (see the electrical machinery bid-rigging of the early 1960s), and for the less sophisticated, there is always the telephone.

D. Circumstantial evidence—Rather than listing the large body of evidence already in the public domain, we are attaching the relevant section of the report of Chairman John Moss' House Subcommittee on Oversight and Investigations ("Questions And Answers About The Nature And Cause Of The Natural Gas Shortage," pp. 3–13). It demonstrates, in our view, a level of suspicious activity that justifies a thorough study.

Taken together, there is sufficient motive, opportunity, means, and circumstantial evidence to establish the possibility of a significant antitrust violation, and hence to invoke a Justice Department investigation, focusing primarily on the probability of anticompetitive collusion inherent in the web of partnerships among ostensible competitors in the gas industry. An antitrust investigation is in no way precluded by the Interior Department's investigation of possible violations of its leasing regulations, any more than treating a symptom of an illness precludes efforts to identify and attack the underlying disease. Moreover, the fact that the political power of the energy industry has preserved these partnerships from antitrust actions in the past does not disprove their anticompetitive consequences. Charges and public suspicion will continue until the Justice Department officially establishes the true facts of the situation.

Sincerely yours,

RALPH NADER.
MARK GREEN.
GARRY DELOSS.

LOCAL PUBLIC WORKS CAPITAL DEVELOPMENT AND INVESTMENT ACT OF 1976

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. PURSELL. Mr. Speaker, before authorizing any more funds for another Public Works Capital Development and Investment Act type legislation, I hope my colleagues will take the time to edu-

cate themselves regarding the remarks of Congressman CONABLE and his colleagues during a special order on the House floor January 13, 1977. The following is provided to help facilitate that education:

PUBLIC WORKS EMPLOYMENT
AMOUNT AVAILABLE AND ALLOCATION

Appropriated by legislation, $2 billion.

Taken by EDA to administer the program, $10 billion.

Total available for grants, $1.99 billion pie.

NATIONAL PIE

Sixty-five percent or $1.3 billion: To states according to their share of the unemployed.

Example, Michigan:

Number of unemployed in Michigan divided by the number of unemployed in the nation equals 5.5%, which equals $71.5 million of the $1.3 billion.

Thirty-five percent or $.7 billion: To states having unemployment above the national rate (7.8%) on a basis of how much the states' unemployment exceeded the national rate. Michigan received $86.5 million.

However, all States were guaranteed a minimum of $10 million—which 21 States received—but no more than $250 million—only 1 State received maximum—no matter how the formula worked out.

The project selection system was designed to score and rank projects within each State by 70- to 30-percent categories. These categories were established by the enabling legislation, which required that 70 percent of all funds appropriated under the program be expended for projects in areas with unemployment rates in excess of the national average, and the remaining 30 percent be expended for projects from areas with unemployment rates equal to or below the national average. In the 30-percent category, priority was to be given to those from areas with unemployment rates of 6.5 percent or more.

INPUT FROM APPLICANTS

A total of 22,275 applications were received by EDA seeking nearly $20 billion. Of this, 17,085 applications were received from the 70-percent category seeking $16,231 billion whereas 4,670 applications were received from areas falling in the 30-percent category. Of this 4,670, 3,882 applications of $3.117 billion were in areas having unemployment greater than 6.5 percent while only 788 applications of $563 million were from areas having below 6.5 percent unemployment.

Once each State got its share, that share was divided so that 70 percent of each State's share went to areas having unemployment exceeding 7.5 percent, while 30 percent of each State's share went to areas having unemployment of 6.5 to 7.5 percent.

SCORING: BY STATE

Each project was scored against other projects within the same category. Within each category, the scoring procedure utilized project and area factors believed by EDA to contribute most to achieving an equitable substate distribution of project funds, and insure that the relatively more economically efficient projects—those having maximum impact on unemployment—were selected, that is, those being most labor intensive. A two-prong test, each containing four factors, was used to weigh each project against its competitors:

Total possible=120 points maximum.

TEST A

1. 30 points maximum: Number of unemployed in the project areas, being a logarithmically determined factor taking into consideration severity and duration.

2. 25 points maximum: unemployment rate (%) in the project area.

3. 30 points maximum: labor intensity of the project.

4. 15 points maximum: depending on per capita income of the project area.

TEST B

1. 10 points maximum: if project is of long range benefit.

2. 5 points maximum: if project submitted by unit of local government or school district.

3. 3 points maximum: if project submitted by special purpose district of local government.

4. 5 points maximum: if project related to existing approved local plans and programs.

SECOND DISTRICT OF MICHIGAN: CONSTITUENT RESPONSE

From my district, I received the following types of complaints—from the Board of Commissioners of Wayne, Washtenaw, and Monroe Counties, the City Councils of Ypsilanti, and from the City Manager of Plymouth—regarding the handling of these grants:

1. Certain political sovereigns were lumped in with other unaffiliated political jurisdictions;

2. No feedback was given as to why grants were denied;

3. Projects not having received environmental review were funded while others which were fully cleared were not; and

4. Jurisdictions submitting laundry lists instead of high priority needs were more successful.

FAULTS WITH THE PROCESS

1. High number of 100% funded programs; grants were not made on a basis of need but solely on basis of unemployment. Some factor such as the community's willingness to put up its own funds should have been included.

2. There should have been an adjustment for change in the unemployment rate since the national average increased to 8%, however, those areas with 8–9% unemployment were low on the 70% category totem pole, while areas with 7.3–7.5% were high on the 30% category totem pole.

3. No feedback was given to those jurisdictions denied grants.

4. Test B, factor 1 did not give sufficient support to projects of long range benefit.

NEW LEGISLATION

The above states what was, the following deals with the new legislation upon which we will be voting in the very near future.

First, we have learned that job creation through public works legislation is an expensive proposition. The additional $4 billion will in no way satiate the requests submitted by local government.

Would it not be wiser and more economical for us to let the results of this past fall's legislation sink in before we go priming that same pump. True, the unemployed need attention. However, I feel it would be much wiser to use established programs such as CETA to deliver manpower programs in the interim, thereby allowing sufficient time to analyze the results of the past public works legislation. Instead, we are taking another blind shot.

Second, the removal of the 70–30 State breakdown is another mistake. The 70–30 categories have been deleted and all or nearly all the money authorized will go directly to the large urban cities. I support helping the cities but not at the expense of all others. I believe that the 70–30 breakdown was a mistake, but to remove the whole idea is likewise an error.

Somehow we must surely be able to provide a mechanism in this legislation by which the executive agency can separate the wheat from the chaff in terms of need.

Finally, is it not about time that this Congress begins long-range planning and escape the yoke of crisis management which we have assumed?

DRAFT DODGER PARDON DISGUSTS VETERANS

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. ASHBROOK. Mr. Speaker, President Carter's pardon of draft evaders has sickened many millions of American veterans. Instead of healing the wounds as the President said it would, it has reopened many.

I have received letters from Vietnam veterans who have expressed their disgust at the pardon. One of these is from Jerry Norton, a national board member of Young Americans for Freedom. I wish to share his letter to President Carter with my colleagues. As an aside, I would also like to point out that Jerry has told me that he has yet to receive any reply from the White House.

The text of the letter follows:

ALEXANDRIA, VA.,
January 29, 1977.

President JIMMY CARTER,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: As a Vietnam veteran with a Purple Heart and Army Commendation Medal for Valor, I want you to know that I find your pardons for those who shirked their duty sickening. God help us if Americans are ever called into battle again.

As for your attempt to buy off those of us who did risk our lives—though even that seems aimed primarily at those too young to actually have served in Vietnam—it won't wash. The price of honor isn't that cheap, Mr. President.

You have begun your presidency by alienating millions of Americans. Just as I counted the days waiting for my tour of duty in Vietnam to end, I will now be counting the days until the next presidential election, when it is my fervent hope that you will be replaced.

Most sincerely,

JERRY NORTON.

OIL TANKER SAFETY

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. STUDDS. Mr. Speaker, the recent series of major oil spill incidents has aroused the interest of the Nation and of a great many Members of Congress in the extremely important issues of oil spill liability and oil tanker safety. Many of the components of these problems were spelled out superbly in a recent series of articles by New York Times reporter John Kifner. The following is the first of these articles:

[From the Boston Herald American, Feb. 13, 1977]

RASH OF TANKER MISHAPS STIR UP NATIONAL ANXIETY

(By John Kifner)

NEW YORK.—The wreck of the Argo Merchant, spilling 7.5 million gallons of oil off Nantucket Island last December, and the rash of tanker mishaps that followed, have stirred national concern over oil pollution by the ships flying "flags of convenience" that bring in much of this nation's oil.

Senate hearings are under way and Brock Adams, the new Transportation Secretary, has announced a set of safety rules, which have been long in the making.

But the Coast Guard has had the authority to make and enforce safety regulations since 1972 and has not done so. Possible congressional action includes a bill to fix liability for oil spills and their damages, but similar legislation failed under oil industry pressure last year.

Thus, largely because of the flag of convenience arrangement, shipping has become an industry without effective regulation. The series of accidents is not so much a sudden phenomenon as part of a growing problem, attributable to the increasing imports of oil and the economic organization of the shipping industry, a five-week examination has found.

The examination included interviews with government officials, congressional sources, industry figures, conservationists, fishermen, Coast Guard officers and scientists, as well as the study of governmental, academic and industry reports.

The Argo Merchant—an aged, rusting Liberian-flag tanker of murky ownership, chartered out to an oil company, manned by a polyglot crew and captained by a Greek officer who read his radio direction finder backwards—was not particularly unusual among the fleet that brings oil into the ports along the Atlantic, the examination found.

Central to the situation is the flag of convenience arrangement under which countries like Liberia, a small, West African nation with no natural harbor, yet which in the last 30 years has accumulated the world's largest merchant and tanker fleets, offer shippers freer and more profitable operation.

About a third of the Liberian-flag fleet is owned by American interests.

Defenders of the system, who like to call it a "flag of necessity," contend that it is the only way American shipowners can stay in the competitive market. Its critics contend that the arrangement allows dangerously decrepit and ill-manned ships to ply the seas.

Last year, a record 19 tankers were lost, according to preliminary figures kept by Arthur McKenzie, director of the Tankers Advisory Center in New York. The lost ships' tonnage, 1,129,000 deadweight tons, was nearly 50 percent greater than the losses in 1975, when the previous record was set.

Of the 19 tankers, 11 flew the Liberian flag. Two of the ships were registered in Cyprus, a flag of convenience with even less restriction. Four of the remaining lost tankers were Greek, one was Spanish and one was East German.

McKenzie said he expected the final 1976 figures to show two or three more tankers lost and noted that the first nine months of the year had already set a record before the Argo Merchant had the largest spill in American waters.

The figures indicate the growing dimension of the problem.

The energy-hungry United States is now importing 45 percent of its oil—6.3 million barrels a day, the equivalent of 35 Argo Merchant loads. The imports, already up from 36 percent before the Arab oil embargo in 1973 and 1974, are expected to continue rising.

Of the imported oil 94 percent is brought in aboard foreign flagships, and 40 percent of that in ships of Liberian registry, according to former Secretary of Transportation William I. Coleman Jr.

Amid this flow of traffic, McKenzie told the Senate Commerce Committee, which is looking into the shipping industry, the rash of accidents was "not unexpected" and was "part of an evergrowing phenomenon."

Some of the incidents involving Liberian flag ships were commonplace and relatively harmless groundings. But they also included a major oil spill in the Delaware River, a breakup off Hawaii and an explosion in Los Angeles Harbor that killed 11 sailors.

The severity of the pollution situation is underlined in the fact that the oil spills and wrecks like those that have aroused current concern account for only 10 to 15 percent of the two million tons of oil spilled into the oceans during transit according to a 1975 study by the National Academy of Sciences.

Most of the spills occur in almost routine operating procedures, primarily the flushing tanks near shore, the practice, often done at night, is common.

International regulations calling for segregated ballasts have been approved for all new ships over 70,000 tons. But the rules, drawn up in 1973 but not in effect since not enough countries have ratified them—the United States is among those that have not—would exempt both the existing fleet and new smaller ships of the size that make up four-fifths of those in American waters.

There are technical problems, too. While the industry says it can control spills in seas of up to five feet, this proved of little avail in the seas so heavy they picked up the fenders placed around the Argo Merchant to contain the oil and flipped them onto the deck.

The two major factors involved in ship accidents, according to studies by McKenzie and others, are the age of the ship and human error, which often results from unseamanlike conduct of the crew.

Shippers who operate under the Liberian flag are able to make huge savings by hiring cheaper crews and do not have to meet the stricter safety requirements or undergo the inspections and crew licensing procedures required by the United States and other traditional maritime nations, such a Britain.

The Liberian shippers contend that their safety record is comparable to those of other fleets, noting that between 1964 and 1967 the percentage of their tanker fleet lost—half of 1 percent—was about in the middle of maritime nations. The high was Greece, with 0.76 percent of its tanker fleet lost. The United States record was 0.15 percent.

Because the Liberian fleet was larger, however, the percentages mean that the Liberian registry accounted for the highest number of ships lost, 68. The Greeks lost the next highest, 26. The United States fleet lost nine ships.

Philip J. Loree, the director of the Federation of American Controlled Shipping, an organization of 20 American oil companies and other shippers using the Liberian and Panamanian flags, contended that the ships represented by his group, averaging 100,000 tons, represented a substantial capital investment and were therefore treated carefully.

Similarly, Guy E. C. Maitland, the executive director of the Liberian Shipping Council, an organization of 62 major international shipholders, says that the Liberian flag-fleet includes some of the most modern, largest and best-equipped tankers now in use.

But Robert J. Blackwell, the assistant secretary for maritime affairs of the Maritime Administration, told the Senate Commerce Committee, that while many of the Liberian-flag vessels were modern, "we have never seen that fleet."

For geographic and economic reasons, the ships that bring oil into American ports are, by and large older ones. Since the early 1960s, shipowners have been building bigger and bigger tankers, or Very Large Crude Carriers, as those about 200,000 deadweight tons are known.

But, there are no deepwater ports on the Atlantic and Gulf coasts, and only a few on the West Coast, that can accommodate the draft of these large ships.

Thus, according to a recent study by the Coast Guard, 80 percent of the ships arriving in American ports are under 70,000 deadweight tons.

At the moment, there is a glut of tanker tonnage, which means that oil companies can choose ships offering to work at cheaper rates. And that means older, less well-maintained ships run by marginal operators are often the ones chosen. Further, there are economic pressures to cut costs on the crews or to steer shorter, but more dangerous courses to save time and money.

The wreck of the Argo Merchant, Loree conceded, "highlighted a problem," where, particularly in the shallow waters of the North Atlantic, he said, the economic pressures made for a "kind of Gresham's Law" under which bad ships drove out good.

Studies by McKenzie and others have found that tankers over 10 years old become increasingly subject to metal fatigue, making them more likely to break up.

More important, while the older coastal tankers flying the American flag are subject to Coast Guard inspections, those flying foreign flags have not been. So ships can be put under a Liberian or other flag and kept going for a few more voyages with little incentive to keep up their maintenance.

"Because of the shallow waters and the economics of oil transportation, what you get is smaller tonnage, which is older tonnage," Howard F. Casey, deputy assistant secretary for maritime affairs of the Maritime Administration, said in a telephone interview.

"They were probably registered under another national flag for part of their life, and frequently these are old crocks that have outlived their usefulness," he added.

Human error was a major factor in more than 80 percent of the accidents at sea, according to a National Academy of Sciences study.

The Liberian authorities accept the papers of most other nations in licensing seamen and officers, although few nations accept theirs. A number of accidents involving Liberian-flag ships have been found to involve unqualified men.

The Coast Guard which has defended the safety record of the Liberian-flag ships has come under increasing criticism from members of Congress and environmentalists, who accuse it of foot-dragging in drawing up safe-

ty regulations under the 1972 Ports and Waterways Act.

One area of criticism, for example, has been the Coast Guard's method of drawing up possible regulations for two proposed new tanker safety requirements, double bottoms and segregated ballasts. Every nongovernmental member of the Coast Guard's study group came from the oil or shipping industries. The regulations that were drawn up fit all the ships now under construction.

Recently, Secretary Adams announced a new set of regulations, long in preparation by the Coast Guard, requiring for the first time that ships coming into American waters have such basic equipment as magnetic compasses and radar.

But in the traditionally risky and free-wheeling shipping industry, even the regulations that are in existence are not always effective.

One-way shipping lanes, for example, are voluntary and there have been a number of near collisions of ships in the wrong lane. Tricks are often used, experienced captains say, to load tankers beyond their safety limits.

Thus, it was in this kind of industry that the Argo Merchant, flagged as a dangerous and defective ship, banned from the port of Philadelphia and cited for deficiencies on a recent pilots' report in Panama, had its final rendezvous with a well-marked shoal off Nantucket.

OPPOSITION TO BUDGET-BUSTING RESOLUTION

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. EVANS of Delaware. Mr. Speaker, I rise in opposition to this budget-busting resolution.

The budget resolution before us today marks another acceleration in the dangerous trend of more spending, bigger government and less personal freedom that has plagued our country for too many years, and, I, for one, find it impossible to support such an irresponsible piece of legislation.

This resolution is designed to accommodate the so-called Carter stimulus package. But I seriously question the value of these proposals in stimulating anything except higher inflation through greater Federal spending.

The keystone to the proposal is the $50 tax rebate, costing $9.6 billion. In my judgment, this rebate will, in the majority of cases, be either put in a savings account or used to pay old debts. It will not encourage significant new consumer demand, which is what creates jobs.

The rest of the resolution contains a shopping list of spending programs which far exceeds what even President Carter asked for. The President's requested outlays are nearly doubled, from $1.8 to $3.5 billion, and his requested budget authority is nearly tripled, from $5 to $14.7 billion. Further, most of these extraordinary spending levels are for public works and public service jobs, programs which do not lead to permanent and productive jobs in the private sector for our citizens.

In short, the Budget Committee has taken a poor proposal by the President, and made it even worse.

The Federal Government cannot buy its way to economic prosperity. If our Nation's economy is to grow and prosper, it must be done through the private sector. Government has a responsibility to assist and stimulate the private sector. But it has not the right to replace it.

This resolution continues the philosophy of throwing more and more of the public's money at our problems. That approach has not worked before and it will not work now.

Instead of more spending, we need to encourage our private economy to greater efficiency and greater growth. The best way to do this is to enact major tax reductions.

I support an immediate, 10-percent across-the-board reduction in personal income taxes. By doing so, we will create demand for goods and services, thus creating jobs, and the increase in the tax base will easily offset any revenue loss.

This approach has worked before. In the 1960's, President Kennedy proposed major tax cuts for both individuals and corporations. The Treasury Department then predicted that there would be a revenue loss between 1963 and 1968 of $89 billion. Yet, in reality, during that same time period, there was an actual $54 billion increase in revenues.

More recently, the Congressional Budget Office calculated that a 5-percent tax cut would raise GNP by $42 billion in the fourth quarter of 1977 and $75 billion by the fourth quarter of 1978. That translates into 790,000 and 1,590,000 jobs, respectively.

Federal spending has reached intolerable limits. Recognizing this, even the President has promised a balanced budget by 1980. But I fail to see how increasing the Federal deficit from $50 billion to $70 billion for fiscal year 1977 will move us toward the goal of a balanced budget.

I want to see a balanced Federal budget. I also want an economy built on the private sector and the free enterprise system, instead of on the public sector and greater government control. This resolution moves us in completely the wrong direction, and I urge that it be rejected.

CONCERNED ABOUT PAUL WARNKE NOMINATION

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. DERWINSKI. Mr. Speaker, many Members of the Senate continue to express concern about the choice of Paul Warnke as Director of the Arms Control and Disarmament Agency. Rather than acknowledging those concerns and reconsidering the nomination, President Carter has obviously decided to not only proceed with this decision, but also to pick Mr. Warnke to be chief negotiator in the Strategic Arms Limitation Talks with the Soviet Union. If confirmed, Mr. Warnke will accompany Secretary of State Vance to Moscow for arms discussions next month. Instead of toughening the bargaining position of the United States with the Soviets, I believe that the role of Mr. Warnke on the negotiating team can only weaken the American position. The views publicly stated by Mr. Warnke over the past several years indicate to me that he is not the proper man to serve in either of the capacities designated for him by the President. I hope that the Senate can convince the President to name another individual.

In the case of Mr. Warnke, we have a special situation in that the President has designated him both as head of an agency, and also a chief negotiator. The nomination should be of special concern to the American people and their representatives in Congress.

From the views publicly expressed by Mr. Warnke, I do not believe we should rely upon his judgments on important strategic questions of the day.

In recognizing the clear political advantages to be gained by strategic superiority, the Soviet Union has engaged in a huge buildup in all areas of their military power. Evidently this massive Soviet spending in military hardware has escaped the notice of Mr. Warnke; one must properly question whether he will have the capacity to prevail upon the Soviet leaders to limit their buildup.

The limited data that Mr. Warnke has used for the positions he has taken in recent years deal primarily with the number of warheads the U.S.S.R. and the United States possess, and the funds spent on arms each year.

By merely asserting that the United States has twice as many warheads as do the Soviets, Mr. Warnke feels that he can dismiss other considerations of strategic developments. Evidently it matters not at all to him that while we have frozen our ICBM force and our SLBM force since 1967, the Soviets have expanded their own forces of ICBM's and SLBM's since 1967.

Preoccupation with the warhead figures and the American MIRVing of CIBM's and SLBM's unfortunately obscures the fact that the Soviet lead in delivery vehicles includes a lead in heavy ICBM's which means that they can carry a much larger and devastating warhead.

Through a methodical program of hardening of silos, dispersal of industry, development and deployment of mobile missile launchers, new ABM technology and a large civil defense program, the Soviet Union apparently hopes to sustain any American attack. Such issues must be fully met in any forthcoming SALT negotiations. Mr. Warnke has not demonstrated sufficient awareness of the problems.

Mr. Warnke's main concern with the American strategic effort in recent years has been how to unilaterally end the arms buildup. Believing that strategic superiority is unnecessary Mr. Warnke has opposed nearly every new program that has been proposed in the past decade. He has participated on panels that

have recommended against the development of the B–1 bomber, the Trident submarine, the MX missile, the cruise missile and the MIRVing of existing weapons. He has opposed the development and deployment of nearly every system of defense that could have meaningful bargaining power with the Soviet Union in the SALT negotiations. In addition, he has stated that any new American program would upset the arms balance. Yet, he claims that the strategic balance is not relevant.

He has advocated unilateral restrictions on our military program on the grounds that the weapons are both unnecessary and would only lead to a new round of military development by the Soviet Union. But the facts are that we have not developed any new ICBM's in over a decade; our B–52's are obsolete; and the Trident is the natural replacement for earlier generation submarines.

Apparently the reason that Mr. Warnke has been so concerned about the nature and amount of U.S. defense spending is that he has other purposes in mind for the money. After leaving the Federal Government, Mr. Warnke contributed an article to the October 1968, issue of Washington Monthly entitled, "National Security: Are We Asking the Right Questions?" In the article, he asked whether the then defense budget of $80 billion could possibly be reduced to only $50 billion.

> We need the further political judgment of whether the $30 billion thus freed can be spent on problems of greater risk to our national security and in areas of greater benefit to the over-all quality of American life. (Quoted in the CONGRESSIONAL RECORD, October 28, 1969, p. 31988.)

A year later in his position on the "Truth in Budgeting Task Force," he also took the position that the defense budget should be drastically cut. He claimed that:

> A reduction of an additional $5 billion in this huge defense budget would produce a fund which could substantially contribute to meeting our existing commitments in education, housing, crime control and environmental improvements. (Quoted from CONGRESSIONAL RECORD, February 26, 1970, p. 5000.)

Mr. Warnke overlooks the fact that defense spending has decreased from over one-half of Federal spending in 1960, to less than 30 percent at this time. In order to overlook this fact, Mr. Warnke frames his discussion of defense spending in terms of so-called discretionary outlays of the Federal Government. In his foreign policy article, he refers to calculations of the OMB that "for the 1975 fiscal year, the defense area takes up $57.1 billion"—foreign Policy, page 14. In the same article he uses the charge that the defense budget "consumes over 60 percent of disposable Federal income"—page 25. Through this kind of fiscal juggling, Mr. Warnke shows that his main interest is in reducing military spending. Mr. Warnke is almost in the antimilitary class. I question whether such a man should be the one to negotiate with the Soviet Union on such a vital subject as disarmament.

CONGRESSIONAL PAY RAISES

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. FISH. Mr. Speaker, when Congress created the Commission on Executive, Legislative, and Judicial Salaries in 1967, it did so with the intent of simplifying the process by which salaries for the three branches of the Federal Government could be determined. It was also done with the intention of providing a vehicle by which accurate and complete data could be collected and assimilated to reflect wage comparability of the Federal Government with private industry. I feel the latter has been accomplished, but the system has by no means simplified the process.

A good argument can be made that the salary recommendations for the judicial and executive branches are justified, and in fact long overdue.

With the exception of a 5-percent cost-of-living increase, the salaries of Federal employees—GS–15 to GS–18—have been frozen for 8 years. During this time, salaries in the private sector increased by 70 percent, and the cost of living has increased by 60 percent.

For many years, we have seen our top administrators and managers leaving Government service for private enterprise due to the great discrepancies between salaries in the private sector and in Government.

In 1973, the retirement rate of Government employees above GS–15 was 30 percent compared to 20 percent for those below that level. In this past year, the retirement rate of top Federal executives reached 46 percent while the rate of those below that level remained unchanged. Many agencies are faced not only with the high retirement rates but with the added difficulty of filling vacancies created by these retirements with qualified managers and administrators.

The judicial branch is facing the same difficulty. Federal judges are quitting, and the number of qualified individuals that are willing to accept Federal appointments has declined drastically in recent years.

Mr. Speaker, I do object, however, to the Commission's salary recommendations for the legislative branch. Why do I differentiate between the salary of a Member of Congress and others in the executive and judicial branches? The answer lies both in sound constitutional procedures and in the fact that Members of Congress enjoy more than adequate fringe benefits.

The question of the propriety of Federal legislators voting themselves pay increases is not new. As a matter of fact, it goes back to the earliest period of our history.

In 1789, at the Constitutional Convention, James Madison proposed a set of 12 amendments to the Constitution, among which was an amendment concerning the salaries of Federal legislators:

> No law, varying the compensation for services of the Senators and Representatives, shall take effect until an election of Representatives shall have intervened.

Of Madison's 12 proposed amendments, 10 of them became our Bill of Rights. At that time, Madison argued that—

> There is seeming impropriety in leaving any set of men with control to put their hand into the public coffers, to take out money to put in their pockets; there is seeming indecorum in such power, which leads me to propose a change.

Madison's logic was consistent with the Constitution's prohibition against the President receiving a pay raise during his term of office. Also, today, 36 States have provisions requiring salary increases to take effect in the term following its approval.

It is common knowledge that the taxpayer today supports a Congressman living in Washington, his travel to his district and his expenses outside of Washington, in addition to the costs of running his offices. The important point is that many of these costs, which overshadow his salary, are not afforded to executive and judicial appointees. In addition, with energy costs soaring and the rates of inflation and unemployment still high, the American people cannot be expected to view sympathetically their elected Federal officials receiving a large pay increase.

Mr. Speaker, I would also like to point out that everyone who ran for the U.S. Senate or House of Representatives did so knowing what the salary was. I might also point out that I have not seen a rush by my colleagues to retire due to inadequate income.

If the Congress by silence, does grant itself a pay increase, I strongly recommended in previous testimony that it not become effective until a new Congress is elected, and that it be conditional on adopting a strict Code of Ethics.

In its recommendation to the President, the Commission states specifically that its salary recommendations and its recommendation for a strict Code of Ethics were a package, and that one should not be considered without the other.

Recent opinion surveys show that in 1964, 76 percent of Americans expressed trust in Government; in 1976, this same survey showed that the rate had fallen to 33 percent. We did not need a survey to tell us this. Every time we go home, or read our mail, this point is driven home to us. It is time to show the American people that this is not an accurate appraisal of their Government, and do so by complying with the Commission's recommendations for a strict Code of Ethics. However, we do nothing for them by accepting a raise by silence.

Mr. Speaker, I strongly recommend that the Congress give careful consideration to the legislation introduced by the gentleman from Ohio (Mr. WHALEN) which gets to the heart of the problem of public trust, and the propriety of legislators raising their own pay. The legislation cosponsored by myself and 69 other Members of the House, would effectively correct this problem by requiring all salary increases to take effect in the Congress elected following the increase.

TABLE 18.—ADVANTAGES AND DISADVANTAGES TO THE AVF AND SELECTED ALTERNATIVES TO THE AVF

ACCESSION SYSTEM	POSSIBLE ADVANTAGES	POSSIBLE DISADVANTAGES
The All Volunteer Force	*The All Volunteer Force*	*The All Volunteer Force*
Today's All Volunteer Force, Compensation Levels, and Management.	Has been successful. Politically popular, especially among young people. Has been the catalyst for many beneficial manpower policies summarized by the treatment of manpower as a valuable resource.	Costly—$3 billion in budget cost $300–$400 million in opportunity cost. Army black content becomes higher than population proportion. Only a small portion of society serve in military. Some soldiers who serve may be more motivated by salary than patriotism.
	ALTERNATIVES TO THE AVF	
I. Modified All Volunteer Force	*I. Modified All Volunteer Force*	*I. Modified All Volunteer Force*
An AVF force consisting of significantly reduced quality standards, more women and more blacks.	Lower recruiting and bonus costs. Still retains AVF concept.	Lower quality individuals, because of higher attrition and discipline problems, may actually increase training and accession costs. May have negative impact on Force Readiness.
II. The Draft	*II. The Draft*	*II. The Draft*
The Selective Service System as managed during the 1960's and early 1970's including reduced wages for first-term enlisted personnel.	Save about $3 billion per year (if first-term enlisted pay is reduced). Insure manning of the force. May help solve Reserve manning problem.	Seems politically and practically infeasible to return to the draft in peacetime. Seems politically and practically infeasible to reduce first-term wages to previous level where some servicemen were on welfare. Return to view of manpower as a cheap commodity with the resulting detriment to personnel policies and manpower management.
III. Modified Draft	*III. Modified Draft*	*III. Modified Draft*
The Selective Service as managed during the 1960's and 1970's; however, first time personnel wages not reduced below current level.	Save about $400–$500 milion per year in recruiting costs and bonuses. Insures manning of the force. May help solve Reserve manning problem.	Seems politically infeasible to return to the draft in peacetime. Return to view of manpower as a cheap commodity with the resulting detriment to personnel policies and manpower management. Equity problem—only a few would be drafted.
IV. Universal Military Training	*IV. Universal Military Training*	*IV. Universal Military Training*
All men receive a minimum level of standard military training.	Equitable—everyone is involved. Creates large trained manpower pool for wartime needs. Could solve Reserve manning problem.	High cost of training and enlarged training support base. Much of cost devoted to creation of a large surplus of trained manpower based on projected requirements.
V. Universal Military Service	*V. Universal Military Service*	*V. Universal Military Service*
All men must serve as soldiers for a limited period.	Equitable—everyone is involved. No problems in manning the force. Can reduce recruiting and bonus costs. May help solve Reserve manning problem.	Very high total cost of pay and training for those in program. Creates a large surplus of soldiers based on projected requirements (assuming a reasonable length tour). Stimulate creation of massive support establishment.
VI. Mandatory National Service	*VI. Mandatory National Service*	*VI. Mandatory National Service*
Everyone, men and women youth, must serve two years in national service, i.e., soldiers, peace corps, hospital aides, etc.	Based on Equitable premise—all must serve. Insures manning of the force. May help solve Reserve manning problem. Save about $400–$500 million per year in recruiting costs and bonuses.	Costly—about $50 billion per year assuming minimum wage—about $14 billion per year assuming $100 per month wage level. What would happen to the significant number of young people who might refuse to serve? Would create a gap of youth workers in some locations and may involve competition with private industry. How would DoD be guaranteed of quality accessions since it would be in competition with other Agencies? Discrimination among assignments (peace corps vs. rifleman) creates inequities.
VII. Voluntary National Service	*VII. Voluntary National Service*	*VII. Voluntary National Service*
Individuals may select from jobs or volunteer programs that exist or are made available in public or private sector.	Programs may provide many needed services for the nation. Similar to a national job corps approach—expansion of job opportunities.	Quality individuals choosing military may be affected by competing opportunities. Very high cost in payment of personnel and management of program.

SENATE COMMITTEE MEETINGS SCHEDULED

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure beginning February 21, and until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the right of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, February 24, may be found in the Daily Digest section of today's RECORD.

The schedule follows:

SCHEDULE MEETINGS

FEBRUARY 25

9 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on proposed legislation to amend the Agriculture and Consumer Protection Act of 1973.
Until noon 322 Russell Building

9:30 a.m.
Appropriations
Interior Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior and related activities, to hear Secretary of the Interior Andrus.
1114 Dirksen Building

Human Resources
Subcommittee on the Handicapped
To continue hearings to review programs for handicapped persons.
4232 Dirksen Building

Veterans' Affairs
To hold hearings on the nomination of Joseph Maxwell Cleland, of Georgia, to be Director of Veterans' Affairs.
318 Russell Building

10 a.m.
Appropriations
Subcommittee on HUD-Independent Agencies
To continue hearings on proposed budget estimates for fiscal year 1978, to hear officials of the National Science Foundation and Office of Science and Technology Policy.
1318 Dirksen Building

Appropriations
Subcommittee on State, Justice, Commerce, and Judiciary
To hold hearings on supplemental appropriations for fiscal year 1977 for the Department of Commerce, to hear officials of the Economic Development Administration.
1224 Dirksen Building

Banking, Housing, and Urban Affairs
Subcommittee on Housing and Urban Affairs
To continue hearings on S. 208, the proposed National Mass Transportation Assistance Act.
5302 Dirksen Building

Commerce, Science, and Transportation
Subcommittee on Space and Science
To hold hearings on S. 365, authorizing funds for fiscal year 1978 for the National Aeronautics and Space Administration.
235 Russell Building

11 a.m.
Foreign Relations
Subcommittee on Foreign Assistance
To hold hearings to receive testimony concerning military and economic assistance to Portugal.
4221 Dirksen Building

FEBRUARY 28

9 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

Banking, Housing, and Urban Affairs
Subcommittee on International Finance
To resume hearings on S. 69 and 92, to amend and extend the Export Administration Act, including provisions on anti-boycott and nuclear proliferation.
5302 Dirksen Building

9:30 a.m.
Human Resources
Subcommittee on the Handicapped
To resume hearings to review programs for handicapped persons.
4232 Dirksen Building

10 a.m.
Armed Services
To hear Paul C. Warnke testify and answer questions in behalf of his nomination to serve as Director of ACDA, with the rank of Ambassador.
Room to be announced

Environment and Public Works
To hold hearings to review Presidential budget requests for fiscal year 1978 for the Environmental Protection Agency.
4200 Dirksen Building

Select Small Business
To resume hearings on problems of U.S. supplemental air carriers, including charter regulations, applications for low-cost scheduled service, discriminatory enforcement of CAB rules, and military airlift contract procedures.
6202 Dirksen Building

2 p.m.
Appropriations
Subcommittee on Labor-Health, Education, and Welfare
To hold hearings to receive testimony on proposed supplemental appropriations for the Department of Health, Education, and Welfare, to hear testimony on certain health programs and on special benefits for disabled coal miners.
S-128, Capitol

MARCH 1

9 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

10 a.m.
Commerce, Science and Transportation
Subcommittee on Science and Space
To resume hearings on S. 365, authorizing funds for fiscal year 1978 for the National Aeronautics and Space Administration.
235 Russell Building

Energy and Natural Resources
Subcommittee on Minerals, Materials and Fuels
To resume hearings on S. 7, to establish in the Department of the Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.
3110 Dirksen Building

5 p.m.
Joint Defense Production
Business meeting to discuss committee organization.
Until: 6 p.m. EF-100, Capitol

MARCH 2

9:30 a.m.
Environment and Public Works
To hold hearings to review Presidential budget requests for fiscal year 1978 for the Economic Development Administration and the Appalachian Regional Commission.
4200 Dirksen Building

Human Resources
Subcommittee on the Handicapped
To resume hearings to review programs for handicapped persons.
4232 Dirksen Building

Veterans' Affairs
Business meeting, to discuss committee organization.
412 Russell Building

10 a.m.
Agriculture, Nutrition, and Forestry
Business meeting, to discuss budgetary and other committee business.
Until: Noon 322 Russell Office Building

Banking, Housing and Urban Affairs
To hold hearings on proposed authorizations for major housing and community development programs.
5302 Dirksen Building

Energy and Natural Resources
Subcommittee on Minerals, Materials and Fuels
To continue hearings on S. 7, to establish in the Department of the Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.
3110 Dirksen Building

10:30 a.m.
Judiciary
To hold hearings on the nominations of Wade H. McCree, Jr., of Michigan, to be Solicitor General; Barbara A. Babcock, of California, to be an Assistant Attorney General (Civil Division); Benjamin R. Civiletti, of Maryland, to be an Assistant Attorney General (Criminal Division); Drew S. Days, III, of New York, to be an Assistant Attorney General (Civil Rights Division); Daniel J. Meador, of Virginia, to be an Assistant Attorney General (Office for Improvements in the Administration of Justice); and Patricia M. Wald, of Maryland, to be an Assistant Attorney General (Office of Legislative Affairs).
2228 Dirksen Building

MARCH 3

9 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings and proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

9:30 a.m.
Environment and Public Works
To hold hearings to review Presidential budget requests for fiscal year 1978 for the Fish and Wildlife Service.
4200 Dirksen Building

Small Business
To hold hearings on bills to provide disaster assistance to small businesses (S. 570 and 704).
3302 Dirksen Building

10 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on proposed authorizations for major housing and community development programs.
5302 Dirksen Building

Commerce, Science and Transportation
Subcommittee on Science and Space
To resume hearings on S. 365, authorizing funds for fiscal year 1976 for the National Aeronautics and Space Administration.
235 Russell Building

Energy and Natural Resources
Subcommittee on Minerals, Materials and Fuels
To continue hearing on S. 7, to establish in the Department of the Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.
3110 Dirksen Building

Rules and Administration
Subcommittee on Privileges and Elections
To hold hearings on the proposed fiscal year 1978 authorization for the Federal Election Commission.
301 Russell Building

Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 4

9 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

9:30 a.m.
Environment and Public Works
To hold hearings to review Presidential budget requests for fiscal year 1978 for the Army Corps of Engineers.
4200 Dirksen Building

10 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on proposed authorizations for major housing and community development programs.
5302 Dirksen Building

MARCH 7

9 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

9:30 a.m.
Environment and Public Works
To hold hearings to review Presidential budget requests for fiscal year 1978 for the General Services Administration.
4200 Dirksen Building

10 a.m.
Appropriations
Subcommittee on Military Construction
To resume hearings on proposed budget estimates for fiscal year 1978 for military construction programs.
S-146, Capitol
Commerce, Science and Transportation
Subcommittee on Science and Space
To resume hearings on S. 365, authorizing funds for fiscal year 1978 for the National Aeronautics and Space Administration.
235 Russell Building

MARCH 8

9 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

10 a.m.
Rules and Administration
Subcommittee on Privileges and Elections
To hold hearings on the operation of the Overseas Citizens Voting Rights Act (Public Law 94-203), and S. 703, to improve the administration and the operation of such Act.
301 Russell Building
Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 9

9 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

9:30 a.m.
Environment and Public Works
To hold hearings to review Presidential budget requests for fiscal year 1978 for the Federal Highway Administration.
4200 Dirksen Building
Small Business
To hold hearings to consider the impact of product liability insurance on small businesses, and on S. 527, authorizing the Small Business Administration to furnish reinsurance for property liability insurers for small business concerns which would not otherwise be able to obtain product liability insurance on reasonable terms.
6202 Dirksen Building

10 a.m.
Commerce, Science and Transportation
Subcommittee on Science and Space
To hold closed hearings on S. 365, authorizing funds for fiscal year 1978 for the National Aeronautics and Space Administration.
235 Russell Building
Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 10

9 a.m.
Agriculture. Nutrition, and Forestry
To continue hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

10 a.m.
Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 11

9 a.m.
Agriculture. Nutrition, and Forestry
To continue hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

MARCH 14

9 a.m.
Agriculture. Nutrition, and Forestry
To continue hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

MARCH 15

9 a.m.
Agriculture. Nutrition, and Forestry
To continue hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.
Until: Noon 322 Russell Building

10 a.m.
Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 16

10 a.m.
Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 17

10 a.m.
Select Intelligence
Subcommittee on Budget Authorization
To hold closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 21

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings to inquire into domestic communications common carrier (i.e., telephones, computers, etc.) policies.
235 Russell Building
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

9:30 a.m.
Small Business
To hold hearings to consider the impact of product safety regulations on small businesses.
318 Russell Building

MARCH 22

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings to consider the impact tic communications common carrier (i.e., telephones, computers, etc.) policies.
235 Russell Building
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10 a.m.
Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 23

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings to inquire into domestic communications common carrier (i.e. telephones, computers, etc.) policies.
235 Russell Building
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.
5110 Dirksen Building

10 a.m.
Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 24

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.
5110 Dirksen Building

10 a.m.
Energy and Natural Resources
To hold oversight hearings on the proposal for an international petroleum transshipment port and storage center located in the Palau District, Western Caroline Islands, Trust Territory of the Pacific Islands.
3110 Dirksen Building

MARCH 25

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.
5110 Dirksen Building

MARCH 28

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.
5110 Dirksen Building

MARCH 29

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.
5110 Dirksen Building

10 a.m.
Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

MARCH 30

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.
5110 Dirksen Building

MARCH 31

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.
5110 Dirksen Building

10 a.m.
Foreign Relations
Subcommittee on Oceans and International Environment
To hold hearings on S. Res. 49, expressing the sense of the Senate that the U.S. Government should seek the agreement of other governments to a proposed treaty requiring the preparation of an international environmental impact statement for any major project expected to have significant adverse effect on the physical environment.
4221 Dirksen Building

APRIL 1

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.
5110 Dirksen Building

ALL-VOLUNTEER FORCE—CURRENT STATUS AND PROSPECTS, PART VI

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1977

Mr. STEIGER. Mr. Speaker, the Defense Department officials who put together the transition paper for the Carter administration which I have been inserting over the past week recognized that despite the Volunteer Army's success to date, alternatives to it must be considered for the future.

In the final chapter of the transition document, they discussed seven possible alternatives, listing possible advantages and disadvantages of each. The alternatives include a modified All-Volunteer Force, the draft, a modified draft, universal military training, universal military service, mandatory national service, and voluntary national service.

All these options, like the Volunteer Force itself, have problems of their own. At this point, I cannot foresee a circumstance where it would be preferable to bring an end to the volunteer concept, short of war. As the transition team said, the All-Volunteer Force has been successful to date. I can only emphasize my full agreement with their conclusion that—

Other things being equal, it is preferable to man a military force with volunteers rather than with conscripts.

This concludes the transition report. Its earlier chapters are included in the five RECORDS preceding this one. If the reader has not seen all of these segments, I hope you will go back to the first, which contained the executive summary. That first chapter offers a succinct explanation of how well and why the Volunteer Force is working and why we ought not tamper with it.

The final chapter of "The All-Volunteer Force—Current Status and Prospects" follows:

CHAPTER 8—ALTERNATIVES TO THE AVF

Table 18 presents possible advantages and disadvantages of the AVF and seven alternatives to the AVF. It must be emphasized that this section is intended only as a preliminary and cursory discussion on this important topic.

THE AVF

The AVF to date has been successful. The disadvantages commonly associated with the AVF include high cost, representation, and motivation. The cost of the AVF is primarily a function of pay comparability, a Defense goal which preceded the AVF. Although not all serve their country under an AVF, the AVF is representative of American society. A predominately black Army has not evolved. Finally, the objection that some AVF soldiers serve primarily for money ignores the fact that serving for a competitive salary does not automatically imply poor performance. Other things being equal, it is preferable to man a military force with volunteers rather than with conscripts.

SEVEN ALTERNATIVES TO THE AVF

The modified AVF option (ALT I) would continue the AVF concept but would reduce quality standards significantly below current levels. This quality reduction may allow for major near-term savings in recruiting costs and enlistment bonuses, but since lower quality individuals exhibit higher attrition, one could expect higher long-term accession related costs.

The two draft alternatives (ALT II and III) may result in annual DoD savings of $3 billion and $1½ billion respectively. However, a return to a peacetime draft does not appear to be practically or politically acceptable at this time.

Universal military training and universal military service (ALT IV and V) would create a large pool of trained manpower or soldiers, but these programs would be very costly and would create a large manpower surplus in excess of projected wartime military requirements.

Mandatory and Voluntary National Service (ALT VI and VII) may initially seem attractive and equitable. However, mandatory national service would be a major societal change. It would also be costly—perhaps costing $50 billion annually *—and it would raise other problems such as what to do about those who refuse to serve. Voluntary National Service, which could increase youth employment opportunities, also involves high program costs and could create significant competition with DoD for high quality youth.

---

* This estimate assumes all youth (male and female) are required to serve for a minimum wage. If only men serve, the estimate become $30 billion annually. Source of cost estimates: Unpublished Manuscript, Richard V. Cooper, *Defense Without the Draft*, RAND Corporation, 1976.
